P R E F A C E .

THE progress and development of the United States during the last decade in every part of their economy, have been far beyond all possible anticipation. The greater number of the old States have acquired, through the increase of their population and of every element of prosperity, an entirely new aspect and character, but it is, perhaps, chiefly in the Western States and Territories that progress has been marked in the most striking manner. This vast portion of our country, covering an area of over two millions of square miles, and which, not very long ago, was a wild and almost an unexplored region, has now a population of nearly twenty millions, and produces all our surplus meat and grain, besides one-third of our manufactured products. New settlements have been multiplied and extended with unexampled rapidity, and numerous places, some few years ago humble villages, are now the marts of an extensive trade. As a natural consequence of this marvelous growth, the preparation of the NATIONAL GAZETTEER, with the ambition of making it a standard work, rendered it necessary to go over the whole ground with most careful and thorough investigation, neglecting no source or means of obtaining the newest and most authentic information.

In the endeavor fully to accomplish all this, the editor and publishers have shrunk from no expense nor hesitated at any amount of work. The previous labors of the editor peculiarly fitted him for the gigantic task of giving in a concise form and with entire accuracy, a full description of the geographical condition of the United States, their physical peculiarities and commercial character ; full details of above 75,000 places, including every State and Territory, County, Township, City, Village, Hamlet and Post Office ; of which latter alone, there were 46,893 in 1882.

All these places have received a thorough and exhaustive description, drawn from the most reliable and newest sources ; their position, means of inter-communication, railroads, rivers, canals ; their agricultural, commercial and manufacturing status, history and population, all being accurately given, well defined and lucidly explained for ready comprehension. To accomplish this has required on the part of

the editor and a large staff of experienced and fully qualified assistants, the arduous and unremitting labor of several years. Every document has been scrutinized, every item of information submitted to the most searching examination, and the result will be found, the editor hopes with full confidence, to be a work hitherto unrivaled in extent of valuable information and general accuracy, making it the standard authority on the subjects of its pages.

The sources whence this information has been laboriously drawn are mainly the National Census of 1880, of which the NATIONAL GAZETTEER may be said to be the sequence and full illustration; the Official Postal Guide of 1882; the last Reports of the Secretary of the Treasury, Secretary of the Interior, Commissioner of Agriculture, Commissioner of Education, Commissioner of Indian Affairs, *et cetera*; the Reports of the Chief of the Bureau of Statistics on the Commerce and Navigation of the United States for the fiscal year, 1882; the Report of the Postmaster General of the United States; the Reports of the Director of the Mint, of the Commissioner of Internal Revenue, of the Comptroller of the Currency; the Reports of the Chambers of Commerce and Boards of Trade of all the commercial and manufacturing cities, the general and local gazetteers of former dates; journals of the most intelligent tourists; guide books, railway guides, maps and other works, geographical, geological and statistical, from which appropriate information could be derived. Fresh and very valuable information has also been obtained by way of a voluminous correspondence with postmasters, editors of local papers, and others, to all of whom the editor of the NATIONAL GAZETTEER respectfully acknowledges himself largely indebted.

It would, perhaps, sound pretentious on the editor's part were he to claim *absolute* immunity from errors, which will occur in the most carefully prepared work; but he can truly declare that he has employed his best energies under some peculiar advantages, to the accomplishment of his plans. In all the toil of this arduous and protracted undertaking, he has been much sustained and animated by the hope of rendering a valuable service to the community, and of contributing, in no small degree, to illustrate the prosperity and glory of a people whose advance in all the elements of a free civilization has become the admiration of the World.

A GENERAL VIEW OF THE UNITED STATES.

THE following work professes to exhibit in detail the several parts, even to the most minute, of the American Union, in a view at once geographical, civil, and commercial. But before entering into the description of the multifarious limbs of this vast body, it is necessary briefly to dwell on its topography, institutions, productions, and manufactures.

The United States of America occupy the central part of North America. On the N., from the Atlantic to the Pacific Ocean, it is bounded by the Dominion of Canada, the line of separation at the extreme N. W. being so drawn as to exclude Vancouver's Island, but to include the islands of the San Juan group. On the S. is the Gulf of Mexico, as far as to the mouth of the Rio Bravo del Norte, which constitutes the limit between the republic of Mexico and the United States in that quarter, as far as to the 32d degree of N. latitude, whence it takes a western course until it strikes a branch of the river Gila, which it follows to its entrance into the Rio Colorado, at the head of the Gulf of California. Thence it crosses over Southern California to the Pacific Ocean, at a point ten miles S. of San Diego. The E. and W. boundaries are the Atlantic and Pacific Oceans. The territory embraced within these limits embodies an area of 3,025,600 sq. m. In addition to this, the U. States possess the territory of Alaska, with an area of 577,390 sq. m. This brings the total area up to 3,602,990 sq. m. Alaska being detached, we shall omit it here, and confine our remarks within the limits above mentioned.

The greatest length of this region, from Cape Cod on the Atlantic to the Pacific near the 42d parallel, is 2,650 m., and the greatest breadth, from the N. W. extremity of Minnesota to the southernmost point of Texas, 1,600 m. Its geographical position is eminently fitted for the growth and rapid development of a great and powerful people. Such an extent in latitude must stretch, of course, through very different climates; so that nearly every variety of temperature, and of animal, vegetable, and mineral productions, will be included. And these have actually been found, not, indeed, in all respects, but for by far the greater number, similar to those of Europe and Asia.

With the exception of a small portion of the N. E. coast, the shores of the Atlantic and Gulf are low, while those of the Pacific are mostly bold and rocky. The eastern coast is filled with numerous bays and roadsteads, which present every facility for commercial intercourse with Europe; while the western shores open their harbors and inlets to the rich traffic of Asia and Oceania. The length of coast-line, not including indentations of the land, according to the U. States coast survey, is 5,715 m., viz.: 2,349 m. on the Atlantic, 1,566 on the Gulf of Mexico, and 1,810 on the Pacific. The principal branch of the sea extending into the land are the Chesapeake, Delaware and Massachusetts bays, and Albemarle and Pamlico sounds on the Atlantic coast, and the Bay of San Francisco and the Strait of Fuca on the Pacific coast. The principal bodies of land projecting into the sea are the peninsulas of Florida on the S. E. and Cape Cod on the N. E., both extending into the Atlantic Ocean. Numerous islands are scattered along the various coasts of the U. States, nearly all of which give evidence, both by their geological structure and their position, that they were once a part of the main land, and have been separated from it by a convulsion of nature or by the action of the waters of rivers and of the ocean. The islands of the Atlantic coast, N. of Cape Cod, are mostly high and rocky, being of granite formation. Those S. of Cape Cod on the same coast are generally low and sandy. Long Island, E. of New York, is the largest, and contains an area of 1,682 sq. m. On the Pacific coast the principal islands are the Santa Barbara Islands, which are barren and rocky, but contain several good harbors.

The skeleton of the U. States is represented by two great systems of mountain ranges, the Rocky Mountains in the W. and the Appalachian or Alleghany chain in the E., between which is the extensive and fertile Mississippi valley. The Rocky mountain system is a part of the great American chain which extends from the Arctic Ocean to the most S. point of South America. Its two main chains in the U. States are the Rocky mountains proper, extending through New Mexico, Colorado, Wyoming, and Mon-

тана, and the Sierra Nevada in California, with its extension, the Cascade range in Oregon and Washington Territory. Between these two chains is a plateau, crossed by numerous mountain ranges, which through its center E. and W. is from 4,000 to 5,000 ft. high, falling off toward the N. and S. from that line. The Wahsatch mountains are the most important range of the plateau. They extend S. and S. W. through Utah and S. E. Nevada, and form the E. rim of the Great Basin, the W. rim being the Sierra Nevada. They rise from 4,000 to 6,000 ft. above the plateau, Mt. Nebo being 11,992 ft. high. The Blue mountains in E. Oregon are little known. The most elevated portion of the plateau is between the Wahsatch and Rocky mountains, and embraces the Colorado "parks" and the Laramie plains in Wyoming. The average elevation here is from 7,000 to 9,000 ft., being greatest on the N. edge of the South park, whence there is a gentle decline in either direction. The loftiest portions of the Rocky mountains is in Colorado, where there are many peaks upward of 14,000 ft. high. The Wind River mountains in N. W. Wyoming, and the Bitter Root mountains, forming part of the boundary between Idaho and Montana, are important spurs of this chain. In the Wind River mountains rise the Missouri river, the Green river, forming the main branch of the Colorado of the West, and the Snake, one of the main branches of the Columbia. The Black Hills, on the border of Wyoming and Dakota, may be considered an outlying group of the Rocky mountains. The Sierra Nevada and Cascade mountains run nearly parallel with the Pacific coast, from 100 to 150 m. from it. In the former are several peaks more than 14,000 ft. high, Mt. Whitney (14,887 ft.) being the highest in the U. States. The Coast range is the westernmost of the Rocky mountain system, running through California, Oregon, and Washington territory, at a distance of from 10 to 50 m. from the coast. It averages from 2,000 to 3,000 ft. in height, but a few peaks rise more than twice as high. The Rocky mountain system embraces an area of nearly 1,000,000 sq. m. It is widest between the 36th and 41st parallels, where the breadth is from 800 to 1,000 m. It is lowest along the 32d parallel, where the greatest elevation is not more than 4,000 ft. The Appalachian chain extends S. W. from Canada to Alabama. It includes among other ranges the Green mountains in Vermont, the Catskills in New York, the Blue Ridge in Virginia, the Black mountains in North Carolina, and, as outlying spurs, the White mountains in New Hampshire and the Adirondaeks in New York. The loftiest peak of the chain is the Black Dome in the Black mountains, 6,707 ft. The Atlantic slope, between the Appalachians and the ocean, is in general hilly, with level tracts near the shore, particularly in the south.

The rivers of the U. States may be comprised in four distinct classes. The first consists of innumerable streams, many of them very short, emptying into the great lakes from Superior to Ontario, with which may here, for convenience, be associated the streams emptying into the river St. Lawrence and those running N. into British America. Of the last by far the most important is the Red River of the North, which empties into Lake Winnipeg in Canada. The whole river system thus composed embraces 184,339 sq. m. of the territory of the U. States, lying between the 71st and 104th degrees of lon. W. The second class comprises all those streams which flow eastward or southward to the Atlantic. This division covers the total eastern side of the U. States, extending from 47° 15' to 25° 15' in latitude, and covers an estimated area of 304,538 sq. m. The most important rivers of this division, which embraces more than one-third the population of the U. States, are the Penobscot, Kennebee, Androscoggin, Merrimaek, Connecticut, Hudson, Delaware, Susquehanna, Potomac, Rappahannock, James, Roanoke, Neuse, Cape Fear, Pedee, Santee, Edisto, Savannah, Ogeechee, Altamaha, Saitilla, and St. Johns. The third grand class embraces the Mississippi system, and also the rivers of Western Georgia, Western Florida, Alabama, Mississippi, Louisiana, and Texas, which empty into the Gulf of Mexico. The total area of this division is computed at 1,683,303 sq. m., of which 1,257,545 are drained by the Mississippi and its tributaries, the principal of which are the Missouri, the Ohio, the Arkansas, and the Red. Of the rivers in this class emptying directly into the Gulf, the most important are the Suwanee, Apalachicola, Mobile, Pearl, Sabine, Trinity, Brazos, Colorado (of Texas), Guadalupe, and Nueces, the Rio Grande del Norte forming for a considerable part of its course the southwestern boundary of the U. States. The fourth grand class embraces the Great Interior Basin, without outlet to the sea, between the Rocky mountains and the Sierra Nevada (210,274 sq. m.), and the basins of the Columbia, the Klamath, the Sacramento and San Joaquin, and the Colorado, as well as the tracts drained by smaller streams flowing into the Pacific. The total area is 834,314 sq. m. Few countries in the world contain so many lakes as the U. States, though these are principally confined to the northern portion. Of the five great lakes, as they are called, the largest bodies of fresh water on the globe, with perhaps the exception of the newly discovered and imperfectly known lakes in the interior of Africa, four, viz., Superior, Huron, Erie, and Ontario, lie on the northern border, partly in the U. States and partly in British America, while Lake Michigan is wholly within the territory of the republic. The value of these lakes to the commerce of the U. States can scarcely be over-estimated, as they form, in connection with the St. Lawrence river, a natural outlet for one of the richest grain producing countries in the world. A vessel of six hundred tons burden can be loaded with grain at Chicago and taken to Liverpool, getting around Niagara Falls by the use of the Welland Canal.

Except in the extreme South and on the Pacific coast, the climate of the U. States is characterized by

fickleness and by great difference in temperature between Summer and Winter. Transitions from heat to cold and from cold to heat, to the extent of 30° in a few hours, are common at all seasons, and the alternations from rain to drought are nearly as remarkable. The Summer is marked by intense heat, the thermometer rising sometimes several degrees above 100° F. In the North this extreme is seldom continued for more than a few days at a time, and in the Southern States the heat, though long continued, is seldom so great. In Winter the thermometer often falls below zero in the North, and it has been known, particularly in Minnesota and Dakota, to reach the freezing point of mercury (—40°). The Atlantic States have in general a temperature about 10° more severe than countries of the same latitude in western Europe, while California has a climate as mild as that of Italy. The Northeastern States are subject to chill winds from the Atlantic (and at points along the coast to fogs), especially in the Spring months; and the ice fields of British North America are the cradle of cold blasts which, having no mountain barrier to overcome, sweep over the Northern States upon every considerable rise in the temperature further South. The great lakes mitigate to some extent the temperature of the country surrounding them, and other local features, such as the elevated plains and lofty ranges of the Rocky mountain system, affect the climate of particular parts of the country. The average annual temperature varies from 76° in S. Florida to 36° in N.E. Minnesota. The isothermal lines are irregular, but between the Pacific and the upper Mississippi they have a general tendency toward the North. On the Pacific coast the annual temperature of 52° in lat. 48° corresponds to a like temperature on the Atlantic coast in lat. 41°. Rain is abundant over the greater part of the republic, and pretty equally distributed throughout the year. In the North Atlantic States the fall is more regular than in the coast States S. of Washington, being in the latter more plentiful than in the former, and more frequent in Summer than in Winter. On the Pacific coast the rains are periodical, occurring chiefly in Winter and Spring, and S. of lat. 40° in Autumn also. In the Northern States snow frequently falls to a considerable depth, and in the most northerly portions it does not melt until Spring. It is comparatively rare S. of the Potomac and on the Pacific coast, and when it does occur in these districts it lasts but a short time. The storms of the U. States seem to take their rise in the vast plain which lies immediately to the E. of the Rocky Mountains, and then generally advance in an E.N. easterly direction across the country. The direction has been observed to vary from about due east to north 54° E. When a great storm springs up near the Mississippi, the wind at St. Louis is generally easterly, while throughout New York and Ohio the wind is from the West. Subsequently this easterly wind is felt at Cincinnati, then at Pittsburg, and afterward at New York, while the entire storm is traveling steadily eastward—that is, the easterly wind is propagated from St. Louis to New York in a direction opposite to that in which the wind in the district over which it passes is blowing before its arrival. The rate at which a storm thus travels varies from zero to 44 m. per hour. It generally makes the distance from St. Louis to New York in about 24 hours, and from New York to Newfoundland in another 24 hours. When a storm in North America is stationary, or nearly so, its form—that is the area occupied by it—is nearly circular; but when it travels rapidly, it takes an oval form, with the longest axis at right angles to its onward course. The Winter storms of the U. States are therefore said to move sideways. As rain and snow are produced under circumstances exactly alike, with the exception of temperature, the same storm frequently furnishes snow in the northern part of the U. States and rain in the southern part. After the center of the storm has passed, a west wind springs up at St. Louis, and is felt successively at Cincinnati, Pittsburg, and finally at New York, having been propagated in the same direction as that in which the wind was blowing in the district passed over by the storm before the latter arrived.

The varied physical aspects of the country indicate a corresponding varied vegetation. E. of the Rocky Mountains, a broad and treeless belt, known as "the Plains," separates two very different forest floras, only two species being common to both, neither of them of much importance. E. of the Plains the larger number of species are deciduous, or at least broad-leaved; and the entire region, excepting the prairies of the West, was originally forest-clad. But while deciduous species predominate, there are extensive pine forests from Louisiana to Maine, and some of the coniferous lumber produced has an almost world-wide fame. Along the Appalachians, from New Hampshire to Alabama, a larger number of valuable hard woods occur than is known to any other temperate climate. The Ohio Valley is known commercially for the size and excellence of some of its deciduous trees, notably black walnut, tulip, bass, and ash, while Florida is equally noted for its live-oak. In Southern Florida are many truly tropical forms, interesting to the botanist, but not sufficiently abundant to be of special economic importance. Over the regions W. of the Plains extensive forests occur only on the mountains or near the sea, and when found are essentially of Conifere. Broad-leaved trees occur in this region, sometimes in considerable abundance, particularly in the western and southern portions, but they are usually scattered, and never form an important forest element. Conspicuous among these are the cottonwood along streams, the mesquite of the southern parts, and several species of California and Oregon trees. Among the latter, several oaks, the madroña, laurel, Oregon ash, and the great-leaved maple are of most value, some growing to a great size and being of wondrous beauty. Along the western flanks of the Cascades and Sierra Nevada, and also near the coast from Cape Mendocino northward, are perhaps the heaviest forests on the globe. They are entirely of Conifere. Trees of 200 feet high are in vast abundance; trees 300 feet high and 10 to 15 feet in diameter not being rare. All these figures are often exceeded. W. of the Rocky Mountains many plains and slopes, and even mountains, which are destitute of timber, are nevertheless abundantly and often densely clothed with shrubs.

The U. States is a Federal Republic. Its national existence commenced July 4th, 1776, when the delegates from the 13 original States, in Congress assembled at Philadelphia, declared that "these united colonies are, and of right ought to be, free and independent States." After a 7 years' war with Great Britain, a preliminary treaty of peace was signed in Paris, November 20, 1782, and on the 3d of September, 1783, a definitive treaty was signed at Versailles, by which Great Britain formally acknowledged the U. States to be free, sovereign and independent. In May, 1787, delegates of all the States, except Rhode Island, assembled in general convention at Philadelphia, and after several months of peaceful deliberation agreed upon the plan of government which now forms the Constitution of the U. States. Over a year elapsed before the Constitution, which has secured the prosperity of the nation, and stands as a model for other nations in the pursuit of freedom, received the ratification of a sufficient number of States to give it a political existence, and nearly three years before it received the unanimous ratification of all the

States and thus became, March 4th, 1789, the supreme law of the land. The original 13 States which adopted the Constitution were New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina and Georgia. In 1803, Louisiana was purchased from the French for \$15,000,000. Florida was ceded to the U. States by Spain, in compensation for spoliation on American Commerce, for \$5,000,000. The annexation of Texas in 1845, led to a war with Mexico. By the treaty of peace which followed, Feb. 2d, 1848, Mexico granted to the U. States the line of the Rio Grande as a boundary and also ceded New Mexico and California. The U. States agreed to pay Mexico \$15,000,000, and certain debts due by Mexico to Americans not exceeding in amount \$3,500,000. In 1867, Alaska was purchased of Russia for \$7,200,000. The actual number of States is 38, in addition to which there are 8 Territories with organized government; the District of Columbia, the seat of government, the unorganized Territory of Alaska; and the Indian Territory. These constitute the political divisions of the U. States. The following table shows the date of ratification of the constitution by each of the 13 original States and the date of admission of each of the other States into the Union; the total population, and its division in males and females, white and black, and native and foreign:

STATES.	Date of Admission.	Population, 1880.	Males.	Females.	White.	Black.	Native.	Foreign.

In rapid increase of population (see pages 38 and 39), the U. States has surpassed all other nations. This wonderful progress is in part attributed to natural increase by excess of births over deaths among the native population, but mostly to *immigration*. Still the current of emigration to America during the 170 years of the colonial history was slow and tedious when compared with that which commenced after the war of independence, and especially when the success of American institutions had been tested by the experience of one generation. Since the formation of the government, the U. States has been the principal point of emigration from Europe, owing chiefly to the advantages presented to the laboring classes, who constitute the great bulk of emigrants. From 1783 to 1820, year in which immigration began to be officially recorded, it has been estimated that the whole number of aliens coming to the U. States was about 250,000. The number of foreign-born passengers arriving in the ports of the U. States in 1820 was 8,385, in 1825, 10,199; in 1830, 23,322; in 1835, 45,374; in 1840, 84,066; in 1845, 114,371; in 1850, 369,980; in 1855, 200,877; in 1860, 150,237; in 1865, 247,453; in 1870, 387,203; in 1875, 227,498; in 1880, 457,259; in 1881, 669,431; in 1882, 788,992—immigration during each of the two years last named surpassing that of any previous years in the history of the country. The following table shows the whole number of immigrants, by countries, between 1783 and 1882:

Chief Nationalities.	Number.	Chief Nationalities.	Number.
England.....	1,101,469	Not specified, including the 250,000 arriving before 1820.....	560,250
Ireland.....	3,286,138		
Scotland.....	206,292		
Wales.....	21,749	Total British Islands.....	5,175,898

Chief Nationalities.		Number.	Chief Nationalities.		Number.
Germany and Austria.....		3,661,517	Other countries and not specified.....		405,539
Scandinavia.....		607,277			
France.....		329,243	All Europe.....		10,667,862
Switzerland.....		111,945			
Italy.....		126,552	Asia (eight-tenths Chinese).....		285,487
Holland and Belgium.....		93,449	America (chiefly British America).....		1,040,182
Russia.....		64,068	Africa.....		1,611
Spain and Portugal.....		38,877	Pacific islands and not specified.....		80,182
Poland.....		27,294			
Hungary.....		26,203	Grand total.....		12,075,324

To these might be added many thousand persons who came from Canada, and of whom no record is made. According to the census of 1880, in 31 States and Territories, in the past decade, natural increase has gained upon immigration, while in 12 the reverse is the case; but in the U. States as a whole there is a relative decrease of the foreign element.

THE GOVERNMENT of the U. States is one of limited powers, all authority not delegated to it by the Constitution being reserved to the States severally or to the people. It consists of three branches—the executive, the legislative and the judicial. The executive power is vested in a President, who, with a Vice-President, is elected for a period of four years by a college of electors chosen for that purpose by the people of the several States, each State returning as many electors as it has Senators and representatives in Congress. The electors are chosen by popular vote at an election held every four years on the Tuesday next after the first Monday in November. The electors thus chosen meet in each State on the first Wednesday in December, and cast their votes for President and Vice-President. The certificates of these votes are opened by the president of the Senate on the second Wednesday of February in the presence of the two Houses of Congress, when the votes are counted and the result declared. The official term of the officer declared elected begins on the 4th of March following. In case of the removal, death, resignation or inability of the President, the Vice-President succeeds to his office. When there is no election of President by the people from the fact that no candidate has a majority of the electoral votes, the House of Representatives chooses a President from the three having the highest number of votes, the representatives of each State together casting one vote. The President may be removed on impeachment for high crimes and misdemeanors. He is commander-in-chief of the army and navy, and of the militia of the several States when called into the service of the general government. With the advice of the Senate he has power to make treaties, appoint ambassadors, judges of the Supreme Court, and other public officers of the U. States whose appointment is not otherwise provided for by the Constitution. The President and Vice-President must be native-born citizens, thirty-five years of age, and fourteen years resident within the United States. The President is assisted by a cabinet of seven ministers, called the Secretaries of State, of the Treasury, of the Interior, of War and of the Navy, the Attorney-General and the Post-master-General. These are the heads of the seven executive departments of the government, who are nominated by the President and confirmed by the Senate. Annual reports are made to Congress, through the President, by the chiefs of the departments above named, communicating all important facts respecting the commercial, financial and economic transactions of the whole country at home and abroad. The legislative branch of the government consists of a Congress, composed of a Senate and House of Representatives. The Senate consists of two Senators from each State chosen by the respective legislatures for six years, and the body is so divided as to the times of election that one-third of the whole number goes out of office every two years. The Vice-President of the United States is the president of the Senate *ex-officio*, and the Senate elects a president *pro tempore* to serve in his absence. A Senator must be thirty years of age, nine years a citizen of the United States, and at the time of his election resident within the State for which he is chosen. The House of Representatives is composed of members chosen for two years by the people of each State. They must be twenty-five years of age, and have been citizens of the United States seven years, and at the time of their election resident within the States for which they are chosen. The number of members of this body is determined by law, and they are apportioned among the several States according to their representative population. The number of representatives in Congress and of electoral votes of each State are fixed by the law of 1882, as follows :

STATES.	Representatives.	Electoral votes.	STATES.	Representatives.	Electoral votes.	STATES.	Representatives.	Electoral votes.	STATES.	Representatives.	Electoral votes.
Alabama.....	8	10	Iowa.....	11	13	Missouri.....	13	15	Rhode Island.....	2	4

Congress has power to lay and collect taxes, imposts and excises, which must be uniform in all the

States, to borrow money, to regulate commerce with foreign nations and among the several States, to coin money, to provide for the common defence and general welfare, to declare war, to originate all bills relating to revenue, and to exercise exclusive jurisdiction over the District of Columbia. Congress can make no law for an establishment of religion or for prohibiting the free exercise thereof, or for abridging the freedom of speech or of the press, or the right of the people peaceably to assemble and to petition the government for a redress of grievances. The judicial branch of the government consists of a Supreme Court, with a Chief Justice and eight Associate Justices, Circuit Courts, District Courts, and the Court of Claims. There are also the Supreme Court of the District of Columbia and the Territorial Courts. The Judges of all the Federal Courts are appointed for life by the President, with the consent of the Senate, but they may be removed for cause. Besides these Federal Courts and Judges each State has its own independent Judiciary. The executive power of each organized Territory is vested in a Governor, appointed for four years by the President, with the consent of the Senate. A Secretary is appointed for the same period in the same manner. The Legislative power consists of a Council and House of Representatives, chosen by the people for two years. A delegate to Congress is elected by the people in each Territory for two years, who is entitled to speak in the House, but not to vote. Each individual State has a government for the regulation of local and internal affairs, consisting of a Governor, Senate and House of Representatives. All powers not expressly granted by the Constitution to the Federal Government, nor prohibited by it to the States, are reserved to the States respectively. The form of government in the several States is and must be republican, and substantially the same, differing only in unimportant details of their Constitution, such as the duration of terms of office, the mode of appointing Judges of the several Courts, and the amount of their salaries. The territory of all the States is divided into counties, having in each courts of justice and such local officers as the common interests demand. In many of the States the counties are divided into townships, averaging six or eight miles square, which form important civil districts and corporations. The larger towns are incorporated as cities and boroughs, which have municipal governments.

The Army Department is in charge of a Secretary. The army is mainly employed in keeping up the fortifications on the coast and lakes, in watching the movements of hostile and suspected Indians, and in guarding the Mexican frontier. It is limited by law to 25,000 enlisted men; the term of service is three years. The highest officers consist of a General, a Lieutenant-General, three Major-Generals, six Brigadier-Generals and seven Chiefs of Departments, with the rank of Brigadier-General. The total enlisted force of the army, in 1882, was 23,596 men. There were 120 companies of cavalry, 60 of artillery, and 250 of infantry. One hundred and two signal-stations are maintained for recording meteoric changes and giving warning, for the benefit of commerce and agriculture, of the approach of storms. The protection and improvement of rivers and harbors are directed by the Engineer Department of the Army under authority of Congress. The Arsenals of the U. States are located at Kennebec, Watertown, Springfield, Mass., Alleghany, Watervliet, Fort Monroe, Augusta, Ga., Washington, Pikesville, Frankford, Detroit, Columbus, Indianapolis, St. Louis, Rock Island, and Benicia. The Military Academy is situated at West Point. On graduation the cadets are appointed to second lieutenantcies in the army. By the Constitution, Congress has power to provide for calling forth the militia of the several States to execute the laws of the Union, suppress insurrections, and repel invasions, and also for the organizing, arming and disciplining the militia, and for governing such part of them as may be employed in the service of the States; to the States respectively being reserved the appointment of officers and the authority of training the militia according to the discipline prescribed by Congress. The President is Commander-in-Chief of the militia when called into the actual service of the U. States. The actual expenditures under the War Department for the year 1882 were \$44,889,725.42.

The Navy Department is also a distinct executive branch, headed by a secretary. The naval force on the navy list, in 1882, comprised 140 vessels, 25 of which were mere tugs, with a large number of others entirely useless, and which could not, without a great expenditure of money, be made fit for service. The bad condition of this important arm of the national service, quite unworthy of a great nation, has of late excited public attention to a large extent. The chief officers on the active list are 1 admiral, 1 vice-admiral, 12 rear admirals, 25 commodores, 50 captains and 90 commanders. The amount of appropriations available for the year 1882 was \$14,874,267.55.

Finances. The public debt of the U. States has chiefly accrued in consequence of the civil war. In 1858 it only amounted to \$58,496,837; it reached its maximum in 1866, amounting then to \$2,680,647,869, successively reduced to \$2,480,672,427 in 1870. The following table prepared in the office of the Secretary of the Treasury, shows its rapid and steady reduction in each year from 1871 to 1882, inclusive:

YEARS.	Outstanding Principal.	Accrued Interest.	Cash in the Treasury.	Debt less Cash in the Treasury.
	Dollars.	Dollars.	Dollars.	Dollars.
July 1, 1871.....	2,353,211,332 32	45,036,766 23	106,217,263 65	2,292,030,834 90
1872.....	2,253,251,328 78	41,705,813 27	103,470,798 43	2,191,486,343 62
1873.....	2,234,482,993 20	42,356,652 82	129,020,932 45	2,147,818,713 57
1874.....	2,251,690,468 43	38,939,087 47	147,541,314 74	2,143,088,241 16
1875.....	2,232,284,531 95	38,647,556 19	142,243,361 82	2,128,688,726 32
1876.....	2,180,395,067 15	38,514,004 54	119,469,726 70	2,099,439,344 99
1877.....	2,205,301,392 10	40,882,791 89	186,025,960 73	2,060,158,223 26
1878.....	2,256,205,892 53	36,404,551 37	256,823,612 08	2,035,786,831 82
1879.....	2,245,495,072 04	30,792,351 34	249,080,167 01	2,027,207,256 37
1880.....	2,120,415,370 63	22,845,547 59	201,088,622 88	1,942,172,295 34
1881.....	2,069,013,569 58	20,948,657 75	249,363,415 35	1,840,598,811 98
1882.....	1,918,312,994 03	13,890,986 47	243,289,519 78	1,688,914,460 72

The amount of U. States bonds which are now due and payable at the pleasure of the government are as follows :

Fives continued at three and a half per cent.....	\$155,356,350
Threes.....	259,370,500
Total.....	414,726,850

Those which next become redeemable are the four and a half per cents., which may be paid September 1, 1891.....

Lastly, the four per cents., redeemable July 1, 1907.....	738,929,600
To which add refunding certificates.....	423,750

Making..... 739,353,350

The amount of the funded debt redeemable at any time before September 1, 1891, which will remain unpaid on the 30th of June, 1883, is about \$300,000,000, and upon the following returns of revenues and expenditures for the fiscal year ending June 30, 1882, the whole funded debt now redeemable could be paid before June 30, 1886. This would leave as the surplus for more than five years the amount of \$600,000,000, undisposed of in the Treasury, unless the reduction of taxation on national banks, tobacco, etc., made in 1883, be followed by more important reductions on custom duties. The amount of the loan redeemable in 1891, is only \$250,000,000, and, as has been stated, no other loan becomes redeemable until 1907, so that the annual surplus, supposing it to be only \$75,000,000, will rapidly increase until that date. The amount of the loan of 1907, as already appears, is less than \$740,000,000, so that, were it all redeemable, the whole public debt could be paid from a surplus as great as estimated early in the fiscal year ending June 30, 1894. It has not often occurred in public financial history that embarrassment has arisen through superabundance of revenues. The condition of the country in that respect, illustrates its almost boundless resources, and establishes its credit beyond a question.

The ordinary revenues from all sources for the fiscal year ended June 30, 1882, were :

From customs.....	\$220,410,730	25
From internal revenue.....	146,497,595	45
From sales of public lands.....	4,753,140	37
From tax on circulation and deposits of national banks.....	8,956,794	45
From repayment of interest by Pacific Railway Companies.....	840,554	37
From sinking-fund for Pacific Railway Companies.....	796,271	42
From customs fees, fines, penalties, etc.....	1,343,348	00
From fees—consular, letters-patent and lands.....	2,638,990	97
From proceeds of sales of government property.....	314,959	85
Paid in from profits on coinage, bullion deposits and assays.....	4,116,693	73
From Indian trust funds.....	5,705,243	22
From deposits by individuals for surveying public lands.....	2,052,306	36
From revenues of the District of Columbia.....	1,715,176	41
From miscellaneous sources.....	3,383,445	43
Total ordinary receipts.....	\$403,525,250	28

The ordinary expenditures for the same period were :

For civil expenses.....	\$18,042,386	42
For foreign intercourse.....	1,307,583	19
For Indians.....	9,736,747	40
For pensions.....	61,345,193	95
For the military establishment, including river and harbor improvements and arsenals.....	43,570,494	19
For the naval establishment, including vessels, machinery and improvements at navy-yards.....	15,032,046	26
For miscellaneous expenditures, including public buildings, light-houses and collecting the revenue.....	34,539,237	50
For expenditures on account of the District of Columbia.....	3,330,543	87
For interest on the public debt.....	71,077,206	79
Total ordinary expenditures.....	\$257,981,439	57

Leaving a surplus revenue of.....\$145,543,810 71
Which, with an amount drawn from the cash balance in the Treasury, of..... 20,737,694 84

Making.....\$166,281,505 55

Was applied to the redemption of the public debt.

The total amount of the circulating medium of the country at the beginning of 1883, is given as follows :

Treasury notes outstanding.....	\$346,681,016
National bank notes outstanding.....	362,727,747
Gold in the Treasury, less certificates held by the banks.....	148,435,473
Standard silver dollars in the Treasury.....	92,414,977
Subsidiary silver coin and silver bullion in the Treasury.....	30,761,985
Coin in the national banks.....	102,362,063
Coin in State and savings banks.....	17,892,500
Estimated amount of coin held by the people.....	387,562,793
Total.....	\$1,488,838,554

The *Post-Office Department* is under the direction of the Postmaster-General. No other nation has a post-office system so extensive as that of the U. States. In 1882 there was in operation 11,098 mail routes (of which 11,013 were upon railways), aggregating in length 343,618 miles. The entire cost of the postal service for the year stated was \$40,482,021, and the gross revenues were \$41,876,410, leaving a net surplus of \$1,394,789. The total number of post-offices in operation in 1870 was 28,492, increased to 46,231 in 1882—all given in the present work.

EDUCATION. There is no national system of education in the U. States, and the general government exercises no control over the common schools and makes no regular provision for their support, but Congress has from time to time made liberal provision for educational purposes by grants of land to the several States. The only educational institutions which are wholly supported and controlled by the government are the military academy at West Point, N. Y., the school of artillery at Fortress Monroe, Va., and the naval academy at Annapolis, Md. The general government has from time to time encouraged the establishment of common schools in the new States by large grants of land, and by the same means has provided for higher institutions by the endowment of a college in each State for instruction in agriculture and mechanic arts. The organization and control of these institutions is given to the respective States, and many of them are now in operation. For these institutions and for common schools, more than 75,000,000 acres of land have been appropriated by the government. The expenditures for public schools in the several States and Territories for the year 1882 amounted to \$84,913,834.

RAILROADS. The first railroad in America was built in 1826; it was a tram-road of 4 miles, used for the transportation of granite to the harbor of Boston. Another tram-road of 4 miles was built in 1827, for the transportation of coal from the pit's mouth, near Mauch Chunk to the Lehigh Canal. In 1828 the attempt was first made to construct a railroad adapted alike to the transportation of passengers and freight. The Erie Canal had cut off the trade which Philadelphia and Baltimore had hitherto received from the West; and as the project of a canal from the city of Baltimore to the Ohio was regarded by many as impracticable, the merchants of that city, in 1827, procured the charter of the present Baltimore and Ohio Railroad. On the 4th of July, 1828, its construction was begun, and on the 2d day of May, 1830, the first section of 15 miles, to Ellicott's Mills, was opened. Like all others constructed at that time, it was an unsubstantial structure, with longitudinal sills, on which was placed a thin bar or strap of iron. Although locomotive engines had obtained some use in England, this road continued for nearly a year after its opening to be operated by horse power. The first locomotive ever used in the U. States, was one imported from England in 1829, constructed at Stourbridge, and called the "Stourbridge Lion." This engine was imported for use upon the Carbondale and Honesdale Railroad, belonging to the Delaware and Hudson Canal Company, and extending from their canal toward the mines. The first experimental trip was made by it on the 8th of August, 1829. The Stourbridge Lion was found too heavy for the track, and it consequently had to be abandoned. The first locomotive built in the U. States, and the second ever in use in it, was made at the West Point Foundry Works in New York, in 1830. It was called "The Best Friend of Charleston," having been built for use on the South Carolina Railroad, then in process of construction. It was placed on the road Nov. 2, 1830. It has been already referred to the Baltimore and Ohio Railroad, which preceded all others in point of time. The next important one was the South Carolina, begun in 1830, and opened for traffic in 1833 for its whole length (135 m.). At that time it was the longest continuous line of railroad in the world. The construction of the Mohawk and Hudson, now a part of the New York Central, was begun in 1830. It was opened (17 m.) in 1831. In New Jersey, that portion of the Camden and Amboy extending from Bordentown to Hightstown (14 m.) was opened on the 22d of December, 1830, and between Hightstown and South Amboy (47½ m.) in 1834. In Pennsylvania, a considerable extent of line for the transportation of coal had been constructed previous to 1835. In 1834 the Philadelphia and Columbia (82 m.) and the portage Railroad (36 m.), were opened. Their completion gave that State a continuous line, made up of canal and railroads, from Philadelphia to the Ohio R. at Pittsburg. In Massachusetts, in 1825, the Boston and Worcester Railroad (44 m.), the Boston and Providence (41 m.), and the Boston and Lowell (26 m.), were all opened for business. The total extent of mileage in operation in all the States at the close of the year 1835 was 1,098 m. The superstructure of the railroads first constructed was a longitudinal sill, the rail or strap of iron laid upon it, serving to prevent the abrasion of the wood rather than to support the train. Of course, until the wooden sill gave place to the heavy iron rail, no considerable rate of speed or amount of traffic was possible. The change from wood to iron was a very gradual one. It was not until 1850 that the longitudinal sill and flat rail were entirely removed from the Utica and Schenectady, the most important link in the New York Central line. The Erie and the Hudson River Railroads were opened in 1851. The first line of railroads undertaken in the great interior basin of the country was the Mad River of Ohio, now a part of the Cincinnati, Sandusky and Cleveland. The Mississippi River was reached in 1854 by the Chicago & Rock Island Railroad, and the Missouri in 1859 by the Hannibal & St. Joseph. Their extension was followed in 1866 by a line through Iowa, an extension of the Galena & Chicago to Council Bluffs, and to a connection at that point with the Union Pacific. That great work was opened May 10, 1869, and, in connection with the Central Pacific, completed the grand line of railway, the

crowning achievement of our people, from ocean to ocean. The great trunk lines being put in, they were speedily connected by other lines, so as now to form a net-work whose meshes are so numerous as to give every farmer in the West a market at its own door. The table on pages 36 and 37, shows the mileage, capital, cost and revenue of all the railroads in the U. States in 1880.

MINERAL AND METALLIC PRODUCTS. There is scarcely a metal or mineral used in the arts or known to science which may not be found in the U. States, chiefly West of the Rocky Mountains, and generally in greater abundance than in any other country. Scarcely any precious stones, however, have been found. A single diamond has been discovered in Rutherford county, North Carolina, and it is said that some of these gems have been found in California. Topaz occurs at Monroe in Connecticut, chalcedony in many localities, and agates and carnelians are numerous along the banks of the Upper Mississippi and the shores of Lake Superior. The more valuable precious stones, however, the ruby, the emerald, etc., have not yet been found.

Gold and Silver. Gold has been obtained for many years from a metalliferous belt which extends along the eastern base of the Alleghanies from Northern New England to Georgia, the southern portion being the most productive. Native gold began to appear in the mint at Philadelphia in 1824, and the receipts increased rapidly, so that in a few years it constituted the principal supply of this metal. The value of the gold mined annually in Virginia, North and South Carolina and Georgia, averaged about \$1,000,000; but when the discovery of gold in California in 1848 was announced, most of the "placer" deposits and many of the veins in the South were abandoned. The California gold-field extends almost continuously over seven degrees of latitude, and in no portion of this territory have mines been completely exhausted. Nevada and Colorado are scarcely second to California in their mineral wealth, and the Nevada silver mines are particularly of extraordinary richness. Chains of silver mines are found also in Arizona, Idaho, New Mexico, Utah, Montana and Wyoming. Gold is also found in these territories, and in Oregon, Washington and Alaska. The discovery of gold in California and other regions west of the Rocky Mts., led to great activity in mining industry, the effects of which have been felt not only in the U. States, but in all the world. There are thousands of mines scattered over an area embracing more than half the territory of the U. States, each yielding annually more or less gold and silver. Complete statistics of the aggregate production of all these mines are secured with difficulty. The following is the estimated production of the different States and Territories, as given by the director of the mint in his report for the year ending June 30, 1880.

Coal. The coal-beds of the U. States are more extensive than those of any other part of the world. The coal is of two kinds, viz., *anthracite* and *bituminous*. The extent of the coal-fields has been estimated at 291,485 sq. m. as certain, with the strong probability of the existence of 333,000 sq. m. in addition in the West. If we admit the correctness of this last estimate—and judging by previous experience, it will be exceeded rather than diminished by the reality—the coal-fields of the U. States cover the immense area of 624,485 sq. m., or more than one-third of the largest estimate made for the coal-producing fields of the whole world. The 291,485 sq. m., which are regarded as certain, are thus divided: New England anthracite field, in Vt. and Mass., 500 sq. m.; Pa. anthracite fields, 470; Southern Jurassic coal-fields (in Va. and N.C.), 220; Alleghany coal-field (extending from Lake Erie to Tuscaloosa, Ala., and occupying portions of Pa., O., Va., W.Va., Ky., Tenn., Ga. and Ala.), 53,895; Central coal-field (extending through Ind., Ill. and Ky.), 40,000; Northern coal-field, 13,000; Western coal-field (outside the Permian), 134,000; Rocky Mountain and far west Tertiary coals, 50,000. When this area is compared with that of the productive coal-fields of the rest of the world, it gives a result very flattering to this country until the amount produced is examined. The productive coal region of the U. States is, as given above, nearly 300,000 sq. m. in extent, while that of other countries is less than 100,000—so far, that is, as is certainly known; but the annual production of coal in the U. States is less than 80,000,000 tons, while Great Britain alone, with a coal-field covering only 9,000 sq. m., produces annually more than 100,000,000 tons. The following table exhibits the quantity (in tons of 2,240 pounds) of coal produced in the U. States during the years 1870, 1880 and 1881.

Iron. The leading State in the possession of iron ore is Missouri. Iron Mountain is thought to be the largest single deposit of ore in the known world. The ores of Pilot Knob, Shepherd Mountain, Cedar Hill and Buford Mountain are next in interest. The Iron Mountain ore may be taken as a type of all the Missouri specular ores. It is nearly pure peroxide, containing abt. 70 per cent. of metallic ore, and is nearly free from mechanical admixture of foreign matter; color, bluish black to steel gray. Unfortunately, Mo. does not possess the large coal-fields of some regions, but the coal found in Illinois is now successfully coked and furnishes good fuel for blast-furnace purposes. Michigan contains the "Lake Superior Iron Region," which, though probably not so rich as the deposits in Mo., is being more extensively worked and is giving a larger annual yield. New York has been celebrated for the variety and quality of various ores, but especially for the magnetic ores of the Lake Champlain region, which have supplied not only her own furnaces, but those of other States, and have furnished to all the rolling-mills east of the Alleghanies the requisite materials for fettling or lining the plates of the puddling furnaces. Pennsylvania has been frequently spoken of as the greatest iron-producing State of the Union, and in figures of iron manufacture she is pre-eminent; but this is due rather to the wealth in fuel of this State and to the patient industry of her people than to any mineral abundance. Indeed, there is scarcely one of the States noted for iron ores which does not surpass Pa. in ore wealth, and, be it added, not one of them that has made the use of what she possesses far Pa. has. In magnetic ores New York, New Jersey, Virginia, North Carolina, Missouri and Michigan far surpass her. Massachusetts, Vermont, Virginia and Tennessee far exceed her in brown hematites. The fossiliferous ores of Pa. are not to be mentioned with those of Alabama; the carbonates cannot compare with those of Ohio, Kentucky and West Virginia; and yet Pa. made 50 per cent. in 1870 and 49 per cent. in 1880 of the total product of pig-iron. It has been patient industry, hard work, frugality and plenty of coal that have made Pa. the great iron-making State that she is. The relative rank of all the States and Territories engaged in the production of iron and steel in 1880 is given in the following table:

A GENERAL VIEW OF THE UNITED STATES.

Copper. The leading copper mines in the U. States are those of Michigan, on the southern shore of Lake Superior. The mines were worked in some places by the predecessors of the Indians on this continent. A large mass of ore, detached, and some stone tools were found by the first white visitors to one of the mines, and these were not left there by the Indians, who were ignorant of the art of mining. The working of these mines by white people began in 1845, and it is stated that between that time and 1868, the total value of the production of this region was \$51,292,500. From that time there has been a marked increase in the production. For the year 1880 the products of copper mining in the U. States amounted to 1,065,955 tons of ore or rock, producing 50,655,140 pounds of ingots, worth \$8,842,961. Of this product the Lake Superior region furnished 90.48 per cent., and the balance came, in order of importance, from Vermont, North Carolina, Missouri, Maine, Pennsylvania, Maryland and Wisconsin.

Lead is chiefly mined in Missouri, Illinois and Iowa; *Zinc* and *Nickel* in Pennsylvania, and *Quick-silver* exclusively in California (see the names of these States).

Petroleum is chiefly found in Pennsylvania, Ohio, West Virginia and New York. The product of this valuable commodity in large quantities is a business of relatively recent origin and growth. The ancient method of obtaining it is thus given by Eaton "A point was selected where the oil appeared to bubble up most freely, when a pit was excavated to the depth of two or three feet. Sometimes this pit was rudely walled up, sometimes not. Sometimes it was near the edge of the water, on the bank of the stream, sometimes in the bed of the stream itself, advantage being taken of a time of low water. In these pits the oil and water would collect together until a stratum of the former would form upon the surface of the latter, when a coarse blanket or piece of flannel was thrown in. This blanket soon became saturated with oil, but rejected the water. The blanket was then taken out, wrung into a tub or barrel, and the operation was repeated. The product was figuratively "a drug in the market," and literally was used only as a drug. In 1854, several barrels of petroleum were sent to Prof. Silliman, of Yale College, for analysis. He made a report which Eveleth & Blissel (who had purchased the "territory" where the principal oil springs were found), published in 1855. In this year the first oil company, "The Pennsylvania Rock Oil Company" was organized, with Prof. Silliman as president. Until 1857, oil was obtained by digging pits and ditches and pumping the oil and water into vats. The substitution of artesian wells for this tedious process was then decided upon. The first efforts were unsuccessful, but Col. E. L. Drake, who acted as agent and superintendent, was unremitting in his attempts, and on the 28th of August, 1859, the first oil well in America was struck, near Titusville, Pa. It yielded ten barrels per day with a hand-pump, and when a larger pump, worked by an engine, was attached, the yield rose to forty barrels. As oil was then worth one dollar per gallon, or forty dollars per barrel, this yield was of considerable value. Speculators were attracted, other wells were bored, and many were for a while "flowing wells." One well yielded for a time more than 3,000 barrels per day: and in this case and others the oil came up more rapidly than it could be provided for, so that much of it ran away and wasted. The "oil excitement" culminated in 1864-5, when 1,100 companies were formed, with a nominal aggregate capital of \$600,000,000, though only about 15 per cent. of this amount, or \$90,000,000, was really paid in, and even this sum so far exceeded the quantity of capital required that some of it received but a poor return. Since that time, though local "excitements" occasionally occur, the oil business has settled down upon a comparatively legitimate and solid basis. The use of powerful "torpedoes" (the main ingredient in the explosive material of which is nitro-glycerine), has greatly improved the chances of obtaining oil and of retaining the productive power of a well. These valuable auxiliaries are put down into the wells and exploded. The result frequently being the tapping of hitherto inaccessible deposits of oil. The price of crude oil is more susceptible to unexpected and violent fluctuations than that of any other commodity in which there are extensive speculative dealings. It requires but a little reflection upon the relative positions of the wheat, cotton, corn, pork, and the petroleum "crops"—so to speak—to note differences between that last-named and those remaining. Of the four commodities first mentioned it is easily perceived that what may be called their statistical positions are sooner or later determined within a fair approximation to the actual outcome, and this, prior to the crop in mind having all come "in sight." The counties in which cotton, wheat and corn are raised in excess of consumptive demands are known, and the surplus shipped for a series of years is a matter of record. A careful report by counties as to the increased acreage in each county affords a basis of reliable estimate as to the forthcoming harvest, subject, of course, to modifying influences, such as the weather, insects, drouth, flood, etc. The prospects of the corn crop exercise an important influence on the character if not the number of hogs to come into market, and the weekly receipts of hogs and packing returns, compared with those of preceding years, afford a fair check on reports concerning livestock in farmers' hands. In these and kindred ways are the statistical positions of wheat, corn, cotton and hog products kept well in hand. When causes arise tending to change the outlook they are generally of such a nature that they may be seen and read of all men, and the consequent variations in current quotations are often anticipated and very readily taken advantage of. When an analysis of the petroleum situation is attempted like results are not found. The statistical position of petroleum has ever been and still remains in part problematical. Unlike the other "crops" named, it furnishes a harvest daily instead of annually. The reports of operations in the producing regions are compiled by one of the Pennsylvania exchanges and are published monthly. These relate to the number of wells completed, the number of rigs up and building, the total new production of oil in barrels and gross, and the average new production in barrels daily. These figures, with comparative data from the month preceding, or the corresponding month one year ago, affords certain gauges of production. In addition, however, there are the statistics of stocks on hand and quantities received and shipped out of the region from month to month, the number of barrels in stock against which certificates have been issued, the prospect of new wells, their rate of production, etc., which are in many particulars speculative. As an instance of this, the information has from time to time been given out on the various petroleum exchanges that such or such a new well is flowing at the rate of 2,400 barrels daily. This may be in one sense true, but the statement is manifestly put in that shape to affect prices, for the probabilities are that the well only spouted 100 barrels for one hour, and was then plugged to prevent the possibility of early exhaustion, and that the owners might take advantage of the market which they knew would be offered them on the announcement of a 2,400-barrel well. They sell thousands of barrels of oil short through a cipher dispatch to brokers at Oil City, Bradford, Philadelphia,

or New York, and immediately forward the news of a 2,400-barrel well. This breaks prices perhaps 7c. or 8c. a barrel, and they close out the deal at a handsome profit. The current reports attest that the average daily production of oil is about 56,000 barrels. The total stocks, including that held by pipe line companies and stocks at wells, cannot be less than 36,000,000 barrels. The average daily consumption is conceded to be but little less than the production. If it was equal to it and the region should suddenly become exhausted there is oil enough above ground to last nearly two years. Yet, with a small daily excess of production over consumption, the announcement that a new well has "come in" flowing at the rate of 1,800 barrels, "which may extend the oil-bearing territory 500 feet further north," will knock prices down 7c. a barrel, reducing the nominal value of stocks of crude over \$2,500,000 within twenty-four hours. The importance of knowing the exact quantity of oil in stock in the hands of the pipe line companies has been recognized by the movement at Harrisburg to provide State inspectors to gauge the oil in tank in the region at regular intervals and report thereon. Considering the magnitude of speculative transactions in crude petroleum, and the fact that these dealings are dependent on the venturesome outsider, it would seem as if some movement for comprehensive and reliable data, weekly, from a recognized responsible source had become a necessity. (For production and exports of petroleum from 1864 to 1882, see page 40.)

AGRICULTURE. The agricultural advantages of the United States are not surpassed by those of any other country on the globe. The fertile soil, the favorable climate, the abundant and equable rainfall, and the great range of latitude, render the eastern half of the U. States, in the quantity, variety and value of its agricultural productions, the richest large section of the earth inhabited by a single nation. Every variety of soil may be found, from the dry and almost sterile plains of the Great Basin to the rich alluviums of the Mississippi valley and the borders of its tributaries. That portion of the country drained by the rivers and lakes of which the St. Lawrence is the outlet to the ocean, including parts of Vermont, New York, Pennsylvania, Ohio, Indiana, Illinois, Wisconsin and Minnesota, and all of Michigan, is an elevated and fertile plain, and generally well supplied with wood. The Atlantic slope embraces all New England, except a part of Vermont, and a portion of all the States bordering on the Atlantic and the Gulf of Mexico. The northeast portion of this division is hilly, and the greater portion of it better adapted to grazing than tillage, though many parts of it are fertile and among the most carefully cultivated land in the country. Some parts of the coast belt are sandy, though capable of being made highly productive; other portions are swampy, with considerable tracts of rich alluvial soil. The inland slope from the mountains towards the coast has some of the finest land in the U. States, with rich soil of alluvium from the mountains and the decomposition of rocks which underlie the surface. The long and broad valley of the Mississippi, embraces nearly two-fifths of the area of the U. States, extending from the Alleghany to the Rocky Mountains, and from the Gulf of Mexico to the British possessions on the north. Much of this territory is prairie of unequaled fertility, the soil being a black mould, in many places several feet in depth. At the base of the Rocky Mountains is a plateau, which is a part of this great valley, from 200 to 400 miles wide, which is in a great degree sterile, owing to insufficient rain and want of means of irrigation. The Texas slope has extensive prairies of rich and fertile soil, with broad tracts of forest. The more elevated regions are excellent for grazing, and yield nourishing pasture for vast herds of cattle. Of the Pacific slope much is sterile and unproductive, though that part lying between the Coast range and the ocean and the valleys between the Coast range and the Cascade range and the Sierra Nevada are very fertile; other valleys and mountain slopes are better adapted to pasturage than to agriculture. The great inland basin of Utah, including parts of other States and Territories, is probably the most desolate and unproductive portion of the country; yet in many sections, by means of irrigation, good crops are gathered. A considerable advance in production was made during the last decade, as exhibited in the following table of the principal crops of the census year 1880, given in comparison with the crops of the census year 1870:

Nature of crops.	1880.		1870.	Nature of crops.	1880.		1870.

The greatness of agricultural production and the abundance of breadstuffs and food product of the U. States, are the features of material prosperity most prominent before the world. This is not due to the new land, for lands used in 1870 increased in product even more than new areas, and the ratio of the crops was largely increased from lands averaging \$30 an acre. Not many years since the Genesee Valley and the central parts of the State of New York, were mainly devoted to the production of wheat. From that point its cultivation gradually moved westward and northward, but this change is far from marking the decay, the farms of these parts of the State being now better cultivated and more productive than when they were devoted to wheat. Mulhall, in his "Balance Sheet of the World," puts the U. States at the head in product and in consumption per head. The product he gives as 48 bushels for each inhabitant, and the consumption of grain as over 40 bushels for each. That is, in some way—directly or indirectly—that amount of grain is used up for each person in the United States. Professor Brewer puts production at 53.7 bushels a head, and so gives a larger surplus for export. Steam transportation and improved farm machinery brings us into close relation to the social economies of the old world, and are producing startling effects in modifying their customs and their laws, and, it might be added, are producing great modifications in American customs and social life.

The following statement, compiled from the Treasury report of commerce and navigation, shows the value of the exports of agricultural products, with their immediate manufactures, for the 10 years, 1871-1880, and their percentage in regard to the value of the total exports:

Products.	1871.	1872.	1873.	1874.	1875.
Animals and animal matter	\$47,010,312	\$77,060,849	\$99,806,599	\$99,697,669	\$104,344,988
Breadstuffs, etc.	79,519,387	85,155,523	98,762,891	161,225,939	111,478,096

Upon one-fourteenth part of their whole soil, or upon one-seventh part of that which is fit for agriculture, the U. States produce the hay and roots that they require, and all the grains and cotton that they need, with so much more that even if they did not produce an ounce of gold or silver, they could command the treasures of the world. Yet if we consider the average product per acre in respect to every one of these crops, we find that it does not exceed one-half the quantity that even a reasonable good system of agriculture would bring forth. If we consider the conditions under which each and all of these great crops of grain, hay, cotton, etc., are produced, we find that they represent in the lesser degree only, the art of agriculture.

MANUFACTURES.—Up to the time of the Revolution, a large proportion of the colonial manufactures was the product of household industries; but the increasing population and wealth of the colonies early gave rise to manufactures devoted to special industries. Furnaces and forges were constructed for the manufacture of iron and steel, and manufactories of vehicles, household furniture, farm implements, hats and caps, gloves, woolen and cotton goods, silk goods, linen goods, leather, gunpowder, paper, books, bags, and other articles, were established in several of the colonies, but chiefly in New York and New England. From the very beginning, the colonists exhibited a marked aptitude for mechanical pursuits. The exigencies of their social, industrial, and commercial life excited the quest for discoveries, and stimulated genius to new inventions and adaptations. The fact that they were so far removed from the methods which characterized European mechanical industries gave a stamp of originality to American manufactures, which, in latter days, has manifested itself in the peculiarities of a thousand mechanic arts. The success of the industrial enterprises of the colonists was based upon faculty and wholesome lives. Through the tuition of self-culture, from generation to generation, inventive genius became an inherited instinct. From an early date the mother country bitterly opposed the establishment of manufactures in the American colonies, her avowed policy being to confine their external commerce to the exportation of products of agriculture, of the forest, and of the fisheries, to England alone and in British ships, and in return to supply them with the products of her own manufactories. But this policy served only to illustrate the irony of events. In the end, it proved to be protective and stimulating, and not repressive of the colonial industries. The restraints imposed by the British Government in connection with the duties laid upon colonial produce when imported into Great Britain, and the great cost of transporting the crude products of the colonies across the Atlantic Ocean, left little to them for their labor. In order, therefore, to supply their needs, they were forced to create a market for their products by becoming their own artificers. Household mechanical industry increased, and hundreds of manufactories were established in the several colonies. The sales of goods of colonial manufacture were at first confined to the towns or neighborhoods in which they were produced, but soon were extended to greater distances. An intercolonial trade thus sprang up which was the beginning of the enormous internal commerce of the U. States of the present day. After a while, the colonies were enabled to export their manufactured products to foreign countries, and they did so to a considerable extent, in defiance of the edicts of the mother country. The vigorous growth attained by American manufacture during the colonial period is evidenced by the fact that the colonists were able to meet all their home needs, and besides to clothe their army during the terrible struggle of the seven years' war. In his message to Congress, dated January 8, 1790, President Washington invited the attention of that body to the importance of promoting manufactures. On the 15th of January the House of Representatives, by resolution, referred this portion of the President's message to Alexander Hamilton, Secretary of the Treasury, "to prepare and report a proper plan, or plans, conformably to the recommendation of the President." Hamilton's memorable report in reply to this resolution was submitted to the next Congress. It has perhaps justly been regarded as the ablest of all his State papers. He recommended a vigorous system of protection and encouragement of American industries by means of duties on imports, bounties, and premiums. It must be remembered that these measures were, in high degree, retaliatory, similar measures being at that time enforced by other commercial nations. It should also be observed that he did not announce the measures which he advocated as being applicable to all countries and at all

times. The conditions under which manufacture are carried on have, since the days of Hamilton, undergone radical changes, as the result of the increase and expansion of population, the introduction and extension of railroads, and the greatly increased facilities for transportation, and as the result also of discoveries, inventions, and adaptations. The variety of manufactured articles have been almost infinitely increased, and their ministration to the needs, tastes, and habits of the people have been multiplied a thousand-fold. Hundreds of manufactured articles, formerly imported, are now supplied in our own markets exclusively by American artisans. With respect to certain other articles, the American manufacturer is able to compete in foreign markets with the manufacturers of other countries. The value of exports of products of manufacture from the U. States increased from \$45,658,873 in 1860 to \$103,132,481 in 1882, exceeding in the latter year the total value of imports into the U. States during the year 1840. It is not of course practicable here to trace the history of the struggle between the advocates and the opponents of governmental protection of manufacturers from the time of Hamilton to the present day. Suffice it to say, that while neither policy has ever been fully adopted, the preponderance of public sentiment has been sometimes on one side and sometimes on the other. Attention will here be confined to the growth of the manufacturing industries of the U. States since the year 1850, but especially since the year 1860. According to the census, the value of the products of manufactures in the U. States was, in 1850, \$1,019,106,616; in 1860, \$1,885,861,676; in 1870, \$3,432,415,933; and in 1880, \$5,369,579,191. During the period from 1860 to 1880 the manufacturing industries of the U. States were more highly protected than during any previous period in the history of the country. The average *ad valorem* rate on imported merchandise was increased from fourteen per cent. in 1861 to forty-two per cent. in 1865. It is an historical fact, however, that this large increase of duties was prompted by the needs of national defense and not by any prevailing sentiment in favor of the protection of American enterprise. As the result of the large increase of duties on imports, the customs revenues increased from \$39,038,269 in 1861 to \$177,056,523 in 1866. Although the duties on the tea and coffee were reduced in 1870 and abolished in 1872, and the reductions of duties were subsequently made, the aggregate duties on imports during the year 1882, had increased to \$216,138,916. At the same time the foreign commerce of the U. States grew more rapidly than ever before. The total value of exports increased from \$333,576,057 in 1860 to \$835,638,658 in 1880 and the value of imports increased from \$353,616,119 in 1860 to \$667,954,746 in 1880. During the same period agriculture, mining, internal commerce, and all the other great business interests of the country. The immediate relations sustained by manufactures to the several sections of the country are indicated by the following facts in regard to the distribution of manufacturing and mechanical industries: According to the census of 1880 the products of manufacture in the U. States were distributed thus: 21 per cent. in New England States; 41 per cent. in the States of New York, New Jersey, Pennsylvania, Delaware, Maryland and the District of Columbia; 29½ per cent. in the Western and Northwestern States; 2½ per cent. in the States of Virginia, North Carolina, South Carolina, and Florida; 3½ per cent. in the States of Kentucky, Tennessee, Alabama, Mississippi, Louisiana, Texas, and Arkansas; and 2½ per cent. in the States of California, Oregon, and Nevada. These facts show the extent to which the manufacturing industries of the U. States have become nationalized. Within the memory of men of middle age, the great West was dependent almost entirely upon the East and upon foreign countries for manufactured products. But the value of the manufactures of that section increased from \$346,675,290 in 1860 to \$1,583,235,703 in 1880. During the latter year, the value of the products of manufacture of the Western and Northwestern States was fifty per cent. greater than the total value of the products of manufacture in the U. States in 1850, and almost equal to the total value of the manufactures of the country in 1860. The very fact of the movement of manufactures toward the great surplus-producing agricultural area of the West clearly proves the mutuality of interest existing between those two great branches of industry.

Through the improvement and extension of the facilities for transportation, and the growing tendency on the part of local traders to purchase "at first hand," the manufacturer has, to a great extent, become a merchant, and local points of manufacture have thus become centers of trade. The products of the manufactures of the West are now shipped not only to all points in the Western States, but also extensively to the Southern States and to the Eastern States, and certain articles are even exported to foreign countries. In view of the present rate of increased manufactures in the Western States, the rapid growth and improvement in the facilities for transportation by rail, and the constant tendency of population westward, it appears safe to predict this, if nothing shall occur to repress the present prosperity of the manufacturing industries of these States during the remaining years of the century, there will be developed between the agricultural and the manufacturing industries of these States a commerce equal in magnitude to the foreign commerce of the U. States at the present time. Experience has proved that the domestic commerce thus created will be much more steady and reliable, and, in all probability, in the end more productive on individual and national wealth than trade with foreign countries.

The advantages realized by the transportation interests of the country from manufactures cannot be stated with precision. About ten per cent. of the east-bound, and ninety per cent. of the west-bound traffic of the great East and West trunk lines consist of products of manufactures. From the best information which can be procured, it is estimated that manufactured articles, together with materials and the coal required for supplying motive power in manufacturing industries, constitute about one-half of the freight tonnage of the railroads of the United States. It is probable that considerably more than one-half of the freight receipts of railroads is derived from the transportation of manufactured articles and of material and coal required in their production. This is evident from the fact that the higher and better paying classes of freight consist chiefly of manufactured articles.

The importance of the relations sustained by manufactures to the internal commerce of the U. States is indicated by the fact, that the value of the latter is estimated to be at least twenty times as great as the foreign trade of the country. The total value of the products of manufactures, according to the census of 1880, is \$5,369,579,191, of which only about \$100,000,000, or 2 per cent., was exported, 98 per cent. having been consumed at home, or, in other words, become the subject of internal commerce. The increased value of manufactures from \$1,885,861,676 in 1860 to \$5,369,579,191 in 1880, of course gave rise to an enormous increase in the internal commerce of the country. Manufactures now constitute the most important elements of the commerce of large towns and cities. The prosperity even of New York city, the great commercial *entrepôt* of the country, at which port 77 per cent. of our foreign commerce is carried on, is, in a much higher degree, dependent upon manufacturing industries than upon foreign commerce. During

the year ending June 30, 1880, the value of the total foreign commerce at that city amounted to \$852,497,243, the value of exports amounting to \$392,560,090, and that of imports to \$459,937,153. The total value of the manufactures of the city, however, during the census year, amounted to \$472,926,437, and those of Brooklyn to \$177,223,142. The total value of the manufactures of the two cities—commercially one city—amounting, therefore, to \$650,149,579. But the manufacture and sale of every dollar's worth of products of manufacture probably contributed ten times as much toward the employment of labor and the sustenance of people in these cities as did every dollar's worth of foreign goods imported. The manufacturing industries of the two cities involved not only wages paid for the manufacture of goods, but also wages paid for transporting and receiving materials and coal, and delivering finished products. They also required the use of, and paid rental upon, a large amount of property in the manufacture and storage of merchandise. Besides, the manufactures of the two cities gave rise to a very large business in the purchase and sale of raw materials, and of finished products. On the other hand, a large part of the foreign exports of New York city consisted of direct shipments from interior points to foreign countries, and another considerable portion paid little more than transfer and warehouse charges. A large portion of the imports of merchandise also passed directly through the city without paying to it any commercial tribute, excepting the incidental expenses of trans-shipment. Other imports paid little more than the expenses of trans-shipment and warehousing. Besides the trade in the products of the manufactories of New York and Brooklyn, the city of New York also controls the trade, in an enormous amount, of the manufactured products of the New England States, New Jersey, and the State of New York, outside of the two cities mentioned. It is believed that if any person were to take the time to ascertain the value of the trade of wholesale houses in New York city dealing exclusively in products of American manufacture to an amount equal in the aggregate to the value of the entire foreign commerce carried on, at, or through that city, he would be surprised to find how small a proportion of the business operations of the city his inquiries had covered. It has already been shown that the products of agriculture in the U. States which are exported consist almost entirely of products of the Western and Northwestern, and of the Southern States, and that the agriculturists of the Atlantic and seaboard States depend almost entirely upon markets created by domestic industries and occupations. These facts, in connection with those just stated in relation to the magnitude of the manufactures of New York and Brooklyn, and of the commerce carried on in these cities in the manufactures of the surrounding country, indicate to how much greater an extent the agricultural interests of the territory within a radius of 200 miles of New York city depend upon home industries and home commerce than upon foreign commerce. The importance of manufactures to the internal commerce of the country is also illustrated in the commercial and industrial experiences of a thousand towns and cities throughout the country. Twenty-five years ago, the cities of Mobile, New Orleans, and Galveston largely dominated the trade of the States situated south of the Ohio river and south of the State of Missouri, but now that trade is mainly controlled by the cities of Cincinnati, Louisville, and St. Louis, and consists largely in the sale of products of the industries of those cities. It was estimated by the superintendent of the Cincinnati Chamber of Commerce that the total value of the sales of merchandise at that city amounted in 1881 to \$254,000,000, of which the value of goods manufactured in Cincinnati, and there sold, amounted to \$150,000,000, and the value of goods purchased abroad and sold in the course of a purely distributive commerce amounted to \$104,000,000. The people of the Western towns and cities generally have, within the last fifteen years, been brought to realize the fact that the trade in the products of their own industries is much more reliable and profitable than their jobbing or wholesale trade. Besides, they have seen that manufactures retain in a city a most desirable class. The social advantages afforded by manufacturing industries, whereby the various members of families can be held together in a single community, is a consideration of very great importance.

The important relations sustained by manufactures to banking and the finance of commerce are clearly understood by every banker and business man in the country. It is impossible to state the amount of bank capital held by manufacturers, or the proportion of bank credits which is based upon manufactured articles. It is believed, however, that the total amount of such credits is greater than the total amount of credits based upon products of agriculture. From the foregoing statements it appears that manufactures, and commerce, and agriculture, and transportation, and banking, and the other great business interests of the country, take hold on each other in innumerable ways, and that, as elements of national prosperity, they are one and inseparable. The depression of one or more of the great manufacturing or mechanical industries of the country would injuriously affect all other business interests, and might result in serious disaster.

In 1880, according to the census of that year, the manufactures of the U. States were as follows :

Mechanical and Manufacturing Industries.	No. of Establishments.	Capital. <i>Dollars.</i>	Average number of hands employed.			Wages. <i>Dollars.</i>	Value of Materials. <i>Dollars.</i>	Value of Products. <i>Dollars.</i>

a. As a given number of refined petroleum represents the product of a larger number of gallons of crude petroleum, it is necessary to reduce the exports of petroleum to their equivalent in crude oil, in order to arrive at a knowledge of the percentage of the total product of mineral oil exported. It has been ascertained, as a result of a careful computation, that the quantity of petroleum and its distilled products exported during the year ended June 30, 1878, was equivalent to 467,483,175 gallons of crude oil; or, in other words, that the exports of petroleum constituted about 66 per cent. of the production. A larger percentage of the mineral oil product of the country is exported than of any other product, except cotton. *b.* Barrels reduced to gallons, at the rate of 42 gallons to the barrel. *c.* Estimated. *d.* Figures of production for fiscal year 1882, furnished by S. H. Stowell, editor of "Stowell's Petroleum Reporter."

Adirondack Mountains, the principal group of mountains in N. Y. They extend from the N. E. corner of the State toward its center, and form a part of the Appalachian chain. They are situated in Clinton, Essex, Franklin and Hamilton cos. Mt. Marcy, in Essex co., 5,402 ft. above sea level, is the highest mountain in the State. The summits next in altitude are St. Anthony, McMartin, Seward, Dix's Peak, Mt. Emmons and Mt. McIntyre. The Adirondacks are formed of granitic and other primary rocks, and present, in general, a conical form with an abrupt slope. Some of the ridges of this group have received local names, as the Kayaderoseras on the W. of Lake George; the Highlands of Black R.; the Hassencleaver Mountains of Oneida co., and the central chain has been called McComb's Mountains. The scenery of this region is wild and grand almost beyond description. Numerous beautiful lakes and ponds diversify the scenery, and give to it a charm which is not surpassed in the U. S. Raquette Lake, the highest of these sheets of water, is 1731 ft. above the sea level. Fish abound in these lakes and the streams which flow into them; and game is still to be found. Among the rivers which have their source among these mountains are the Saranac and the Ausable, which empty into Lake Champlain; and the Boreas, the Cedar and the Hudson, which unite into the Hudson in the S. W. corner of Essex co. Among the best known lakes are Lake George, Schroon Lake and Long Lake. Fine forests of pine, maple, beech, birch, ash and other woods cover these mountains; along the streams cedar, hemlock, tamarack and hackmatack form almost impenetrable swamps. The most valuable prod. is the white pine, which is cut in immense quantities. The Adirondack region is visited yearly by a large number of sportsmen and tourists. It is easily reached by several routes, one of the best from N. Y. being *via* Lake Champlain.

Cap., Aitkin. Pop. 366 (of whom 111 for., and 57 Indians). —p. v. in Aitkin tp., cap. of above co., on the N. P. RR., and on the Mississippi R., 88 m. W. of Duluth. It is an important center of the lumber trade on the Mississippi R. Pop. 136; of tp. 366.

Akan, Wis., tp., Richland co. Pop. 841.

Akersville, Pa., p. h. in Brush Creek tp., Fulton co., 34 m. W. of Chambersburg. Pop. 19.

Akin, Ill., p. v., Franklin co., 16 m. S. W. McLeansborough. ✦

Akron (p. o. name ACROS), Ala., p. v., Hale co., on the Black Warrior R. It is 25 m. by rail, S. S. W. Tuscaloosa. It has a mineral spring and several churches. ✦

Akron, Ill., p. tp., Peoria co., abt. 18 m. N. by W. of Peoria. Coal and limestone are found here in abundance. Pop. 1,217.

Akron, Ind., p. v. in Henry tp., Fulton co., 28 m. N. E. Logansport. It has several factories. Pop. 193.

Akron, Mich., p. tp., Tuscola co. Pop. 1,367.

Akron, Mo., p. h. in Clay tp., Harrison co., 20 m. from Leon, Iowa. ✦

Akron, N. Y., p. v. in Newstead tp., Erie co., 14 m. W. of Batavia by the Niagara Falls branch of the N. Y. C. RR. It is one of the most important centers of prod. of hydraulic cement. It has a wkly paper. Pop. 1,036.

Akron, O., a flourishing city, cap. of Summit co., on the A. & G. W. RR., and on the Ohio & Erie Canal, at its junction with the Penn. & Ohio Canal, 36 m. S. of Cleveland, and 246 m. N. E. Cincinnati. Akron is situated on the portage summit of the Ohio & Erie Canal, in a beautiful and fertile country. By means of the canal and the Little Cuyaboga R. the city is amply supplied with water power, which is employed in a variety of manuf.; and its mercantile business is extensive. It has several flour mills, woolen factories, rubber works, manuf. of gas, &c., and numerous manuf. of iron goods. Mineral fire-proof paint, immense beds of which are found in the vicinity, and wheat are important articles of export. It is the seat of Buchtel College (Universalist), and has a public library, 2 daily and 3 wkly papers, and 3 nat. banks. Akron was founded in 1825, and was made the cap. of the co. in 1841. Pop. in 1860, 3,477; in 1870, 10,006; in 1880, 16,512.

Akron, Pa., p. v. in Ephrata tp., Lancaster co., on the R. & C. RR., 22 m. W. S. W. Reading. Pop. 224.

Alabama, Ala., a river which is formed by the junction of the Coosa and the Tallapoosa, and flowing S. S. W., unites with the Tombigbee, 48 m. above Mobile Bay, and after the junction has the name of Mobile R. It is navigable at all seasons for vessels requiring 6 ft. of water, from the junction, 60 m. to Claiborne. From Claiborne, 150 m. to the mouth of the Cahawba, the river has 4 or 5 ft. of water. From the mouth of the Cahawba to the junction of the Coosa and Tallapoosa, its head branches, the river affords, in all places, 3 ft. of water. The river is subject to great changes by rising and falling; it is very tortuous throughout its course, and on its banks are some of the largest cotton plantations in the South, and much valuable timber.

—a southern State, the 21st in the order of its admission, the 17th in surface and also in population, lies between lat. 30° 13' and 35° N., and between 85° and 88° 35' W. It is bounded S. by Florida and the Gulf of Mexico. W. by the Mississippi, N. by Tennessee, and E. by Georgia. Its length is 330 m., average breadth 154, and area, 51,540 sq. m. The Blue

Ridge of the Alleghenies stretches into the northern portion of the State, but the elevation is nowhere great. From this broken but beautiful region, there is a gradual declination towards the S., the surface expanding into broad prairies with gentle swells, till the vicinity of Mobile Bay, where it becomes very flat, and raised but little above the sea-level. The State has only abt. 60 m. of seacoast, a large portion of the S. boundary being cut off from the seacoast by an intervening strip of Florida. The principal rivers are the Mobile, Tombigbee, Alabama, Coosa, Black Warrior, Perdido, and Chattahoochee. Mobile Bay, the largest and finest on the Gulf receives the greater part of the navigable waters of the State through the Mobile R. and its affluents. The Perdido R. separates Florida from Alabama. The Tennessee comes in at the N. E. corner of the State, and taking a circular sweep southward, goes out at the N. W. corner, and empties into the Ohio at Paducah, Ky. The Chattahoochee, a large river rising in Ga. and emptying into Appalachicola Bay, forms the E. boundary of the State for more than 100 m. The climate of Alabama is semi-tropical. The temperature ranges from 82° to 18° Fahr. in winter, and in summer from 105° to 60°; the mean temperature for the year being a little over 60°. The uplands are healthy, but the inhabitants of the low-lying lands are subject to intermittent, bilious, and congestive fevers.

Alabama is rich in minerals. The mineral region occupies the N. E. corner of the State, extending S. W. abt. 160 m., and has an average width of abt. 80 m. White marble of remarkable brilliancy, soapstone, flagstones, graphite or plumbago, potter's porcelain, and fire-clays, and granite of good quality are obtained here. Gold was discovered in Randolph co. in 1836, and mined so successfully that \$213,750.00 of it had been coined at the U. States mint and its branches to June 30, 1872, and the greater part previous to 1859. Copper is also found, but not in ores sufficiently rich to make its mining profitable. The most valuable portion of the mineral wealth of Alabama, however, consists in her mines of coal and her abundant iron ores. The coal-fields contain seams of bituminous coal from one to eight ft. thick, of several varieties, some of them excellent for smelting iron ores. In close proximity to the latter are extensive beds of iron ore; the Red Mountain extends across the State for more than 100 m., having in its whole course a stratum of solid red iron ore from two to eight ft. thick. Very extensive beds of the brown hematite iron ore of the best quality are found in Bibb, Shelby, Jefferson, Talladega, St. Clair, and Claiborne cos. The iron manufactured from these ores is of excellent quality. The 6 cos. in which coal is mined produced, in 1880, 323,972 tons valued \$476,911. The census of 1880 shows the State of Alabama ranking 7th in the production of iron ore, with 17 mining establishments scattered in 10 cos., having an aggregate capital of \$536,442 and employing 738 hands. The total production during census year was 191,676 tons, valued \$201,865. There were 14 blast-furnaces, rolling-mills and steel works, having an aggregate capital of \$3,309,196 and employing 1,626 hands, to whom \$571,713 wages were paid during the census year; value of all materials used, \$631,707; of iron and steel production, \$900,850.—Alabama combines the vegetable products of the temperate and semi-tropical regions. In the N. the white, red, cup, pin, and post oak, the hickory, chesnut, poplar, cedar, elm, mulberry, and pine, are the principal forest trees. Below latitude 33° the trees are festooned with the long Spanish moss, and the forests begin to assume a more semi-tropical character. In this region, the deciduous trees very generally give place to the live-oak, the cypress, the loblolly, the yellow pine, the magnolia, and other

forest trees of the Gulf region, while the apples, pears, plums, and hardy peaches are partially replaced by the fig, the pomegranate, the olive, the apricot, the scuppernong grape, and the orange. The N. part of the State is best adapted to the culture of the grasses, the cereals, and maize, though in the more fertile valleys considerable cotton is raised. The central and most of the S. portion is admirably adapted to cotton. Large quantities of maize are also grown in the central counties. In the S.W. the sugar crop is usually successful, and rice is grown on the wet and low lands. The chief agricultural productions in 1880 were 22,679,352 lbs. of corn, 1,402,218 of wheat, 32,906 of rye, 2,926,336 of oats, 370,510 of potatoes, 34,900 tons of hay, 94 hhds. of sugar, 2,348 gals. of molasses, and 699,654 bales of cotton. There were 113,950 horses, 121,081 mules and asses; 75,534 working oxen; 271,443 milch cows; 404,213 other cattle; 347,538 sheep, and 1,252,462 swine.—There are still great numbers of deer in the N. cos., and wild turkeys are abundant. Wild pigeons, partridges, rabbits, gray squirrels, and other game are plentiful, while opossums, raccoons, wildcats, wolves (the prairie wolf), foxes, and bears are occasionally met with. Lizards and snakes abound in the swampy regions, and the moccasin and milk snake are particularly venomous. In some of the streams and bayous the alligator is found, though less abundant than in Louisiana.—According to the census of 1880 the cotton manufacture aggregated 1,060 looms and 55,072 spindles; number of bales of cotton used, 14,887; number of operatives employed, 1,600. There were in the State 2,070 manufacturing establishments, having an aggregate capital of \$9,668,008, and employing 10,019 hands; total amount of wages paid, \$2,500,504; value of materials, \$8,545,520; value of products, \$13,565,504. The foreign commerce all centers at Mobile.—In 1882 Alabama had 1,804 m. of railroad in operation, divided into 26 lines; cost of roads and equipments, \$84,199,205.—In 1882 there were 4,572 common schools, of which 2,981 were white and 1,591 colored schools. The total number of children within the school ages was 388,003, of which 217,590 were whites, and 170,413 were colored. The total number of children enrolled was 176,280, of which 107,338 whites, and 68,951 colored. The total revenue of the school department was \$307,479.04. The University of Alabama, founded in 1831, is situated at Tuscaloosa, and is under the control of the State board of education. There are besides 4 collegiate institutes, viz.: Southern University, at Greensborough; Howard College, at Marion; Spring Hill College, at Mobile; and Lincoln University, at Marion. The Alabama Agricultural and Mechanical College, organized in 1872, had 279 students in 1882.—Among the public institutions in the State are the penitentiary at Wetumpka; the insane hospital at Tuscaloosa; the asylum for deaf, dumb, and blind, and the freedman's hospital at Talladega, and the asylum for the blind, at Mobile.—The leading religious denominations are Methodists and Baptists.—The assessed value of real and personal property in 1882 was \$152,920,115; amount of taxes (at the rate of 63 mills) \$1,035,915.05. The total receipts into the State treasury in 1882 were \$1,012,547.01; total disbursements, \$918,588.61. The total State debt, in 1882, was \$9,407,800, on which the interest charge was \$343,929.—The present constitution was adopted in 1868. The Governor, Lieutenant-Governor, Secretary of State, Treasurer and Attorney General are chosen for two years by the electors of the State. The Auditor is chosen for one year. The elections take place on the Tuesday after the first Monday in November. The House of Representatives must not exceed 100 members; the Senate must be not less than one-fourth and not more than one-third of the number of representatives.

The State sends 2 senators and 8 representatives to Congress; it has 10 electoral votes. The judicial power is vested in a Supreme Court of 3 justices, with appellate jurisdiction only; 5 courts of chancery and 12 circuit courts, each of which is held by one judge; a probate court for each county; and city courts for Mobile, Montgomery, Selma and Huntsville. The judges of the several courts are elected by the people for a term of 6 years.—Alabama is divided into the following 66 cos.: Autauga, Baldwin, Barbour, Bibb, Blount, Bullock, Butler, Calhoun, Chambers, Cherokee, Chilton, Choctaw, Clarke, Clay, Cleburne, Coffee, Colbert, Coneuh, Coosa, Covington, Crenshaw, Cullman, Dale, Dallas, DeKalb, Elmore, Escambia, Etowah, Fayette, Franklin, Geneva, Greene, Hale, Henry, Jackson, Jefferson, Lamar, Lauderdale, Lawrence, Lee, Limestone, Lowndes, Macon, Madison, Marengo, Marion, Marshall, Mobile, Monroe, Montgomery, Morgan, Perry, Pickens, Pike, Randolph, Russell, Shelby, St. Clair, Sumter, Talladega, Tallapoosa, Tuscaloosa, Walker, Washington, Wilcox, Winston. The civil divisions of a co. are called "beats" instead of "districts" as in Ga. and the neighboring States. The cities are Mobile, the first in size and commercial importance, Montgomery, the cap., Selma, Huntsville, Eufaula, Talladega, Tuscaloosa, (the former cap.), and Tusculumbia.—Alabama was first penetrated by the Spaniards in quest of gold in 1541, under the celebrated leader, De Sota. The present site of Mobile was first occupied by the French in 1711, and ceded by them, with the other possessions East of the Mississippi, to the English, in 1763. Alabama was originally included in Ga., but in 1802 became part of the territory of Miss. In 1819 it was admitted into the Union as an independent member. It passed an ordinance of secession, 11 Jan., 1861, and was re-admitted to representation in Congress, 1868. Pop. in 1820, 127,901; in 1830, 309,527; in 1840, 590,756; in 1850, 771,623; in 1860, 964,201; in 1870, 996,992; in 1880, 1,262,505 (of whom 662,185 whites and 600,320 colored).

Alaska, a territory consisting of a vast tract of country forming the N. W. portion of N. America, bounded N. by the Arctic Ocean, E. by B. America, S. and W. by the Pacific Ocean. The name was formerly confined to a long narrow peninsula stretching into the Pacific, but has been extended to the whole territory. Alaska comprises the whole of N. America from 141° W. lon. to Behring Strait, and also numerous islands along the coast, notably Prince of Wales Islands, King George III. Archipelago, the Kodiak Islands, and the Aleutian Islands, which stretch seaward from the extremity of the peninsula. From the main portion of the territory a narrow strip, with a breadth of about 50 m. extends S. E. along the Pacific coast, and terminates at the confines of British Columbia, in 54° 40' N. lat. From N. to S. the extreme length of Alaska is about 1,100 m., and the greatest breadth from E. to W. is 800 m. The area of the whole territory is estimated at 514,700 sq. m. The numerous islands, creeks and inlets of Alaska lengthen out its coast-line to 7,860 m., an extent greater than that of the E. coast-line of the U. States. Beginning at the S. E., the chief creeks and bays are Cook's Inlet, Bristol Bay, Norton Sound and Kotzebue Sound; while, following the same order, the principal headlands, in addition to the extremity of the peninsula, are Cape Newenham and Cape Romanzoff in the Pacific, Cape Prince of Wales in Behring Strait, and Cape Lisburne, Icy Cape and Point Barrow in the Arctic Ocean. Point Barrow is in lat. 71° 23' N. and is the extreme northern point of the country. The exploration of the N. coast was chiefly the work of the British navigators, Cook, Beechey and Franklin, and of the officers of the Hudson Bay Com-

pany. The principal river of Alaska is the Yukon or Kwichpak, which rises in British America, and, receiving the Porcupine R. at Fort Yukon, flows W. across the territory and falls into the Pacific Ocean to the S. of Norton Sound. At a distance of 600 m. from the sea this magnificent river has a width of more than a mile. Its tributaries would, in Europe, be reckoned large rivers, and its volume is so great that 10 m. out from its principal mouth the water is fresh. Among the other rivers are the Copper R., the Suschitna, the Nuschagak and the Kuskokwim, falling into the Pacific, and the Colville, flowing N. into the Arctic Ocean. A great mountain range extends from British Columbia, in a N. W. direction, along the coast of Alaska, the summit being covered with snow and glaciers. Mount St. Elias, an active volcano, in lat. 60° 18' N., lon. 140° 30' W., rises to the height of 14,970 ft. above the sea. The mountain chain runs out along the peninsula which has given its name to the country, and at the W. extremity there are several volcanic cones of great elevation; while in the Island of Uminak, separated from the mainland by only a narrow strait, there are enormous volcanoes, one rising to more than 8,000 ft. in height. In the interior and to the N. the country is also mountainous, with great intervening plains. The climate of the S. W. coast is tolerably mild, considering its high latitude. The great warm current of the Pacific, sweeping in a N. E. circuit from the East India Islands, and corresponding very much in character and effects to the Gulf Stream of the Atlantic, washes its shores; and while it modifies the temperature, also causes an excessive rainfall. At Sitka the mean temperature is 42°.9, and the average rainfall about 80 in. Alaska will never have any great agricultural value. From the great amount of rain and the want of heat, cereals grow, but will not ripen, and vegetables do not thrive. Native grasses and berries grow plentifully, but the chief wealth of the country is in its vast forests, in the furs of its wild animals, and in the fish with which its rivers and seas abound. The forests, rising from the coast and covering the mts. to a height of 2,000 ft., consist of a very durable yellow cedar, spruce, larch and fir of great size, and also cypress and hemlock. The wild animals include the elk, the deer and various species of bear, and also many fur-bearing animals, such as the fox and wolf, the beaver, ermine, martin, otter and squirrel. Near the coast and islands there are innumerable fur-bearing seals, which are caught in great numbers by the settlers; but from the rigor of the climate and the arduous nature of the work, the trapping of the animals of the interior is left to the Indians. The salmon abound in the rivers, and there are great banks along the shores, the favorite haunt of cod and other fish. Abt. 80 whalers prosecute their fishery off the coast of Alaska. Coal and iron are the most important minerals, but the value of the deposit remains to be ascertained. The pop. is very limited, consisting of 8,000 whites and 15,000 Indians, with some Esquimaux on the N. coast. The Indians are rapidly decreasing in number, and are described as treacherous and discontented. Sitka, formerly New Archangel, in the island of Sitka, lat. 57° 3' N., lon. 135° 18' W., was the seat of the Russian Government, and is the headquarters of the U. States authorities. It contains abt. 1,500 inhabitants, is the residence of a Greek bishop, and has fortifications, magazines and a magnetic observatory. Of the other settlements, Fort Nicholas, on Cook's Inlet, and Fort St. Michael, on Norton Sound, are the most important. The admirable harbors on this coast and the great navigable river Yukon, afford facilities for the formation of new settlements and the increase of trade. The N. W. coast of this part of America was discovered and explored by a Russian expedition under Behring in 1741; and at subsequent periods set-

tlements were made by the Russians at various places, chiefly for the prosecution of the fur trade. In 1799 the territory was granted to a Russo-American fur company by the Emperor Paul VIII., and in 1839 the charter of the company was renewed. New Archangel, in the island of Sitka, was the principal settlement, but the company had about 40 stations. They exported annually 25,000 skins of the seal, sea-otter, beaver, &c., besides about 20,000 sea-horse teeth. The privileges of the company expired in 1863; and in 1867 the whole Russian possessions in America were ceded to the U. States for a money payment of \$7,200,000. The treaty was signed on 30th March, and ratified on 20th June, 1867; and on the 9th October following, the possession of the country was formally made over to a military force of the U. States at New Archangel. It still remains in the military keeping of the U. States, no steps having been taken to organize a territorial government. It has, however, been constituted a revenue district, with New Archangel, or Sitka, as the port of entry. Since Alaska was ceded to the U. States considerable information has been collected as to the resources of the less sterile parts of the country; but the central and N. parts of this region are only known as the inhospitable home of some wandering tribes of Indians and Esquimaux. See ALEUTIAN ISLANDS; see also *Alaska and Missions on the N. Pacific Coast*, by Rev. Sheldon Jackson, N. Y., 1880.

Albany, N. Y., an E. co., bounded E. by Hudson R., and N. partly by the Mohawk; area, 490 sq. m. Normanskill and Catskill Creeks furnish it with good water power. The land near the Hudson and some of the other streams is fertile; but in the N. and W., where the surface is mountainous, it is less productive, and in some places sterile. The E. part is covered with immense beds of clay, sand and gravel, the sand in some places being 40 ft. deep. Iron, hydraulic limestone, marl and gypsum are found, though they are not abundant. The chief prod. in 1880 were 23,128 bush. of wheat, 296,145 of corn, 787,529 of oats, 158,600 of rye, 211,225 of buckwheat, 17,952 of barley, 691,842 of potatoes, 133,536 tons of hay, 158,804 lbs. of wool, 1,400,367 of butter, and 161,000 of hops. Besides Albany, the cap., Cohoes and West Troy are important manufacturing places. The assessed val. of real estate in 1880 was \$64,295,172, and of personal prop. \$4,977,970. Pop. 155,045 (of whom 38,033 for., 1,382 colored, 3 Chinese and 6 Indians).

—a city, cap. of the above co., and of the State of New York, on the W. bank of the Hudson R., at the head of sloop navigation and near the head of tide water, 145 m. N. of New York city, and 164 m. (or 201 by rail) W. of Boston, in lat. 42° 39' 49" N., lon. 73° 44' 33" W. It has a commanding situation, and when viewed from the water appears to great advantage. On the margin of the river is a flat, alluvial tract, extending from 15 to 100 yards back, from which the ground rises abruptly, and in the course of a mile attains an elevation of 220 feet, beyond which it is level. The view from the highest parts of the city is extensive and picturesque. To the N. are seen the city of Troy and the adjacent villages, and in the distance the hills of Vermont; to the E. the beautiful country lying on the opposite side of the Hudson; and to the S. the Helderbergs and Catskill Mountains. The principal streets are Broadway and Pearl street, which run parallel with the river, and State street, 100 feet wide, which ascends the hill to the Capitol, and thence narrows to the limits of the city proper westward. Washington avenue runs parallel to it, commencing from in front of the City Hall, and continues as the Schenectady turnpike. Among the public buildings and institutions are the new capital, a magnificent edifice in the Renaissance style, and built of New England granite, at a cost of above \$10,000,000, the State Hall for State offices and the City Hall for city offices, both of marble and fronting on small parks near the old Capitol; the State Museum of Natural History in the same building with the collection of implements and productions of the field of the State Agricultural Society; the State Library, containing, with the law department, over 90,000 volumes; the Bureau of Military Record, containing memorials of past wars; the Dudley Observatory, possessing the best astronomical instruments and Scheutz's tabulating machine, and now having also a physical observatory; the Medical College, which, with the Law School and the Observatory, now has an organic connection with Union College at Schenectady, under the name of Union University; two public hospitals, and a State normal school. The Albany Institute is a society first formed in 1791 for the advancement of science, and publishes its transactions. There is a public high school, one academy for boys, and three for girls. In 1880 there were 38,000 children of school age, of which 14,632 only were enrolled in, and 9,193 in average attendance at the public schools. There are abt. 60 places of worship; the largest and most imposing church being

the cathedral of the Immaculate Conception. There is also a Young Men's Association, a Young Men's Christian Association, and numerous other benevolent and social associations. The penitentiary, situated on the W. of the city, was opened in 1848, has 60 cells, and is conducted under the contract system of labor, the men being employed in shoemaking, and the women in chair-seating. For 30 years after the Revolution, Albany was the seat of the entire trade of the W. part of the State, the produce being brought in by sleighs in winter; but the growth of the city was not rapid. The first great impulse to its commercial prosperity was given by the successful trips of the Clermont, the first steamboat of Fulton, in 1807, and the improvements in steam navigation which immediately followed. The steamboats now upon the Hudson R. are among the largest that navigate any inland waters. The Erie Canal, completed in 1825, and the various lines of railroad constructed since that time, have each essentially added to the growth and prosperity of the city. A sand bar, abt. 3 m. below the city, frequently impedes the passage of large vessels in dry seasons. There are 6 or 7 railroads leading from Albany; the Hudson R. and the Harlem to New York city, the Boston and Albany to Boston; the Rensselaer and Saratoga to Vermont and Canada; the New York Central to Buffalo; and the Albany and Susquehanna to Binghamton on the N. Y., L. E. & W. RR., besides steam and horse railroads to Troy. The river is crossed by two railroad bridges, and a third is in way of construction, incorporated for a third, over which teams will also pass. The most prominent manuf. has hitherto been stoves, including now hollow-ware, averaging annually \$2,500,000 in value. There are 9 shoe factories, 33 brewers and malsters, and several manuf. of aniline colors, furniture, flour, brick, oil-cloth, paper collars, safes, pianos, jewelry, soap, candles, boilers, machinery, &c. The lumber market in the value of its lumber is second to none, the quantity received being valued at \$13,000,000 a year. Its cattle trade is of the greatest importance, being the central market for New York city and New England, and its stock traffic amounts to \$20,000,000 a year. Grain and the products of the extensive local manufacturing interests are also exported. Commerce is facilitated by a large number of slips for vessels, by a large dock, and by a pier, forming a great canal basin. There is also a very large grain elevator, owned by the N. Y. C. RR. The city has a board of trade and a board of lumber dealers. Albany is a port of survey in the U. S. customs-district of New York. There are 7 nat. banks, 2 other banks, 3 private bankers, 7 savings banks; 5 fire and 1 life insurance companies; 7 daily, 12 wkly or bi-wkly papers, and 6 monthly periodicals. The city is chiefly supplied with water by gravitation from an artificial lake in the Sand Plains, abt. 5 m. W. The fire department has 7 steam fire-engines and a fire-alarm telegraph system. Albany is the oldest settlement in the original 13 colonies except Jamestown, Va. It was first settled by the Dutch in 1614 as a trading port. Fort Orange, or Auranja, was erected here in 1623. The village was successively called Beverwyck and Williamstadt. In 1664 it was called Albany, for the duke of York and Albany, afterward James II. Till the Revolution it was the center of a large Indian trade. Here was held the first General Congress, to make arrangements for the national defence; and here, upon the 4th of July, 1754, Franklin and other patriots "signed the first plan of *American Union*, and proclaimed to the colonies that they were one people, fit to govern, and able to protect themselves." Albany became the State cap. in 1797. Its pop. in 1790 was 3,506; in 1810, 10,762; 1830, 24,238; 1850, 50,762; 1870, 69,422; 1880, 90,905.

Albany, O. (p. o. name LEE), in Lee tp., Athens

co., 10 m. S. W. Athens. It has the Atwood Institute and a wkly paper. Pop. 469.

Alert, *O.*, p.o., Butler co.

Aleutian Islands [from the Russian *alent*, a bold rock], a chain of small islands situated in the Northern Pacific Ocean, and extending E. from the peninsula of Kamtschatka, in Asiatic Russia, to the promontory of Alaska, in North America. This archipelago has been sometimes divided into three groups, the islands nearest Kamtschatka being properly called Aleutia, the central group the Andreanov or Andreanovian, and those nearest to the promontory the Fox Islands. They are all included between 52° and 55° N. lat. and 172° E. and 163° W. lon. The whole of the islands are bare and mountainous, and their coasts are rocky and surrounded by breakers, by which the approach is rendered exceedingly dangerous. The land rises immediately from the coasts to steep bald mountains gradually ascending into lofty ranges running from E. to W. Springs take their rise at the bottom of the mountains, and either flow in broad and rapid streams into the neighboring sea, or, collecting in the rocky vales and glens, form ample lakes, which send off their superfluous waters by natural canals into the adjacent bays. These islands bear evident marks of volcanic formation, and several of them have still active volcanoes, which continually emit smoke and sometimes flames. The most important group of the chain is that called the Fox Islands, of which the largest are Unimak and Ounalaska, both near the W. extremity of Alaska. The thin argillaceous soil of the Aleutian Islands produces little vegetation, and agriculture is almost unknown. The climate is subject to sudden changes, and is very unfavorable to any attempts at cultivation. Few trees grow on the islands, but there are some stunted shrubs of birch, willow, and alder. The principal occupations of the Aleutians are fishing and hunting, and the preparation of the implements necessary for both. Since the end of last century the fur traders have had settlements here for the capture of the seal and the sea-otter, which are found in great numbers on the shores, and of the Arctic fox, which roams over the islands. Fish are abundant, and dogs and reindeer are common. The pop. of the whole group is abt. 8,000, the natives being a kindred race to the inhabitants of Kamtschatka. Until 1867 these islands belonged to Russia, but they were included in the transfer to the U. S. of the whole Russian possessions in America made in that year. They now form part of the territory of Alaska. From the position of the Aleutian Islands, stretching like a broken ridge from Asia to America, some ethnologists have supposed that by means of them America was first peopled. See ALASKA.

Alexander (p.o. name ALEXANDER CITY), *Ala.*, p.v., ♣ Tallapoosa co., 47 m. N.W. Opelika by the C. & W. RR. Pop. 796.

Alexander, *Ark.*, p. h., Pulaski co., on the St. L., I. M. & S. RR., 13 m. S. W. Little Rock. Pop. 125.

Alexandria, Va., a N. E. co., bordering on the Potomac R., which separates it from Washington, D.C. Area, 36 sq. m. The surface is hilly. The soil is not fertile, but under cultivation produces paying crops of cereals. The V.M.R.R. runs through the co. Until 1846 this co. formed a part of the District of Columbia, but was then retroceded to Virginia by Act of Congress. Cap., Alexandria. Val. of taxable prop. abt. \$7,000,000. Pop. 17,545 (of whom 766 for., and 7,577 colored).

—a city and the cap. of above co., 7 m. S. of Washington, on the right bank of the Potomac R., which is a mile wide at this point, and forms a spacious harbor, affording anchorage for the largest ships. The streets are regular and well paved, and the principal thoroughfare is traversed by a horse railway. The city contains a court-house, a very handsome market-house, 15 churches, 2 national and 2 private banks, 1 daily, 3 wkly. and 1 monthly papers, and an efficient steam fire department, and is lighted with gas and supplied with water. An extensive cotton factory has been in operation for a number of years, with flouring mills, machine shops, plaster mills, and other industries. The city is noted for the number and excellence of its institutions of learning, and has a large public library. It is the terminus of a number of railroads. Alexandria is a port of entry and has a growing foreign trade; it enjoys an extensive coal trade by the Chesapeake and Ohio Canal from the Cumberland region, a large number of vessels being employed in the shipment of the product of the mines to Northern ports. In 1880 the number of vessels registered, enrolled and licensed, was 98, with a tonnage of 4,359. Pop. 13,659.

Alexandria Bay, N. Y., a summer resort in the Thousand Islands, and in Alexandria tp., Jefferson co., on the St. Lawrence R., and connected with Clayton by a steamboat line. It contains 2 large hotels. Pop. 587.

Allamoree, Iowa, a N. E. co., bounded N. by Minn., and E. by the Mississippi R., which separates it from Wis. Area, 650 sq. m. The surface is in part hilly and in part prairie. Extensive forests abound. The soil is rich. The chief prod. in 1880 were 535,674 bush. of wheat, 1,510,394 of corn, 628,387 of oats, 19,677 of rye, 100,769 of barley; also butter and pork. The Upper Iowa R. drains the N., and the Yellow R. the S. part of the co. Trenton limestone, excellent for building purposes, also magnesian limestone, underlie the greater part of the co. The S. W. part is crossed by the M.&St.P. R.R. Cap., Waukon. Val. of taxable prop. abt. \$5,500,000. Pop. 19,791 (of whom 5,650 for., and 37 colored).

—p. o. in above co.

Allamuchy, N. J., p. h. and tp., Warren co., 36 m. W. of Paterson. Iron is mined here. Pop. of tp. 648.

Allandale, Ga., p. o., Banks co.

Allapaha, or ALAPANA (al-lap'-ahaw), Ga., p. v. ♦ in Berrien co., 112 m. W. of Brunswick by the B. & A. R.R. It has several manuf. and a wkly. paper. Pop. 157.

Allapaha River, Ga., rises in the S. part of the State, flows S., and empties into the Suwanee, Fla. Length abt. 175 m.

Allatoona, Ga., p. v. and station in Bartow co., near Allatoona Pass, on the W. & A. R.R., abt. 41 m. N. of Atlanta. This v. was attacked by the Con-

federates under the command of Gen. French, Oct. 5, 1864, but after vigorous assaults, successfully resisted by the little Federal garrison commanded by Gen. Corse. The loss of the garrison was about 700 men—over one-third of the entire command; that of the Confederates was estimated at 2,000 dead or captured. Pop. 778.

Alleghan, Kan., p. o., Rice co.

Alleghan, Mich., a S. W. co., bounded W. by Lake Michigan, intersected by the Kalamazoo and drained by the Rabbit and Black Rs. Area, 830 sq. m. The surface is slightly undulating and heavily wooded. The soil along the rivers is a rich black alluvium. The chief prod. in 1880, besides lumber, were 1,116,778 bush. of wheat, 1,368,851 of corn, 360,334 of oats, 57,675 of rye, 12,762 of buckwheat, 28,323 of barley, 341,623 of potatoes, 171,800 lbs. of wool, 660,018 of butter, and 158,109 of maple sugar. Good limestone is quarried in the S. W. part of the co. Cap., Alleghan. Val. of taxable prop. abt. \$18,000,000. Pop. 37,806 (of whom 6,020 for., 408 colored and 120 Indians).

—p. v. ♦ cap. of above co., in Alleghan tp., on the Kalamazoo R., at the head of navigation, and on the Kalam. div. of the L. S. & M. S. RR., 25 m. N. of Kalamazoo, and 33 m. S. W. Grand Rapids. It is a shipping point for large quantities of lumber. It is supplied with water by the Holly system, and has a nat and a private bank, 4 wkly papers, a large public library, 10 churches, and various mills and factories. It is also an important shipping point for lumber. Pop. 2,296; of tp. 3,689.

Alleghany, another spelling for ALLEGHANY.

Alleghany, Cal., p. v. and mining camp in Forest tp., on Kanaka Creek, Sierra co., 9 m. from Downieville. Pop. 277.

Alleghany, Md., a W. co., bounded N. by Penn. and S. by Va., from which it is separated by the Potomac R. and its N. branch. It is drained by the Youghiogheny R. and several creeks. Area, 520 sq. m. The co. is traversed by the main Alleghany Mts. and several smaller ridges, and its surface is generally irregular and rocky, although there are several fertile valleys which afford excellent pasturage, and furnish a superior quality of butter and mutton. Limestone, sandstone and iron ore abound. Bituminous coal is extensively mined in the Cumberland district, the total prod. for 1880 amounting to 2,198,073 tons. The Chesapeake & Ohio Canal and the B. & O. RR. and P. & C. RR. intersect the co. The chief prod. in 1880 were 67,458 bush. of wheat, 206,949 of corn, 19,165 of oats, 11,386 of buckwheat, 51,649 lbs. of wool, 381,004 of butter, and 88,193 of maple sugar. Cap., Cumberland. Val. of taxable prop. abt. \$26,000,000. Pop. 38,012 (of whom 6,989 for., and 1,531 colored).

Alleghany, N. C., a N. W. co., bounded N. by Va., W. by New R. (a branch of the Kanawha), S. and E. by the Blue Ridge Mts. Area, 300 sq. m. The surface is generally mountainous. The soil moderately fertile. The chief prod. in 1880 were 10,291 bush. of wheat, 122,587 of corn, 19,365 of oats, and 17,638 of rye. There are copper mines in the co. Cap., Gap Civil. Val. of taxable prop. abt. \$1,100,000. P. 5,486 (of whom 2 for., and 518 colored.) —tp., Davidson co. Pop. 592.

Alleghany, N. Y., a W. S. W. co., bounded S. by Pa. Area, 1,050 sq. m. The Genesee R. and its tributaries drain the co., and also furnish water power for its numerous mills. The surface is hilly, and in the E. and W. parts rises to a table-land. A large portion of the co. is covered with dense growths of ash, pine, beech, sugar-maple, oak, and other woods. The soil is well adapted to pasturage. The chief prod. in 1880 were 158,128 bush. of wheat, 241,364 of corn, 985,938 of oats, 105,857 of buckwheat, 60,674 of barley. The co. contains many saw and

grist mills, and several tanneries. The Genesee Canal and the N. Y., L. E. & W. RR. run through it. Cap., Belmont. Val. of taxable prop. abt. \$26,000,000. Pop. 41,801 (of whom 3,182 for., and 376 colored).

—p. v. ♦ and tp., Cattaraugus co., on the Alleghany R., and on the W. branch of the N. Y., L. E. & W. RR., 61 m. E. S. E. Dunkirk, and 398 m. from New York. It has a wkly paper, a college, a Catholic convent, an academy, 2 hotels, and several manuf. Pop. 1,049; of tp. 4,044. See KNAPP'S CREEK and PARK VIEW.

Alleghany, Pa., a S. W. co. Area, 760 sq. m. The Alleghany and Monongahela Rs. unite in this co. to form the Ohio R., which runs 14 m. in the co.; also drained by the Youghiogheny and several creeks. The surface is hilly and broken and very picturesque. The soil of the S. E. part is very fertile. The chief prod. in 1880 were 355,470 bush. of wheat, 804,577 of corn, 922,045 of oats, 56,323 of rye, 18,598 of barley, 856,143 of potatoes, 364,937 lbs. of wool, 1,480,466 of butter, and 87,004 tons of hay. Cap., Pittsburgh, the second city of Pa. in manuf. interests and wealth, near which are considerable mines of bituminous coal, whose production in 1880 was 4,426,871 tons. Val. of taxable prop. abt. \$375,000,000. Pop. 355,759 (of whom 88,579 for., and 7,881 colored).

—a manuf. city in above co., on the Alleghany R., at its junction with the Monongahela, opposite Pittsburgh, and on the P., F. W. & C. RR. It is the S. W. terminus of the W. P. RR. Many persons doing business in Pittsburgh reside here, and the city is noted for the number of its elegant and beautiful houses. The Western Theological Seminary (Presbyterian), the theological seminary of the United Presbyterian Church, and the Alleghany Theological Institute are situated here. The city contains abt. 45 churches, a home for the Friendless, a House of Industry, an Orphan Asylum; the Western Penitentiary of Pa., a United States Arsenal, &c. It has water-works, street railways, a park of 100 acres, and a soldiers' monument; also 4 nat., 2 private, and 2 savings banks; 1 daily, 1 wkly, and 1 monthly papers; the Pittsburgh Locomotive Works, which employs abt. 400 men; 4 rolling mills, several large machine shops and foundries, 12 ale and beer breweries, a steel factory, a blast furnace, 5 cotton mills, &c. Val. of taxable prop. abt. \$20,000,000. Pop. in 1860, 26,702; in 1870, 53,180; in 1880, 78,680.

—tp., Blair co. Pop. 2,140.

—tp., Butler co., containing extensive coal mines. Pop. 2,287.

—tp., Cambria co. Pop. 1,431.

—tp., Westmoreland co. Pop. 2,050.

Alleghany, Va., a W. co., bordering on W. Va., bounded N. W. by the Alleghanies, and S. E. by Middle Mt. Area, 521 sq. m. A stream, issuing from a spring, has a fall of 180 ft., and proceeds, by a succession of cataracts, to Jackson R., which joins the Cowpasture on the E. border of the co., to form the James R. The Warm Spring Mts. and Peter's Mt. extend through the center of the co., which presents almost everywhere picturesque and captivating scenery. The soil in the valleys is very fertile. The chief prod. in 1880 were 28,832 bush. of wheat, 95,011 of corn, 34,981 of oats, 51,772 lbs. of butter, and 6,862 of tobacco. The Red Sweet Springs, in this co., are somewhat celebrated. Cap., Covington. Val. of taxable prop. abt. \$1,500,000. Pop. 5,586 (of whom 90 for., and 1,132 colored).

—(p. o. name ALLEGHANY STATION), v. in above co., on the C. & O. RR., abt. 5 m. E. of White Sulphur Springs.

Alleghany Bridge, Pa., a small p. v. in Eldred tp., McKean co., on the Alleghany R. ♦

Alleghany Furnace, Pa., a small h. in Logan tp., Blair co., near Altoona, containing important iron works. ✚

Alleghany Mountains, or ALLEGHANIES, a name sometimes used as synonymous with the Appalachian system of mountains. In a more restricted sense it is applied to the parallel ranges which traverse Pennsylvania, Maryland and Virginia, and form the most prominent features in the physical geography of those States. The general direction of these ridges is nearly N. E. and S. W., and their mean height abt. 2,500 ft. Among their highest summits are the Peaks of Otter, in Virginia, rising to 4,300 ft. above the sea. These ridges are remarkable for the parallelism of their direction and the uniformity of their outline and altitude, and enclose several beautiful and fertile valleys. The rocks of the Alleghanies are the Silurian and Devonian limestones and sandstones, and the group of strata called the coal-measures. See APPALACHIAN MOUNTAINS.

Alleghany River, Pa., rises in Potter co., Pa., makes a short circuit in N. Y., and returns into the former State. Flowing afterward in a S. S. W. direction through the hilly oil regions, it unites with the Monongahela at Pittsburgh, forming the Ohio. It is navigable for small steamboats 150 m. or more above Pittsburgh. It is over 460 m. long, and its waters are remarkably clear and pure.

Alleghany Springs, Va., p.h. and spa, in Montgomery co., abt. 3 m. from Shawsville, on the V. & T. RR., and 77 m. S.W. Lynchburg, is a popular resort for invalids and others. The springs are highly saline, and produce laxative, tonic, or alterative effects, according to the method of use. They are especially recommended for dyspeptics. Eight m. distant are the sublime Punchon Run Falls, and the scenery near is wild and picturesque.

Allegheny, another spelling for alleghany, frequently used in Pennsylvania.

Allemands', A.C., p.o., Guilford co.

Allemands, or DES ALLEMANDS (*daz d'Allemands*), *La.*, p.v. in St. Charles parish, 32 m. W. of New Orleans and on the B.D.A. and M.L.&T.R.Rs.

Alleman's, or ALLEMAN'SVILLE *Pa.*, p.v. in Gulch tp., Clearfield co., 20 m. N. of Altoona. Coal is found in the vicinity. Pop. 66.

Allen, Ark., tp., Pope co., Pop. 211.

Allen, Ill., tp., La Salle co., abt. 20 m. S. E. Ottawa. Pop. 1,016. See RAMSON.

—tp., McLean co., Pop. 1,291. See STAMFORD.

Allen, Ind., an E. N. E. co., bordering on Ohio. Area, abt. 650 sq. m. It is drained by the St. Mary and St. Joseph Rs., which unite at Ft. Wayne to form the Maumee, and by several smaller streams. The surface is almost level. The forests of black walnut, oak, hickory, &c., which formerly covered the most part of the co., have been in great part cleared off; lumber is, however, still exported. The soil is generally very fertile. The chief prod. in 1880 were 917,824 bush. of wheat, 1,331,237 of corn, 586,733 of oats, 153,060 of potatoes, 137,842 lbs. of wool, 669,104 of butter, pork, horses, and cattle. The Wabash and Erie Canal, the G. R. & I. RR., the P., Ft. W. & C. RR., and other lines, intersect the co. Cap., Fort Wayne. Val. of taxable prop. abt. \$42,000,000. Pop. 54,766 (of whom 9,182 for., and 205 colored).

Allentown, *Dak.*, p.o., Turner co.

Allentown, *N.J.*, a flourishing p.v. ♦ in Upper Freehold tp., Monmouth co., abt. 11 m. S.E. Trenton. It has a wkly paper. Pop. 1,010.

Allentown, *O.*, p.v. in German tp., Allen co., on Ottawa R., abt. 96 m. N.W. Columbus. Pop. 73.

Allentown, *Pa.*, a flourishing city, cap. of Lehigh co., pleasantly situated on an eminence on the W. bank of the Lehigh R., 51 m. N. by W. of Philadelphia, 36 m. N.E. Reading, and 90 m. N.E. Harrisburg by the P.&R.R.R. The beds of iron ore and anthracite, which are very extensive in the valley of Allentown, have given to that town a very great importance. It contains numerous iron-works, and has some fine public buildings, an academy, a theological seminary and a military institute. It is lighted by gas; the streets are wide, and the houses are built of brick and stone. The first house of Allentown was built by William Allen, in 1750, on a grant of 20,000 acres, received from William Penn; in 1812 it became the county town, and in 1838 its former name of Northampton was changed to Allentown. Its inhabitants are mostly of German descent. The city has 2 nat. banks, 2 savings banks, 3 daily and 6 wkly papers (of which last, 4 are in the German language). Pop. in 1860, 8,025; in 1870, 13,884; in 1880, 18,063.

Allenville, *Mo.*, p.v. in Hubble tp., Cape Girardeau co., 48 m. N.W. Columbus, Ky., by the St.L., I.M.&N.R.R. Pop. 122.

Alton, Ill., a beautiful city and river port, Madison co., on the left bank of the Mississippi R., 8 m. above its confluence with the Missouri, 20 m. below the mouth of the Illinois, 2 m. from Upper Alton, with which it is connected by a street railway, and abt. 24 m. N. of St. Louis. It is connected with Chicago, 280 m. N. E., by the C. & A. RR., and with other important points, by the I. & St. L. RR. and the St.L.,R.I.&C.R.R. It has a river front of nearly 2 m., and is built on irregular ground, which rises in the W. part to a height of 225 ft. Plaza Creek, which has its source in local springs, drains the city. Alton is laid out at right angles, the

main business houses occupying the streets parallel with and adjacent to the river. The residences are built upon the slopes of the hills; the elevated plateau of Middletown and on the bluffs overlooking the river. The business houses are handsome, substantial brick structures; while the many elegant and costly residences speak of the presence of wealth and refinement. The city is underlaid by deeply fissured, cavernous limestone, that furnishes a fine quality of lime and building stone, which, with coal obtained in the neighborhood and the products of the rich farming country surrounding the city, are the principal articles of export. The city is connected with the opposite bank, and with important points along the Mississippi R., by ferries and steamboats. Alton has 4 large flour mills, a tobacco factory employing 400 hands, a glass factory employing 450 hands, several saw and planing mills, a foundry, an organ factory, an important manuf. of plows, carriages, woollens, agricultural implements, &c. It is the seat of a Catholic bishop, of Shurtleff College (founded in 1836), and several other educational and benevolent institutions. It has 2 nat. banks, 2 daily and 4 wkly papers, a public library, &c. Pop. 8,978; o tp. 9,851. See NORTH ALTON.

Altoona, Pa., a city in Blair co., at the E. foot of

the Alleghenies and at the head of Tuckahoe valley, 117 m. E. of Pittsburgh, 131 m. W. by N. of Harrisburg, and abt. 237 m. W. of Philadelphia by the P. RR. The region in the neighborhood is remarkably picturesque, especially journeying to the W.; and some of the most wonderful triumphs of engineering are to be seen in the H m. covering the ascent of the mt., to reach the summit of which, double power is required on all trains, although engines are dispensed with on the descent. One notable feature on the road is the "horse-shoe bend" following the brink of a precipice by a very short curve. At the summit of the mt. the road runs through a tunnel 3,670 ft. long. The Penn. RR. Co. have their most extensive car factories and machine shops here. The city is supplied with water by hydraulic pressure. It contains abt. 20 churches, a high school, a public library, a convent, 3 daily, 7 wkly and 3 monthly papers; 1 nat., 1 private, and 1 savings bank; extensive manuf. of iron and lumber, &c. Pop. 19,716.

Alto Pass, Ill., p.v. in Ridge tp, Union co., abt. 40 m. N. of Cairo. Pop. 166.

Alturas, Idaho, a S. co., bounded N. by the Rocky Mts., which separate it from Montana, and S. by Snake R., and drained by the Malade R. and other streams. Area 19,180 sq. m. The surface in the N. part is mountainous and covered with forests; but, in the S. part, prairie land, which is fertile. Gold and silver are found in quartz rocks; the silver ore is particularly rich. Cap., Rocky Bar. Val. of taxable prop. abt. \$600,000. Pop. 1,433 (of whom 128 chinese).

Alturas, Cal., p.v. in Hot Springs and South Fork tps., cap. of Modoc co., near Goose Lake, and abt. 158 m. N. E. Reading. Pop. 148.

Altus, Ark., p.v. in Hogan tp., Franklin co., on the L. R. & Ft. S. RR., 5 m. E. of Ozark. Pop. 224.

Annapolis, Md., a city, cap. of the State and of Anne Arundel co., is beautifully situated on the S. bank of the Severn R., 2 m. from its entrance into Chesapeake Bay, 20 m. S. by E. of Baltimore, and 22 m. E. by N. of Washington, 40 m. by rail to either of these cities, and 30 m. by water (Steamboat) to Baltimore; lat. of the State House, 38° 58' N.; lon. 76° 29' W. The A. & E. RR., 21 m. long, connects it with the Washington branch of the B. & O. RR. Annapolis was formerly a port of entry, but its trade has been transferred almost entirely to Baltimore, and it is now chiefly distinguished as the seat of the State government and of the U. States Naval Academy. It contains a State House, governor's mansion, court-house, jail, a nat. and a savings bank, several oyster-packing houses, 2 hotels, 1 daily and 4 wkly papers, 6 churches, an Episcopal mission, colored Bethel, and Catholic college. It is also the seat of St. John's College, a State institution, founded in 1784. The naval academy

was established here in 1845. The grounds connected with it are very extensive, including an observatory which possesses a complete collection of the most perfect astronomical instruments, and a carefully selected library of 15,000 volumes. Two ships of war are attached to the institution during the summer months as practice ships and for sailing upon an ocean voyage. The harbor, or Annapolis Roads, is one of the finest in the country, there being a depth of 60 ft. in the channel up to Round Bay, in the Severn R., 7 m. from the city. The city has both gas and water-works. Providence, as A. was first called, was founded in 1649, but it did not get a charter until 1708, when it also received its present name in honor of Queen Anne. It has been the seat of government since 1689. Pop. 6,643.

Annapolis, Mo., p.v. in Union tp., Iron co., on Big Creek, 108 m. S. of St. Louis by the St. L., I. M. & S. RR. A mineral spring is here. Pop. 153.

Annapolis, O. (p.o. name STEPHEN SPRINGS), v. in Liberty tp., Crawford co., abt. 70 m. N. of Columbus. Pop. 350.

—p.v. in Salem tp., Jefferson co., abt. 125 m. E. N. E. Columbus. Pop. 131.

Annapolis Junction, Md., p.h., Anne Arundel co., 21 m. N. W. Annapolis, and 19 m. S. W. Baltimore. The A. & E. RR. joins the Washington branch of the B. & O. RR. at this point. Pop. 300.

Ann Arbor, Mich., a city, Washtenaw co., situated upon the Huron, about 38 m. W. of Detroit by the M. C. RR. The city, which is healthy and well built, is a place of considerable commercial importance, its chief manuf. being iron, wool and flour, while the trade in the prod. of the surrounding district is large and valuable. It is the seat of the university of Michigan, a liberally-endowed institution, founded in 1837, and at present containing 3 subsidiary colleges devoted to legal, medical and literary studies respectively, with a total attendance, in 1881, of 1,376 students. The college buildings are large and pleasantly situated, and the university possesses a library, an observatory, and a chemical laboratory. Ann Arbor has 10 churches, a nat. and a savings bank, 1 daily, 6 wkly, 1 semi-monthly and 2 monthly papers. It contains a valuable mineral spring. Pop. 8,061; of tp. 9,461.

Annapolis, W. Va., p.v. in Clifton tp., Grant co., on Platte R., abt. 67 m. W. of Madison. Pop. 60.

Annapolis, Ill., p.v. ✦ and tp., Henry co., 35 m. E. of Rock Island by the C., R. I. & P. RR. It has coal mines. Pop. 393; of tp. 1,287.

Anne Arundel, Md., a central co., on the W. shore of Chesapeake Bay, bounded N. by the Patapsco R., W. by the Patuxent, and partly drained by the South and Severn Rs. Area, 390 sq. m. Surface undulating and hilly. Soil fertile. The chief prod. in 1880 were 98,147 bush. of wheat, 692,611 of corn, 60,798 of oats, 16,394 of rye, 31,840 lbs. of wool, 193,994 of butter, and 4,441,010 of tobacco. Among its mineral resources are red sandstone, serpentine, and iron ore. The A. & E. R. and the B. & P. RRs. traverse the co. Cap., Annapolis. Val. of taxable prop. abt. \$11,000,000. Pop. 28,526 (of whom 829 for., and 13,879 colored).

Annetta, Tex., p.h., Parker co., abt. 20 m. W. of Fort Worth.

Anthony's Nose, N. Y., or, as more commonly called, the Nose, is situated in the W. part of Montgomery co., on the N. branch of Mohawk R., and is on the extremity of the hill or mountain called the "Klips." It slopes toward the river from an elevation of abt. 500 feet, bearing a great resemblance to a nose some 300 or 400 feet long, as seen from the river, at the N. entrance of the Highlands. There is another projection of the same name, but less remarkable, opposite the site of old Fort Montgomery, near the S. entrance of the Highlands, below West Point.

Anthony Place, Fla., p.o., Marion co.

Antie Grim Creek, Pa. and Md., rises in S. E. part Franklin co., in the former State, flows S. across boundary line into the latter, and empties into the Potomac R., abt. 7 m. N. of Harper's Ferry. It was the theatre of one of the bloodiest battles of the civil war, Sept. 17, 1862, between the Union troops, under Gen. McClellan, and the Confederates, under Gen. Lee, in which the former lost 11,426 killed and wounded, but remained master of the field, the Confederates retreating to the right bank of the Potomac in the nights of 18-19, without encountering resistance.

Apopka, Fla., p.v. † Orange co., near a lake of the same name, abt. 90 m. S. of St. Augustine.

Apostles' Islands, of the TWELVE APOSTLES, 17 is., a group of 27 islands in Lake Superior, 70 m. W. of Ontonagon. The principal islands are Ile au Chêne, Madeline, Bear, Stockton, and Outer Island. They are covered with fine timber, and their cliffs have been worn into strange forms by the action of the waves. The land area is estimated at 200 sq. m. Brown sandstone is quarried and exported from the islands. La Pointe, on Madeline Island, is the cap. of Ashland co. This place was settled by the French in 1680. These beautiful islands have several Jesuit missions, one of which was established in 1658.

Appalachee Bay, Fla., a large open bay on the S.W. coast, in the Gulf of Mexico, having a breadth of abt. 45 m., and an extent inland of abt. 20 m. There is a wide passage from the bay, 10 ft. deep, leading to the town of St. Mark's, which furnishes excellent anchorage ground.

Appalachee Indians, a once powerful tribe of W. Florida. They were conquered and converted to Christianity by Spanish missionaries, but the oppression and cruelties of the colonial authorities, together with the destructive invasions of English colonists and Indians from Carolina, greatly diminished their numbers. Soon after 1700 a part removed to what is now Alabama, and the tribe soon ceased to exist.

Appalachee River, Ga., has its source in Gwinnett co., flows S.E. along the N.E. border of Walton and Morgan cos., and empties into the Oconee R. abt. 5 m. E. of Buckhead, after a course of abt. 75 m.

Appalachian Mountains, the general name given to a vast system of elevations, partly in Canada, but mostly in the U. States, extending for 1,300 m. from Cape Gaspé, on the Gulf of St. Lawrence, S.W. to Alabama. The whole system may be conveniently divided into three great sections: the *Northern*, from Cape Gaspé to New York; the *Central*, from New York to the valley of the New R.; and the *Southern*, from the New R. onward. The first of these includes the Adirondacks, the Green Mts., and the White Mts., and the irregular elevations toward the N.; the central contains a large portion of the Blue Ridge, the Alleghanies proper, and a great number of lesser ranges; and the southern consists of the prolongation of the Blue Ridge, the Black Mts., the Smoky Mts., and the Unaka Mts. The whole range, and especially the central portion, is remarkable for the parallelism of the various ridges, the uniform height of the summits in the same part of the chain, the absence of a central axis of elevation, and the presence, instead, of a central valley or axis of depression. The typical arrangement of the system—most distinctly visible in the central division—might be represented in diagram thus: first, a stretch of country, gradually sloping, with slight undulations and irregularities, upward from the Atlantic, and attaining a height of 300, 500, or 1,000 ft.; then, a lofty ridge rising like a rampart, and succeeded by other ridges separated from each other by longitudinal valleys; next, the great central valley or axis of depression; and lastly, a new succession of ridges breaking off into table-land with transverse valleys and a gradual decrease of elevation. The Atlantic slope varies in breadth from 50 m., as in New England, to 200 m., in the S., and in the neighborhood of New York has almost altogether subsided. The central valley may be traced from Lake Champlain in the N., along the course of the Hudson, down through the Cumberland Valley, in Pennsylvania, and the Great Valley of Virginia and Tennessee: it varies in breadth from 15 m. in the N. to 50 or 60 m. in the S. The elevation of the valley rises toward the S. in keeping with the elevation of the neighbor-

ing ranges. None of the summits of the system reach the region of perpetual snow, but a large number of them attain a considerable altitude. In the Adirondacks the highest point, Mt. Tahawus or Mt. Marcy, reaches 5,379 ft. In the White Mts., Mt. Washington, in the main chain, has a height of 6,288 ft.; Mt. Adams, 5,794; Mt. Madison, 5,365; Mt. Jefferson, 5,714; Mt. Clay, 5,553; Mt. Monroe, 5,384; Lafayette, 5,290; and a great number of summits attain a height of more than 4,000 ft. In the Green Mts. the highest point, Mt. Mansfield, is 4,430 ft.; Lincoln Mt., 4,078; Killington Peak, 4,221; Camel Hump, 4,088; and a number of other heights upward of 3,000 ft. In the central division the hypsometric surveys are imperfect, but the general elevation of the higher chains is from 1,000 to 2,500 ft. As we approach the S., the complexity of the system and the altitude of the individual mts. increase together, and the chains which have run parallel and distinct begin, as it were, to gather and fold themselves into an irregular coil. The peaks of Otter, in Virginia, are abt. 4,000 ft. high; and in the Black Mts., the Black Dome (Clingmann), which is the culminating point of the whole system, attains the height of 6,707 ft.; Balsam Cone (also known as Guyot, from the hypsometrical explorer of the region) has 6,671; Black Brother, 6,619; and Mt. Hallback (Sugarloaf), 6,403; besides a large number of summits varying from 3,000 up to 6,000 ft. In the Smoky Mts. we have Clingmann's Dome, 6,660 ft. high; Guyot, in Tennessee, 6,636; Mt. Alexander, 6,447; Mt. Leconte, 6,612; Mt. Curtis, 6,568; several others upward of 6,000, and a great many of more than 5,000. In the whole Appalachian system, Lake Champlain is almost the only lake of any importance, but a multitude of rivers, and some of them of considerable size, find their sources in its recesses. The watershed does not lie along any continuous axis, but shifts its position several times along the line, in the N. it is found in a stretch of country, called the Height of Land, that lies between the White and the Green Mts., and gives birth to the Connecticut and a number of smaller streams; next, it is formed by the Adirondack Mts., which supply the source of the Hudson R.; and further S. by the high plateaus of Pennsylvania and New York, which give origin to the Delaware and the Susquehanna, with their numerous tributaries. These rivers, flowing S. and E., have thus to cut their way through the successive ridges of the whole Appalachian range. The watershed is next situated in the Alleghanies proper, which send a number of alluents to the Ohio on the W., and give rise to the James R. on the E.; and lastly, it runs along the terminal cluster or coil composed of the Black, the Smoky, and the Unaka Mts. Here a tributary of the Ohio, called the Red R., a number of the alluents of the Tennessee, and various less important streams, have their sources. The Appalachian Mts. are a vast storehouse of mineral wealth. Magnetite, hematite, limonite and other iron ores are found in great abundance. The first is best exhibited in what is frequently called the Champlain Iron District, where it is now largely manufactured, and it also attains remarkable development in various parts of New York and New Jersey. The extensive deposits of this ore in Virginia, N. Carolina, and Georgia, have hitherto been turned to comparatively little account. It is frequently contaminated by phosphate of lime, sulphur and titanium. Red hematite is found in New York, Pennsylvania, Tennessee and Georgia, and is usually known as Clinton ore, from a place of that name in Madison co., New York, while in Tennessee it is called Dystone ore. It is of great commercial importance, though, on account of the amount of phosphorus which it contains, it is worthless for the manufacture of steel. Limonite, or brown hematite,

which, from its fusible character, is usually worked along with the more crystalline ores, occurs in a series of beds all along the banks of the Appalachians, from Maine to Georgia. The earthy carbonate of iron—"clay ironstone ore," "shell ore," "kidney ore"—is found in most parts of the system in connection with the carboniferous strata, and has been very largely manufactured. In the N. district alone—that is, in the E. part of New York, in New Jersey, and E. Pennsylvania—the number of furnaces in 1880 was 219, and the gross prod. of iron for that year 4,458,828 tons, or abt. 62 per cent. of the entire prod. of the U. States. This abundance of ore would have been almost useless had it not been for the equally abundant supplies of fuel; and the coal measures are among the most extensive in the world, the bituminous coal alone covering an area of 56,000 sq. m., without counting the unrivalled beds of anthracite in Pennsylvania and New York, which cover an area of between 400 and 500 sq. m. While the supply of gold, silver, copper and lead is of comparatively no importance, marble, limestone, fire-clay, gypsum and salt are extremely abundant. Many of the ranges are richly covered with forest, and yield large quantities of valuable timber, consisting chiefly of sugar maple, white birch, beech, and ash, in the N., and oak, cherry-tree, white poplar, white and yellow pine, toward the S. The dark foliage of the pines, balsam firs, hemlock trees, and cedars, gives color and name to many of the districts. Rhododendrons, kalmias, azaleas, and other flowering shrubs, often grow in almost impenetrable thickets, and in some parts the botanist is at once delighted and bewildered by the profusion and variety of the smaller plants. Bears, panthers, wild cats and wolves haunt the forests in large numbers.

Appalachicola, Fla., a W. river formed by the union of the Chattahoochee and Flint Rs., at the S. W. angle of Georgia, flows S. abt. 75 m. into St. George's Sound, through an estuary called Appalachicola Bay. It is navigable for steamboats through its whole course, and with its branches is supposed to drain not far from 20,000 sq. m. The tide runs up 60 m. There is a fine light at the N. W. end of St. George's Island to indicate the entrance of the bay.—town, port of entry, cap. of Franklin co., on the Gulf of Mexico, on a bluff at the mouth of Appalachicola R., 65 m. S. W. Tallahassee. Large quantities of cotton were once shipped here. At present there is a trade in timber and fish. Pop. 1,336.

Appalaga, Fla., p. o., Gadsden co.

Appanoose, Ill., p. tp., Hancock co. Pop. 846. See NIOTA.

Appanoose, Iowa, a S. co., adjoining Missouri. Area, 500 sq. m. It is drained by Chariton R. and several creeks, which furnish abundant water power. Surface, undulating prairie, with timbered land along the water courses. Soil fertile. The chief prod. in 1880 were 65,793 bush. of wheat, 2,410,620 of corn, 643,704 of oats, 82,207 of potatoes, 103,640 lbs. of wool, 585,045 of butter, and 39,930 galls. of sorghum molasses; also live stock. Extensive beds of coal are found. The C., R. I. & P. RR. and the M., I. & N. RR. connect at the cap., Centerville. Val. of taxable prop. abt. \$5,000,000. Pop. 16,636 (of whom 513 for., and 73 colored).

Appanoose, Kans., p. o., Franklin co.

Applebachsville, Pa., p. h., Haycock tp., Bucks co., abt. 40 m. N. of Philadelphia. Pop. 96.

Apple Creek, Ill., a small stream, which falls into the Illinois R., in Greene co.

Apple Creek, Mo., a stream in Henry co., emptying into the Grand R., a tributary of the Osage R.—Another rises in S. part of Perry co., flows S., then E. into the Miss. R., abt. 1 m. above Birmingham.—tp., Cape Girardeau co. Pop. 2,924. See APPLETON and OAK RIDGE.

Appledore Island, Me. See ISLES OF SHOALS.
Applegate, Cal., p.h., Placer co., abt. 45 m. N. E. Sacramento by C. P. RR. Limestone is quarried here, and there are extensive manuf. of lime. ✦

Applegate, Oreg., p. tp., Jackson co., on Applegate Creek, 10 m. S. W. Jacksonville. Pop. 365.

Applegate Creek, Oreg., rises in S. part of Jackson co., flows N. W. into Josephine co., where it empties into Rogue R.

Apple Grove, Va., p.v., Louisa co., abt. 56 m. N. W. Richmond. ✦

Apple Grove, W. Va., p.o., Mason co.

Apple River, Ill., crosses the N. W. part of the State, passes through Jo Daviess co., and falls into the Mississippi, 20 m. below Galena. It is a rocky and rapid stream, furnishing many good mill sites. Length 45 m.

—p.v. ✦ and tp., Jo Daviess co., 40 m. N. E. Dubuque by the I. C. RR. It has a bank and a graded school. Pop. 627; of tp. 1,036.

Apple River, Wis., rises in Polk co., and flows S. W. into the St. Croix R. Length 70 m.

—p. tp., Polk co. Pop. 412.

Appleton, Ark., p.v., Pope co.

Appleton, Me., p.v. and tp., Knox co., on George's R., 30 m. E. of Augusta. It has several lumber mills. Pop. of tp. 1,368.

Appleton, Minn., p.v. ✦ and tp., Swift co., on Pomme de Terre R., 24 m. S. W. Benson. Pop. 400; of tp. 632.

Appleton, Mo., p.v., Cape Girardeau co., 86 m. S. E. St. Louis. Pop. 100.

—tp., St. Clair co. Pop. 1,983. See APPLETON CITY.

Appleton, O., v. in Bennington tp., Licking co. Pop. 60.

Appleton, S. C., p.o., Barnwell co.

Appleton, Tenn., p.o., Lawrence co.

Appleton, Wis., a city, cap. of Outagamie co., in Grand Chute tp., near Fox R., and 30 m. from its mouth, 5 m. N. of Lake Winnebago, 100 m. N. W. Milwaukee by the C. & N. W. RR. The rapids known as the Grand Chute, have here a descent of abt. 30 ft. in a distance of $\frac{1}{2}$ m. The city has 2 nat. banks, 4 wkly and 1 monthly papers, many flour, paper, saw and woolen mills, and various other manuf. It is the seat of Appleton Collegiate Institute and Lawrence University. Pop. 8,005.

Appleton City, Mo., p.v. ✦ St. Clair co., 59 m. S. W. Sedalia by the M., K. & T. RR. It has a bank and 1 wkly paper. Pop. 1,034.

Apple Tree, Ky., p.o., Breathitt co.

Apple Valley, Ga., p.o., Jackson co.

Applying, Ga., a S. E. co., bordering N. and E. on Altamaha R., and drained by the affluents of the Santilla; area, 1,080 sq. m. The surface is level and sandy. The chief prod. in 1880 were 56,573 bush. of corn, 31,594 of oats, 35,149 of sweet potatoes, 53,801 lbs. of rice, 14,772 galls. of molasses, and 379 bales of cotton. Cap., Bayley. Val. of taxable prop. abt. \$903,000. Pop. 5,275 (of whom 18 for., and 1,193 colored). —p.v., cap. of Columbia co., 30 m. N. W. Augusta. Pop. 100.

Appomattox, Va., a river which rises in Prince Edward co., and after flowing E. 120 m., unites with James R. at City Point. It is navigable for vessels of 100 tons to Petersburg, 14 m. from its mouth, and for vessels of 4 or 5 tons to Farnville, 90 m. further, by means of a canal around the falls at Petersburg.

—a co. in the S. central part of the State, bordering N. W. on the James R. Area, 280 sq. m. The surface is diversified and covered with forests; the soil is fertile. The chief prod. in 1880 were 37,974 bush. of wheat, 149,487 of corn, 50,438 of oats, and 1,965,937

lbs. of tobacco. Cap., Appomattox Court-House, or Clover Hill. Val. of taxable prop. abt. \$1,500,000. Pop. 10,080 (of whom 3 for., and 4,927 colored).

Appomattox Court-House, Va., p.v., cap. of above co., 26 m. E. of Lynchburg by the A., M. & O. RR., Appomattox Station being 3 m. distant from the village. Here, on the 9th of April, 1865, was discussed, settled and signed, between General Grant and General Lee, the capitulation by which the latter surrendered the Confederate army of Northern Virginia, an event which put an end to the civil war. Pop. 100.

Apponaug, R. I., a v. in Warwick tp., 10 m. S. of Providence by the N. Y., P. & B. RR. It is better known as Warwick, which is the p.o. name. Pop. 900.

Apponegansett, Mass., p.o., Bristol co.

Appoquinimink, Del., a hundred of New Castle co. It includes several villages, and is so named after a small creek which flows E. into Delaware Bay. Pop. 2,351.

Ap tos, Cal., p.o., Santa Cruz co.

Aranasas, Tex., a co. bordering on the Gulf of Mexico, and watered by a small river of the same name which empties itself into Aransas Bay. Area, 440 sq. m. Cap., Roekport. Pop. 996 (of whom 165 for., and 79 colored). *Aransas Bay* is about 20 m. long; average breadth 6 m. It has for principal entrance Aransas Pass, in lat. 27° 52' N., lon. 97° 3' W. —p.o., Bee co.

Aransas Pass Light-House, Tex., p.o., Aransas co.

Arapahoe, Col., an E. co., mountainous in its W. part, while its E. portion consists mostly of a barren plain. Area, 5,000 sq. m. The K. P. RR. passes through it, and terminates at Denver, and is connected by a branch from that city with the U. P. at Cheyenne. Cap., Denver, which is also the cap. of the territory. The chief prod. in 1880 were 70,231 bush. of wheat, 16,835 of corn, 36,618 of oats, and 21,578 of barley. Val. of taxable prop. abt. \$7,000,000. Pop. 58,645 (of whom 9,292 for., 1,081 colored, 1 Indian, and 238 Chinese).

Arapahoe, Kan., an unorganized S. W. co., consisting of an undulating prairie, partly drained by the Cimarron R. Area, 580 sq. m. Pop. 3.

Arapahoe, Neb., p.v. ✦ and precinct, Furness co. Pop. 470; of precinct 1,130.

Arapahoe Peak, Col., a mountain in lat. 40° 1' N., lon. 105° 39' W. Height, 13,520 feet.

Ararat, or PILOT MOUNTAIN, N. C., in Surry co., between the Ararat and Dan Rs. It is of a pyramidal form and $\frac{1}{2}$ m. high, and its top is a plateau one acre in extent, on which is a gigantic rock 300 feet high.

Ararat, Pa., p.v. and tp., Susquehanna co., abt. 20 m. N. of Carbondale. Pop. of tp. 639.

Ararat, Va., p.o., Patrick co.

Arastella, Kan., p.v., Jewell co., 15 m. S. of Jewell Centre. Pop. 75.

Arba, Ind., p.h. in Green Fork tp., Randolph co., 15 m. N. of Richmond. Pop. 250.

Arizona, a territory, bounded N. by Utah, E. by New Mexico, S. by Mexico, and W. by California and Nevada. According to the Act creating it a territory in 1863, Arizona comprises all the lands of the U. States formerly belonging to New Mexico, extending from W. lon. 109° to the California line. Since then, however, the N.W. corner has been ceded to Nevada; area, 112,920. The territory lies in the basin of the Colorado R., which enters in it abt. 37° N. lat., and forms its western boundary southwards from 36°. In the north there is an extensive but barren plateau, with an average elevation of 7,000 ft. through which the Colorado cuts its way, and forms one of the most remarkable gorges in the world, the length being abt. 300 m., and the perpendicular walls reaching heights of from 3,000 to 6,000 ft. South of this plateau is the valley of the Colorado Chiquito (Little Colorado, or Flax R.), which joins the Colorado in 36° 15' lat. N., and 113° lon. W., while further S. the ground rises into another plateau, the main portion of which is known as the Mogollon Mts. In this district the country is reported to be beautiful and fertile, the mountains covered with noble pine trees, and the valleys clothed with rich mezquite grass. Further S., again, is the basin of the Gila, with its numerous tributaries, obliquely crossed by detached prolongations of the Sierra Madre of Mexico. The mountain ranges run parallel from the N.W. to the S.E. The highest peaks are Mt. San Francisco, more than 12,000 ft. high, and Bill Williams Mt. South of these are the Juniper Mts., a chain of low, rolling hills. Eastward are the Black Hills, rugged and steep, and a favorite stronghold of the hostile Indians. The inhabitants of Arizona are mostly Indians. Of these 4,300 Pinas and Maricopas occupy a reservation of 64,000 acres on the Gila R.; 4,000 Papagoes, a wandering tribe in the S.E. part of the territory, have no grounds allotted them; 4,000 Mohaves have 75,000 acres on the Colorado R.; 2,000 Yumas live near the mouth of the Colorado, but belong to the Mohawk reservation; while 1,500 Hualapais and 8,000 or 12,000 Yavapais and Apaches, without set-

tled habitations, live in a state of continual warfare with their neighbors. Owing to the savage temper of the Apaches the N. and N.E. section of the territory are not fully explored. The territory must for a long time depend upon the development of its mining advantages, and these are to be found in the southern part, where, owing to sandy, arid wastes, agriculture cannot flourish. The most valuable mining district has the suggestive name of Tombstone, but it is wonderfully rich in silver. Another famous mining centre is in Pioneer district, the Silver King mine being the best for its yield and facilities in working of any in the territory. While the earth in this region is loaded with silver, it should also be remembered that at Clifton lies the biggest deposit of pure, superior copper in any part of the world. Its supply is believed to be almost without limit, and it is ready for the markets of the world, only awaiting the simplest handling. The Tip-Top mines in the Bradshaw district are now known to be rich and very profitable. Ross Browne, in 1868, attributed the want of success in the mines to the comparative inaccessibility of the territory, which was without seaports or finished lines of overland travel; also to trouble made by Indians, lack of water for their working, and the refractory character of the ores of the lodes then opened. These conditions are fast being improved. Besides the lodes of gold and silver on nearly all the streams, iron, platinum, quick-silver, and coal exist in different parts of the territory. For the year 1882 the total yield of gold was \$1,060,000; of silver \$7,300,000.—In the country bordering on the Santa Cruz a large quantity of land can be made productive without irrigation, but agriculture must be almost profitless in the southern part for want of streams of water. The grazing lands are about three-quarters of the entire area of 55,000,000 acres, and of irrigable lands there are abt. 1,000,000. The Colorado desert lies below the bed of the river, and for 150 m. has a soil of marl and shells, needing only moisture to insure fertility. The vegetable productions are iron-wood, mesquite, cotton-wood, sycamore, ash, oak, willow, walnut, prickly pears, cactus, aloe, artemisia; and under cultivation, grapes, figs, oranges, lemons, tomatoes, tobacco, Indian corn, and the other cereals. Much of the land produces two crops in the year. The chief prod. for the census year 1880 were 36,246 lbs. of corn, 189,527 of wheat and 239,051 of barley. Live-stock on farms in the same year consisted of 6,798 horses, 891 mules and asses, 982 working oxen, 9,156 milch cows, 34,842 other cattle, 76,524 sheep, and 3,819 swine.—The recent completion of a line of railway from the Atlantic to the Pacific, via the Southern route, places Arizona upon a great national highway which passes entirely through its southern part and brings it within four or five days' time of the city of New York.—The territory is divided into 10 counties, viz.: Apache, Cochise, Gila, Graham, Maricopa, Mohave, Pima, Pinal, Yavapai, and Yuma. The principal towns or villages are Florence, Globe, Phoenix, Prescott (the cap.), Tombstone, Tucson, and Yuma.—The governor and other executive officers and the judges of the Supreme Court, are appointed by the President of the U. States. The people elect members for the legislature and a delegate to Congress.—Arizona is a part of the territory obtained from Mexico by the "Gadsden Purchase," in 1853, for ten millions of dollars, and was organized as a territory, Feb. 24, 1863. Great losses were inflicted upon the early settlers by the nomadic Apaches, whose depredations, down to the present time, have seriously retarded the development of the country. Pop. in 1870, 9,658; in 1880, 40,440 (of whom 28,292 males, greatly exceeding the females, 12,238; 24,391 natives and 16,049 foreigners—chiefly Mexicans; 35,160 whites, 155 colored, 1,632 Chinese, and 3,493 taxed Indians).

Arkadelphia, *Ark.*, p. town, cap. of Clark co., in Caddo tp., on Ouachita R., 65 m. S. W. Little Rock by the St. L., L. M. & S. RR. (Arkansas div.). It has a private bank and a wkly paper. Pop. 1,506.

Arkansas, a tribe of Indians, allied by language to the Dakotas, formerly residing on the Ohio. Like the northern Dakotas, they appear to have been once divided into several bands or minor tribes. Driven from their old haunts by the Illinois and other Indians, they went southward and became the constant and powerful allies of the French of Louisiana. They number at present some 200, and live in the Indian Ter. They are now generally called *Quapaw*.

—a S. W. river, the next largest tributary of the Mississippi after the Missouri, rises in the Rocky Mts. W. of the South Park, in lat. 29° N., lon. 106° W., at an elevation of 10,000 ft. above sea level. It flows E. through Colorado to near the center of Kansas, and thence generally S. E. through the Indian Ter. and the State of Arkansas to its junction with the Mississippi at Napoleon, 255 m. (direct) above New Orleans. Its whole length, including its curves, is over 2,000 m. to its extreme source. In the summer it pours a broad, deep stream from the mountains upon the arid plains through which it passes, which so absorbs its waters that in the dry season it can be passed, many hundred m. below the mountains, without reaching as high as the knees. The Great Canadian Fork enters it on the S. side, and is its largest tributary. It is so impregnated with salt in some parts as to be unfit for drink. During the periodical swell it is navigable nearly to the Rocky Mts., and at other times for 600 m. above its entrance into the Mississippi. The navigation is unobstructed by rocks, shoals or rapids. The soil on its borders in some of the lower parts is fertile; in the upper parts it is sterile. For 30 or 40 m. from its mouth, which is 300 yds. wide, it passes through an inundated forest.

—a S. W. State, situated between lat. 33° and 36° 30' N., and lon. 84° 45', and 94° 40' W.; area, 53,045 sq. m. It is bounded N. by Missouri, E. by Tennessee and Mississippi, from which it is separated by the Mississippi R., S. by Louisiana, and W. by the Indian territory. It belongs to the great basin of the Mississippi, being watered by that river and by several of its main tributaries, which are all more or less navigable. Of these the principal are the St. Francis, in the northeast; the White R. with its affluents, the Cache, Little Red, and Black Rs. in the N.; and notably the Arkansas, which, entering the State at Fort Smith, traverses it in a S. E. direction until it joins the Mississippi at Napoleon. The S. part of the State is watered by the Washita in the E., and by a bend of the Red R. in the W. The E. part of the State, bordering on the Mississippi, is low and swampy, and is annually overflowed. Westward the country gradually attains a greater elevation, passing off into hills and undulating prairies, which lead up to the Ozark Mts., beyond which, again, an elevated plain stretches towards the Rocky Mts. The Ozark Mts., do not exceed 2,000 ft. in height, and the only other great elevations are the Black Hills and the Washita Hills. In the district N. of the Arkansas R., the three leading geological formations are the "mill-stone grit, with its associate shales and conglomerate; the subcarboniferous limestone and its associate chert, shales, and sandstones; and the magnesian limestones, and their associate sandstones, calciferous sandrocks

and chert, belonging to the lower Silurian period."

The mineral products are reported to be very considerable, "including zinc, manganese, iron, lead, and copper, marble, whet and hone stones, rock-crystal, paints, nitre-carbide, kaolin, granite, freestone, limestone, marls, greensand, marly limestones, grindstones, and slate." The zinc ores are said to compare very favorably with those of Silesia, while the argentiferous galena produces a high average percentage of silver. Of coal, anthracite and lignite, there are abundant supplies. A great number of mineral and thermal springs occur in various parts of the State, the most remarkable and most frequented groups lying to the S. of Arkansas in Hot Springs co. The heat of several attains 146° or 148° Fahr. Among what are called natural curiosities may be mentioned the sandstone dam across Lee's Creek in Crawford co., the Mammoth Spring in Fulton, which is supposed to have underground connection with Howel's Valley in Missouri, and is said to pour forth its water "at the rate of 8,000 barrels per minute," the Bee Rock in White co., and the crystal-line productions of Magnet Cove.—A very large portion of eastern Arkansas is as yet covered with virgin forests, in which are to be found vast quantities of valuable timber, such as the oak, walnut, cypress, ash and poplar; in the western portion, pine, oak, walnut, cherry and cedar, besides an infinite variety of other timber possessing local value. The eastern or level portion of the State is well adapted to the growth of cotton, corn and oats. Every variety of vegetables common to this latitude is produced. Cotton is the principal crop grown in this section, and in quality of fibre, or in yield per acre in quantity, is surpassed by none of the cotton-producing sections. At the fairs at St. Louis and Memphis cotton produced here has ever carried off the premium. The yield per acre is from 1½ bales to ¾ of a bale of 500 pounds of lint cotton. Corn is also successfully grown in this section, yielding from 20 to 60 bushels per acre. Oats yield from 20 to 50 bushels. In this region the small fruits, such as the strawberry and raspberry, as well as the peach, plum and early varieties of apple, are successfully and profitably grown, finding a market for the most part at St. Louis. The Irish and sweet potatoes, as well as the turnip, yield large returns. Portions of this section of the country seem to be the home of the grape from the infinite number, varieties and excellent quality of many of those growing wild over the whole face of the country. The western portion, from its elevation as well as from the component parts of its soil, is adapted to the growth of all the cereals grown in this or even N. of this latitude. Corn, wheat, oats, tobacco and the various cultivated grasses, such as timothy, red top, berds-grass and clover, are successfully grown. The yield of corn is from 25 to 75 bushels, wheat from 12 to 30 bushels, oats from 30 to 60 bushels per acre. Timothy yields from 2 to 3 tons per acre. In this section the apple, pear, plum and cherry, grow to perfection, unsurpassed in form or flavor. This section of the State in the beauty of its scenery, the purity of its air, with its numberless cool, sparkling springs and pellucid brooks, and salubrity of its climate, will compare favorably with any part of the U. States.—Wild game, consisting of bears, deer, turkeys, ducks, prairie-chickens, and quail, is abundant and the rivers, lakes, and the bayous are well stocked with fish, among which are pickerel, black bass, buffalo, and catfish, the latter sometimes weighing 150 pounds. In the bayous and lakes, and in the Red, Ouachita, and Arkansas Rs., the alligator occasionally makes its appearance, though less abundant than in Louisiana and Texas, serpents and other reptiles are plentiful in the lowlands, and the rattlesnake and moecassiu are found in the hills.—The

product of each principal crop for the census year 1880 was as follows:

Products.	Quantity Produced.	Average Yield per Acre.	Number of Acres.	Value.
Indian corn. bush	22,432,800	24	934,700	\$13,011,024
Wheat.....do.	1,384,000	8	173,000	1,430,830
Rye.....do.	42,900	11	3,900	33,039
Oats.....do.	1,603,120	23.2	69,100	737,425
Potatoes.....do.	696,600	66	8,100	647,828
Hay.....tons	21,800	1.35	16,148	307,330
Cotton.....lbs	323,812,500	275	1,177,500	32,281,250
Total.....			2,382,448	\$48,604,846

In 1880 the State had 146,333 horses, 87,082 mules and asses, 25,444 working oxen, 249,407 milch cows, 433,392 other cattle, 246,737 sheep, and 1,565,098 swine. There were in 1870, 49,359 farms, averaging 154 acres each; and 94,433 in 1880, averaging 145 acres each.—This state has no direct foreign commerce, but large quantities of cotton, corn, hides, wool, lumber, etc., are exported through New Orleans. But little attention has been given to manufacturing. The census of 1880 gives 1,292 establishments, with an aggregate capital of \$2,953,130; hands employed, 4,557; wages paid, \$925,353; value of materials, \$4,392,080; value of products, \$6,756,159.—Arkansas is still one of the most backward States in educational facilities. The public school appropriations amount to only \$205,000 per annum, being considerably less in proportion to the school population than is spent by any other State. Congress has granted over 1,000,000 acres of land to Arkansas for school purposes. In some sections the State fund is supplemented by liberal local levies. Considering the facts that the public school system was not established until 1868, and that in 1870 only 75 per cent. of the adult population could read and write, substantial educational progress is being made. The penitentiary, the institute for the blind and the deaf mute institute are all located at Little Rock. The State Industrial University, at Fayetteville, offers 4 years' free instruction in its preparatory and collegiate departments to 230 students appointed by county judges and to 237 in its normal department. The other institutes for superior instruction are, Arkansas College at Batesville, Cam Hill College at Boonsboro, Judson University at Judsonia, and St. John's College at Little Rock. The last statistics attainable report 1,181 libraries in the State, 1,371 church organizations, and 1,141 edifices.—In 1882 there was 1,041 m. of railroad in operation, and there was in contemplation a great extension of railroad facilities, which will contribute largely to the material development of Arkansas.—The financial troubles of Arkansas date from its first erection into a State in 1836. A State bank was organized, and authorized to issue \$2,000,000 of bonds, and further credit was obtained by means of a real estate bank, whose \$1,500,000 of bonds were guaranteed by the State and secured by the public lands. Both institutions suspended payments in the second year. This was the commencement of the State debt, the unskillful management of which has ever since impeded the progress of the State.—The State debt matured in 1862. Since the restoration of self-government in 1869 the weight of public sentiment has favored the evasion of the vast liabilities which it would still tax all the resources of the State to discharge in full. The debt contracted in waging war against the Federal Government was declared void. The levee bonds

were decided to be unconstitutional by the Supreme Court in 1878, and all the railroad-aid bonds have since been declared by the same court to have been illegally issued. The vote on the Fishback amendment, which repudiates the bulk of the debt of Arkansas, was about 61,000 for, to 41,000 against. It was declared not carried, because it lacked 4,000 of a majority of all the votes cast. The liabilities, considered not binding by so large a proportion of the citizens of the State, consist of abt. \$2,000,000 of levee bonds, \$5,000,000 of railway-aid bonds, and other disputed liabilities, aggregating abt. \$4,000,000. There is an admitted debt amounting to some \$5,000,000, over half of which is funded. The settlement of the debt question in a way which shall be understood to be final, whether by the acknowledgment of the entire debt, or the repudiation of a portion of it, would probably promote the commercial progress of Arkansas. Although its development has been slower than that of any other State, the natural resources of Arkansas are scarcely excelled. Nearly the entire area of the State is cultivable land of high average quality. The soil is seven to ten feet in depth, and contains potash, soda, magnesia, ferrous oxide, lime, and phosphoric acid in favorable quantities. The greater part of the 10,000,000 acres donated by Congress as "swamp-land," need no reclamation whatever. Timber-land in this State is easily brought under cultivation, as stumps rot thoroughly in three years. The crops of the prairie States and of the Gulf States thrive equally. The yield of cotton is as large in proportion to the labor applied as in any part of America. It is a surer crop in Southern Arkansas, probably, than in any other district. Sugar-cane, tobacco, and all the cereals are cultivated with profit. The planting-season lasts from February till August, so that, if a crop does not promise well, a second one can be planted and harvested the same season.—Arkansas is divided into 64 cos., viz.: Arkansas, Ashley, Baxter, Benton, Boone, Bradley, Calhoun, Carroll, Chiot, Clark, Clay, Columbia, Conway, Craighead, Crawford, Crittenden, Cross, Dallas, Desha, Dorsey, Drew, Faulkner, Franklin, Fulton, Garland, Grant, Greene, Hempstead, Hot Spring, Howard, Independence, Izard, Jackson, Jefferson, Johnson, La Fayette, Lawrence, Lee, Lincoln, Little River, Logan, Lonoke, Madison, Marion, Miller, Mississippi, Monroe, Montgomery, Nevada, Newton, Ouachita, Perry, Phillips, Pike, Poinsett, Polk, Pope, Prairie, Pulaski, Randolph, St. Francis, Saline, Scott, Searcy, Sebastian, Sevier, Sharp, Stone, Union, Van Buren, Washington, White, Woodruff, Yell. There are no large cities. Little Rock, the cap., is a place of considerable traffic. The other chief towns are Camden, Fort Smith, Helena, Hot Springs, Pine Bluff, and Princeton.—The legislature, which meets biennially, consists of a senate of 26 members, elected for 4 years, and a house of representatives of 82 members, elected for 2 years. The governor receives a salary of \$5,000. The supreme court consists of a chief justice appointed by the governor, and 4 judges elected by the people. There are 10 circuit courts. Arkansas sends a representative to the Federal Congress, and has 7 electoral votes.—This State was a part of the domain of Louisiana purchased from France in 1803. It was made a separated territory in 1812, and was admitted as a State in 1836. An ordinance of sessions was passed May 6, 1861. A new constitution was ratified by the people in March, 1868, and on the 22d of June, the administration of affairs was transferred to the civil authorities. Pop. in 1820, 14,273; in 1830, 20,388; in 1840, 97,554; in 1850, 209,897; in 1860, 435,450 (slaves 111,115); in 1870, 484,471 (free colored 122,169); in 1880, 802,525 (of whom 416,379 males and 386,246 females, 792,175 natives and 10,350 of foreign birth, 591,531 whites, 210,666 colored, 133 Chinese, and 195 taxed Indians).

Arkansas, *Ark.*, a S. E. co. in the angle between the White and Arkansas R.s.; area 1,140 sq. m. Surface mostly level, comprising the S. part of Grand Prairie, the soil of which is very fertile. The chief prod. in 1880 were 152,289 bush. of corn, 10,254 of oats, 24,770 of sweet potatoes, and 8,508 bales of cotton. Cap., De Witt. Val. of taxable prop. abt. \$3,500,000. Pop. 8,038 (of whom 133 for., and 3,069 colored).

Ascension, La., a S. E. parish, on both sides of the Mississippi. It has on the N. the Amite R., with which the Manshac Pass from the Mississippi communicates. The La Fourche, another outlet of the Mississippi, leaves that river at Donaldsonville, in this parish. Area, 373 sq. m. The surface consists mostly of an alluvial plain. A great part of the land is subject to frequent inundations, and is extremely fertile, particularly on the banks of the river. The chief prod. in 1880 were 110,137 bush. of corn, 16,411 lbs. of rice, 7,902 of sugar, 341,674 galls. of molasses, and 592 bales of cotton. Cap., Donaldsonville. Val. of taxable prop. abt. \$2,700,000. Pop. 16,896 (of whom 455 for., and 10,930 colored).
Ascutney Mountain, Vt., lies in the tps. of Windsor and Weathersfield, and is a huge mass of granite, producing but little vegetation of any kind. Its name is undoubtedly of Indian origin, but writers are not agreed as to its signification. From the summit of this mountain, 3,320 ft. above sea level, the prospect is extensive and very beautiful. The Connecticut, which is easily seen winding its way through fertile and highly cultivated meadows, adds much to the charm of the scenery.

Atlanta, Cal., p.o., San Joaquin co.

Atlanta, Ga., the cap. of the State and also of Fulton co., is situated at an elevation of 1,100 feet above the sea, 101 m. N.W. Macon, 171 m. W. of Augusta, and abt. 7 m. S.E. the Chattahoochee R. It is laid out in the form of a circle, abt. 3 m. in diameter, the Union passenger depot occupying the center. Oglethorpe park, at the terminus of Marietta street, contains fine drives, lakes, &c. The chief public buildings are the State capitol, the first Methodist church (South), and the Kimball House, one of the largest hotels in the South. There are 40 churches of different denominations, the Methodists being most largely represented. Laid out in 1845, and incorporated in 1847, A. has since rapidly increased, and is now the largest and most important city in the State. It is the center of a large trade in grain, cotton and tobacco, and has extensive railway communications, the A. & W. P., A. & R., W. & A., G., and M. & W. RRs. connecting here. The principal manuf. are a rolling mill, 3 iron foundries, 3 planing mills, several flour mills, a cotton factory with a capacity of 20,000 spindles and 550 looms, two railway shops, a brewery, several tobacco factories, a manuf. of agricultural implements, several paper mills, &c. The business of the city amounts to abt. \$50,000,000 annually. The val. of property in 1880 were \$17,811,612. There are 8 banks with capital of \$1,305,000; 3 daily, 11 wkly, 1 semi-monthly and 11 monthly papers and periodicals. A very good public school system was organized in 1872. There are 7 grammar schools (of which 3 for colored children), and 2 high schools; other institutions of learning are the North Georgia female college, Atlanta Medical College, Oglethorpe College, Atlanta University (colored), two business colleges, an English and German select school, and an orphans' free school. Oglethorpe College has a library of 5,000 volumes; the young men's library possesses 8,000 volumes, and the State library contains 20,000 volumes. The city is governed by a mayor and a board of 14 councilmen (2 from each ward). During the war A. was the center of important military operations, and suffered greatly in consequence. It was strongly fortified by the Confederates, and defended, first by Gen. Joseph E. Johnston, and then by Gen. Hood, against the attack of Gen. Sherman. Hood was compelled to evacuate the city (Sept. 1, 1864), and Sherman afterward retired to Chattanooga—movements which occasioned the destruction by fire of the greater part of the buildings, both public and private. Here was held in 1881 an International Exposition, whose great object was the exhibition of cotton and cotton machinery. It was successful beyond the most sanguine expectation, and promises to be very beneficial in its effects to the whole South. Besides showing to farmers how to improve the cultivation and handling of the cotton crop, it has opened the eyes of the Southern people to the possibilities of wealth that lie around them by attempting to compete with the North in manuf. their own fabrics from their own great fibre. Pop. in 1850, 2,572; 1860, 9,554; 1870, 21,879; 1880, 34,398.

Atlanta, Idaho, a gold-mining p.v., Alturas co., 58 m. N.E. Boise City. Pop. 120.

Atlanta, Idaho, p.o., Alturas co.

Auburn, N. Y., a city, cap. of Cayuga co., 25 m. W. by S. of Syracuse by the N.Y.C.R.R., and 2 m. N. of Owasco Lake, the outlet of which intersects the town. It stands on high, uneven ground; the thoroughfares are wide and lined with trees, and the houses for the most part well built. The principal public buildings are in Genesee street. The most remarkable of the institutions is the State prison, founded in 1816, which is conducted "on the silent system," and usually contains upward of 1,000 prisoners, who are employed each in the work to which he has been trained. Auburn also possesses a Presbyterian theological seminary, founded in 1821, an academy, 5 public free schools, 16 churches, an orphan asylum, 2 opera-houses, 4 nat., 2 other banks, and 2 savings banks; 3 daily and 3 wkly papers. The water power supplied by the outlet of Lake Owasco is utilized in a number of manuf. Cotton and woolen goods, carpets, agricultural implements and other tools, paper, flour and beer are the principal products. Pop. 21,924.

Au Gres, Mich., a small river, rises in Ogemaw co., and flows S. E. for abt. 45 m. into Saginaw Bay. —p.v. and tp., Bay co., on Au Gres R., abt 36 m. N. E. Bay City. Pop. of tp. 316.

Augusta, Ark., p.v. ♦ in Augusta tp., cap. of Woodruff co., on White R., abt. 60 m. E. of Little Rock. It is a shipping place for cotton, and has a bank, a high school and a wkly paper. Pop. 702; of tp. 2,620.

Augusta, Cal., v., Santa Clara co., abt. 4½ m. from Santa Clara. ♦

Augusta, Ga., a handsome city, cap. of Richmond co., at the head of navigation on the Savannah R., 231 m. from its mouth, 132 m. N. W. Savannah by the C.R.R. of Georgia, 85 m. S. W. Columbia, S.C., by the C. C. & A. R.R., 171 m. E. of Atlanta by the G. R.R., 137 m. N. W. of Charleston, S.C., by the S. C. R.R., and 112 m. N. W. of Port Royal by the P. R. & A. R.R., which is the shortest way to the sea-side. Augusta is the third city of Ga., in population and wealth. It is situated in a beautiful plain, and is spacious and regular in its plan, Green street, for instance, being 168 ft. in width, with a row of trees extending along each side. The principal buildings are the city hall, masonic hall, odd fellows' hall, orphan asylum and the medical college of Ga., which had in 1880 14 professors, 112 students and a library of 5,000 volumes. The city water-works were completed at a heavy cost in 1861. The water is drawn from the canal and forced into a tank holding 185,000 gallons in a cylindrical brick tower standing 115 ft. above the general level of the city. The Augusta Canal, 9 m. long, brings the waters of the Savannah R. near the city, some 40 ft. above the level,

and thus affords inexhaustible power for factories. Augusta has 5 cotton factories, 5 extensive flouring mills, 4 foundries (besides the extensive foundry and machine shops of the G.R.R.), 3 planing mills, &c., 2 nat. and 8 other banks, 2 daily and 5 wkly papers, 21 churches, 2 academies, an arsenal, several hospitals, many benevolent societies, and a high school connected with a good system of graded schools. Augusta was laid out in 1735, was an important place during the revolutionary war, and continued to flourish amazingly till the opening of the Georgia R.R. A temporary decline then took place, owing to the change in the method of traffic; but a new current of prosperity speedily set in, which still continues. Pop. in 1870, 15,389; in 1880, 21,891.

Augusta, Ill., p.v. ♦ and tp., Hancock co., 36 m. N.E. Quincy by the C.B.&Q.R.R. It has a bank, a flour mill, and manuf. of woollen goods, carriages, plows, &c. Pop. 1,066; of tp. 1,894.

Augusta, Ind., Marion co. See NEW AUGUSTA. —p.v. in Lockhart tp., Pike co., 13 m. S. of Petersburg. Pop. 142.

Augusta, Iowa, p.v. and tp., Des Moines co., abt. 12 m. S.W. Burlington. Pop. 162; of tp. 564.

Augusta, Kans., p.v. and tp., Butler co., on Walnut Creek, 22 m. E. of Wichita by the St.L.&S. F.R.R. It has 2 banks, 2 wkly papers, and a graded school. Pop. 922; of tp. 1,588.

Augusta, Ky., p.v., ♦ Bracken co., on the Ohio R., 44 m. above Cincinnati, is the seat of Augusta Male and Female College. It has good public and private schools, 2 wkly papers, a bank, and a large tobacco trade. Pop. 1,282.

Augusta, Me., a city, cap. of the State and of Kennebec co., at the head of sloop navigation of Kennebec R., 43 m. from its entrance into the Atlantic. It is in lat. 44° 18' 43" N., lon. 69° 50' W., 62 m. N.E. Portland by the M.C.R.R. It is regularly laid out, and has many handsome dwellings. It contains a State-house, a court-house, a U. States arsenal, an insane hospital, &c., and has 3 nat. and another bank, 1 daily, 7 wkly and 6 monthly papers, and 7 hotels. Lumber forms the chief manuf. interest. There is also an extensive cotton factory, a card factory, an iron foundry, a free library, and the Maine State Library. Half a mile above the city is a splendid dam across the Kennebec, which provides an immense water power, while canals on the E. end render the river navigable N. of Augusta. Pop. 8,666.

Augusta, Mich., p.v. ♦ in Ross tp., Kalamazoo co., 14 m. E. of Kalamazoo. It has a flour mill, a foundry, and several manuf. Pop. 700. —tp., Washtenaw co. Pop. 1,640.

Baltimore, *Kan.*, p.o., Coyle co.

Baltimore, *Md.*, a N. co., bounded N. by Pennsylvania, and S. by the Patapsco; area, 718 sq. m. The surface is undulating, with wooded ridges enclosing fertile valleys, and with bold hills often rising to 860 feet above sea level. On the Great and Little Gunpowder, the Patapsco, Gwynn's, and Jones' Falls Rs., are large cotton, woolen, and carpet factories, furnaces, foundries, paper and flour mills. Copper and iron are found in considerable quantities, and iron is extensively mined. The total prod. of iron and steel for the year 1880, was 69,944 tons. Near Texas and Cockeysville are extensive quarries of excellent marble. The soil is moderately rich. The chief agricultural prod. in 1880 were 293,462 bush. of wheat, 1,204,698 of corn, 314,060 of oats, 49,321 of rye, 240,816 of potatoes, and 664,204 lbs. of butter. It contains the city of Baltimore. Cap., Townsontown. Val. of taxable prop. abt. \$500,000,000. Pop. 415,524 (of whom 65,880 for., and 64,284 colored). — a city of the above co., one of the most flourishing cities in the U. States, and the 7th in point of Pop., is pleasantly situated on the N. branch of Patapsco R., 14 m. from its entrance into Chesapeake Bay, 178 m. from the Atlantic, 40 m. N.E. Washington, 93 m. S.W. Philadelphia, and 185 m. S.W. New York. It is built on slightly undulating ground, and extends abt. $4\frac{1}{2}$ m. from E. to W., and $3\frac{1}{2}$ from N. to S., covering an area of 10,000 acres. It is divided into two nearly equal parts, known as East and West Baltimore, by a small stream called Jones' Falls, crossed by a number of bridges. Baltimore contains abt. 200 churches, and has 3 universities, several colleges, 123 public schools, a State normal school, besides numerous private schools and academies, an academy of art and science, hospitals, a museum, and many fine public buildings, the most imposing of which is the new city hall, a fine specimen of the Renaissance style of architecture, and one of the finest structures of the kind in the country. Another important public building is the Peabody Institute, founded and endowed by George Peabody, and designed for the diffusion of knowledge among the masses. It contains a free library of 60,000 volumes, a lecture-hall, a conservatory of music, etc.. Baltimore has several splendid monuments, which have acquired for it the name of "the Monumental City." The largest of these are Washington's Monument and the Battle Monument. Baltimore is well supplied with water, and has a number of parks and public squares, chief of which is Druid Hill Park, a tract of 700 acres possessing more natural beauties than any other in the U. States. The manufactures and commerce of Baltimore are very extensive and flourishing. There is scarcely a branch of industry that is not prosecuted to some extent in the city or

its vicinity, etc. In the vicinity of Baltimore is found the finest brick-clay in the world, of which more than 100,000,000 bricks are made annually. The Abbott Iron Works, in the E. part of the city, have the largest rolling-mills in the U. States. An industry peculiar to Baltimore is the packing of oysters in airtight cans for shipment to all parts of the world. Fruits and vegetables are also packed in the same way, the entire trade consuming from twenty to thirty million cans annually. This city is one of the greatest flour-markets in the Union, and has a large export trade in tobacco. There are 17 nat. and 8 private banks, 7 daily, 41 wkly, 52 semi-monthly, and 14 monthly papers, 17 fire and marine and 3 life insurance companies. The harbor, which consists of three parts, is excellent. Its entrance, between Fort M'Henry and the lazaretto, is abt. 630 yards wide, with 23 ft. of water. This depth is continued with an increased width for a mile and a quarter, to near Fell's Point. The entrance to the second harbor is opposite Fell's Point, where the width is contracted to one-fourth of a mile, with a depth of 16 ft. Above this entrance it widens into an ellipse of a mile long, half a mile broad, and 15 ft. deep. The third, or inner harbor, has a depth of 14 ft., and penetrates to near the center of the city. Vessels of the largest class can lie at the wharves near Fell's Point, Locust Point, and Canton, and those of 500 tons can come into the inner harbor. The railroads centering at Baltimore are the B.&O., one of the grandest works of its kind in the world; the N.C.; the P., W. & B.; the Washington branch of the B.&O.; the W.M.; and the B. & P. Two lines of foreign steamers connect the city with the Old World, while her admirable system of railroads place her in rapid communication with all parts of the country, and enable her to successfully compete with New York for the traffic of the West and Northwest. Baltimore has also a considerable coasting trade. It was first settled in 1662, but it was not till 1729 that its erection was authorized by the assembly of Maryland. In 1752 it contained but 25 houses and 200 inhabitants. Pop. in 1800, 23,514; in 1810, 25,538; in 1820, 62,738; in 1830, 80,625; in 1840, 102,313; in 1850, 169,654; in 1860, 212,418; in 1870, 267,354; in 1880, 322,190. Bangor, Me., a city and port of entry, cap. of Penobscot co., is at the head of navigation on the W. side of Penobscot R., where it is entered by the Kenduskeag, 60 m. from the open sea, 136 m. N.E. Portland by the M.C.R.R., and 246 m. from Boston. Lat. 44° 47' 50" N.; lon. 68° 47' W. The city is also connected with Portland, Boston, and other points on the coast by 2 lines of steamers. The E.&N.A. R.R. affords the only all-rail route between Bangor and St. John, New Brunswick, a distance of 206 m. Bangor is situated on both sides of the Kenduskeag, which is crossed by several bridges. The bridge across the Penobscot, to the pleasant town of Brewer, is 1,320 ft. in length. The harbor, directly below the mouth of the Kenduskeag, is spacious, and is sufficiently deep for vessels of a large class. The Penobscot is navigable to the city for vessels of 300 or 400 tons, the tide alone rising to the height of 17 ft. In the winter season, for abt. 4 months, the river freezes 12 m. below, to Frankfort. The situation of the city is pleasant and commanding, affording a fine view of the Penobscot R. and of the surrounding country. Many of the streets are broad and well shaded with elm trees. The public and private buildings of the city are, many of them, neat and elegant. It contains a handsome custom-house, which cost \$100,000, 14 churches of 9 denominations, 53 public schools, 5 nat. banks, 2 savings banks and 3 private bankers, 2 daily and 5 wkly papers, 4 iron foundries, 4 furniture factories, &c. The Bangor Library Association, founded in 1843, has 11,000 volumes. The Theological Seminary (Trinitarian Congregational), founded in 1816, is beautifully situated in the most elevated part of the city; it has a library of 13,000 volumes. The trade is extensive, particularly in lumber, of which it receives, next to Chicago, a greater quantity than any other city in the U. States. —Abt. 2,000 vessels are annually employed, during the season of navigation, in freighting lumber, timber, &c., to various places, besides others engaged in foreign commerce and in the fisheries. For the year 1880 the imports amounted to \$13,761, and the exports to \$163,814. The entrances from foreign ports were 9 American vessels, of 2,286 tons, and 14 foreign, of 1,817 tons; clearances, 46 American, of 10,388 tons, and 31 foreign, of 5,228 tons. In the coastwise trade and fisheries 167 vessels, with an aggregate tonnage of 147,191, entered, and 6 vessels of 906 tons cleared. The number of vessels registered, enrolled and licensed was 168, with an aggregate tonnage of 26,129. Bangor was incorporated as a town in 1791, and as a city in 1834. Pop. 16,857.

Bath, Ga., p.o., Richmond co.

Bath, Ill., p.v. and tp., Mason co., 49 m. S.W. Peoria by the P., P. & J.R.R. It has several manuf. and 2 grain elevators. Pop. 439; of tp. 1,542.

Bath, Ind., tp., Franklin co. Pop. 751. See MIXERVILLE.

—h., Union co., 10 m. S.W. Richmond. ✚

Bath, Ky., a N.E. co., watered by Licking R. and Slate Creek; area, 230 sq. m. The N.W. portion is very fertile. Coal and iron are found in great abundance, and there are numerous medical springs. The chief prod. in 1880 were 124,603 bush. of wheat, 830,986 of corn, 50,257 of oats, 9,160 of rye, 31,705 lbs. of wool, and 70,319 of tobacco. Cap., Owingsville. Val. of taxable prop. abt. \$8,300,000. Pop. 11,982 (of whom 85 for., and 2,014 colored).

Bath, Me., a city and port of entry, cap. of Sagadahock co., on the W. bank of Kennebec R., 4 m. below its junction with the Androscoggin at Merrymeeting Bay, 12 m. from the ocean, and 35 m. by rail S. of Augusta. The city extends 2½ m. along the bank of the river, which is here a mile wide, with abundant anchorage and docks, the tide rising abt. 12 ft. It contains 5 nat. and 2 savings banks, 1 daily and 1

wkly paper, and has a fine custom-house built of granite. Bath has been long noted for the excellence of its schools. As the river never freezes here and is of great depth, Bath has great advantages as a commercial port. The prosperity of the city depends almost entirely on its shipping and fisheries; and its manuf. industries are nearly all auxiliary to the one department of ship-building, in which it ranks next after New York, Philadelphia and Baltimore. A large number of vessels engaged in commerce in all parts of the world are owned in Bath. In 1880 there were built here 34 vessels of 20,046 tons. In that year the number of vessels registered, enrolled and licensed was 264, with an aggregate tonnage of 140,577. The imports amounted to \$19,821, and the exports to \$48,193; 12 American vessels, tonnage 10,880, and 12 foreign vessels, tonnage 828, entered from foreign ports; the clearances for foreign ports were 4 American vessels, tonnage 1,408, and 11 foreign vessels, tonnage 735. The entrances in the coastwise trade and fisheries were 1,829, with an aggregate tonnage of 438,512, and the clearances 1,819, of 462,176 tons. A branch of the Maine Central connects the city with Brunswick, 9 m. distant, and there is steamboat communication with Boston and Portland. Bath was incorporated as a town in 1780, and as a city in 1850. Pop. 7,875.

Bath, Mich., p.v.♦ and tp., Clinton co., 9 m. N. E. Lansing. Pop. 270; of tp. 791.

Bath, Minn., p.tp., Freeborn co. Pop. 919.

Bath, N. H., p.v. and tp., Grafton co., on the Connecticut R., 98 m. N.W. Concord by the B., C. & W.M.R.R. It has several grist and saw mills. Pop. 400; of tp. 1,032.

Bath, N. Y., v. in New Utrecht tp., Kings co., on the Long Island shore of the Narrows, and on the B., B. & C.L.R.R., 2 m. from Coney Island, and 7 m. S. of Brooklyn. It is a summer resort. Pop. 300.

—v. in North Greenbush tp., Rensselaer co., on the E. bank of the Hudson R., opposite the upper portion of Albany. It has a mineral spring. Pop. 2,046. —p.v.♦ and tp., cap. of Steuben co., on Conhocton Creek, 20 m. N. of Corning by the Rochester div. of the N.Y., L.E. & W.R.R. The v. has 1 nat. and 2 private banks, 2 wkly papers, an orphan asylum, and various factories. It is also the seat of the New York State Soldier's Home, and of the Haverly Union School. Pop. 1,183; of tp. 7,896.

Bath, N. C., p.v. and tp., Beaufort co., 26 m. N. E. New Bern. Pop. 89; of tp. 2,768.

Bath, Pa., p. borough.♦ Northampton co., 12 m. N. of Bethlehem by the Lehigh and Lackawanna branch of the C.R.R. of N. J. It has a savings bank and various factories. Pop. 698.

Bath, S. C., p.v., Aiken co., 7 m. N.E. Augusta.♦

Bath, Va., a co. bordering on West Virginia. Area, 290 sq. m. It is well watered by the sources of the James, Cowpasture and Jackson Rs. The surface is diversified by ridges of the Alleghany Mts., with intervening valleys, and abounds in beautiful scenery. The chief prod. in 1880 were 26,557 bush. of wheat, 90,843 of corn, and 20,927 of oats. Limestone and iron ore are found. The co. contains many medicinal springs, including the "Hot Springs" (110° F.), the "Warm Springs," the "Healing Springs," the "Bath Alum Springs," &c. It also contains the famous "Blowing Cave." Cap., Bath Court-House. Val. of taxable prop. abt. \$1,400,000. Pop. 4,482 (of whom 29 for., and 961 colored).

Bath Alum, Va., p.v., Bath co., abt. 5 m. S.E. Bath Court-House. The medicinal springs here are much resorted to.♦

Bath Court-House (p.o. name WARM SPRINGS), Va., v., cap. of Bath co., 50 m. W. of Staun-

ton and 5 m. N.E. Hot Springs. It has warm saline, chalybeate springs, which have a reputation for the cure of scrofula, rheumatism and anæmia.♦

Bath Springs, Tenn., p.o., Decatur co.

Batie, Ark., tp., Benton co. Pop. 684.

Bat'in, Neb., p.o., Webster co.

Baton Rouge, La., a city, cap. of East Baton Rouge parish and formerly of the State, on the E. bank of the Mississippi, 117 m. above New Orleans. The city is well built, and stands on a bluff which rises abt. 25 ft. above the highest inundations. The river below the city is bordered by plantations of sugarcane, groves of tropical fruit trees, and handsome villas and gardens. The city contains a nat. arsenal and barracks, a military hospital, the State penitentiary, and deaf and dumb asylum, and has 2 wkly and 1 tri-wkly newspapers. The Louisiana State University was provisionally located here after its edifice being burned in 1869. It was one of the first French settlements, said to have been the seat of an old Indian village. In the civil war it was occupied by the Federal troops shortly after the capture of New Orleans. On Aug. 5, 1862, Gen. Williams was attacked here by the Confederates under Gen. Breckinridge, who were repulsed after a fierce contest, in which the Union general was killed. Pop. 7,197.

Bestonian, *Ark.*, tp., Ouachita co. Pop. 800.

Behring's Strait, the channel which separates the N.E. corner of Asia from the N.W. corner of America, and which connects the North Pacific with the Arctic Ocean. It is formed, in its narrowest part, by two remarkable headlands, the extreme points E. and W. of the continents to which they belong; Cape Prince of Wales (Alaska), on the American coast, in lat. 65° 46' N., lon. 168° 15' W.; and East cape, on the shore of Asia, in lat. 66° 6' N., lon. 169° 38' W. The distance between these points is abt. 36 m.; but N. and S. of them, the land on both sides rapidly recedes, and, on the N. especially, it trends so sharply, that the name of Strait is not very applicable to any part beyond the capes in that direction. It is usual, however, to regard it as extending along Asia from Tehukotskoi Noss, in 64° 13', to Serdre Kumien, in 67° 3' N., which gives it a length of 400 m.: its width between Tehukotskoi Noss (173° 24' W.) and Cape Rodney, on the opposite shore of America (166° 3' W.), is abt. 250 m. The land on both sides is considerably indented. The water has an equal, but not great depth. Shoal water appears to be principally confined to the bays and inlets on the American side. There are a few small islands scattered here and there along the strait; and one of some size, St. Lawrence, or Clerke's Island, lies at a short distance S. from its entrance. The temperature is low; by the end of August the thermometer sinks to the freezing point, and N. of the two capes there is always a store of ice which the heat of summer is quite powerless to disperse. It need scarcely be added, that the strait is frozen over every winter. Fogs and hazy weather are very common, almost, indeed, perpetual; for, though the summer sun is above the horizon for a very considerable time, yet he seldom shines for more than a few hours, and often is not seen for several days in succession. Vitus Behring may be considered as having settled in 1728, the fact of the existence of this strait, and therefore it is most properly called by his name; but the complete discovery was reserved for Cook, who, in 1788, surveyed the whole length of both coasts, with a precision and accuracy which left nothing for after voyagers to perform.

Belfast, *Me.*, a city, port of entry, and the cap. of Waldo co. It is pleasantly situated at the head of Belfast Bay, on the E. side of Penobscot R., 30 m. from the ocean, 131 m. N.E. Portland by the Burnham & Belfast branch of the M.C.R.R., and 40 m. E. of Augusta. The harbor is spacious, and is sufficiently deep for vessels of a large class, and is rarely obstructed by ice, which renders it the great winter port of the Penobscot. It has considerable foreign and coasting trade, and is considerably engaged in the fisheries and in ship-building. In 1880 there were 245 registered, enrolled and licensed vessels belonging to this port, with an aggregate tonnage of 51,132; and during that year 7 vessels of 1,605 tons in aggregate were built there. Belfast has 3 wkly papers, 1 nat. bank and 1 savings bank. It was incorporated in 1773, and the city charter was adopted in 1853. Pop. 5,308.

Black Hawk Creek, Iowa, takes its rise in Grundy co., flows E. and then N.E., and empties into Cedar R. in Black Hawk co.

Black Heath, Pa., v. in Cass tp., Schuylkill co., Pop. 48.

Black Hill, Tex., p.o., Collin co.

Black Hills, a mountain range in S.W. Dak. and N.E. Wyo., lying near the parallel of 44° N. lat. and between lon. 103° and 105° W., abt. 100 m. long and 60 m. wide. They are a continuation of the Big Horn and Snow Mts., which branch off from the Rocky Mts. The base of these hills is abt. 2,500 or 3,000 ft. above the sea, and the highest peak is 6,700 ft. Abt. one-third of their area is covered with vast forests of magnificent pine trees. Their geological formation indicates great mineral wealth. Gold has been discovered in connection with quartz and metamorphic slate, and it has been conclusively proved that this region abounds in iron, coal, lead, salt and petroleum, besides its valuable pine and cedar timber. (See page 863).

Black Horse, Md., p.v., Harford co., abt. 25 m. N.W. Bel Air. It has an academy and a woolen mill. ♦

Black Horse, Pa., p.v., Chester co., 45 m. W. of Philadelphia. ♦

Blackinton, Mass., p.v. in Adams and Williamstown tps., Berkshire co., 3 m. W. of North Adams by the B.J.T.&W.R.R. It has a public library, a woolen factory, &c. Pop. 900.

Blackmonton, Miss., p.o., Carroll co.

Blackmore, Iowa, p.o., Ringgold co.

Black Mountain, S.C., p.t.p., Buncombe co. Pop. 699.

Black Mountains, N.C. These mountains which lie in Yancey and Buncombe cos., between the main central ridge of the Alleghenies on the W., and a portion of the Blue Ridge on the E., form the culminating range of the Appalachian system. They contain 12 measured peaks, which are higher than Mt. Washington in New Hampshire, and are so called from the dark growth of balsam firs and other evergreens which cover their summits. Unlike the other ridges of the Alleghenies, they lie for the most part transverse to the general trend of the range, and give this direction to the great valleys and rivers included between them. They rise from a district of great elevation, the height of the valley at Asheville, on the French Broad R., being abt. 2,000 ft. above the sea, and that of Toe R. at Burnsville, Yancey co., abt. 2,500 ft. From this plateau the drainage is toward the Ohio in a N. direction by the branches of the Great Kanawha, by those of the Holsten and the French Broad toward the S.W., and by those of the Yadkin and the Catawba into the Pedee and Santee, toward the S.E. The principal peak, called Clingman's peak, but known in N. Carolina as Mt. Mitchell, was, in 1844, estimated by Dr. E. Mitchell to be 6,672 ft. In 1856 Prof. Guyot determined the highest point, which he then called the Black Dome, to be 6,760 ft. high. This is the highest point of the U. S. east of the Rocky Mts.

Black River, Mich., takes its rise in Sanilac co., flows S., and then S.E. for abt. 75 m., and empties into St. Clair R. near Port Huron.

—p.v. in Alcona tp., Alcona co., abt. 85 m. N.E. Standish. Pop. 182.

Black River, Mo., rises in Johnson co., flows N.E. and then E. for abt. 100 m., and joins La Mine R. in Cooper co.

—tp., Butler co. Pop. 759.

—tp., Reynolds co. Pop. 567.

—tp., Wayne co. Pop. 635.

Black River, or **BIG BLACK RIVER, Mo.** and **Ark.**, rises in Iron co., Mo., and flows nearly S. to Ark., and then S.W., entering White R. (of which it is the largest affluent) at Jacksonport. Length, abt. 350 m. It is navigable for steamboats abt. 100 m. from its mouth, except when the water is low.

Black River, N. Y., rises in Herkimer co., pursues a N.W. course through Oneida and Lewis, and part of Jefferson cos., then flows W. by Watertown, and empties through Black River Bay into Lake Ontario. Near Turin, in Lewis co., it has a fall of abt. 63 ft. Below the fall it is navigable to Carthage, a distance of 40 m. From Carthage to Watertown is a series of rapids, rendering navigation almost impossible. A canal has been opened from the upper falls to Rome on the Erie Canal. The whole length of the river is 125 m., and its breadth at Watertown (6 m. from its mouth) is 60 yards.

—p.v. in Le Roy tp., Jefferson co., on the above river, 85 m. S.W. Utica by the U.&E.R.R.R. Pop. 195.

Black River, N.C., tp., Cumberland co. Pop. 1,085.

—tp., Harnett co. Pop. 643.

Black River, O., rises in Medina, flows N., and empties into Lake Erie, 7 m. below Elyria.

—tp., Lorain co. Pop. 1,937. See LORAIN.

Black River, S. C., rises in the E. part of Kershaw district, flows S.E. across Sumpter and Williamsburg district for abt. 140 m., and empties into Winyaw Bay at Georgetown.

Black River, Vt., the name of 2 small Rs. The one, in Windsor co., falls into the Connecticut at Springfield; length, 35 m. The other, in Orleans co., falls into Memphremagog Lake at Salem; length, 30 m.

Black River [Indian name *Sappah*], Wis., rises in Marathon co., flows S. and then S.W. through Clark and Jackson cos., and enters the Mississippi R. abt. 15 m. above La Crosse. This river, which is abt. 200 m. long, has many tributaries, and drains a large extent of country.

Black River Chapel, N.C., p.o., Sampson co.

Black River Falls, Wis., p.v. ♣, cap. of Jackson co., on Black R., 56 m. S.E. of Eau Claire by the C. St. P., M. & O. R.R. It has numerous saw and flouring mills, a graded high school, iron in unlimited quantity, a bank and a wkly paper. Pop. 1,427.

Black Rock, Conn., p.v., Fairfield co., on Long Island Sound, at a short distance from Bridgeport. Pop. 300.

Black Rock, Md., p.o., Baltimore co.

Black Rock, N. Y., a former p. town of Erie co., on the Niagara R., at its S. end, abt. 1 m. N. of Buffalo, of which it is now a part. The river here affords great water power.

—tp., Whitley co. Pop. 127.

Boston, Mass., the cap. of the State and of Suffolk co., the chief city of New England, the 6th in the U. States in point of pop., and perhaps the 2d in commerce, wealth, banking capital and valuation, is situated at the W. extremity of Massachusetts Bay, on the B. & A., the B. & M., the B. & P., the B. & L., the B. R. B. & L., the E., the F., the N. Y. & N. E., and the O. C. RRs., 237 m. N. E. New York, and 202 m. E. by S. from Albany. The city embraces Boston proper, East Boston, South Boston, Roxbury, Dorchester, Charlestown, Brighton, and West Roxbury, containing in all abt. 22,000 acres. Boston proper, or old Boston, occupies a peninsula of some 700 acres, very uneven in surface, whose Indian name was Shawmut, meaning "Sweet Waters." It was called by the earlier settlers Trimountain or Tremont. *East Boston* occupies the W. portion of Noddle's or Maverick's Island. Here is the deepest water of the harbor, and here the ocean steamers chiefly lie. *South Boston* extends abt. 2 m. along the S. side of the harbor, an arm of which separates it from Boston proper. The harbor is a spacious indentation of Massachusetts Bay, embracing abt. 75 sq. m., including several arms. A wide sheet of water at the mouth of Charles R. is commonly known as Back Bay. There are more than 50 islands or islets in the harbor, and it offers many picturesque views. In the older portions of the city the streets are irregular, and generally narrow, though somewhat has been done toward widening and straightening them since the fire. Those in the new section are wide, well-paved, regularly laid out, and present a handsome appearance.—The public buildings embrace those of the U. States Government, the State, the county, and the city. The new post-office, completed in 1875 at a cost of over \$3,000,000, is said to be the finest building in New England. The State House, standing on the highest land in the city—what remains of the old Trimountain summits, was built in 1798, and has been recently greatly extended. This edifice, with its golden dome, looks nobly down upon the "Common," so dear to the citizens of Boston. This park is considered to date from 1634, and by the city charter it is made public property forever. It contains 48 acres, laid out in sloping lawns and winding walks, and shaded by magnificent trees. Faneuil Hall, the "cradle of liberty," in Dock square, has a historical reputation, because of the meetings of the revolutionary patriots that were then held. The Boston public library, in Boylston street, next to the Library of Congress the largest in America, contains 375,000 volumes, besides 150,000 pamphlets, and the valuable Tosti collection of engravings. Boston possesses so many other public buildings and institutions, and its literary, learned, scientific, and benevolent societies are so numerous, that even a mere enumeration of them cannot be attempted here. The public schools of Boston have a high reputation,

and its educational and literary institutes are not surpassed by any city in the U. States. Boston has numerous lines of steamers to the principal eastern ports of the U. States, Canada and England. The harbor has 164 wharves, and will afford anchorage for 500 vessels of the largest class. Seldom has the foreign commerce of any port grown so rapidly as has that of Boston within the past ten years. In 1870, there were no transatlantic steamers sailing direct from this port. In 1880, the number which sailed was 322. Boston early became distinguished for her spirit of enterprise, rapidly attained to eminence in commerce after the revolution, and has since always maintained her rank among the commercial cities of the Union. In 1882 Boston ranked next to New York in extent of imports, and third in the value of exports—New York being first and New Orleans second. The total value of imports was \$69,716,147; of exports \$61,614,526: 594 American vessels of 265,186 tons, and 2,424 foreign vessels of 1,151,045 tons entered from foreign ports; and 572 American vessels of 247,228 tons, and 2,278 vessels of 1,057,944 tons cleared for foreign ports; 872 vessels of 937,105 tons entered in the coastwise trade, and 1,166 vessels of 1,055,551 tons cleared. There were belonging to the port 733 sailing vessels of 237,122 tons, and 102 steamers of 29,843 tons; 62 vessels of 3,194 tons were employed in cod and mackerel fishing; 25 vessels of 7,607 tons were built during the year. Notwithstanding the rapid increase of her foreign commerce, it is in her domestic trade that Boston has made of late the most important gains. In boots and shoes, clothing, dry goods, wool, leather, lumber and fish, she holds a leading position, and the traffic in these branches was larger in 1882 than in any previous year. The total sales of merchandise during that year are estimated at \$1,400,000,000. According to the census of 1880 there were in Boston 3,521 manuf. establishments; capital invested \$42,750,134; hands employed 113,626; wages paid \$23,715,140; value of stock used \$77,586,607; value of products, \$123,366,137. In 1883 Boston had 59 nat. banks, with an aggregate cap. of \$51,650,000, 65 banking houses, and 16 saving banks; there were 9 daily, 72 weekly, 70 monthly, and 4 quarterly papers and periodicals.—The government is vested on a mayor elected annually, a board of 12 aldermen, and a common council of 64 members, 4 for each ward. The fire department is divided into 21 steam-engine companies, 10 hose companies and 7 hook and ladder companies. Boston is liberally supplied with water from Lake Cochituate, 20 m. N. of the city. The total debt of the city in 1880 amounted to \$42,030,126, all funded. The total income of Boston for the last year was \$20,044,102; expenditures \$18,327,880. The total valuation was \$639,089,200. The tax levied, at the rate of \$1.25 on \$100 was \$9,466,896.—The first settler of Boston proper was the Rev. John Blackstone, who sold his claim to the peninsula for £30 sterling, and removed to Rhode Island in 1635. On the 23d of February, 1822, the city was incorporated. It several times suffered from disastrous conflagrations, which, by turn, were described as "The Great Fire," but all these were eclipsed in their devastation by the disaster of November 9-10, 1872, in which hundreds of costly warehouses were destroyed, involving a loss of over \$80,000,000. It is an evidence of the energy and resources of the citizens, that in a little more than two years after the catastrophe, the whole "burnt district," with widened and improved thoroughfares, was covered with solid, substantial, and palatial edifices combining all the safeguards, improvements, and conveniences of modern skill. Pop. in 1705 (1st colonial census) 15,520; in 1800, 24,937; in 1820, 43,298; in 1830, 61,392; in 1840, 93,385; in 1850, 136,881; in 1860, 177,840; in 1870, 250,526; in 1880, 362,839 (of whom 248,043 native, and 114,796 foreign).

Brazier, *O.*, p.o., Clermont co.

Brazil, *Ind.*, p.v.♦ in Brazil tp., cap. of Clay co., 16 m. E. of Terre Haute and 57 m. S.W. Indianapolis by the T.H.&I.R.R. (Vandalia line). It has 5 churches, a public library, excellent water-works, 5 hotels, 1 nat. and 1 private bank, 3 wkly papers, several iron manuf., woolen, planing and flour mills, &c. There are 5 large mines of excellent block coal. Pop. 3,441; of tp. 4,346.

Brazil, *Iowa*, p.o., Appanoose co.

Brazil, *Tenn.*, p.v. and tp., Gibson co., 9 m. S. W. Trenton. Pop. 135; of tp. 1,165.

Brazil Station, *Ind.*, T.p.o., Choctaw Nation.

Brazils, *Ark.*, p.o., Saline co.

Brazito, *Mo.*, p.v., Cole co., 12 m. S.W. Jefferson City. Pop. 100.

Brazoria, *Tex.*, a S.E. co., bordering on the Gulf of Mexico; area, 1,400 sq. m. It is watered by the Brazos and San Bernard Rs., which are navigable, and by numerous smaller streams which flow into the gulf. The I.&G.N.R.R. passes through part of the co. The manuf. of extract of beef is extensively carried on. The surface is level, one-half covered with valuable oak forests, and the rest prairie. The soil is red, deep and very productive. The chief prod. in 1880 were 234,980 bush. of corn. Cap., Brazoria. Val. of taxable prop. abt. \$2,000,000. Pop. 9,780 (of whom 330 for., and 7,531 colored).

—p.v., cap. of above co., on the W. bank of Brazos R., abt. 30 m. from its mouth, 60 m. W.S.W. Galveston. Pop. 677.

Brazos, *Tex.*, one of the largest rivers of Texas, rises in the high table-land in the N.W. part of the State, and flows first nearly eastward to Baylor. It afterward pursues a S.E. course for about 200 m. In the subsequent part of its course the general direction is S.S.E., and it enters the Gulf of Mexico about 40 m. S.W. Galveston. Its whole length is estimated at 900 m. In the rainy season, from February to May inclusive, it is navigable for steamboats abt. 300 m. from its mouth. It flows through forests of live oak and red cedar.

—a central co.; area, 578 sq. m. It is bounded on the E. by the Navasota R., and on the S.W. by the Brazos. The former river unites with the Brazos at the S.E. extremity of the co. The soil is fertile; the surface in part undulating and well timbered. The chief prod. in 1880 were 165,100 bush. of corn, 14,435 of oats, and 9,743 bales of cotton. The co. is intersected by the H.&T.C.R.R. Cap., Bryan. Val. of taxable prop. abt. \$2,300,000. Pop. 13,580 (of whom 633 for., and 6,257 colored).

Brazos Island, *Tex.* See BRAZOS SANTIAGO.

Brazos Point, *Tex.*, p.o., Bosque co.

Brazos River Bent, *Tex.*, v. in Austin co. Pop. 155.

Brazos Santiago, *Tex.*, an inlet and seaport, Cameon co., between the N. end of Brazos Island and the S. extremity of Padre Island. It has some trade, but it has a bad and shifting bar. The settlement is on Brazos Island, in lat. 26°04' N., lon. 97°12' W. A railroad has been constructed to White Rancho, on the Rio Grande. Point Isabel light-house, on the mainland, is a brick tower, with a white, flashing light; lat. 26°04'52" N., lon. 97°11'04" W. Brazos Island extends southward 10 m. to "Boca Chica," a small outlet of the Rio Grande. The island is a waste of sand.

Bread Loaf, *Vt.*, p.v., Addison co., 9 m. S.E. Middlebury.✦

Breadysville, *Pa.*, p.v. in Warminster tp., Bucks co., 22 m. N.E. Philadelphia. Pop. 42.

Break abeen, *N. Y.*, p.o., Schoharie co.

Break neck (or EVANSBURG), *Pa.*, p.v. in Jack-

sont tp., Butler co., 14 m. S.W. Butler. It has a graded school and a bank. Pop. 350.

Breast River, or TETON RIVER, *Mont.*, rises in Deer Lodge co., flows E. for abt. 200 m., and enters the Missouri R. in Choteau co.

Breathersville, *Md.*, p.v. in Washington co., 6 m. S. of Hagerstown by the Washington co. branch of the B.&O.R.R. Pop. 100.

Breathitt, *Ky.*, an E. co.; area, 600 sq. m. It is diversified by hills and forests, and intersected by the N. and middle forks of the Kentucky R. The chief prod. in 1880 were 291,217 bush. of corn, and 15,279 of oats; also potatoes and wool. Cap. Jackson. Val. of taxable prop. \$800,000. Pop. 7,742 (of whom 1 for., and 185 colored).

Breaux Bridge (*brā-ō*), *La.*, p.v., St. Martin's parish, on Teche bayou, 24 m. S.E. Opelousas. It has several cotton-gins. Pop. 443.

Breck, *Ky.*, p.o., Owen co.

Breckenridge, *Col.*, p.v., cap. of Summit co., near the base of the Rocky Mts., 70 m. W. by S. of Denver. Rich gold mines abound here. Pop. 1,657.

Breckenridge, *Ill.*, p.v., Sangamon co., 12 m. S.E. Springfield. Pop. 100.

Breckenridge, *Ind.*, p.v. in Franklin tp., Harrison co., 14 m. S.W. New Albany. Pop. 57.

Breckenridge, *Ky.*, a W. co., bordering on Indiana, bounded N.W. by the Ohio R.; area, 500 sq. m. The surface consists of undulating uplands. The soil has a basis of red clay and limestone, and is fertile and well watered. Sinking Creek in this co. plunges below the surface, and is lost for 5 or 6 m., when it emerges from the ground and flows into the Ohio. Penitentiary Cave, near this creek, is said to contain chambers of vast size. The Tar and Breckenridge White Sulphur Springs are in this co. The Breckenridge coal is found here. The chief prod. in 1880 were 113,423 bush. of wheat, \$64,772 of corn, 152,632 of oats, and 3,932,565 lbs. of tobacco. Cap., Hardinsburg. Val. of taxable prop. abt. \$5,000,000. Pop. 17,486 (of whom 168 for., and 2,204 colored).

Breckenridge, *Mich.*, p.v.♦ in Wheeler tp., Gratiot co., 26 m. W. of East Saginaw. Pop. 237.

Breckenridge, *Minn.*, p.v. and tp. Wilkin co., on the Red R. of the North and at the mouth of the Bois des Sioux R., 217 m. W. N.W. St. Paul by the St. P., M.&M.R.R. Steamers ply between this point and the Manitoba settlements. Pop. 400; of tp. 436.

Breckenridge, *Mo.*, p.v.♦ and tp., Caldwell co., 145 m. W. of Hannibal and 61 m. E. of St. Joseph by the H.&St.J.R.R. It contains a bank, 2 wkly papers, and several factories. Pop. 781; of tp. 1,708.

Breckenridge, *Tex.*, p.v.♦, cap. of Stevens co., abt. 90 m. W. of Fort Worth. Pop. 497.

Bridgeport, Cal., p.v. in Bridgeport tp., cap. of Mono co. It is abt. 10,000 ft. above sea level, and is reached via Carson City, Nevada, by stage line, from which it is distant 117 m. It depends mainly on the gold-mining interest for support. Pop. 100; of tp. 628.

—tp., Nevada co. Pop. 2,116.

Bridgeport, Conn., a city and port of entry, one of the capitals of Fairfield co., on an inlet of Long Island Sound, at the mouth of Pequonock R., 56 m. E. of New York and 18 m. W.S.W. New Haven by the N.Y., N.H. & H.R.R.; lat. 41° 10' 30" N.; lon. 73° 11' 46" W. It is the S. terminus of the Housatonic R.R., which extends to Pittsfield, Mass., and of the Naugatuck R.R., which connects it with Waterbury. It is mostly built on a small plain, behind which rises an eminence called Gold Hill, which is abt. 60 ft. above high-water mark, and is occupied by elegant mansions. Bridgeport contains 25 churches, 5 nat. and 3 savings banks, a public library and an orphan asylum. It has 3 daily and 5 wkly papers. It is the third city in size and importance in Conn. It derives its prosperity chiefly from its manuf. of carriages,

sewing machines, miscellaneous hardware, machinery, brass and iron castings, leather, cartridges, hats, shirts, saddles, springs and axles, &c. Here are the large manuf. of Wheeler & Wilson, Elias Howe, and the Secor sewing machines, with the Union Metallic Cartridge Co., Wood Bros.' carriage factory, The New York Tap and Die Co., Glover Sandford & Sons' hat manuf., and many others. The city has a paid fire department and an electric fire-alarm telegraph. It has two fine parks. Steamboats ply daily between Bridgeport and New York. Pop. in 1870, 18,969; in 1880, 29,148.

Bridgeport, Ill., a suburb of Chicago, 3 m. S.W. from the City Hall.

Bridgeport, H. Va., p.v., Harrison co., 5 m. E. of Clarksburg by the B.&O.R.R. It is an important shipping place for stock. Pop. 395.

Bridgeport, Wts., p.v., Crawford co., on Wisconsin R., 8 m. E. by S. of Prairie du Chien. Pop. 448.

Bridgeport's Pass, Wyo., a defile in the Rocky Mts., in the S. part of the territory, abt. lat. 41° 39' N., lon. 107° 30' W. The overland mail route passed through it before the P.R.R. was opened. It is described by Fitz Hugh Ludlow as "a narrow gallery, walled by noble precipices of red granite and metamorphic sandstone, rising directly from the traveler's side to the almost perpendicular height of from 1,500 to 2,500 feet. In some places this gallery appears scarcely more than a crevice of dislocation, a mere crack between stupendous naked rocks, which would match joints exactly if slid back to their old

position. Though the passage is in reality ample for an army, the vast height of its lateral walls makes it seem proportionally narrow. This American Simplon is Bridger's Pass. It is several miles in length."

Bridges, Mo., tp., Ozark co. Pop. 1,141.

Bridgeton, Ala., p.o., Shelby co.

Bridgeton, Ind., p.v. in Raccoon tp., Parke co., on Big Raccoon Creek, 10 m. S.E. Rockville. Pop. 121.

Bristol, Pa., a city, Bucks co., on the Delaware R., 19 m. above Philadelphia, and nearly opposite Burlington, N. J., and has almost hourly communication with Philadelphia by steamboats. It is a pleasant, neat looking town, 23 m. N.E. Philadelphia and 10 m. S.W. Trenton by the Penn. RR. It has a bank, a valuable mineral spring, 3 wkly papers, and numerous factories. Pop. 5,273.

—tp., Bucks co. Pop. 1,682. Sea NEWPORT.

Bristol, R.I., an E. co.; area, 25 sq. m. Mount Hope and Narragansett Bays bound it E., S., and W. The surface is uneven, and presents a variety of beautiful scenery. The soil is very fertile. A RR. from Bristol to Providence passes through the co., and another extends from Fall River to Warren. Chief agricultural prod., Indian corn and potatoes. Cap., Bristol. Val. of taxable prop. abt. \$14,000,000. Pop. 11,394 (of whom 2,828 for., and 210 colored).

—a town, port of entry, and the capital of above co., 1 m. S.E. Providence, and 11 m. N. of Newport by the P., W. & B. RR. It is pleasantly situated on a peninsula stretching out toward the south, between Narragansett Bay on the W. and Mount Hope Bay on the E. The town is 5 m. long and 3 m. broad, and has an area of 12 sq. m. It includes Mount Hope, a beautiful eminence 300 ft. above water, noted for the fine view from its summit, and interesting as the ancient residence of King Philip, who was killed here in 1676. The soil is very fertile, and a considerable portion of the inhabitants are engaged in raising onions and other market vegetables. The village is a place of summer resort, and contains a wkly paper, several churches, banks, manufactories, and good schools. During the revolutionary war it was bombarded by the British, and a large part of it burned to the ground. Steamers from Fall River to the latter city also stop here. In 1880 the district (including Warren) had 27 registered vessels, tonnage 1,803. Pop. 6,028.

Bristol, Tenn., p.v. and tp., Sullivan co., is partly in Washington co., Va., 8 m. N.E. Blountville, 130 m. E.N.E. Knoxville by the E.T., V.&G. RR. It is a thriving place, and the seat of King College. It has a bank, 3 wkly papers, flouring and planing mills, and a foundry. Pop. 1,647.

Brooklyn, Mo., p.v. in Union tp., Harrison co., 10 m. N. of Bethany. Pop. 71.

Brooklyn, N. J., b., Sussex co., near Port Morris.

—v. in Monroe tp., Gloucester co. Pop. 146.

Brooklyn, N. Y., the third city in the U. States in point of population, and the capital of Kings co., is located on Long Island on the side of the East R. opposite New York, and is popularly known as the "City of Churches." While it is in point of fact a part of the great metropolis, yet being divided from it by a ship channel of importance, it remains a separate city, which in many of its social aspects at least widely differs from New York. The city now includes all the county towns of the western part of the island, so that it now covers a larger area than any other city in the U. States. From Hunter's Point to Bay Ridge it has a river frontage of nearly 9 m. The exterior line of the city measures 22 m., embracing an area of 13,337 acres. It is divided into Brooklyn proper and the Eastern District, consisting of that part of the city still known as Williamsburg, and the more northerly locality called Greenpoint. The ground on which the city is built exhibits considerable inequalities of surface, and thus increases the picturesqueness of its appearance, while the practical disadvantages of such a site have been overcome by skillful engineering. The streets, with the exception of Fulton Street, the principal thoroughfare, are generally straight, have a width of from 60 to 100 ft., and cross each other at right angles.—Chief among the public buildings are the City Hall (an edifice of white marble dating from 1845-6), the county court-house (erected in 1862), the county jail (1857), the penitentiary, the State arsenal, and the city hospital. Besides the last-mentioned institution the benevolent establishments of Brooklyn include the Long Island College Hospital, St. Mary's and St. Peter's hospital, the female orphan asylum, the marine hospital, the Graham institute for the relief of aged women, and numerous other charities. The churches number abt. 250, many of them are beautiful buildings, but none claim special notice except the New Roman Catholic Cathedral, which is only rivaled by the corresponding building in New York. Of literary and artistic institutions the most remarkable are the Mercantile Library, the Brooklyn Institute, the Long Island Historical Society, the Art Association, the Academy of Design, the Academy of Music, and the Philharmonic Society. There are 3 theatres, and an opera house, which dates from 1862. The educational establishments comprise the Packer Collegiate Institute for female education, the Polytechnic Institute for boys, the Adelpia Academy for both sexes, the Roman Catholic College of St. John, upwards of fifty public grammar and primary schools, and numerous private institutions.—Though Brooklyn in some measure serves as a suburb of residence to New York, and many of its inhabitants carry on their business in the larger city, its own industrial and commercial activity is very great. It has flour-mills, sugar refineries, lager-beer breweries, distilleries, tobacco factories, and chemical works; and manufactures steel, brass and copper wares, engines, machinery, and printing presses. The grain trade is of enormous extent, the warehouses being capable of holding abt. 12,000,000 bushels; and sugar, coffee, oil, hides, and wool are also largely imported. Most of the river frontage is lined with basins, wharves, and docks, the most important being the Atlantic dock, the Erie basin, the Brooklyn basin, the Wallabout basin, and the U. States navy yard. This last is on the S. shore of Wallabout Bay. This is the principal naval station in the country. The grounds embrace a total area of 144 acres. The yard proper comprises 45 acres, inclosed by a high brick wall. Abt. 2,000 men are employed here almost constantly. Among the most interesting things in the yard is the immense dry dock, which is one of the most remarkable structures of the kind in the world. It is built of granite, and the main chamber is 286 ft. long by 35 ft. wide at the

bottom, and 307 ft. long by 98 ft. wide at the top, with a depth of 36 ft. The enormous steam pumps connected with the dock can empty it of water in 4½ hours. This dock cost considerably over \$2,000,000. Just E. of the navy yard are extensive marine barracks, and on the opposite side of Wallabout Bay is the Marine Hospital, a handsome structure surrounded by 21 acres of ground, and having accommodations for 500 patients. The Atlantic Dock is fronting Governor's Island near the S. extremity of the shore line. This massive dock was built by a stock company. The basin is a parallelogram in form, has an area of 40 acres, and a depth of 25 ft. It will accommodate the largest vessels; 500 vessels can occupy it at one time, and 400 canal boats, besides many other vessels, have floated upon it at once. The pier line on Buttermilk Channel is 3,000 ft. long, and the total wharfage is abt. 2 m. Surrounding the basin on all sides, excepting an entrance 200 ft. wide for vessels, are substantial brick and granite warehouses from 2 to 5 stories high, and covering an area of 20 acres. Here are 9 steam grain elevators, the largest capable of raising 3,000 bushels per hour. S. of the Atlantic Docks, on Gowanus Bay, are the Erie and Brooklyn basins, of similar design and construction, and still farther S. 2 large dry docks.—Brooklyn is not a port of entry, it is a part of the customs district of New York. The city is supplied with water by an elaborate system of reservoirs, of which the most distant is 19 m. away in the vicinity of Hempstead. It has 4 nat. and 9 State and other banks, 5 daily, 18 wkly and 13 monthly papers, and several fire, marine and life insurance companies.—Prospect Park, the great breathing spot of Brooklyn, is finely situated on an elevated ridge in the S. W. part of the city, and commands a magnificent view of the cities of New York, and Brooklyn, the inner and outer harbor, Long Island, the Jersey shores, and the Atlantic. The location, and the natural advantages of the park, consisting of fine old shade trees, wooded hills, and broad meadows, render it more attractive than the New York Central Park. The lake covers an area of 61 acres, all of which is in winter allotted for skating. Washington Park, on the site of ancient fortification, is also a pleasant spot, and there are various other open grounds throughout the city. At the W. end is situated the well known Greenwood cemetery, which contains abt. 520 acres of finely varied ground, a good part of which is still adorned with natural wood.—The traffic of the city is facilitated by tramway lines, and its connections with New York, which has hitherto been dependent on steam-boat ferries, has been recently rendered more convenient by a stupendous iron-wire bridge, which crosses the East R. near its W. extremity, and was inaugurated with great solemnity on May 24, 1883. The bridge may be said to begin at Chatham square in New York and end at the corner of Sands and Washington streets in Brooklyn, but the bridge proper, the single span which constitutes the marvel of engineering skill, stretches 1,595½ ft. from tower to tower and 3,460 from anchorage to anchorage. At the towers the bridge is 118 ft. above high water mark and in the centre 135 ft. It is 85 ft. wide, and costs over \$15,000,000.—The first settlement of Brooklyn, or as it was formerly called Breuckelen, dates from 1636, when a few Walloon colonists took up their residence on the spot that still bears the name of Wallabout (Waalbogh or Walloons' Bay). English and Dutch settlers followed; and in 1667, a charter was granted to the town by Governor Richard Nicolls. In 1698 the pop. only amounted to 509 persons, of whom sixty-five were slaves. In 1816 Brooklyn was incorporated as a village, and in 1834 it became a chartered city. The pop. was in 1800, 3,298; in 1820, 7,175; in 1830, 15,292; in 1840, 36,233; in 1850, 96,850; in 1860 (including Williamsburg) 266,661; in 1870, 396,099, and in 1880, 566,680.

Brooklyn, O., p.v. and tp., Cuyahoga co., 3 m. S. of Cleveland, on Cuyahoga R. Manuf., leather. Pop. 1,295; of tp. 4,433.

Bucksport, Me., p.v. and tp., Hancock co., on the E. bank of Penobscot, just above Orphan Island and the Narrows, 16 m. S. of Bangor. The v. is regu-

larly laid out on a rising slope. Neat and tasteful houses, with overshadowing trees, give it a very pretty appearance from the river. As the Penobscot seldom freezes at this point, Bucksport becomes the winter harbor for Bangor vessels as well as for its own commerce. There are 2 hotels, 1 nat. bank, 4 ship-yards and several manuf.; also a male and female seminary, under the control of the Methodists. During the war of 1812-13 it was captured by the English. A large, substantial fort, built in 1848-50, on the opposite bank and at a bend of the river, now commands the Narrows and the river in both directions. Pop. 1,500; of tp. 3,047.

—tp., Franklin co. Pop. 242.

Buffalo, N. Y., a city, port of entry and the cap. of Erie co. for many years called the "Queen City of the Lakes," the 13th city in the U. States, and the 3d in the State of New York in point of pop., is situated at the extremity of Lake Erie, at the head of Niagara R. and at the mouth of Buffalo R., abt. 293 m. N.W. New York City,—with a water front of 2½ m. on the lake and of the same extent on Niagara R. It has one of the finest harbors on the lakes, formed by the Buffalo R., a small stream, which is navigable for about 2 m. from its mouth. The entrance is protected by a breakwater, which is 1,500 feet long, upon the S. side of the river; and there is also another on the N. side, by which a capacious harbor is made. In 1869, the U. S. Government began the construction of an outside harbor, by building a breakwater, designed to be 4,000 feet long, fronting the entrance of the Buffalo R., and nearly completed. The city commands a fine view of the lake; the climate is pleasant and healthful; the streets, broad and generally lined with trees, are well paved, lighted and supplied with sewers. There are many fine residences with attractive grounds, and numerous parks, squares and public places. The most prominent public buildings are the city and county hall, a granite structure, in the form of a double Roman cross, with a tower 245 feet high, costing over \$2,000,000; the U. States Custom House and Post Office, the State Arsenal, and the Erie County Penitentiary, a State asylum for the insane in process of construction. The city contains abt. 100 churches; it has an excellent system of public schools, a State normal school, the Canisius College, St. Joseph's College; the Martin Luther College (theological); St. Mary's Academy and Industrial School for girls, and the Medical College of the University of Buffalo. The charitable institutions of the city are numerous. There are several libraries, the most important being that of the Young Men's Association, with about 30,000 volumes, and the Grosvenor Free Library, which contains abt. 15,000 volumes. Buffalo has an Academy of Music, a new opera house, and several other theatres; 2 nat. banks, 9 banking houses, 3 savings banks, and 3 private bankers; 9 daily, 18 weekly, 1 semi-weekly and 4 monthly papers. The city is divided into 13 wards, and is governed by a mayor and 26 aldermen. It has an efficient paid fire department and police, and is well supplied with water from the Niagara R. The value of real and personal estate in 1882 was \$92,266,315, viz.: real, \$84,396,770, personal, \$7,859,545. The position of Buffalo on the great water and railway channels of communication between the West and the East gives it a commercial importance surpassed by that of few other American cities. It is the centre of an important system of railroads. Besides many narrow-gauge roads, the lines converging here are the N.Y.C., the N.Y., L.E.&W., the B. N. Y.&P., the D., L.&W., the C.S., the G.S., the B.&S. W., the N.C., the L.S.&M.C., and the A.V.R.Rs. Owing to the increase of railroad facilities, there has

been a large decrease in the extent of the lake commerce since 1862, and more recently in that of the canal. The canal tolls collected at Buffalo in 1881 aggregated only \$325,674 as compared with \$736,631 in 1880. The registered marine of the port in 1882 comprised 229 vessels of 110,864 tons, of which 128 of 70,996 tons were steamers. The value of imports from Canada in 1882 was \$5,966,596; of exports, \$252,362. The number of lake vessels that arrived in 1882 was 664 (tonnage 110,595); the clearances numbered 633 (tonnage 105,773). The immense quantities of grain moving from the Western States to the seaboard constitute the most important feature of the commerce of the city. The aggregate receipts (including flour) by lake and the L.S.&M.C. RR. were in 1880, 112,042,927 bush.; in 1881, 62,062,895; in 1882, 87,116,090. For receiving, storing and transferring this vast amount of produce to canal boats and railway cars, there are 36 elevators, capable together of storing 8,000,000 bushels, and of transferring no less than 3,200,000 bushels a day. Live-stock and lumber from the Western States and Canada, and coal from Pennsylvania, are also leading items in commerce. In 1882, 630,995 cattle, 1,460,000 sheep, 1,965,350 hogs, and 17,504 horses were received at Buffalo, and stock slaughtered aggregated 637,925 heads. The receipts of lumber by lake in 1881 amounted to 240,802,160, besides about 40,000,000 shingles, and 15,000,000 staves. The imports of coal in 1882 comprised 3,031,791 tons. The coal trade is rapidly increasing. The number of ships built at Buffalo in 1882 was 29, consisting of 20 steamers of 1,915 tons in aggregate, 6 steam canal-boats of 813 tons, and 3 barges of 1,479 tons. Manufacturing has made rapid strides of late years. The stove works are very extensive. The iron and nail and the malleable iron works, the planing-mills, grape-sugar and starch works, chemical works, and fertilizer works, are among the largest in the country. To these must be added the car wheel works, iron bridge building, agricultural implements, freight cars, oil refineries, pork-packing houses, edge tools, organs and melodions, 11 large flour-mills, 60 malt-houses, 48 breweries, several distilleries, 11 tanneries, and other industries too numerous to mention. The Board of Trade, constituted in 1844 and incorporated in 1857, is an important institution. To its secretary, Mr. William Thurstone, we are indebted for much of the information above given. Buffalo was founded in 1801, became a military post in 1813, and was burned by the British on the last day of that year. After the war the place was rebuilt, and in 1832 it attained the rank of a city. Pop. in 1820, 2,093; in 1830, 8,653; in 1840, 18,213; in 1850, 42,261; in 1860, 81,129; in 1870, 77,714; in 1880, 155,134 (of whom 103 natives, and 51,268 foreigners).

Bull Run, Va., a stream dividing Fairfax and Prince William cos., in the N.E. part of the State, and flowing into the Occoquan R., 14 m. from the Potomac. On its banks were fought two of the most memorable battles during the civil war. After a series of heavy skirmishes, July 16-19, 1861, the Union army under Gen. McDowell were, on the 21st., utterly routed by the Confederates under Gens. Beauregard and J. E. Johnston. On the 30th Aug., 1863, another great battle was fought here between the Nat. forces commanded by Gen. Pope, and the Confederates under Gens. Lee, Longstreet and "Stonewall" Jackson, when the former were again defeated with heavy losses.

Burlington, Iowa, a city ✚ and the cap. of Des Moines co., 98 m. S. by E. of Cedar Rapids by the B. C. R. & N. RR., and 207 m. W. by S. of Chicago by the C. & B. & Q. RR. It occupies on the W. bank of the Mississippi a natural amphitheatre, formed by the limestone bluffs, which slope backward from the river. The business portion of the city is built upon the low ground along the river, while the residences upon the high bluffs command extended views of the fine river scenery. The river at this point is a broad, deep and beautiful stream of clear water, and upon the bluffs between which it passes are orchards and vineyards. The city is regularly laid out and well built, the houses being chiefly of brick. The Burlington business college was organized here in 1865, and the Burlington University, a Baptist institution, was organized in 1854. There are about 15 churches, a public library, 3 nat. banks, 3 daily and 3 wkly papers. The extensive coal fields in the vicinity afford great facilities for manuf.; the chief establishments are flouring mills, saw mills, foundries, pork-packing houses, breweries and soap factories. The town was laid out in 1834, and from 1837 to 1840 was the cap. of Iowa. Pop. in 1870, 14,930; in 1880, 19,450; of tp. 20,241.

Burlington, Kan., p.v. ✚ in Burlington tp., cap. of Collee co., on the right bank of the Neosho R., 28 m. E. of Emporia by the Neosho Valley div. of the M. P. RR. It has an abundant water power, a nat. bank, 2 wkly papers and first-class mills. Pop. 2,011; of tp. 2,687.

Burlington, Tex., v., Montague co., abt. 75 m. W. of Denison. ✱

Burlington, Vt., a city, cap. of Chittenden co., and the largest place in the State, is situated on Burlington Bay on Lake Champlain, 40 m. W. by N. of Montpelier by the C.V.R.R. It was first settled in 1773, but in 1800 the pop. was only 600. The principal streets are laid out at right angles, many of them well shaded with elm and maple trees. The location of the city is unequalled in this part of the country, and the beauty of its scenery unsurpassed anywhere. The geographical position of the city, midway of the E. shore of Lake Champlain, and the facilities for transportation by rail and water, make the whole valley of the lake tributary to it in the way of business. Its heaviest trade is in lumber. There are five planing mills, one of which alone dresses 50,000,000 feet a year, and the whole amount dressed is 8,000,000 or 10,000,000 feet per month. The capital invested is over \$1,000,000. There are large quarries of building stone, of limestone, and fine marble within or near the city limits; lime-kilns and brick-yards are in active operation, and steam marble mills, machine shops, foundries, sash factories, chair and furniture factories, paper mills, and many smaller manufacturing trades, are thriving. On the N.E. limit of the city the abundant water-power of the Winooski is utilized for woolen and cotton mills, flour mills, machine shops, chair factories, &c. A line of passenger steamers and a large fleet of tugs and barges ply between Burlington and every port on the lake. The University of Vermont and State Agricultural College is situated here; it was chartered in 1791, has 8 professors and an average attendance of 100 students, besides a flourishing medical department, and ranks as one of the best institutions in the country. The city has 14 public schools, 2 large Roman Catholic schools and an Episcopal institute for boys, several private schools, 9 churches, besides several mission chapels and 2 orphan asylums. There are 2 nat. banks, 2 savings banks, and 1 private banking house; 1 daily and 3 wkly papers; 1 fire and 1 life insurance company. The libraries are the University Library, 15,000 vol.; Young Men's Association, 2,000 vol.; Young Men's Christian Association, 1,000 vol., and the Fletcher Free Library. The city is supplied with water from the lake, raised by steam pumps to a reservoir on the hill, which gives a head of 280 feet; the water-works are under the control of the city, but the gas-works are the property of a corporation. Pop. 11,364.

Burlington, W. Va., p.v., Mineral co., 12 m. S. of Keiser. Pop. 66.

Burlington, Wis., p.v. ✱ and tp., Racine co., on the Pishtaka or Fox R., 27 m. W. by S. of Racine by the C.M.&St.P.R.R. It has several factories and mills, 1 nat. and 1 other bank, and 1 wkly paper. Pop. 1,611; of tp. 2,738.

Calabahn, N. C., p.o., Davie co.
Calais (kâl'iss), Me. ✚, a city of Washington co., 28 m. N. by W. of Eastport, at the head of tide water on St. Croix R., 30 m. from the sea, opposite the town of St. Stephen, New Brunswick, with which it communicates by means of 5 bridges, and 75 m. E. by N. of Bangor. Calais is the S.E. terminus of the St.C.&P.R.R. Lines of steamers ply to St. John on the E., and Portland and Boston to the W. The chief industry is the manuf. and trade in lumber, which is obtained from the extensive forests on the upper St. Croix. The machinery for sawing lumber is propelled exclusively by water power, and consists of 63 mills and 40 lath and shingle machines. Nearly all the mills contain gangs of saws, each gang containing 16 movable upright saws in a single frame, the whole having a capacity of production equal to 1,000,000 superficial feet of sawed lumber per day. Ship-building is also an important branch of industry. From 10 to 15 vessels are built annually, and there is a dry dock and 2 marine railways. The city owns 10,000 tons of shipping. Manuf., all kinds of planed lumber and wood manufactures, iron foundries, machine shops, plaster of Paris, flour mills, tanneries, &c. Calais has a large city hall, an opera-house, 16 schools, 2 wkly papers, 3 post-offices, 4 hotels, 10 churches, a nat. and a savings bank. The city was incorporated in 1850. In Aug., 1870, abt. 40 acres of the most thickly settled portion were burned over together with 15 wharves and abt. 20 vessels. It has been since rebuilt with more commodious and substantial structures. Pop. 3,500.
Calais, O., p.v. in Seneca tp., Monroe co., 35 m. N.E. Marietta. Pop. 159.

Calamus, Neb., p.tp., Valley co. Pop. 285.
Calamus, or CALMUS, Wis., tp., Dodge co. Pop. 1,166.
Calapoo'ya River, Oreg., rises in the Cascade Range, flows W., then N.W., and joins Willamette R. some miles N. of Albany. Length, 125 m.
Calaveras, Cal., a N. central co.; area, 936 sq. m. It derives its name from Calaveras R., which runs centrally through it and joins the San Joaquin abt. 12 m. below Stockton. It is bordered by Amador co. on the N.W., by Alpine on the N.E., by

Tuolumne on the S.E., and by Stanislaus and San Joaquin cos. on the S.W. The Mokelumne R. separates it from Amador, and the Stanislaus R. from Tuolumne co. Bear Mt., a rocky, wooded range, abt. 2,000 ft. high, strikes northward across the middle of the co., dividing this central portion into two sections, the lower of which includes a rich copper-mining district, and also many valuable quartz lodes. Placer mining is profitably conducted in a number of localities. Through an elaborate system of canals this co. is generally well supplied with water. Prod., wheat, barley, hay, wool and wine. Val. of taxable prop. abt. \$2,000,000. Cap., San Andreas. Pop. 9,094 (of whom 3,349 for., 1,115 Chinese, and 272 Indians).

Calcasien, La., a river which rises S.W. of Red R., in the parish of Natchitoches; toward its mouth it expands into a lake 30 m. in length, and from 1 to 10 in width, but it contracts again to a river before it enters the Gulf of Mexico. The tide flows above the head of the lake, but both the river and lake are too shallow to be of much service for navigation. Length, abt. 225 m.

—a S.W. parish between the Gulf of Mexico and the Sabine R. and Lake, which separate it from Texas. Area, abt. 5,000 sq. m. It is watered by the Mermentau, Calcasien and Sabine Rs. and lakes. The soil in the vicinity of the streams is fertile, and the surface, which is level, is chiefly occupied by savannas, or grassy plains, affording pasturage to large numbers of cattle. The chief prod. in 1880 were 156,118 bush. of corn and 514 bales of cotton; also molasses and sweet potatoes. Val. of taxable prop. abt. \$1,200,000. Cap., Lake Charles. Pop. 12,488 (of whom 314 for., and 2,564 colored).

—p.o. in above parish.

Caldwell, Kan., p.v. ♦ and tp., Summers co., 22 m. S.W. Wellington by the Caldwell branch of the A.T.&S.F.R.R. It has a bank and a wkly paper. Pop. 1,005; of tp. 1,979.

Caldwell, Ky., a W. co., bounded S.W. by Tennessee R., N.E. by Tradewater Creek, and intersected by the Cumberland R. Area, 700 sq. m. Surface, diversified; soil, fertile. Iron ore and coal are abundantly found on the banks of the rivers. The chief prod. in 1880 were 707,609 bush. of corn, 51,468 of wheat, 3,215,602 lbs. of tobacco, and pork. Val. of taxable prop. abt. \$3,500,000. Cap., Princeton. Pop. 11,280 (of whom 48 for., and 2,186 colored).

Caldwell, La., a N.E. parish; area, 528 sq. m. It is bounded E. by Beauf Bayou, and intersected by Washita R., which is navigable by steamboats through the parish. Surface flat and alluvial on the E. and hilly on the W. The chief prod. in 1880 were 53,312 bush. of corn, and 6,504 bales of cotton. Val. of taxable prop. abt. \$1,000,000. Cap., Columbia. Pop. 5,770 (of whom 30 for., and 2,897 colored).

Caldwell, Mich., tp., Missaukee co. Pop. 104.

Caldwell, Mo., a N.W. co.; area, 435 sq. m. It is drained by Shoal Creek, which affords good water power. Surface mostly level; soil fertile. The chief prod. in 1880 were 3,147,148 bush. of corn, 182,888 of oats, 38,417 of wheat, and pork. Val. of taxable prop. abt. \$8,000,000. Cap., Kingston. Pop. 13,654 (of whom 631 for., and 413 colored).

California, a W. State, next to Texas the largest in the Union, bounded on the N. by Oregon, E. by Nevada and Arizona, S. by Lower California—a province of Mexico, and W. by the Pacific Ocean. It lies between lat. 32° 20' and 40° N., lon. 114° 20' and 124° 25' W.; length, 775 m.; greatest breadth 330 m.; area, 155,980 sq. m. The sea coast extends the full length of the State, amounting, following the indentations, to abt. 700 m. The principal bays and harbors, beginning on the S., are San Diego, Santa Barbara, San Luis Obispo, Monterey, San Francisco, Tomales, Bodega, and Humboldt. There are few islands on the coast, and they are small. The principal are the Santa Barbara Islands, which are 8 in number, and lie opposite the shore of Santa Barbara, Los Angeles and San Diego co's., the furthest one being about 60 m. from the mainland. They are hilly, rocky, and generally sterile. Cal. may be divided into three quite distinct portions, and these are very different from each other in importance—the central being much the most densely populated, and in every respect the most valuable. This central portion is embraced between the parallels of 35° and 40°, and has, on its E. side, the Sierra Nevada, and on its W. the Coast Ranges, with the Pacific Ocean at their W. base. Between these two mountain chains lies the Great Central Valley, which forms so marked a feature in the topography of the State. This valley is drained by the Sacramento R., flowing from the N., and the San Joaquin from the S., the two uniting abt. midway between the N. and S. extremities of the valley, and entering the Bay of San Francisco through Suisun and San Pablo bays. The entire length of the Great Valley is abt. 450 m.; and its breadth averages abt. 40 m., including the lower foot-hills, so that the entire almost level area contains abt. 18,000 sq. m. On the W. side, however, the conditions are greatly changed. The rain-fall, almost entirely cut off on the E. slope of the Coast Ranges, becomes considerable on the W. side of the more elevated Sierra, and numerous large rivers are fed from the melting snow during the summer, although, towards the close of the dry season the body of water which they carry has usually become very much diminished. N. of the parallel of 40°, where the Coast Ranges and the Sierra unite, and the Great Valley disappears, the country is extremely rough and very thinly inhabited. The N.W. corner of the State is also extremely rough and mountainous, and a large part of it quite uninhabitable. That portion of Cal. that lies to the S. and E. of the S. insolation of the Coast Ranges and the Sierra, comprising an area of fully 50,000 sq. m., is also very thinly inhabited, with the exception of a narrow strip along the coast. The region lying E. of the Sierra Nevada, and between the crest of that range and the boundary of the State, chiefly divided between the two co's. of Mono and Inyo, is also a very mountainous tract of country. There are many fine points in the scenery of Cal., some of which have already become well known from the descriptions of pleasure-travelers who have flocked to the State from all parts of the world. The granite pinnacles and domes of the highest Sierra opposite Owen's Lake; the snowy cone of Mount Shasta, rising 10,000 feet above the adjacent plains; the lovely valleys of the Coast Ranges, with their pecu-

liar vegetation—all these have their charms; but the point which is most attractive of all is the Yosemite (which see). The climate of Cal. is very different in different parts of the State, but there are certain peculiar features which obtain all over the State. In the first place, the division of the year into two seasons—a dry and a rainy one—is the most marked general characteristic of the Californian climate. Again, the climate of the Pacific coasts along its whole length is milder and more uniform than that of the States in a corresponding latitude E. of the mountains. Thus, we have to go as far N. as Sitka, in lat. 57°, to find the same mean yearly temperature as that of Halifax, in lat. 44° 39'. But, in addition, we notice that the means of summer and winter are much nearer the mean of the year in Cal. than in the east. This condition of things is not so marked as we advance into the interior of Cal.; but everywhere in the State the winters are comparatively mild, and the heat of summer is much less disagreeable in its effects, because the air is exceedingly dry and the evaporation proportionately rapid. The climate of San Francisco is indeed wonderfully uniform; and the bracing, cool air which sweeps in from the ocean during the afternoons of the summer, although not favorable to persons with weak lungs or sensitive throats, is the very breath of life for those who are in vigorous health. One great drawback to the enjoyment of the delightful climate of Cal., however, is the dust of summer, which seems, until one becomes accustomed to it quite unbearable.—“The El Dorado of the nineteenth century” is no misnomer for Cal., which has the most wonderful gold-fields of the world. They were discovered in the middle of the last century by the Jesuits, who kept the knowledge a secret. In Feb., 1848, Captain Sutter, while digging the tail-race for a saw-mill, found gold, and the news of the discovery at once spread. The excitement extended throughout the Union, and the “Argonauts of '49” came swarming to the gold-fields. People ran about the country picking up the precious lumps, “as hogs in a forest root for ground-nuts.” The first deposit of gold from Cal. was received at the U. States Mint, Philadelphia, Dec. 8, 1848. After melting, the average value of the bullion was \$18.50 per ounce. The product of 1848 was \$10,000,000; 1849, \$40,000,000; 1853, \$65,000,000. Since the last-named year the annual product has fallen off to \$18,200,000 in 1882. Organized companies, with capital and machinery, have to a large extent displaced the individual gold-hunter with his simple pan. Silver mining has been attempted in many localities in Cal., generally with indifferent success. The product of silver mining for the year 1882 was \$750,000. In no other part of the world has cinnabar, the common ore of quicksilver, been found so widely disseminated as in Cal. The old Almaden mine of Spain has been worked for 2,500 years, and is still the most productive. The New Almaden of California, within 20 years yielded 537,176 flasks of 7½ lbs. each. The New Idria is but slightly inferior, and more than 20 other mines have been successfully worked. There are also valuable deposits of iron ore, coal, copper, tin, platinum, manganese, asphaltum, petroleum, lead, zinc, bismuth, gypsum, marble, granite, limestone, borax, sulphur, salt, etc.—All the products of the U. States are grown in Cal. Fruits are abundant, and of great size. Among them are apples, peaches, pears, plums, cherries, oranges, lemons, limes, figs, prunes, almonds, mulberries, apricots, pomegranates, nectarines, etc. The olive is produced in great perfection. Wheat, oats, rye and flax are indigenous. Cotton, tobacco, rice, hops, hemp, jute, tea, coffee and chicory are successfully cultivated. The grapes and wines are celebrated. Mulberry trees thrive better than in France, and the production of silk

cocoons is annually increasing. Cal. fruits are now sold in all the large Eastern markets. The principal agricultural products for the year 1880 were as follows :

Products.	Quantity.	Average Yield per Acre.	Number of Acres.	Total Valuation.
Indian corn, bush.	2,580,800	32	80,650	\$1,961,408
Wheat..... do.	33,877,600	16	2,117,350	32,522,496
Rye..... do.	306,704	19	19,169	254,564

In 1880, live stock in farms, was as follows : 281,990 horses, value \$12,678,019; 25,700 mules, value, \$1,767,903; 473,400 milch cows, value, \$14,992,578; 999,900 oxen and other cattle, value, \$20,347,965; 7,493,864 sheep, value, \$12,739,569; and 667,600 hogs, value, \$3,324,648.—(For manufactures and commerce, see SAN FRANCISCO).—The constitution of Cal. requires a free school to be supported in each district six months in each year. The system includes primary and grammar schools, high schools, evening schools, normal schools, technical schools and the State University. The University constitutes a perpetual public trust, and is free to both sexes. The schools of Cal. are justly famous, and the educational interest is in no State better appreciated and supported. The assessed value of real and personal estate, in 1881, was \$610,263,829, and the taxation, at the rate of 6.55 mills, was \$3,997,228; The total public State debt amounted to \$3,391,906. There was in the State 2,260 m. of railroad in operation.—Cal. is divided into 51 counties, viz.: Alameda, Alpine, Amador, Butte, Calaveras, Colusa, Contra Costa, Del Norte, El Dorado, Fresno, Humboldt, Inyo, Kern, Lake, Lassen, Los Angeles, Marin, Mariposa, Mendocino, Merced, Modoc, Moro, Monterey, Napa, Nevada, Placer, Plumas, Sacramento, San Benito, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Barbara, Santa Clara, Santa Cruz, Shasta, Sierra, Siskiyou, Solano, Sonoma, Stanislaus, Sutter, Tehama, Trinity, Tulare, Tuolumne, Ventura, Yolo, Yuba. Sacramento is the cap., and San Francisco the metropolis. The other cities are Los Angeles, Marysville, Oakland, San Diego, San José, and Stockton.—Election for State offices, members of Congress, and of the legislature are held biennially on the first Tuesday in September (odd years). The legislative department consists of an assembly, composed of 80 members elected for 2 years, and a senate of 40 members, elected for 4 years. The legislature meets biennially, on the first Monday in December (odd years). The executive department consists of governor, lieutenant-governor, secretary of State, comptroller, treasurer, attorney-general, surveyor-general, and superintendent of public institutions, chosen by the people for 4 years. The judiciary consists of a supreme court, with 5 judges elected for 10 years; 17 district courts with 1 judge each, elected for 6 years, and county courts, consisting of 1 judge in each co., elected for 4 years. Cal. sends 6 representatives to the Federal Congress, and has 8 electoral votes. Upper Cal. was discovered in 1538 by Castillo, a Spanish navigator. In 1578, Sir Francis Drake visited it, and gave it the name of

New Albion. The Spaniards planted the first colony in 1768. The territory was purchased from Mexico by the U. States in 1847, for \$15,000,000. A constitution was adopted Nov. 13, 1847, and on Sept. 9, 1850. Cal. without ever having been under a territorial government, was admitted into the Union as a State. A new constitution (excluding Chinese from citizenship, etc.) was adopted May 8, 1879. The progress of Cal. has been of the most substantial character. The tendency of gold-mining to assume a stable character is shown by the annual steadiness of the crop. The great improvements which have taken place in mining machinery and methods now enable the working with profit of low-grade ores, of which there are regular and enormous deposits. The injunctions which have in 1881 suspended the operations of some of the principal hydraulic mines of Cal. may lessen by some millions the gold-harvest; but the movement to restrain the hydraulic miners from washing their tailings into the valleys, where they fill up the beds of the streams and destroy agricultural lands, is in itself an evidence of a growing conservatism of feeling—of the increasing disposition to look upon Cal. as a country in which permanent homes are to be made. In the agricultural capabilities of her soil lie the possibilities of her greatest wealth. The wheat crop of 1880, after supplying all home demands, including that of distilling, gave a surplus for export of no less than 1,400,000 tons—a surplus worth, even at the low rates that prevailed on account of the scarcity of tonnage, \$37,500,000, or more than twice the whole bullion product of the State. Or, in other words, the wheat crop of Cal. for 1880, was worth more than half as much as the bullion product of the whole U. States. Among the most valuable of her industries in the future will be those of the vineyard and the orchard. The natural adaptation of the soil and the climate has been proved beyond a question. The grape-growers of the State can now sell their grapes with as much certainty as the farmer his wheat. There is now sent to the Atlantic coast more wine than is imported from France, and it is estimated that the wine crop of 1880 yielded to the growers nearly \$3,500,000. Pop. in 1860, 379,904; in 1870, 560,247; in 1880, 864,634 (of whom 518,176 male, and 346,518 female; 571,820 natives; and 292,874 foreigners; 767,181 whites, 6,018 colored, 75,132 Chinese, 86 Japanese, and 16,277 Indians).

Cambridge, Ala., p.o., Dallas co.

Cambridge, Ill., p.v. in Cambridge tp., cap. of Henry co., 29 m. S.E. Rock Island by the R.I. & P. R.R. It has a bank and 2 wkly papers. Pop. 1,203; of tp. 2,302.

Cambridge, Iowa, p.v. in Union tp., Story co., on Skunk R., 15 m. S.W. Nevada. Pop. 223.

Cambridge, Kan., p.v. in Windsor tp., Cowley co. Pop. 98.

Cambridge, Me., p.tp., Somerset co. Pop. 472.

Cambridge, Md., p.v., cap. of Dorchester co., on the S. side of Choptank R., 12 m. from its entrance into Chesapeake Bay; 61 m. S.E. Annapolis, and 117 m. S. of Wilmington, Del., by the Delaware div. of the P., W. & B. R.R. It is connected with Baltimore by a tri-wkly line of steamboats. It has 2 wkly papers. Fish and oysters are largely exported. P. 2,262.

Cambridge, Mass., a city and semi-cap. of Middlesex co. It lies on Charles R., 3 m. N.W. Boston, with which it is connected by two bridges, with long causeways, and by tramways. It is the seat of Harvard University, the oldest, richest, and most thoroughly equipped literary institution in the U. States. Connected with the university is an observatory, in 42° 22' 48" N. lat. and 71° 8' W. lon. Between Arlington and Cambridge is North Cambridge; and the districts of the city nearest to Boston, by the two bridges, are called Cambridgeport and East Cambridge. Cambridge was incorporated as a city in 1846. It is for the most part level, with much marsh land near the river, portions of which are in process of being reclaimed. The cemetery of Mount Auburn is on the W. border of the city. The system of public schools is very complete and efficient, including a high school, 7 grammar schools, 18 primaries, and a training school, with 183 teachers; cost of maintenance abt. \$275,000. In 1880 the net debt of the city, incurred for water-works, streets, school-houses, &c., was \$3,403,723. Val. of taxable prop. \$49,235,098. The city of Cambridge has 25 churches, 8 banks, 2 savings banks, a fire insurance company, and many literary and charitable institutions. It has also numerous manuf., chiefly located in Cambridgeport, but is particularly noted as the head of the printing industry. Cambridge was the site of the camp of the first American army, at the outbreak of the War of the Revolution with Great Britain. From it went the detachment which entrenched on Bunker's Hill; and here Washington took command of the army, July 3, 1775. Pop. in 1860, 26,060; in 1870, 39,634; in 1880, 52,740.

Cambridge, Mich., p.tp., Lenawee co. P. 1,075.

Cambridgeport, Mass. See CAMBRIDGE.

Cambridgeport, Vt., p.v. in Grafton tp., Windham co., abt. 6 m. N.W. Bellows Falls. ✦

Camden, Ala., a thriving p.v. ♦, cap. of Wilcox co., 4 m. S. of the Alabama R., and 32 m. S.W. Selma. Pop. 590.

Camden, Ark., p.v. ♦ in Ecure Fabre tp., cap. of Ouachita co., 90 m. W. by S. of Little Rock, on the Ouachita R., which, up to this point, is navigable for steamboats of large size, except during summer months. About 25,000 bales of cotton are yearly shipped here. Camden has a bank, 1 daily and 3 wkly papers. Manuf., iron, woollens, flour, &c. Pop. 1,502.

Camden, Del., a flourishing p.v., Kent co., on a branch of Jones Creek, 3 m. S. of Dover. Manuf., fruit-canning. Pop. 1,500.

Camden, Ga., a S.E. co., bordering on Florida and the Atlantic, bounded S. by the St. Mary's R., W. partly by the Santilla, and N. by the Little Santilla; area 600 sq. m. It includes Cumberland Island in the Atlantic, 18 m. long, abt. 3 m. wide, and separated from the mainland by a narrow channel. Surface level; soil sandy. The chief prod. is rice. Cap., Jeffersonton. Val. of taxable prop. abt. \$1,400,000. Pop. 6,183 (of whom 57 for., and 4,092 colored).

Camden, Ill., p.v. and tp., Schuyler co., abt. 13 m. W. of Rushville. Pop. 184; of tp. 1,112.

Camden, Ind., p.v. in Jackson tp., Carroll co., on Deer Creek, 14 m. S.W. Logansport by the St. L. V., T. H. & I. R.R. It has a bank and several factories. Pop. 457.

—(p.o. name PENNSVILLE) v. in Penn tp., Jay co., on Salamonie R., 14 m. N.E. Hartford City. Pop. 497.

Camden, Iowa, p.v. in John's tp., Appanoose co. Pop. 51.

Camden, Kan., p.v., Morris co. Pop. 115.

Camden, Ky., p.o., Oldham co.

Camden, Me., p.v. in Camden tp., Knox co., on the W. side of Penobscot Bay, 10 m. N. of Thomaston, and 40 m. E.S.E. Augusta. It has 2 fine harbors, and its commerce is considerable. Manuf., anchors, pumps, woollens, &c.; also lime, of which abt. 200,000 casks are annually shipped to all parts of the U. States. The lime is used for making cement of a superior quality. Megunticook R. affords an extensive water power. Camden has a nat. and a savings bank, and a wkly paper. Pop. 2,500; of tp. 4,386.

Camden, Mich., p.v. in Camden tp., Hillsdale co., abt. 15 m. S.W. Hillsdale. Pop. 191; of tp. 2,048. See MONTGOMERY.

—v., Kent co., abt. 20 m. S.E. Grand Rapids. ✦

Camden, Minn., tp., Carver co. Pop. 908.

—p.v. in Lynd tp., Lyon co., 8½ m. S.W. Marshall. Pop. 200.

Camden, Miss., p.v., Madison co., 45 m. N.E. Jackson. Pop. 161.

Camden, Mo., a central co., drained by the Osage and several other rivers; area, 600 sq. m. Surface undulating; soil tolerably fertile. Lead mines are worked near Osage R., which is navigable during a short time every year. The chief prod. in 1880 were 448,411 bush. of corn, 69,171 of wheat, and 27,151 of oats. Cap., Linn Creek. Val. of taxable prop. abt. \$1,700,000. P. 7,267 (of whom 101 for., and 115 colored).

—tp., De Kalb co. Pop. 1,640. SEE MAYSVILLE.

—a coal-mining p.v. in Camden tp., Ray co., on Missouri R., abt. 25 m. N.E. Kansas City. Pop. 509; of tp. 3,353.

Camden, Neb., p.v., Seward co., on Big Blue R., 14 m. S.E. Seward. Pop. 80.

Camden, N. J., a S. W. co., separated from Pennsylvania by the Delaware R.; area, 220 sq. m. The surface is generally level, the soil of the E. part sandy, and that of the W. a rich loam, yielding quantities of fruit and vegetables for the Philadelphia market. It is traversed by the C. & A., C. & A., C. & B. C., W. J. & V. R.R.s., and a branch of the N. J. S. R.R. The chief prod. in 1880 were 284,555 bush. of corn, 67,604 of wheat, 306,811 of Irish and 142,629 of sweet potatoes, and 257,855 lbs. of butter. Cap., Camden. Val. of taxable prop. \$19,819,561. Pop. 62,941 (of whom 7,163 for., and 5,652 colored).

—a city, cap. of Camden co., on the left bank of the Delaware R., directly opposite Philadelphia, with which it is connected by a regular steamboat service. It lies 87 m. S.W. New York, and is the terminus of several R.R. lines. Among its public buildings the chief place is held by the court-house and rail stations. Manuf., iron foundries, saw mills, chemical-works, glass-works, ship-yards, &c. Windmill, or Clark's Island, lies in the river between Phil. and Camden proper, having the deepest channel on the Phil. side. Vessels of the largest class can come up only to Kaighn's Point, and those of 150 tons only to Camden proper. Camden has several yards, dry-docks, and marine railways, 2 nat. banks, a trust and savings fund, 1 daily and 3 wkly papers, &c. The city received its charter in 1831; and gas-lights were first introduced in 1851. Pop. in 1840, 3,371; in 1850, 9,479; in 1870, 20,045; in 1880, 41,659.

Camden, N. Y., p.v. ♦ and tp., Oneida co., on Fish Creek, 18 m. N.W. Rome by the R., W. & O. R.R. It has a nat. bank and 2 wkly papers. Manuf., furniture, iron foundry, rakes, woollens, &c. Pop. 1,589; of tp. 3,392.

Camden, N. C., a N.E. co., bounded N. by Virginia, S. and S.W. by Albemarle Sound and Pasquotank R.; area, 280 sq. m., part of which is occupied by the Dismal Swamp; surface level; soil fertile. Valuable forests of cedar and cypress exist, and the exportation of the timber and other prod. is facilitated by the Dismal Canal, 22 m. long. The chief prod. in 1880 were 295,447 bush. of corn, and 823 bales of cotton. Cap., Camden. Val. of taxable prop. abt. \$800,000. Pop. 6,274 (of whom 14 for., and 2,483 colored).

—(p.o. name CAMDEN COURT-HOUSE), p.v., cap. of above co., on Pasquotank R., which enters Albemarle Sound abt. 19 m. below, 40 m. S. of Norfolk. Pop. 300.

Camden, O., v. in Columbia tp., Hamilton co. Pop. 63.

Camden, O., tp., Lorain co. Pop. 908.

—p.v. ♦ in Somers tp., Preble co., on Seven Mile Creek, 44 m. N. of Cincinnati. Manuf., flour, lumber, &c. Pop. 800.

Camden, Pa., p.v. in Millin tp., Allegheny co., on Monongahela R., 15 m. S.E. Pittsburgh, with which it is connected by daily steamboat. There are coal mines near it. Pop. 300.

Camden, S. C., p.v. ♦, cap. of Kershaw co., 33 m. N.E. Columbia on the Wateree R., which is navigable for steamboats as far as the town. It has an arsenal, an academy, a library, 2 newspapers, and is altogether a flourishing little town. It is the N. terminus of the Camden branch of the S. C. R.R. It is best known as the scene of two battles—the first fought Aug. 16, 1780, between Gates and Cornwallis, and the second April 23, 1781, between Greene and Rawdon. In 1825, Lafayette laid the corner stone of a monument here to the memory of Baron De Kalb, of revolutionary celebrity, which stands at the foot of De Kalb street, and is of fine white marble. Pop. 1,780.

Camden, Tenn., p.v., cap. of Benton co., 87 m. W. of Nashville by the N.C. & St. L. R.R. Pop. 200.

Camden, Tex., p.o., Falls co.

Camden, W. Va., p.o., Lewis co.

Camden Bay, Alaska, on the Arctic Ocean, lat. 70° N., lon. 145° W.

Camden Point, Mo., p.v., Platte co., abt. 17 m. N.E. Leavenworth, Kan. Pop. 142.

Camdenville, Ky., v., Anderson co., abt. 16 m. from Frankfort. Pop. 110.

Camel's Hump, N., Chittenden co. This mountain lies in the E. part of Huntington, and is the most elevated summit of the Green Mts., with the exception of the Chin. It is situated 17 m. W. from Montpelier, 25 m. N.E. from Middlebury, and 20 m. S.E. from Burlington. The summit, 4,088 ft. above sea level, is conspicuous from the whole valley of Lake Champlain, but is hardly accessible except from the N. When it is reached, however, the prospect which it commands is hardly surpassed in extent and beauty. It is usually ascended by way of Duxbury, where carriages can approach to within abt. 3 m. from the summit. The rocks which compose the mountain are wholly of mica slate, and the Hump is nearly destitute of soil or vegetation.

Camera, N. C., p.o., Pender co.

Camerton, Dak., p.v., cap. of McCook co., abt. 45 m. N.W. Lincoln. Pop. 200.

Canadega Lake, N. Y., is situated in the N. part of Otsego co., and surrounded by hills. Length, 5 m.; average breadth, 1½ m. It communicates with Otsego Lake.

Canadian, Ark., tp., Mississippi co. Pop. 572.
Canadian River, rises in N. Mex. among the mountains of the Guadalupe Range, abt. 200 m. N.N.E. of Santa Fe. The first part of its course for some 200 m. is nearly S., after which it flows in an E. direction through the N. of Tex. and S. part of Ind. Ter., entering the Arkansas R. abt. 500 m. from its mouth. Its entire length is abt. 900 m. During the dry season it is a small, shallow stream, but, like other Western rivers, is subject to inundation at the breaking up of winter. Its waters are slightly colored (whence it is sometimes called the "Rio Colorado"), and have a brackish taste. Branches.—The North Fork (or Rio Nutria) of the Canadian, rising near 37° N. lat. and 103° W. lon., flows nearly parallel with the main stream, which it joins abt. 100 m. W. S.W. of Fort Smith. The Rio Nutria may more properly be regarded as a tributary than as a branch or fork of the Canadian River.

Canadice, N. Y., p. tp., Ontario co., between Honeoye Lake on the E., and Hemlock Lake on the W. Pop. 895.

Canajoharie, N. Y., p. v. ✦ and tp., Montgomery co., on the S. bank of Mohawk R. across which a bridge connects it with the village of Palatine Bridge and the N.Y.R.R., 55 m. N.W. Albany. It has 2 nat. banks, 1 wkly paper, several manuf. and is surrounded by a rich farming and dairying district. Pop. 2,013; of tp. 4,294.

Canal, Ind., p.o., Warrick co.

Canal, Pa., p.tp., Venango co., bordering S.W. on French Creek. Pop. 1,030.

Canal Dover, O., p.v. ✦ in Dover tp., Tuscarawas co., on the Ohio Canal, 69 m. N.W. Bridgeport, on the Ohio R., by the C.T.Y.&W.R.R., and 100 m. N. of Marietta by the C.&M.R.R., of which it is the N. terminus. It has 2 banks, a wkly paper, several important iron manuf., flouring mills, &c. Pop. 2,208.
Canal Fulton, O., p.v. ✦ in Lawrence tp., Stark co., on Tuscarawas R., also on the Ohio Canal, 9 m. N.W. Massillon by the C.T.V.&W.R.R. It is an important shipping place for wheat. Pop. 1,196.

Canal Lewisville, O., p. v. in Tuscarawas tp., Coshocton co., on the Ohio Canal, and at a short distance from Coshocton. Pop. 251.

Canal Winchester, O., p.o. ✦ at Winchester, Franklin co.

Canandaigua, Mich., p.v. in Medina tp., Leawee co., on Tillin R., 16 m. S.W. Adrian. P. 125.

Canandaigua, N. Y., p.v. ✦ in Canandaigua tp., and the cap. of Ontario co., 28 m. S.E. Rochester, and 74 m. W. of Syracuse by the N.Y.C.&H.R.R.R. This v., one of the most pleasant in W. New York, is beautifully situated on a plain at the N. end of Canandaigua Lake. It is well built, lies chiefly on two parallel streets, running N. and S., and crossed at right angles by a number of others. At the center is a fine public square, on which stands the court-house and other public buildings. It has a fine court-house, a town hall, 6 churches, a nat. and another bank, an academy of a high order, with a large endowment, a distinguished female seminary, a lunatic asylum, 2 wkly papers, and various manuf. It is surrounded by a rich agricultural country. P. 5,726, of tp. 8,286.

Canandaigua Lake, N. Y., Ontario and Yates cos. This beautiful sheet of water is 14 m. long and from 1 to 1½ m. wide, is surrounded by a highly cultivated country, and presents, on its shores, much delightful scenery. Its waters are deep, transparent, and abound with fish of various kinds. Its

outlet flows N.E. into Flint Creek, which enters Clyde R., one of the constituents of Seneca R., the common outlet of Cayuga, Seneca, Canandaigua, and some smaller lakes, by which their waters are finally discharged through Oswego R. into Lake Ontario.

Canarsie, N. Y., p.v. in Flatlands tp., Kings co., on Jamaica Bay, abt. 6 m. S.E. Brooklyn. It has several good hotels, and is a favorite summer resort. Pop. 1,760.

Canaseraga, N. Y., a thriving p.v. in Burns tp., Alleghany co., on Canaseraga Creek, 79 m. S.E. Buffalo by the N.Y., L.E. & W. RR. It has 2 wkly papers, an academy, a graded school, and several mills. Pop. 701.

—v. in Sullivan tp., Madison co. Pop. 744.

Canaseraga Creek, N. Y., runs N. through Alleghany and Steuben cos., and joins the Genesee in Livingston co.

Canastota, N. Y., p.v. in Lenox tp., Madison co., on Erie Canal, 21 m. E. of Syracuse, and 31 m. W. of Utica by the N.Y.C. & H.R. RR. It is also the N. terminus of the C. & C. RR. It has a nat. and another bank, a wkly paper, and various manuf. Pop. 1,569.

Canastota Creek, N. Y., Madison co., runs N.W. to Oneida Lake.

Canawanugus, N. Y., a small p.v., Livingston co., on the Genesee Valley Canal, abt. 20 m. S. W. Rochester. ✦

Canby Hollow, Va., p.o., Lee co.

Canbyon, Mont., p.o., Custer co.

Canyon City, Oreg., gold-mining p.v. ♦, cap. of Grant co., on the Middle Fork of John Day's R., 190 m. S.E. Dallas. Pop. 393.

Canyon Creek, Mont., p. h., Lewis and Clarke cos., abt. 30 m. N. by W. of Helena. Pop. 14.

Canyon Ferry, Mont., p.v., Meagher co., on the Missouri, 20 m. N.E. Helena. Pop. 135.

Capac, Mich., p.v. ♦ in Mussey tp., St. Clair co., 27 m. W. by N. of Port Huron by the C. & G.T.R.R. Pop. abt. 544.

Capau Gris, Mo., h. in Monroe tp., Lincoln co., on the Mississippi, 41 m. N.W. St. Louis. Pop. 55.

Capay, Cal., p. h., Yolo co., 35 m. N.W. Sacramento. Pop. 450.

Cape, La., p.o., Madison co.

Cape Ann, Mass., a rocky peninsula forming the N. limit of Massachusetts Bay, 31 m. N.E. Boston. It contains the town of Rockport and part of Gloucester, Essex co. The place is much exposed to the prevalent N.E. storms; but it offers a small, well-sheltered harbor among the rocks, where coasting vessels often take refuge. On the shore of this harbor, in lat. 42° 38' N., lon. 70° 35' W., are 2 fixed lights, 500 to 600 yards apart, 90 ft. above the water.

Cape Arago, Oreg., in Coos co., on the Pacific; lat. 43° 21' N., lon. 124° 20' W.

Cape Beaufort, Alaska, a headland in lat. 69° N., lon. 163° W.

Cape Blanco, or OXFORD, a rocky headland forming the W. extremity of Oregon; lat. 42° 50' N.; lon. 124° 32' W. A short distance S. of the cape is the harbor of Port Oxford, or Ewing.

Cape Canaveral, Fla., on the Atlantic, 135 m. S.E. St. Augustine; lat. 28° 27' N., lon. 80° 33' W. It has a revolving light.

Cape Charles, Va., a headland at the N. entrance of Chesapeake Bay, forming the S. extremity of Northampton co. N.E. of it, on Smith Island, is a light-house with a revolving light; lat. 37° 3' N.; lon. 76° 2' W.

Cape Cod, Mass., is a long and narrow sandy peninsula, which nearly coincides with Barnstable co. It is about 65 m. long, and from 1 to 20 m. wide. The form of it is similar to a man's arm bent at the elbow. On the N. extremity, which is called Race Point, is a revolving light 47 feet above the sea; lat. 42° 03.7' N., lon. 70° 14.3' W.

Cape Conception, Cal., the S. W. extremity of Santa Barbara co., lat. 34° 26' N., lon. abt., 120° 25' W.

Cape Dall, Alaska, a headland in lat. 61° 22' N., lon. 166° 25' W.

Cape Dezhnev, Alaska, is the extremity of a peninsula in Norton Sound; lat. 64° 16' N., lon. 161° 52' W.

Cape Elizabeth, Alaska, is in lat. 59° 8' N., lon. 151° 4' W., at the E. of the entrance to Cook inlet.

Cape Elizabeth, Me., tp., Cumberland co., 1 m. from Portland, contains 7 churches, and has a rolling mill, oil refinery, a dry-dock, and important manufactures. Cape Elizabeth is a suburb of Portland, and a place of summer resort. The tp. takes its name from the cape, in lat. 43° 33' 56" N., lon. 70° 11' 41" W. It has two stone light-houses, one with a fixed and one with a flashing light. Pop. 5,302.

Cape Elizabeth Depot, Me., p.v. in Cape Elizabeth tp., Cumberland co., on Casco Bay at a short distance S. of Portland. Pop. 600.

Cape Fair, Mo., p.o., Stone co.

Cape Fear, N. C., on the Atlantic, is the S. extremity of Smith's Island, and is the most S. point of the State. The light-house is in lat. 33° 52.3' N., lon. 77° 59.8' W.

—tp., Chatham co. Pop., 2,500.

—tp., New Hanover co. Pop. 1,293.

Cape Fear River, N. C., is formed by the Haw and Deep Rs., which unite at Haywood, in Chatham co. It flows S.E. for abt. 200 m. (from junction to mouth) and enters the Atlantic near Cape Fear. Steamboats can ascend it to Fayetteville, 120 m.

Cape Flattery, Wash., the N.W. point of the territory and of Callam co. On Tatoosh Island, half a mile distant, is a small light-house, in lat. 48° 23' 20" N., lon. 124° 43' 48" W. This is the most W. point of the U. S. exclusive of Alaska.

Cape Florida, Fla., the S. point of Key Biscayne, off the S.E. point of the State, has a light-house standing in a grove of cocoanut trees, lat. 25° 39' 56" N., lon. 80° 09' 24" W., with a fixed light.

Cape Foulweather, or YAQUINA HEAD, the westernmost point of Tullamook co., has a brick light-house 81 feet high, showing a fixed white light of the first order 150 feet above the sea; lat. 44° 16' 33" N., lon. 124° 05' W.

Cape Galena, Mo., p.v. Morgan co., on Osage R., 11 m. N. of Linn Creek. Here is a lead mine. ♦

Cape Girardeau, Mo., a S.E. co. Area, 875 sq. m. It is bounded on the E. by the Mississippi R. and drained by the Whitewater. The surface is nearly level; the soil is fertile. The chief prod. in 1880 were 904,998 bush. of corn, 535,893 of wheat, 124,523 of oats, 17,222 lbs. of tobacco, and 36,711 of wool. Lumber, cooperage, saddlery, harness, &c., are the principal manufactures. Cap. Jackson. Val. of taxable prop. abt. \$11,000,000. Pop. 20,998 (of whom 2,386 for., and 1,994 colored).

—a city in above co., on the W. bank of the Mississippi, 150 m. S. of St. Louis, is the seat of St. Vincent's College, and contains also a female academy and public school. There are 3 wkly papers, one of them German. Its exports are cotton, plows, lime, mineral paints, &c. There are 9 churches and a bank. Pop. 3,889; of tp. 5,791.

Cape Hallett, *Alaska*, a headland on the Arctic Ocean, lat. 70° 47' 30" N., lon. 151° 53' W.

Cape Hat teras, *N.C.*, the E. extremity of the State, is a point of a low sandy island, separated from the mainland by Pamlico Sound. The navigation is dangerous in this vicinity, on account of shoals which extend far out into the sea; lat. 35° 15.2' N., lon. 75° 30.9' W. Two m. N. of the extremity stands the light-house, 190 feet in height, showing a flashing dioptric light of the first order.

Cape Henlopen, *Del.*, is at the entrance of Delaware Bay, 13 m. S.S.W. of Cape May; lat. 38° 46.6' N., lon. 75° 04.7' W. It has a stone light-house, showing a fixed, white dioptric light of the first order, 128 ft. above the sea.

Cape Henry, *Va.*, is at the S. side entrance of Chesapeake Bay, abt. 10 m. S.W. Cape Charles; the light-house has a fine light, 120 ft. above sea level, in lat. 36° 55' N., lon. 76° 5' W.

Cape Lisianski, *N.J.* See CAPE MAY.

Cape Lisburne, *Alaska*, a projection of land into the Arctic Ocean, in lat. 68° 55' N., lon. 163° 33' W.

Capell, *Cal.*, p.o., Napa co.

Cape Lookout, *N.C.*, the S. E. extremity of the islands off Cartaret co., has a light-house 150 ft. high near its extremity, in lat. 34° 37' 16" N., lon. 76° 31' 07" W., with a fixed white light of the first order.

Cape's Mills, *N.C.*, p.o., Richmond co.

Cape May, or CAPE ISLAND, *N.J.*, the S. extremity of the State, is at the entrance of Delaware Bay. Here is a revolving light, elevated 152 ft. above the sea, in lat. 38° 55.8' N., lon. 74° 57.3' W.

—a co. at the S. extremity of the State; area, 250 sq. m. Its eastern boundary is formed by the Atlantic; Delaware Bay washes its W. shore, and Tuckahoe Creek makes a part of its N. border. The surface is level and the soil entirely alluvial. On the Atlantic coast is a beach covered for the width of from 1½ to 2 m. with grass. Through the numerous inlets which divide this beach the sea penetrates into the marshes about 4 m. in width and forms lagoons or salt water lakes. In the N. part of the co. is a similar marsh. Near Dennisville is a deposit of cedar timber in the soil to an indefinite depth, which, though probably at least 2,000 years old, is still sound and valuable. The West Jersey RR. traverses the co. The chief prod. in 1880 were 116,428 bush. of corn, and Irish and sweet potatoes. Cap., Cape May Court-House. Val. of taxable prop. \$3,460,200. Pop. 9,765 (of whom 222 for., and 569 colored).

—a city of above co., also called Cape City and Cape Island City, 81 m. S. S. E. Philadelphia by the West Jersey RR., of which it is the S. terminus. It is also connected with Philadelphia, in summer, by several lines of steamboats. It is a noted summer resort, being the favorite watering place for Philadelphians. The beach is over 5 m. long and affords splendid drives. The bathing facilities are unrivalled. There are numerous large and well-appointed hotels, which with the cottages of visitors are situated on a small piece of land about 250 acres in extent, known as Cape Island, having formerly been separated by a small creek from the mainland. The principal place of resort in the vicinity is Cold Spring, 2 m. N. of the beach. Pop. 1,699.

Cape May Court-House, *N.J.*, p.v., the cap. of Cape May co., 3 m. from the sea, 69 m. S. E. of Philadelphia by the West Jersey RR. Pop. 570.

Cape May Point, *N.J.*, a watering place and p.o. in Cape May co., near the Cape May light-house,

2 m. S. of the city of Cape May. It is well supplied with hotels and boarding-houses. Pop. 198.

Cape Mendocino, *Cal.*, a lofty headland of Humboldt co., is the westernmost point of that State. It has a wrought-iron light-house with a flashing white light of the first order, 428 ft. above the sea; lat. 40° 26' 24" N., lon. 124° 23' 27" W.

Cape Neddick, *Me.*, p.v. in York tp., York co., abt. 4 m. S.E. of a headland of the same name, and 40 m. S.E. of Portland. ♣

Cape Ommaney, *Alaska*, the S. extremity of Baranoff Island, at the entrance to Christian Sound, in lat. 56° 10' N., lon. 134° 35' W.

Cape Perpetua, *Oreg.*, is in lat. 44° 12' N., lon. 124° 7' W., Benton co.

Cape Porpoise, *Me.*, a fishing p.v. in Kennebunkport tp., York co., on the Atlantic Ocean, 25 m. S.W. Portland. Pop. 440.

Cape Romain, *S.C.*, a very low point of land, 37 m. N.E. Charleston. It has a fixed light on the E. end of Great Racon Key, 87½ ft. above sea level, in lat. 33° 1' N., lon. 79° 24' W.

Cape Roman, or ROMANO, *Fla.*, a long, low point, containing mangrove trees, on the W. coast of the State, 312 m. S.S.W. Tallahassee, in lat. 25° 41' N., lon. 80° 5' 30" W.

Cape Romanzoff, on the W. coast, near the entrance to Behring's Straits.

Cape Rozier, *Me.*, p.v., Hancock co., on a point of land projecting into Penobscot Bay, 11 m. E. of Belfast. ♣

Caper ton, *W. Va.*, p.o., Fayette co.

Cape Sable, *Fla.*, the most southerly projection of the mainland of Florida, in lat. 24° 50' N., lon. 81° 15' W.

Cape Saint George, *Fla.*, the S. extremity of St. George's Island, S. of Franklin co. The light-house is 65 ft. above sea, with a fine light, in lat. 29° 36' N., lon. 85° 5' W.

Cape San Blas, *Fla.*, is on the S. coast, 125 m. S.E. Pensacola, and consists of a low tongue of land projecting abt. 2 m. from the mainland. The light-house, in lat. 29° 40' N., lon. 85° 20' W., is 65 ft. above sea level, and has a revolving light.

Cape Sandy, *Ind.*, p.o., Crawford co.

Cape town, *Cal.*, p.o., Humboldt co.

Capeville, *Va.*, p.o., Northampton co.

Cape Vincent, *N.Y.*, a p.tp. ♣ and port of entry of Jefferson co. The tp. borders on the St. Lawrence and Lake Ontario, and has important fisheries. The village is situated on the St. Lawrence, opposite Kingston, Canada, at the terminus of a branch of the R., W. & O. R.R., and has a steamboat landing, a ship-yard, several mills, a brewery, &c. Pop. of v. 1,361; of tp. 3,143.

Capitoma, *Kan.*, p.tp., Nemaha co. Pop. 864.

Capistra no, *Cal.*, p.h., Los Angeles co., 29 m. S.E. Anaheim. Pop. 80.

Capitol City, *Col.*, a silver-mining p.v., Hinsdale co., 20 m. N.W. Lake City. Pop. 140.

Capitol Mountain, *Col.*, a summit of the Elk Mts., lat. 39° 8' N., lon. 107° 5' W. Height, 13,997 ft.

Capeville, *Tenn.*, p.v., Shelby co., 17 m. S. of Memphis. Pop. 75.

Caplinger's Mill, *Mo.*, p.o., Cedar co.

Capon Bride, *W. Va.*, p.v., Hampshire co., on Capon R., 20 m. N.W. Winchester. Pop. 140.

Capon Iron Works, *W. Va.*, p.o., Hardy co.

Capon Road Depot, *Va.*, p.o., Shenandoah co.

Capon Springs, *W. Va.*, p.o., Hampshire co.

Cappahosic, *Va.*, p.o., Gloucester co.

Cappeln, *Mo.*, p.v. in Femme Osage tp., St. Charles co., 38 m. W. of St. Louis. Pop. 33.

Capp's Creek, *Mo.*, v. in Newtonia tp., Newton co., some few miles from Pierce City. ♣

Capp's Ford, *Tenn.*, p.o., Claiborne co.

Capron, *Ill.*, p.v. ♦ in Boone tp. and co., 69 m. N.W. Chicago by the C.&N.W.R.R. Pop. 323.

Captain's Harbor, *Alaska*, a trading port in the island of Oonalaska, and the 3d place in the territory in rank of commercial importance.

Captina, *Ok.*, p.o., Belmont co.

Capto, *Cal.*, v. in Little Lake tp., Mendocino co. Pop. 43.

Captole, *Ga.*, p.o., Screven co.

Capulin, *Col.*, p.o., Conejos co.

Caput, *Mo.*, p.o., Barton co.

Caranchua, *Tex.*, p.o., Jackson co.

Carbon, *Ind.*, p.v. in Van Buren tp., Clay co., 53 m. W. of Indianapolis by the I.&St.L.R.R. Coal, lumber and staves are extensively shipped here. Pop. 600.

Carbon, *Iowa*, v. in Douglas tp., Adams co. Pop. 252.

Carbon, *Mo.*, coal-mining v., Macon co., at a short distance E. of Macon. ♦

Carbon, *Pa.*, an E. co.; area, 400 sq. m. It is a mountainous district, made up of parallel ridges running in a N.E. and S.W. direction. The largest of these is the Blue or Kittatinny Mt., which bounds the co. on the S.E. Anthracite is the principal prod. of the co. The coal mines are in the smaller ridges N.W. of this. Of these, Mauch Chunk, at the E. termination of the S. anthracite coal field, is the most important. At the top of Summit Mt. the beds have been opened and worked like a quarry, the coal lying in a mass not less than 50 ft. thick. The Hazleton and Beaver Meadow mines are in the N.W. corner of the co. The coal is transported by RRs. from the mines to the Lehigh R., and thence by slack water navigation and canal, and also by the L.V.R.R., down the Lehigh to the Delaware R. at Easton. The Lehigh R. traverses the co. across the line of its ridges; but the mines are only on its W. side, and from 6 to 10 m. or more distant. The yield of the mines in this co. is abt. the 6th of the whole production of anthracite. The L.V.R.R., and branches to Mahanoy, Mount Carmel, Hazleton and Audenried, traverse the co. The chief prod. in 1880 were 78,406 bush. of corn, 70,560 of oats, 41,200 of rye, and 20,740 of buckwheat. Cap., Mauch Chunk. Val. of taxable prop. abt. \$20,000,000. Pop. 31,922 (of whom 5,637 for., and 41 colored). —p.o., Carbon co.

—tp., Huntingdon co. Pop. 1,393. See ROBERTS-DALE.

—v. in Mahoning tp., Lawrence co. Pop. 74.

Carbon, *Wyo.*, a central co., extending from Montana on the N. to Colorado on the S., intersected by the N. fork of the Platte R., and watered by the S. fork and by Powder and Tongue Rs.; area, over 15,000 sq. m. The S. part is occupied by the Medicine Bow Mts., and the central portion contains Black and Wind River Mts. Copper and paint-ore are found, and coal and iron in the S. part, which is crossed by the U.P.R.R. Cap., Rawling's Springs. Pop. 3,438 (of whom 925 for., and 29 Chinese). —p.v. ♦, Carbon co., 84 m. N.W. Laramie by the U.P.R.R. Pop. 365.

Carbado, *Wash.*, p.o., Pierce co.

Carbonateville, *N. Mex.*, p.o., Santa Fé co.

Carbon Black, *Pa.*, p.v. in Winfield tp., Butler co., 11 m. S.E. Butler by the Butler extension of the P.R.R. (Saxtonburgh City Station). Pop. 100.

Carbon Centre, *Mo.*, p.o., Vernon co.

Carbon Centre, *Pa.*, p.v. in Clearfield tp., Butler co., 8 m. E. of Butler. Pop. 60.

Carbon Cliff, *Ind.*, p.v. in Hampton tp., Rock Island co., 9 m. E. of Rock Island by the C.,R.I.&P.R.R. Manuf., fire-bricks. Pop. 170.

Carbondale, *Cal.*, p.o., Los Angeles co.

Carbondale, *Ill.*, p.v. ♦ and tp., Jackson co., 57 m. N. of Cairo by the I.C.R.R., which here connects with the G.T.&C. and the C.&S.R.Rs. It has an

active trade in cotton, tobacco, fruit, lumber and farm produce, and has a savings bank, another bank and a wkly paper. It is the seat of the Southern Illinois Normal University. Pop. 2,213; of tp. 3,552.

Carbondale, *Ind.*, p.v., Warren co., 7 m. N. of Williamsport. Pop. 50.

Carbondale, *Kan.*, p.v. ♦ in Ridgeway tp., Osage co., 17 m. S.W. Topeka by the A.,T.&S.F.R.R. It has extensive coal mines. Pop. 710.

Carbondale, *Ok.*, a coal-mining v., Athens co., abt. 15 m. N.E. New Philadelphia. ♦

Carbondale, *Pa.*, a city of Lackawanna co., on the D.&H.R.R., at the head of Lackawanna Valley and near the source of the Lackawanna R., 110 m. N.N.W. of Philadelphia. The Lackawanna Valley is extremely rich in beds of coal, which in the vicinity of Carbondale are 20 ft. thick. The mines are worked by the Delaware and Hudson Canal Company, who take out annually abt. 900,000 tons. The coal is drawn up inclined planes by steam engines to a height of 850 ft.; thence it is conveyed by RR. to Honesdale; and from Honesdale by the Delaware and Hudson Canal to the Hudson R. The city was incorporated in 1851. It contains 8 churches, a Catholic academy, a graded school, a music hall, 2 banks, and 2 wkly papers. Pop. 7,714.

—tp., Lackawanna co. Pop. 1,163.

Carbon Hill, *Ok.*, p.o., Hocking co.

Carbon Run, *Pa.*, a coal-mining p.v. in Barclay tp., Bradford co., 4 m. S. of Barclay. Pop. 600.

Carson, Wts., tp., Portage co. Pop. 426.

Carson City, Mich., p.v. ♦ in Bloomer tp., Montcalm co., 20 m. S. E. Stanton. It has a bank, a wkly paper, several mills, and an extensive trade in pine lumber. Pop. 709.

Carson City, Nev., the cap. of the State, and also of Ormsby co., situated in Eagle Valley, 4 m. from Carson R. and 178 m. N. E. San Francisco. It is in a fertile and picturesque region. The Sierra Nevada Mts. rise abruptly on the W., while the valley of the Carson extends far to the N. and E. A railroad connects it with Virginia and Gold Hill, in Storey co., which is used chiefly to transport ore from the mines at those places to the crushing mills on the Carson R., and to carry back timber, which is abundant on the slopes of the Sierra Nevada. The branch mint occupies a fine building. The State prison is at Warm Springs, 2 m. to the E. There are 4 quartz mills, with 76 stamps, for the production of silver, and several churches, good schools, 2 daily papers, and the State and Odd Fellows' libraries. Carson City was founded as a ranch before the discovery of silver in Nevada, after which time it increased rapidly, being on the line of travel through the State previous to the opening of the C. P. RR. Pop. 4,227.

Carson Hill, Cal., v., Calaveras co. Pop. 22.

Carson River, Nev., rises in the Sierra Nevada, flows nearly N. E. for abt. 150 m., passes through Ormsby and Lyon cos., and enters Carson Lake in Churchill co. Carson Lake has no outlet, and is abt. 15 m. long.

Carson's Creek, N. C., p.o., Transylvania co.

Carson's Lake, Ark., tp., Mississippi co. Pop. 169.

Carter, Iowa, p.o., Iowa co.

Carter, Ky., a N. E. co., intersected by the Little Sandy R. and Tygart's Creek. Area, abt. 500 sq. m. The surface is hilly and broken. The soil near the rivers is tolerably fertile, but in other places unfit for cultivation. The mineral wealth is considerable, iron ore and stone coal being found among the hills in great quantities. The chief prod. in 1880 were 25,880 bush. of wheat, 281,371 of corn, 40,148 of oats, 118,918 lbs. of butter, and 20,519 of wool. There are 2 manuf. of pig iron. Cap., Grayson. Val. of taxable prop. abt. \$2,400,000. Pop. 12,345 (of whom 167 for., and 371 colored).

Carter, Mo., a S. E. co., intersected by Current R. Area, 500 sq. m. The surface is diversified by hills and valleys. Timber is plentiful, and copper and iron are found. The chief prod. in 1880 was 100,836 bush. of corn. Cap., Van Buren. Val. of taxable prop. abt. \$1,200,000. Pop. 2,168 (of whom 14 for., and 21 colored).

—tp. in above co. Pop. 798.

Carter, Tenn., a N. E. co., bordering on North Carolina, drained by affluents of Holston R. and by Doe R.; area, 350 sq. m. It occupies some of the highest ground in the State. The Iron Mt. range, covered with timber and rich in mines of iron, extends along its S. E. border. Watauga R. and other streams supply water power, which is extensively employed in iron-works. The valleys are highly productive. The chief prod. in 1880 were 55,180 bush. of wheat, 243,906 of corn, and 51,141 of oats. There are 6 iron forges, 1 flour mill, and 1 manuf. of woolen goods. Cap., Elizabethtown. Val. of taxable prop. abt. \$1,600,000. Pop. 10,019 (of whom 6 for., and 634 colored).

Cato, *Wis.*, p.v. and tp., Manitowoc co., abt. 10 m. N.W. Manitowoc. Pop. 142; of tp. 1,875.

Cato Falls, *Wis.*, v. in Cato tp. Pop. 27.

Catoctin Creek, *Md.*, rises in Frederick co., and flows S. to the Potomac R., which it joins 10 m. below Harper's Ferry.

Catoctin Furnace, *Md.*, p.v., Frederick co., 11 m. N. of Frederick City.

Catoma, *Ala.*, p.o., Montgomery co.

Caton, *N. Y.*, p.v. and tp., Steuben co., 6 m. N. E. Lindleytown. Pop. 300; of tp. 1,642.

Catonsville, *Md.*, p.v., Baltimore co., 8 m. W. of Baltimore. It has an academy for ladies. Pop. 1,712.

Catoosa, *Ga.*, a N.W. co., bordering on Tennessee, and watered by alluents of the Tennessee R.; area, 175 sq. m. It is traversed by the W.&A.R.R. The surface is hilly and partly covered with forests. The chief prod. in 1880 were 151,767 bush. of corn, 34,613 of wheat, and 111 bales of cotton. Cap., Ringgold. Val. of taxable prop. abt. \$500,000. Pop. 4,739 (of whom 22 for., and 612 colored).

Catoosa Springs, *Ga.*, p.o. and saline chalybeate spring of Catoosa co., 8 m. E. of Ringgold. There are accommodations for several hundred visitors, and the springs are extensively patronized in the summer.

Catskill, *N. Y.*, p.v. in Catskill tp., cap. of Greene co., on the W. bank of the Hudson R., at the mouth of Catskill Creek, 34 m. below Albany, and 109 m. by rail N. of New York. It contains a court-house, 7 churches, 2 nat. banks, and 2 wkly papers. The H.R.R.R. passes on the other side of the river. Pop. 4,320; of tp. 8,311.

Catskill Creek, *N. Y.*, a good mill stream, rises in Schoharie co., flows through the S.W. corner of Albany co., and enters the Hudson in Greene co., at the v. of Catskill. It has a descent of more than 1,000 ft. in 35 m.

Catskill Mountains, *N. Y.*, a group of moderate elevation belonging to the great Appalachian system. They are situated for the most part in Greene co., their E. base being 7 or 8 m. distant from the v. of Catskill. They are chiefly remarkable for the beauty of their scenery and the magnificence of the outlook over the neighboring country. The most striking features of the Catskills are the cascades of the mountain streams and the deep gorges or "cloves" through which these find their way to the lower lands. The highest summits are Round Top, High Peak, and Overlook, the elevation of which, according to barometrical measurements, is abt. 3,800 ft. The clove of the Catterskill, or Kaaterskill, which commences a m. W. of two small lakes, lies between these and Round Top, the latter being on the S. and the lakes on the N. side. High Peak is 6 m. distant from the head of the clove, and is reached by a foot path. The clove is a ravine of 5 m. in length. At its head the rivulet from the lakes meets another branch from the N., and their united waters flow with increasing swiftness to a point where the mountain divides like the cleft foot of a deer, leaving a deep hollow for the brook to tumble into. The descent of the first cascade is 180 ft., that of the second 80, and below these there is another fall of 40 ft. In the winter the upper fall becomes encased in a hollow column of blue ice, which reflects in the rays of the sun the brilliant colors of the prism. Below the falls the sides of the gorge rise in a succession of

walls of rock to the height of 300 ft. or more. Other falls are met with by following the stream down toward the Hudson, till 2 m. above the v. of Catskill the waters are discharged into the stream of this name. The Stony clove is 6 m. W. from the head of the Catterskill, in a portion of the group called the Shandaken Mts.; it is only $1\frac{1}{2}$ m. long. The clove of the Plattekill is 5 m. S., beyond the Round Top and High Peak; its scenery possesses the same wild character as the Catterskill. Numerous side streams descend the steep mountain on its S. side from an altitude of 2,000 ft., leaping from ledge to ledge till they mingle their waters with the Plattekill. Where the stream first falls into the clove it is said to descend in successive falls 1,000 ft. in a few hundred yards; and, as stated by others, 2,500 in 2 m. The streams which flow down the E. slopes of the mountains soon find their way into the Hudson. On the W. side the drainage is into the Schoharickill, which runs N. and falls into the Mohawk 50 m. above its junction with the Hudson.

Catskill Station, N. Y., small p.v., Columbia co., on the Hudson R., opposite Catskill, 109 m. N. of New York city by the N.Y.C.&H.R.R.R. \blacklozenge

Cat Spring, Tex., p.v., Austin co., 6 m. S.W. Belleville, Pop. 150.

Cattaraugus, N. Y., a S. W. co., bordering on Pennsylvania; area, abt. 1,250 sq. m. It is partly bounded N. by Cattaraugus Creek. The surface is hilly, but there are few mountains of considerable altitude. The soil is rich and productive, yielding good crops of grain and affording excellent pasturage. The Alleghany R. and the numerous creeks which flow through the co., furnish motive power. Bog-iron ore, peat, marl, manganese, and sulphur are found in different places; salt springs have been discovered, and petroleum springs exist in the E. part. Cattle and lumber are the principal exports, the transportation of which is greatly facilitated by the N.Y., L.E.&W.R.R., which traverses the co., and by the Genesee Valley Canal, which extends from Rochester to Orlent. The co. is also traversed by three lines of R.Rs. The chief prod. in 1880 were 305,193 bush. of corn, 61,976 of wheat, 933,579 of oats, 38,228 of buckwheat, 33,534 of barley, 151,620 tons of hay, 942,802 lbs. of cheese, 2,915,633 of butter, 114,917 of wool, 493,694 of maple sugar, and 47,836 of hops. Cap., Little Valley. Val. of taxable prop. \$13,153,000. Pop. 55,808 (of whom 7,658 for., and 283 colored). —p.v. \blacklozenge in New Albion tp., above co., 31 m. E. of Dunkirk by the N.Y., L.E.&W.R.R. It has a bank and several mills. Pop. 705.

Cattaraugus Creek, N. Y., rises in Cattaraugus and Genesee cos., flows W., forming the boundary between Cattaraugus and Erie cos., and empties into Lake Erie. It is a fine, large stream, and has a fall of 800 ft. in abt. 50 m., affording extensive water power.

Catur, Ky., p.o., Perry co.

Cayote, Tex., p.o., Bosque co.

Cayucas, Cal., a pretty agricultural p.v. in San Luis Obispo co., on the sea-coast, 20 m. N.W. San Luis Obispo, Pop. 300.

Cayuga, Ill., p.v., Livingston co., 87 m. S.W. Chicago by the C.&A.R.R. Pop. 178.

Cayuga, Miss., p.v. Hinds co., 22 m. S.E. Vicksburg, Pop. 79.

Cayuga, N. Y., a central co., bounded N. by

Lake Ontario, W. by Cayuga Lake, touching Skaneateles Lake on the E., and traversed by Seneca R. and other smaller streams, which furnish abundant water power; area, 752 sq. m. The surface is undulating; the soil fertile; salt, gypsum and limestone abound. Owaseo Lake, 10 m. long, lies in its center. The chief prod. in 1880 were 1,086,061 bush. of corn, 692,028 of wheat, 1,041,403 of oats, 72,480 of buckwheat, 576,813 of barley, 465,503 of potatoes, 2,596,813 lbs. of butter, 347,668 of wool, and 407,769 of tobacco. Cap., Auburn. Val. of taxable prop. \$60,000,000. Pop. 65,084 (of whom 10,804 for., and 158 colored).
 —or **CAYUGA BRIDGE**, p.v. in Aurelius tp., Cayuga co., on Cayuga Lake near its outlet, 3 m. W. of Auburn by the N.Y.C.&H.R.R., which here crosses the lake on a bridge 1 m. in length. Pop. 484.

Cayuga Creek, N.Y., rises in Genesee and Wyoming cos., flows W. and unites with Seneca Creek to form Buffalo Creek, in Erie co.

Cayuga Lake, N.Y., lies between Cayuga and Seneca cos., and extends several m. S. into Tompkins co. It is a beautiful sheet of water, abt. 40 m. long from N. to S., and from 1 to 3½ m. in width. The outlet flows N. into Seneca R., and thence through the Oswego into Lake Ontario, abt. 35 m. distant. Its shores, in some places, are precipitous, but generally rise gradually from 100 to 150 ft., covered with highly-cultivated farms and thriving vs. It is very deep in some places, it is said, exceeding 500 ft.; its water is very transparent, and, owing to its depth, rarely closed by ice, even in the severest winters. It abounds with the choicest fish, such as the salmon trout, pickerel, perch, and pike.

Cayuta, N.Y., p.v. and tp., Schuyler co., 5 m. S.E. Alpine. Pop. 53; of tp. 691.

Cayuta Creek, N.Y., a rapid mill stream, rises in Cayuga Lake, Chemung co., flows S., and falls into the Susquehanna a short distance below the State line.

Cayuta Lake, N.Y. This small body of water lies in the N. part of Chemung co., on the confines of Tompkins co. Trout and other fish of a fine flavor are abundant in its waters.

Cayutaville, N.Y., p.o., Schuyler co.

Centre, Pa., a central co.; area, abt. 1,000 sq. m. It is traversed by the Alleghany, Bald Eagle and several other mountain ranges. It is well drained by a number of small creeks. The soil is excellent in the valleys, and agriculture is in a forward state. The mountains are covered with valuable timber, but furnish little land suitable for cultivation. There are extensive mines of iron, quarries of limestone, and beds of stone coal. The chief prod. in 1880 were 898,185 bush. of corn, 389,804 of wheat, 250,351 of oats, 125,628 of potatoes, 70,880 of rye, 581,662 lbs. of butter, and 56,711 of wool. Cap., Bellefonte. Val. of taxable prop. abt. \$12,000,000. Pop. 37,921 (of whom 1,212 for., and 349 colored).

Chamis'so, *Alaska*, an island in Kotzebue Sound, near the entrance to the Bay of Good Hope, in lat. 66° 13' 10" N., lon. 161° 45' 50" W.

Chamois (*shu-moi'*), *Mo.*, p.v. ✦, Osage co., on Missouri R., 25 m. S. of Jefferson City by the M.P.R.R. It has a wkly paper. Pop. 562.

Champagne, *Wis.*, p.o., Lincoln co.

Champagnolle, *Ark.*, tp., Calhoun co. Pop. 820.

—p.v. in Franklin tp., Union co. Pop. 109.

Champaign, *Ill.*, an E. central co., comprising a part of the Grand Prairie, and watered by several streams; area, abt. 875 sq. m. The surface consists of an open plain of great fertility, interspersed with small clusters of trees. It is traversed by several lines of R.R.s. The chief prod. in 1880 were 10,132,525 bush. of corn, 1,527,055 of oats, 433,847 of wheat, 67,742 of rye, 285,716 of potatoes, 67,514 tons of hay, 44,768 lbs. of cheese, 868,014 of butter, 78,143 of wool, and 63,647 gallons of sorghum molasses. Cap., Urbana. Val. of taxable prop. abt. \$27,000,000. Pop. 40,870 (of whom 4,651 for., and 469 colored).

—a city of the above co. on the Chicago div. of the I.C. R.R., 128 m. S.S.W. Chicago, and on the I.B. & W.R.R., 48 m. S.E. Bloomington. The State Industrial University is located here with an attendance of abt. 600 students. It contains a fine improved park of 10 acres, and is connected by street cars with Urbana, the county seat, 2 m. distant. It has a public library, a nat. and 3 other banks, a young ladies' seminary, 3 wkly papers, and several factories. Pop. 5,106; of tp. 5,914.

Champaign, *O.*, a W. co., intersected by Mad R.; area, abt. 590 sq. m. The surface is level or undulating, and the soil fertile. It is traversed by 5 lines of R.R.s. The chief prod. in 1880 were 2,158,860 bush. of corn, 963,988 of wheat, 201,212 of oats, 31,091 tons of hay, 447,642 lbs. of butter, and 193,316 of wool. Cap., Urbana. Val. of taxable prop. \$20,403,119. Pop. 27,817 (of whom 1,382 for., and 1,667 colored).

Champion, *Mich.*, tp., Marquette co. P. 1,482.

—p.v., Michigamme tp., Marquette co., 31 m. W. of Marquette by the M.H. & O.R.R. Iron ore is mined here. Pop. 500.

Champion, *N. Y.*, p.v. and tp., Jefferson co., 14 m. W. of Watertown. Pop. of tp. 2,259. See WEST CARTHAGE.

Champion, *O.*, p. tp. Trumbull co., 20 m. N. of Youngstown by the A. & P.R.R. Pop. 866.

Champion, *Pa.*, p.h. in Salt Lick tp., Fayette co., 15 m. N.W. Mt. Pleasant. Pop. 50.

Champion City, *Mo.*, p.v., Franklin co., abt. 10 m. W. by N. of Stanton Station. Pop. 136.

Champion Hills, *Miss.*, a place in Hinds co., abt. midway between Jackson and Vicksburg. Here, May 16th, 1863, a severe action took place between the Nat. force, under the command of Gen. Grant, and the Confederates, under Gen. Pemberton, in which, after a contest of several hours, the latter were defeated with heavy loss.

Champion Mills, *Minn.*, p.o., Blue Earth co.

Champlain, Ill., v. in Pontiac tp., Livingston co. ✚

Champlain, N. Y., p. v. and tp., Clinton co., at the N. extremity of Lake Champlain. The v., which is 118 m. N. of Albany by the D.&H.C.R.R., and 5 m. W. of Rouse's Point by the O.&L.C.R.R., has a nat. bank, an academy, 2 wkly papers, and several factories. Pop. 1,509; of tp. 5,407.

Champlain Lake, forms part of the boundary between New York and Vermont, and extends from Whitehall, N. Y., northward to Canada. It is about 125 m. long, and is narrow in proportion to its length. The S. half averages less than 2 m. wide, and in many places is less than a mile. In the N. part, where large islands occur in it, the width is 10 m. or more. The greatest depth is about 280 ft. The water of this lake is discharged by the Sorrel or Richelieu R., which issues from its N. extremity. The chief towns on its shores are Burlington and Plattsburg. Occupying a basin between the Adirondacks and the Green Mts., this lake is remarkable for its beautiful and picturesque scenery. Numerous steamboats ply daily between Whitehall and Canada in the summer. A naval battle was fought on Lake Champlain between Gen. Arnold and the British, Oct. 13, 1776, in which the latter had the advantage. Sept. 11, 1814, Com. McDonough gained an important victory over the British fleet near Plattsburg. This lake is connected with the Hudson R. by the Champlain Canal.

Champlin, Minn., p. v. and tp., bordering on the Mississippi R., Hennepin co., abt. 15 m. N. W. Minneapolis. Pop. 246; of tp. 456.

Champany's Island, Ga., one of the sea-islands, McIntosh co.

Charleston, Pa., in Mercer co. See HILL.

—p. tp., Tioga co. Pop. 2,193. See WHITNEYVILLE.

Charleston, S.C., a S.E.co., bordering on the Atlantic, including several islands, of which the largest is Edisto; area, 1,906 sq. m. The Santee R. bounds it on the N., and it is drained by Ashley and Cooper Rs., which unite to form the harbor of Charleston. The other chief river is the Edisto, and there are numerous inlets, besides Charleston harbor, the N. and S. Edisto and S. Santee, which are generally navigable by small craft. The coast is broken by several bays and protected by a stretch of sandy islands. The surface is low, level, and in some places exposed to inundation. The soil embraces every variety, from the richest alluvial mould to the most sterile land. There are large quantities of waste land, most of it reclaimable. The sea-island cotton is raised along the rivers and coast. The olive, orange, and lemon have been found to mature in the open air, though cut down by occasional severe winters. The palmetto and the pine are among the indigenous forest trees. A communication between the Santee and Cooper Rs. has been opened by a canal 22 m. long. The chief prod. in 1880 were 279,968 bush. of corn, 75,613 of sweet potatoes, 4,569,526 lbs. of rice, and 9,303 bales of cotton. Cap., Charleston. Pop. 102,825 (of whom 4,283 for., and 71,890 colored).

—a city, a seaport, and the cap. of the above co., is situated in 32° 47' N. lat. and 79° 57' W. long. 100 m. S.S.E. Columbia, 82 m. N.E. Savannah, Ga., and 455 m. S.S.W. Washington, D.C. It stands upon a flat tongue of land pointing S.E. between the Ashley and Cooper Rs., which here debouche into a spacious harbor extending abt. 7 m. S.E. to the Atlantic, with an average width of two miles. The harbor is surrounded by land on all sides except the entrance, which is abt. 1 m. wide and 18 ft. deep. The water in the harbor, however, is very much deeper. The harbor is well defended—at its entrance by Forts Sumter and Moultrie, and inside by Castle Pinckney and Fort Ripley. Owing to the lowness of the ground on which it is built, Charleston presents a peculiarly picturesque appearance from the harbor. Its proximity to the ocean tends materially to the equalization of the climate, which is generally delightful. The city has a water front of abt. nine m. The most noted public buildings are the city orphan house, the city hall, the custom house, the arsenal, the court-house and the Academy of Music. Charleston is one of the leading commercial cities of the South, being the outlet for a very rich rice and cotton producing country, and a point of supply for an extensive territory embracing S.C. and parts of N.C., Ga., Ala., Fla., Tenn. and Miss. The commerce consists chiefly of exports. For the year 1882 the value of exports was \$19,475,433 (of which 300,401 bales of cotton value \$17,084,926, and 161,364 barrels of rosin and turpentine value \$540,050); of imports \$577,148. Besides this foreign commerce there is an extensive trade in cotton, rice, naval stores, phosphate, and lumber, which are shipped in large quantities to ports of the U. States. The large quantities of bone phosphate annually shipped, exported or consumed, which for the year 1881 amounted to 173,168 tons, are obtained in the vicinity of the city, where the richest deposits of this material in the U. States have been discovered. A valuable fertilizer is manufactured from the phosphate. During the year 1882, 214 vessels of 93,530 tons entered in the foreign trade, and 283 of 158,002 tons, cleared. The number of vessels registered, enrolled and licensed was 189 of 8,572 tons. Among the most important industries are the manufacture of fertilizers from phosphate, in which more than \$2,000,000 is invested, and the preparation of rice for market

by removing the husk, cleaning, &c. The manuf. of sulphuric acid is extensively carried on in connection with the phosphate industry. Charleston has an extensive wholesale trade in dry goods, boots and shoes, clothing, hats and caps, drugs and medicines, &c. The city has 3 nat., 3 savings and 8 other banks, 3 daily, 4 wkly and 1 monthly papers. Three railroads have their termini here,—the N.E. extending to Florence; the S.C., to Augusta, Ga.; and the S.&C. The Santee canal, 22 m. long, connects Charleston with the Santee R. The city has an excellent fire department, an efficient police system, and several charitable institutions, good public schools, and a normal school for girls. The higher institutions of learning are the College of Charleston, founded in 1785, and the Medical Colleges of the State of S.C.

The Charleston library, founded in 1748, has abt. 15,000 volumes. The city contains 39 churches, the most noted edifices being St. Michael's, built in 1752, and St. Philip's, both Episcopal.—Charleston was founded in 1679 by English colonists under Wm. Sayle. After a seige of several weeks it was taken in May, 1780, by the British, who evacuated it in Dec., 1782. Open hostilities in the civil war began at Charleston with the bombardment of Fort Sumter by Confederate General Beauregard. It was evacuated by the Confederates, Feb. 17, 1865, all the public buildings, cotton warehouses, stores, shipping, &c., having previously been fired by order of the general in command. From this and other causes the city suffered much injury during the war; but since its close many new buildings have been erected, and there has been marked commercial and industrial progress. Pop. in 1800, 18,711; in 1830, 30,289; in 1850, 42,985; in 1860, 40,519; in 1870, 48,959 (of whom 22,749 colored); in 1880, 49,999.

Charleston, Tenn., p.v., Bradley co., on Hiwassee R., 70 m. S.W. Knoxville, and 102 m. N.E. Chattanooga by the E.T., V. & G.R.R. It has a bank, and carries on an extensive trade in stock and agricultural products. Pop. 359.

Charleston, Va., tp., Orleans co. Pop. 1,204. See EAST CHARLESTON and WEST CHARLESTON.

Charleston, W. Va., a city, cap. of the State and of Kanawha co., on the Great Kanawha R., 60 m. from its mouth, and at its confluence with Elk R., 65 m. S. of Parkersburg, and 369 m. N.W. Richmond by the C. & O.R.R. The valley of the Kanawha is rich in salt, coal, iron and timber, and Charleston is a central point for the working and shipping of these articles. In the vicinity of the city are 10 salt furnaces; more salt is made here annually than at any other point in the country, except Syracuse, N. Y. They are situated in the Kanawha Salines, beginning abt. 2 m. above Charleston, and extending up the river on both sides for 10 m. The State-house is a capacious stone building, 138 ft. long, 56 wide, and 140 high, erected in 1870. The other State institutions are in other parts of the State. The manuf. establishments comprise 2 iron foundries and machine works, 4 saw and planing mills, a cabinet factory, 2 factories for making staves and headings for salt and flour barrels, a pump factory, a mineral water factory, 2 large flour mills, a woolen factory, &c. Charleston has a high school called the Charleston Institute, a public school, a Roman Catholic seminary, and several private schools, 10 churches, 4 wkly papers, a monthly periodical, and 2 banks. The seat of government was removed here from Wheeling by an act of the legislature of 1869. Pop. 4,192.

Charleston Four Corners, N. Y., p.v., Montgomery co., 10 m. S. of Fonda. Pop. 106.

Charleston Spring, N. J., v. in Millstone tp., Monmouth co. Pop. 63.

Charles town, Ind., p.v. ♦, Clark co. (of which it was formerly the cap.), 13 m. N.E. Jeffersonville, in the middle of a rich farming district. It has 9 churches, graded schools, 2 flour mills, a woolen mill, cheese factory, a saw mill, and a wkly paper. Pop. 1,103 ; of tp. 3,099.

Charlestown, Md., p.v., Cecil co., on Northeast R., 43 m. E. of Baltimore by the P., W. & B. RR. Pop. 211.

Charlestown, Mass., a former city and seaport of Middlesex co., is a N. suburb of Boston, lat. 42° 2' N., lon. 71° 3' 33" W. It is situated on a peninsula nearly enclosed by the Mystic and Charles Rs., and is connected with Boston and Chelsea by 5 bridges. The ground is uneven, and rises into two eminences, Breed's and Bunker Hills, which afford delightful situations for dwellings. The city is handsome and well built, with pleasantly shaded rather irregular streets. Three avenues, Main, Bunker Hill, and Medford streets, traverse the peninsula, and, converging at its neck, make the fine broad avenue Broadway, passing through Somerville and over Winter Hill. The city has 13 churches, 2 nat. banks, 3 newspapers, public parks, horse railways, a public library, and numerous charities. Here is also a State prison, after the plan of that at Auburn, N. Y., in which there are 600 convicts. There is an extensive U. S. navy-yard, occupying 70 to 80 acres, extending from the Charles to the Mystic R., in which are 3 large ship-houses, a ropewalk, the largest in the U. S., and machine shops for the manuf. of copper-work, machinery, and ordnance, capable of employing 2,000 men. A dry-dock connected with the navy-yard is built of granite and cost \$670,000. There are \$10,000,000 worth of government stores in the yard. Charlestown has manuf. of steam-engines, boilers, and machinery, chemicals, stone-ware, brass-ware, brushes, sugar, soap, leather, mechanics' tools, gas fixtures, whips, drain-pipes, New England rum, tobacco, oils, &c. To commemorate the battle of Bunker Hill, a granite shaft 220 ft. high, 31 ft. sq. at the base, and 15 at the top, was commenced in 1825 and finished in 1843. Charlestown is supplied with water from Mystic Lake, 5 m. distant. The water-works were finished in 1864, at a cost of \$1,461,250. The water flows from the lake 1 m. by gravitation, is then pumped by 3 engines to a reservoir on Tuft's Hill, from which it flows 4 m. and supplies Charlestown and the neighboring towns; in all, a population of 100,000. Charlestown is memorable from its association with the Revolution. It was burned by the British on the day of the battle of Bunker Hill. The city charter dates from 1847. The city of Charlestown was annexed to Boston, Oct. 13, 1873.

Charlestown, Minn., tp., Redwood co. P. 304.

Charlestown, N. H., p.v. ♦ and tp., Sullivan co., on the Connecticut R. and the V. C. RR., 50 m. W. of Concord. It has a nat. bank, a savings bank, 4 churches, and manuf. of lumber, boots and shoes, &c. Pop. of tp. 1,586.

Charles worth, Mich., p.v. in Hamlin tp., Eaton co., 23 m. S. of Lansing. Pop. 60.

Charlevoix, Mich., a N. W. co., bordering on Lake Michigan, and intersected by Green R.; area,

abt. 500 sq. m. Its N. W. shore is deeply indented by Little Traverse Bay, and 2 or 3 considerable lakes lie wholly or partly within its boundaries. The chief prod. in 1880 were 32,037 bush. of wheat, 23,144 of corn, 42,816 of potatoes, and 27,518 lbs. of maple sugar. Cap., Charlevoix. Val. of taxable prop. abt. \$500,000. Pop. 5,114 (of whom 1,325 for., and 256 colored).

—p.v. ♦ in Charlevoix tp., cap. of above co., on Lake Michigan, 15 m. W. of Petoskey. It has a considerable lumber trade, and a wkly paper. Pop. 512; of tp. 619.

Charlie Hope, Va., p.o., Brunswick co.

Charlie ville, La., p.o., Richland parish.

Char loc, O., p.v., Paulding co., on Anglaise R. and Miami Canal, 8 m. S. E. Paulding Station. P. 54.

Charlotte (shar'lot), Ill., tp., Livingston co. Pop. 833.

Charlotte, Iowa, p.v. ♦ in Waterford tp., Clinton co., on Deep R., 22 m. W. of Lyons by the Clinton and Anamosa line of the C. & N. W. RR. It has several mills. Pop. 294.

Charlotte, Me., p. tp., Washington co. P. 489.

Charlotte, Mich., p.v. ♦, cap. of Eaton co., 20 m. S. W. Lansing by the C. & G. T. RR., and 35 m. E. of Jackson by the Grand Rapids div. of the M. C. RR. It has a nat. and another bank, a high school, and 2 wkly papers. Manuf., lumber, barrels, staves, flour, foundries &c. Pop. 2,910.

Charlotte, Mo., tp., Bates co. Pop. 966.

Charlotte, N. Y., tp., Chattanooga co. Pop. 1,667. See SINCLEARVILLE.

—p.v. in Greece tp., Monroe co., on Lake Ontario, at the mouth of the Genesee R., 70 m. S. W. Oswego and 27 m. E. of Niagara Falls by the R. W. & O. RR. It is the lake port of Rochester, 7 m. to the N. distant, with which it is connected by a branch of the N. Y. C. RR. It has a custom-house, an iron foundry, several grain elevators, ship-yards, &c. Pop. 962.

—(p.o. name NEWFANE), v. in Newfane tp., Niagara co., 7 m. N. of Lockport. Pop. 260.

Charlotte, N. C., a city, cap. of Mecklenburg co., on Sugar Creek, 125 m. W. S. W. of Raleigh. The Charlotte, Columbia, and Augusta, the Wilmington, Charlotte, and Rutherford, and the North Carolina RRs. meet here. A plank road 120 m. long connects it with Fayetteville. The city is situated upon the gold range of the Atlantic States, and its prosperity is principally owing to the working of the mines in its vicinity. A branch mint for coining gold was established here in 1838, which, under the coinage act of 1873, this establishment ceased to be operated as a mint, but is continued as an assay office. Charlotte contains several schools, churches, and cotton factories, and 4 nat. banks. It has 2 daily, 2 tri-wkly, and 4 wkly papers, and a monthly periodical. The "Mecklenburg Declaration of Independence" was adopted here, May 31, 1775. The British troops occupied Charlotte in 1780, and for a time it was the American headquarters. Pop. 7,094; of tp., 10,547.

Charlotte, Oreg., p.o., Lane co.

Charlotte, Tenn., p.v., cap. of Dickson co., 46 m. W. of Nashville. It exports tobacco, peanuts, corn and cattle. Pop. 350.

Charlotte, Vt., tp., Chittenden co., bordering W. on Lake Champlain. Pop. 1,342.

Charlotte, Va., a S. co., bounded S. W. by Staunton R.; area, 550 sq. m. The surface is hilly; the A. M. & O. RR. crosses the N. end, and the R. D. & P. RR. traverses the co. The chief prod. in 1880 were 65,301 bush. of wheat, 311,579 of Indian corn, 77,799 of oats, and 3,226,448 lbs. of tobacco. Cap., Smithville. Val. of taxable prop. abt. \$5,800,000. Pop. 16,653 (of whom 92 for., and 10,908 colored).

Char'lotteburg, N. J., p.v. in Milford tp., Passaic co., on Pequannock Creek, 24 m. W. of Pat-

erson. It has a marble quarry, and manuf. of tools, &c. Pop. 151.

Charlotte Centre, N. Y., p.v. in Charlotte tp., Chautauqua co., $3\frac{1}{2}$ m. from Sinclairville Station.

Charlotte Court-House, Va. See SMITHVILLE.

Charlotte Furnace, Ky., p.o., Carter co.

Charlotte Hall, Md., p.v., St. Mary's co., 37 m. S. E. Washington, D. C. Pop. 81.

Charlotte Harbor, Fla., an inlet on the W. coast, Manatee co. It is nearly 24 m. long, and is sheltered from the sea by several islands. It is shallow, its greatest depth being abt. 10 ft. Good oysters and fish abound here.

—p.v., Manatee co., on a bay of the same name on the Gulf of Mexico, 150 m. N. of Key West. Pop. 30.

Charlotte Lake, N. Y., a small sheet of water lying in Gallatin tp., Columbia co.

Charlotte River, N. Y., drains the W. part of Schoharie co., flows W. 30 m. through a part of Delaware co. into Otsego co., where it enters the Susquehanna.

Charlottesville, Ind., p.v. in Jackson tp., Hancock co., 29 m. E. of Indianapolis by the P. & C. & St. L. R.R. Pop. 389.

Charlottesville, Va., p.v. ♦ in Charlottesville tp., cap. of Albemarle co., on Rivanna R., 110 m. S. W. Alexandria and 61 m. N. E. Lynchburg by the V. M. & R. It has 2 banks, 2 wkly papers, an academy and several factories. One mile W. of this town is the University of Virginia, founded in 1822. Pop. 2,676; of tp. 8,128.

Charlottesville, N. Y., p.v. in Summit tp., Schoharie co., 46 m. S. W. Albany. It has several mills. Pop. 126.

Charlottesville, Ill., v. in Bond tp., Lawrence co., Pop. 23.

Charlton, Ga., a S. E. co., bounded N. E. by the Satilla R. and separated from Florida on the S. E., S. and S. W. by St. Mary's R.; area, 1,000 sq. m. Okefenokee Swamp occupies the W. part. The surface is level and sandy. Tar and turpentine are manufactured. The chief prod. in 1880 were 16,763 bush. of corn, 21,616 lbs. of rice, and 62 bales of cotton. Cap. Traders Hill. Val. of taxable prop. abt. \$450,000. Pop. 2,161 (of whom 3 for., and 361 colored).

Charlton, Mass., p.v. and tp., Worcester co., 13 m. S. W. Worcester by the B. & A. R.R. Lumber and woollens are manuf. Pop. of tp. 1,900.

Charlton, Mich., tp., Otsego co., Pop. 96.

Charlton, N. Y., p.v. and tp., Saratoga co., 27 m. N. W. Albany. Pop. 175; of tp. 1,474.

Charlton, Pa., v. in Pine Creek tp., Clinton co., abt. 6 m. E. of Lock Haven by the P. & E. R.R. Pop. 134.

Charlton City, Mass., p.v. in Charlton tp., Worcester co., 15 m. S. W. Worcester. Manuf., woollens. Pop. 1,900.

Charlton Depot, Mass., p.v. in Charlton tp., Worcester co., 57 m. S. W. Boston. Pop. 800.

Charm, Ind., p.o., Elkhart co.

Charrette, Mo., tp., Warren co. Pop. 2,806. See DUTZOW and MARTHASVILLE.

Charter Oak, Iowa, p. tp., Crawford co. Pop. 286.

Chartiers (char' tiers), Pa., borough and tp., Allegheny co., on Chartiers Creek, which divides it from Mansfield, 5 m. S. W. Pittsburgh by the P. & L. E. R.R. Pop. 1,852; of tp. 3,316.

—p.o. in Stowe tp., Allegheny co.

—tp., Washington co. Pop. 2,188. See HUNTONVILLE.

Chartier's Creek, Pa., rises in Washington co., and after a course of 30 m. falls into the Ohio 4 m. below Pittsburgh.

Chase, Ind., p.o., Benton co.

Chase, Iowa, p.o., Johnson co.

Chase, Kan., a N. central co., intersected by the Cottonwood R. and also drained by several creeks. Area, 757 sq. m. The surface is undulating; the soil fertile. The A. T. & S. F. R.R. traverses it. The chief prod. in 1880 were 693,622 bush. of corn, 92,133 of wheat, and 42,422 of oats. Cap., Cottonwood Falls. Val. of taxable prop. abt. \$4,500,000. Pop. 6,051 (of whom 627 for., and 119 colored).

—p.o., Rice co.

Chase, Md., p.v., Baltimore co., 16 m. N. E. Baltimore. Pop. 100.

Chase, Mich., p.v. and tp., Lake co., 8 m. W. of Reed City. Pop. 273; of tp. 1,087.

Chase, Mo., p.v., Carroll co.

Chase, N. b., a S. W. co., bordering on Colorado. The surface is level and treeless. Pop. 70.

—p.o., Greeley co.

Chase, O., p.v., Athens co., 11 m. S. of Athens. ♦

Chase, Tex., p.v., McLennan co., 9 m. N. E. Waco. Pop. 250.

Chaseburg, Wis., p.v., Vernon co., abt. 12 m. S. E. La Crosse. Pop. 125.

Chase City, Va., Mecklenburg co., 95 m. S. W. Richmond. It has a graded school and a wkly paper. Pop. 251.

Chase's Lake, N. Y., p.v. in Lewis co., abt. 12 m. N. E. Long Island City. Pop. 80.

Chase's Mills, Mo., p.v. in Turner tp., Audroscoggin co., 13 m. N. of Auburn. Pop. 30.

Chase's Mills, N. Y., p.v. in Louisville tp., St. Lawrence co., on Grass R., abt. 6 m. N. E. Glendale Station. Pop. 114.

Chase's Mills, Pa., p.v. in Delmar tp., Tioga co., on Tioga R., 4 m. S. W. Fall Brook. Pop. 75.

Chase's Wharf, Va., p.o., Lancaster co.

Chasetown, O., v. in Perry tp., Brown co. P. 51.

Chaseville, Fla., p.v., Duval co., on St. John's R., abt. 7 m. E. of Jacksonville. Pop. 80.

Chaseville, N. Y., p.v. in Maryland tp., Otsego co., abt. 70 m. W. of Albany. Pop. 100.

Chaseville, O., p.v. in Seneca tp., Noble co., 1 m. N. of Mt. Ephraim. ♦

Chaseville, Tenn., p.o., Benton co.

Chaska, Minn., p.v. ♦ in Chaska tp., cap. of Carver co., on the N. bank of Minnesota R., 22 m. S. W. Minneapolis by the M. & St. L. R.R. It has a bank and a wkly paper. Pop. 1,068; of tp. 1,255.

Chaslaw, N. b., p.o., Saunders co.

Chastain, Ga., p.o., Colquitt co.

Chastaigner, Ia., p.o., St. Landry co.

Chatauta, Tenn., p.o., Bradley co.

Chatawa, Miss., p.v., Pike co., 93 m. N. of New Orleans by the C. St. L. & N. O. R.R. The Redemptionists have a home here. Pop. 192.

Chateaugay, N. Y., p.v. ♦ and tp., Franklin co., on Chateaugay R., 12 m. E. of Malone by the O. & L. C. R.R. The tp. has a number of butter, cheese and starch factories. Pop. 680; of tp. 2,828.

Chateaugay Lake, N. Y., is situated in Beekman tp., Clinton co., on the borders of Franklin co. It is elevated 1,400 ft. above the Hudson, is 4 m. long and 2 m. wide. Its waters abound in fish.

—p.v. in Belmont tp., Franklin co., 6 m. from Chateaugay Station. It has several factories. Pop. 680.

Chateaugay Mountains, N. Y. This range commences in Canada, and extends S. through the N. W. part of Clinton into Franklin co. Some of the highest peaks are in the vicinity of Chateaugay Lake, Franklin co.

Chateaugay River, N. Y., rises in Clinton and Franklin cos., flows N. and enters the St. Lawrence in Canada.

Chatfield, Minn., p.v. ♦ and tp., Fillmore co., 49 m. W. of Winona and 25 m. S. E. of Rochester by the C. & N. W. R.R. It has a bank, a wkly paper, and several mills. Pop. 827; of tp. 1,547.

—v. in Almira tp., Olmsted co. Pop. 339.

Chatfield, O., p.tp., Crawford co. Pop. 1,266.

Chatfield, Tex., p.v., Navarro co. Pop. 84.

Chatham, Conn., tp., Middlesex co., on the E. side of the Connecticut R., abt. 25 m. N.E. of New-Haven. Here are cobalt mines and several important manufactories. Pop. 1,967.

Chatham, Ga., a S.E. co., bordering on the Atlantic. Area, 358 sq. m. It is bounded on the N.E. by the Savannah R., and on the S.W. by the Ogeechee. The surface is level; the soil is sandy and partly sterile, but that which is near the rivers is fertile. The chief prod. in 1880 were 23,763 bush. of corn, 51,612 of sweet potatoes, 886,782 lbs. of rice, and wine. It is intersected by several lines of railroads. Cap., Savannah. Val. of taxable prop. abt. \$25,600,000. Pop. 44,995 (of whom 3,279 for., and 27,535 colored).

Chatham, Ill., p.v. & tp., Sangamon co., 9 m. S.W. Springfield by the C.&A.R.R. It has an elevator, a flour mill, &c. Pop. 454; of tp. 1,377.

Chatham, Iowa, p.o., Buchanan co.

Chatham, Ky., p.v., Bracken co., 15 m. W. of Maryville. Pop. 100.

Chatham, Mass., p.v. & tp., Barnstable co., on the ocean, at the S.E. extremity of Cape Cod, abt. 80 m. S.E. Boston. It has a fair harbor and is resorted to as a summer residence. The inhabitants are chiefly engaged in the merchant marine and in fishing. There are 4 churches, good public schools, and a wky paper. It has two light-houses, lat. 41° 40' 15" N., lon. 69° 56' 30" W. Pop. of tp. 2,252.

Chatham, Minn., tp., Wright co. Pop. 274.

Chatham, N.H., tp., Carroll co. Pop. 421.

Chatham, N. J., p.v. and tp., Morris co., 16 m. W. of Newark by the Morris and Essex div. of the D., L. & W. R.R., near the Passaic R., on which there are several mills. Pop. 738; of tp. 4,276. See MADISON.

Chatham, N. Y., tp., Columbia co. Pop. 4,574. See CHATHAM CENTRE, CHATHAM VILLAGE, EAST CHATHAM and NORTH CHATHAM.

—tp., Medina co. Pop. 1,133. See CHATHAM CENTRE.

Chatham, N. C., a central co.; area, 700 sq. m. It is drained by the Haw and Deep Rs., which in the S.E. part unite to form the Cape Fear R. The surface is diversified; the soil is fertile. The chief prod. in 1880 were 558,281 bush. of corn, 122,760 of wheat, 120,341 of oats, 5,558 bales of cotton, and 49,837 lbs. of tobacco. Iron ores abound. Coal mines have been opened near Deep R. It is intersected by the W. R.R. of N. C., and the R. & A. R.R. Cap., Pittsborough. Val. of taxable prop. abt. \$5,500,000. Pop. 23,450 (of whom 39 for., and 7,955 colored).

Chatham, O., p.v. in Newton tp., Licking co., 8 m. N.W. Newark Junction. Pop. 131.

Chatham, Pa., p.v. in London Grove tp., Chester co., 16 m. S.W. West Chester. Pop. 123.

—tp., Tioga co. Pop. 1,317.

Chatham, Va., p.v. & tp., cap. of Pittsylvania co., 49 m. S.W. Lynchburg, and 16 m. N. of Danville by the V.M.R.R. It has a savings bank, 2 wky papers, tobacco factories, &c. Pop. 543.

Chatham Centre, N. Y., p.v. in Chatham tp., Columbia co., on Kinderhook Creek, 24 m. S.E. Albany by the B. & A. R.R. It has a straw-paper mill. Pop. 223.

Chatham Centre, O., p.v. in Chatham tp., Medina co., 8 m. S.W. Medina Station. Pop. 350.

Chatham Hill, Va., p.v. Smyth co., abt. 10 m. N. of Marion. Pop. 153.

Chatham Port, Mass., p.o., Barnstable co.

Chatham Run, Pa., p.v. in Pine Creek tp., Clinton co., on the Susquehanna R., 6 m. from Lock Haven. Pop. 186.

Chatham Valley, Pa., p.o., Tioga co.

Chatham Village, N. Y. (p.o. name CHATHAM), v. in Chatham and Ghent tps., Columbia co., on the B. & A. R.R., and on the N. W. & H. R.R., of which it is the N. terminus, and 2 m. S.E. Albany. It has a nat.

bank, a wky paper, an academy, a blast furnace, foundry, machine shops, cotton mills, and 2 paper mills. Pop. 1,765.

Chats worth, Ill., p.v. & tp., Livingston co., 70 m. E. of Peoria by the W., St. L. & P. R.R. It has 2 banks, a wky paper, and several factories. Pop. 1,055; of tp. 1,870.

Chattahoochee, Fla., p.v., Gadsden co., 3 m. from the junction of the Flint and Chattahoochee Rs., 41 m. W. of Tallahassee by the J., P. & M. R.R. Here are the State penitentiary and a lunatic asylum. Pop. 200.

Chattahoochee, Ga., a S.W. co., bounded N. by Upotoy Creek, and separated from Alabama on the W. by the Chattahoochee R.; area 250 sq. m. The surface is undulating and heavily wooded; the soil is productive. The chief prod. in 1880 were 75,441 bush. of corn, and 4,480 bales of cotton. Cap., Cusseta. Val. of taxable prop. abt. \$1,000,000. Pop. 5,670 (of whom 6 for., and 3,546 colored).

Chattahoochee River, Ga. and Ala. It rises in the Appalachian Mts., in Habersham co., Ga., and flowing S.W. it reaches the border of Ala. at Miller's bend, from which it flows nearly S., forming, for 200 m., the boundary between Ga. and Ala. to its junction with the Flint R., to form Appalachianicola R. It is navigable for steamboats to Columbus Ga., 225 m. above its junction with Flint R. Total length abt. 550 m.

Chattan, Ill., p.o., Adams co.

Chattanooga, O., v. in Liberty tp., Mercer co. Pop. 67.

Chattanooga, Tenn., a city, cap. of Hamilton co., pleasantly situated in a fertile valley, on the E. and S. banks of the Tennessee R., near the base of Lookout Mt., 250 m. by water from Knoxville, and 150 m. S.E. Nashville. The river is navigable for steamboats 8 months of the year, and by small boats at all times. The N. & C., E. T. & G., A. & C., and W. & A. R.Rs. Standing in the center of what is called the Mineral District of Alabama, Georgia, and Tennessee, this thriving and progressive city is properly recognized as the "Pittsburgh of the South." Its varied industries embrace several iron and nail-works, car foundries, pipe and machine-works, tanneries, pump factories, saw and planing mills, soap-works, flour and grist mills, carriage and wagon manuf., cotton and woolen mills, furniture factories, &c. Chattanooga is the shipping point for most of the surplus productions of East and of a portion of Middle Tennessee. It has a nat. bank, a daily, a wky and semi-monthly paper, numerous churches, a female institute, a good system of public schools, &c. During the civil war, Chattanooga was an important strategic point for the operations in E. Tennessee and Georgia. An obstinately contested battle was fought at Missionary Ridge, a few miles from Chattanooga, Nov. 25, 1863, between the Nat. forces under Gen. Grant, and the Confederates under Gen. Bragg, in which the latter were completely defeated. Pop. in 1870, 6,093; in 1880, 12,892.

Chattanooga Creek, Ga. This stream takes its rise in the S. part of Walker co., and, flowing N., joins the Tennessee R. at Chattanooga.

Chattooga, Ga., a stream which rises in Chattooga co., and, flowing S.S.W. abt. 55 m., falls into the Coosa R. in Cherokee co., Ala.

—one of the head feeders of the Savannah R., rises near the S. frontier of N. C., flows S.W. for abt. 40 m. along the boundary between S. C. and Ga., and joins the Tallulah to form the Tugaloo R.

Chattooga, Ga., a N.W. co., bordering on Alabama, and intersected by the Chattooga R. Area, 360 sq. m. The surface is diversified by valleys and mountains connected with the Blue Ridge. The principal summits are Taylor's Ridge, John's Mt., and Dirtseller Mt. The chief prod. in 1880 were 287,-

611 bush. of corn, 46,969 of wheat, 48,111 of oats, and 5,247 bales of cotton. Cap., Summerville. Val. of taxable prop. abt. \$1,800,000. Pop. 10,021 (of whom 6 for., and 2,040 colored).

Chattooga, *S.C.*, tp., Oconee co. Pop. 718.

Chattooga, *Ga.*, p.o., Chattooga co.

Chaumont (*sho'moo'*), *N.Y.*, p.v. in Lyme tp., Jefferson co., on Chaumont Bay, an inlet of Lake Ontario, 15 m. N.W. Watertown by the R.W.&O. RR. It has a good harbor, extensive fisheries, and large quarries of excellent limestone. Pop. 479.

Chauncey, *Ga.*, p.v., Dodge co., 65 m. S.E. Macon. Pop. 200.

Chauncey, *Ill.*, p.v. in Petty tp., Lawrence co. Pop. 40.

Chauncey, *Ind.*, v. in Wabash tp., Tippecanoe co., near Lafayette Junction. Pop. 717.

Chauncey, *O.*, p.v. in Dover tp., Athens co., 35 m. W. of Marietta. It has a coal mine and salt wells. Pop. 185.

Chautauqua (*shu-tau'kwaa*), *Kan.*, a S.E. co., watered by Big Caney and Middle Caney Creeks. Area, 650 sq. m. The surface is level; the soil is productive. The chief prod. in 1880 were 1,048,485 bush. of corn, 81,893 of wheat, and 20,912 of oats. Cap., Sedan. Val. of taxable prop. abt. \$2,200,000. Pop. 11,072 (of whom 282 for., and 155 colored).

Chautauqua, *N.Y.*, the most W. co. of the State. Area, 1,099 sq. m. It is bounded on the N. W. by Lake Erie, is drained by Conewango Creek, and contains Chautauqua Lake. The surface is partly undulating; the soil is fertile. The chief prod. in 1880 were 542,889 bush. of corn, 119,171 of wheat, 912,679 of oats, 61,356 of barley, 30,803 of buckwheat, 321,712 of potatoes, 185,552 tons of hay, 841,616 lbs. of cheese, 5,279,726 of butter, 201,517 of wool, and 350,773 of maple sugar. The manuf. interests are increasing; they include carriages, lumber, leather and leather goods, flour, cooperage, metallic wares, &c. There is a spring of inflammable gas at Fredonia, used to illuminate the houses. This co. is intersected by several lines of railroads. Cap., Mayville. Val. of taxable prop. \$21,345,973. Pop. 65,340 (of whom 10,804 for., and 158 colored).

—tp., Chautauqua co. Pop. 3,576. See MAYVILLE.

Chautauqua Lake, *N.Y.*, a beautiful sheet of water in Chautauqua co., abt. 18 m. long and from 1 to 3 m. wide. It is 726 ft. higher than Lake Erie, and is said to be the highest navigable water in the U. S. The surplus water flows through an outlet into Conewango Creek. Steamboats ply between the outlet and Mayville, which is at the N. W. end of the lake. Near the S.E. end is the large village of Jamestown.

—p.v. on the above lake, Chautauqua co., 12 m. N. W. Jamestown. It is much resorted to during summer, and has large hotel accommodation. Pop. 50.

Chazy, *N.Y.*, p.v. and tp., Clinton co., 13 m. N. of Plattsburg by the M.&P. RR. The tp. is bounded on the E. by Lake Champlain. Pop. 262; of tp. 3,147.

Chazy Lake, *N.Y.*, in Beckman tp., Clinton co., is 4 m. long, and averages 1 m. in width.

Chazy River, *N.Y.*, waters the W. part of Clinton co., flows E. in a circuitous course of abt. 40 m. into Lake Champlain, in Champlain tp. It affords good water power.

Cheap, *Ga.*, p.o., Banks co.

Cheap Hill, *Tenn.*, p.o., Cheatham co.

Chesterham, *Tenn.*, a N.W. co. Area, 375 sq. m. It is intersected by the Cumberland R. and the Harpeth. The surface is undulating. The chief prod. in 1880 were 457,189 bush. of corn, 18,036 of wheat, 42,297 of oats, and 950,352 lbs. of tobacco. Lumber is also an important prod. It is traversed by the N. & N.W. RR. Cap., Ashland City. Val. of taxable prop. abt. \$700,000. Pop. 7,955 (of whom 31 for., and 1,661 colored).

Cheat Mountain, *W. Va.*, p.v., Randolph co., 56 m. W. of Grafton. Pop. 100.

Cheat River, *W. Va.*, is formed by the junction of several branches which rise among the Alleghenies in Randolph co. and unite in Tucker co. It flows nearly N. and enters the Monongahela in Fayette co., Pa. Its length, without the branches, is 75 m. It takes its name from the extremely variable volume of its waters; for while it is sometimes a large stream, it often becomes in a few hours quite insignificant.

Chebanse, *Ill.*, p.v. ♦ in Chebanse tp., Iroquois co. and in Otto tp., Kankakee co., on the I.C. RR., 65 m. S. S. W. Chicago. It has a bank, a wkly. paper, and a very extensive trade in grain. Pop. 728; of Chebanse tp. 2,557.

Chebeague Island, *Me.*, p.o., Cumberland co.

Cheboygan, *Mich.*, a co. at the N. extremity of the lower peninsula, is bounded on the N. by Lake Huron, and traversed by the Cheboygan R. Lumber, potatoes and maple sugar are the chief prod. Cap., Cheboygan. Val. of taxable prop. abt. \$600,000. Pop. 6,524 (of whom 2,513 for., 103 Indians, and 21 colored).

—p.v. ♦ in Benton tp., cap. of above co., on Lake Huron, which here receives the Cheboygan R., 36 m. N. E. Petoskey. It has a bank, 2 wkly. papers, a graded school and a number of saw, planing and grist mills. Pop. 2,269.

Cheboygan River, *Mich.*, takes its rise in Ostego co., flows N., and empties into Lake Huron at Cheboygan village.

Cherokee, N.C., a S.W. co., bounded N.E. by Graham co.; area, 650 sq. m. It is intersected by Hiwassee R. and its branches, and borders on Tennessee and Georgia. The surface is mountainous, Unaka and Smoky Mts. in the N.W., and the Blue Ridge, near the S.E. border, being the principal branches. The soil near the streams is fertile. The chief prod. in 1880 were 227,650 bush. of corn, and 17,808 of wheat. Cap., Murphy. Val. of taxable prop. abt. \$1,300,000. Pop. 8,182 (of whom 5 for., and 386 colored).

Cherokee, S.C., tp., Spartanburg co. P. 2,096.

—tp., York co. Pop. 2,441.

Cherokee, Tex., an E. co., bounded E. by the Angelina R., and W. by the Neches; area, 1,444 sq. m. It is well watered, and consists of prairies alternating with woodland, pine and oak being abundant. It is one of the best farming counties in the State. Iron ore is abundant. The chief prod. in 1880 were 450,573 bush. of Ind. corn, and 9,813 bales of cotton. Cap., Rusk. Val. of taxable prop. abt. \$1,200,000. P. 16,724 (of whom 90 for., and 5,710 colored).

—p.o., San Saba co.

Cherokee City, Ark., p.v., Benton co., 65 m. N. of Fort Smith.

Cherokee Indians, a tribe of aborigines who were formerly numerous and powerful. They occupied the S. portion of the Appalachian Mts. and large tracts in Ga. and Ala. They have been considered the most civilized of the Indians in the U.S. In 1838 all the Cherokees living in Ga. were removed to the Indian Territory beyond the Mississippi, in which a large tract of land was appropriated to them. Many of them cultivate the soil and are industrious in their habits. They have a written language, written laws, and an organized government. Their present territory, E. of lon. 95° W., and S. of lat. 37° N., embraces 9,776,000 acres, two-thirds of it being unfit for cultivation. They number abt. 14,000, besides several hundred in North Carolina.

Chesapeake Bay, Md. and Va., [from an Indian word meaning "mother of waters"], a large inlet of the Atlantic, is abt. 200 m. long and from 7 to 20 m. broad, and generally 9 fathoms deep, and is the largest bay in the U. States. Its entrance is wholly in Virginia, between cape Charles on the N. and cape Henry on the S., which are abt. 12 m. apart. It extends abt. 75 m. in Va., but lies mostly in Maryland, where it extends 125 m., dividing the State into two parts, called the Eastern and Western Shore. This bay contains many islands, chiefly on its E. side; furnishes an extensive and a safe navigation for the largest vessels, and has many considerable bays and good harbors. The Susquehanna enters it at its N. point; on its W. side it receives the Patapsco, Patuxent, Potomac, Rappahannock, York, and James Rs. On the E. shore the rivers are less extensive, but generally have large estuaries. They are the Elk, Sassafras, Chester, Choptank, Nanticoke, Pocomoke, and some others. The Potomac is navigable for large ships to Alexandria, 290 m. from the mouth of the bay. The entire surface drained by the rivers which enter this bay, has been estimated at 70,000 sq. m.

—tp., Morrow co. Pop. 975. See CHESTERVILLE.

—tp., Wayne co. Pop. 2,105. See LATTASBURG.

Chester, Pa., a S.E. co.; area, 738 sq. m. It is bounded N.E. by the Schuylkill R. and also drained by the Brandywine and Octorara creeks. The surface is pleasantly diversified. Among its remarkable features is a long, narrow valley called Chester Valley, which extends across the country from the Schuylkill to Octorara Creek. The soil is very fertile. Cattle, fruit, grain, and garden and dairy products are extensively raised. Iron, paper, woolen goods, machinery, &c., are largely manufactured. Fine white marble is quarried in the valley. Among the minerals found in this co. are copper, lead, zinc, kaolin, zircon, titanium, sapphire, corundum, amethyst, &c. For the year 1880 the production of iron and steel amounted to 78,363 tons. Cap. West Chester. Val. of taxable prop. abt. \$72,000,000. Pop. 83,480 (of whom 5,883 for., and 7,059 colored.)
 —a city, Delaware co., on the Delaware R. and the P. W. & B. RR., 15 m. W.S.W. of Philadelphia. It was settled by the Swedes in 1643, and is the oldest town in the State. In Chester are large ship-yards, in one of which 1,300 men are employed. There are also manuf. of woolen and cotton goods, metals, &c. It has numerous churches and public schools, 2 nat. and 2 other banks and 1 daily and 6 wkly papers. There is an academy in the city, and in the neighborhood is the Crozer Theological Seminary (Baptist). Chester was incorporated a city in 1866. Adjacent are the boroughs of Upland and South Chester, which have considerable manuf. Pop. 14,996; of tp. 15,578.

Chester, S.C., a central co.; area, 570 sq. m. It is bounded on the E. by the Catawba R., and on the W. by Broad R. The surface is moderately hilly; the soil is productive. The chief prod. in 1880 were 357,308 bush. of corn, 35,768 of wheat, 87,583 of oats, and 19,051 bales of cotton. It is intersected by the C. C. & A. RR. Cap., Chester Court-House. Val. of taxable prop. abt. \$6,000,000. Pop. 24,153 (of whom 134 for., and 16,515 colored.)
 —tp., Chester co., Pop. 5,964.

Cheyenne (she-en), Kan., a co. at the N. W. end of the State; area, abt. 1,000 sq. m. Pop. 37.

—tp., Barton co. Pop. 586.

—p.o., Osborne co.

Cheyenne, Neb., a S. W. co., bounded W. by Wyoming, and S. by Colorado, and intersected by the N. and S. forks of the Platte; area, 6,000 sq. m. The U.P.R.R. runs E. and W. through the S. portion. Cap., Sidney. Pop. 1,558 (of whom 346 for., and 42 Chinese and Indians).

Cheyenne City, Wyo., the cap. of the territory and of Laramie co., situated on the U.P.R.R., in the S. E. part of the territory, 516 m. by rail W. of Omaha, Neb., and 1,260 m. E. of Sacramento, Cal.

The city is built on a broad, open plain, abt. 6,000 ft. above the sea; Crow Creek, an affluent of the S. Platte, winds around it on two sides. The land rises slightly toward the W., while toward the E. it gradually though imperceptibly declines. The D.P.R.R. connects it with Denver, Col., 106 m. distant. Fort D. A. Russel is situated 2½ m. N.W. Cheyenne, and Fort Russel depot abt. half way between them. The depot is used for storing and distributing the government supplies for Forts Laramie and Fetterman, on the N. Platte, and the Indian agencies N. of the city. There are abt. 60 business houses, representing the

ordinary branches of trade. The principal manuf. are of saddles and moss-agate jewelry, the stone being found in large quantities in the territory. The machine and repair shops of the U. P. R.R. are extensive. There are several hotels, a small theatre, a nat. bank, 2 daily and wkly papers and 6 churches. Cheyenne was settled in the summer of 1867, when the U. P. R.R. first reached the point. At one period there were 6,000 inhabitants in the place and vicinity, but as the road was extended west the floating pop. migrated with it. Pop. in 1870, 1,450; in 1880, 3,456.

Cheyenne River, rises in Crooke and Laramie cos., Wyoming, by two branches, each of which is abt. 300 m. long, called the North Fork or Belle Foussehe, and the South Fork, which flow respectively N. and S. of the Black Hills, unite E. of these mountains, in Dakota, to form the Big Cheyenne, which, after a N. E. course of abt. 150 m., empties into the Missouri in Stanley co., Dakota.

Cheyennes, a nation of Indians, dwelling in the U. States territories E. of the Rocky Mts., and connected with the great Algonquin family. They are associated with the Arapahoes, but are much more roving in their habits than the latter. They are divided in three bodies, on Milk R., Montana, on the North Fork of the Canadian, and a small band apart. They are a tall, fine and courageous race. They are generally rich in herds and are great horse dealers. The attempts to educate them have met with little success, and their language is very difficult to learn. The tribe now scarcely numbers 3,000 souls.

Cheyenne Wells, *Col.*, p. o. Bent co.

Cheyney, *Pu.*, p. o. in Thornburg tp., Delaware co.

Chicago, Ill., the principal city of the State, and the cap. of Cook co., has within 50 years grown from a small Indian trading station to the position of the metropolis of the Northwest, the 4th in pop. of the cities of the U. States, and the greatest railway centre on the continent. It is situated on the W. shore of Lake Michigan, at the mouth of the Chicago R., 715 m. in a direct line and 912 m. by rail W. by N. from New York, and 260 m. N. N. E. of St. Louis. The site of the business portion is 14 ft. above the lake; it was originally much lower, but has been built up from 3 to 9 ft. since 1856. It is an inclined plane, rising toward the W. to the height of 28 ft., giving slow but sufficient drainage. The climate is healthful and invigorating, and the city is kept singularly clear of all forms of malaria by the prevailing winds. The area of the city comprises 23,000 acres, and extends over 7 m. N. and S. along the lake shore, and 5 m. E. and W. The streets intersect each other at right angles. There is an inlet called the Chicago R. which runs from the lake nearly a mile W. then separates into two branches, one running N. W. the other S. W., thus dividing the city into three divisions, connected by more than 35 bridges, and by two tunnels running under the bed of the river. This river ("Chacagna," Indian for thunder) gave the city its name. Originally it emptied into the lake, but a remarkable piece of engineering caused it to change its course, and, so to speak, run "up hill." (See CHICAGO RIVER). The river has been so deepened that the largest vessels may be towed into any of its branches, which are supplied with docks and water-ships, affording a dockage capacity of nearly 40 m. more than 20 of which are already in use. State St., in the S. division, is the Broadway of Chicago, and on it or near it are the finest commercial structures, hotels, retail stores, and the like. Other important business streets are Lake, Clark, La Salle, Randolph, Dearborn, Monroe, Madison, and Washington. In fact there is scarcely a street in the South or business district which does not contain some notably fine buildings. The finest residences are in Wabash, Prairie and Michigan avenues, which

are of a semi-suburban character, adorned with rows of trees, and bordered by villas surrounded with beautifully ornamented grounds. Most of the public buildings were burned down in the great fire of 1871, and have not been replaced as rapidly as the business structures destroyed at the same time. A new city hall and county court-house, estimated to cost \$5,000,000, and almost finished, is a magnificent structure. A new U. S. custom-house and post office, costing upward of \$5,000,000, is one of the finest public buildings in the country. The chamber of commerce is a spacious and imposing building, and its interior decorations are very elaborate. The Exposition Building, in which an exhibition of art and industrial products is held every autumn, is a vast and ornate structure of iron and glass, surmounted by a dome 60 ft. in diameter and 160 ft. high. Chicago ranks next to New York in commercial importance. The shipment of leading articles of trade from Chicago was stated as follows in the annual report for 1882 of the Board of Trade (an association meeting daily, with a membership of 1,936).

Beef . . . pkgs.	138,719	Hides . . . lbs.	93,026,199
Pork . . . barrels	435,625	Fl'x seeds bls.	4,332,047
Other pork		Other " lbs.	54,469,994
meats . . . lbs.	615,822,951	Salt . . . barrels	1,320,009
Lard . . . "	235,473,520	Coal . . . tons	727,477
Butter . . . "	59,927,879	Lumber. M ft.	1,073,419
Wool . . . "	45,208,863	Shingles . . . M	146,943

There are 24 grain elevators, with an aggregate storage capacity of 23,623,000 lbs. There are vast store houses, where the grain is elevated from cars and ships, and disposed according to grades, then reloaded on cars and ships, all the work being done by machinery. Chicago is the greatest grain market in the world, her produce forming the basis for speculation, as stocks and gold do in New York. As a market for live stock it is the most important centre in the U. States. The vast live stock trade is transacted at the union stock yards, situated near the S. limits of the city, and connected with all the railroad lines. The receipts of live stock during 1882 were: 1,607,495 cattle and calves, 5,817,504 hogs, 628,887 sheep, and 13,556 horses aggregate value \$196,670,221. Chicago is a port of entry, and has a considerable commerce with Canada. The total value of domestic produce exported to Canada by lake in 1882 was \$3,973,834. During 1882, 257 vessels of 119,554 tons arrived from and 327 of 154,621 tons cleared to foreign ports; 13,094 vessels arrived and 13,299 cleared in the coasting trade. The total number of vessels owned in the district of Chicago in 1882 was 368, with an aggregate tonnage of 67,535. The mercantile trade of the city is of considerable importance, as it supplies most of the vast region from which produce is received. The principal industries are hog-packing, beef-packing, brewing, and distilling, and the manuf. of iron and steel, wood, brick, leather, chemicals, boots and shoes, and cigars and tobacco. The number of hogs packed in 1882 was 2,781,064 representing over 48 per cent. of all the hogs packed in the West. Chicago had, in 1883, 11 nat. banks, 12 other banks, and 27 bankers. The annual bank clearings for 3 consecutive years were as follows:—1880, \$1,725,684,894; 1881, \$2,249,097,450; 1882, \$2,366,536,855. The principal lines of rail-road, running from Chicago are the C. & A., the P., Ft. W. & C., the C. M. & St. P., the P., C. & St. L., the C. B. & Q., the I. C., the M. C., the C. R. I. & P., the L. S. & M. S., the C. & G. T., the C. & E. I., the W., St. L. & P., the B. & O., and the C. & N. W.—Chicago is divided into 20 wards, and is governed by a mayor, chosen every two years, and a board of 40 aldermen. It has a very efficient police force and fire department. The system by which it is supplied with water has been called one of the wonders of the world. The water-works, which extend 2 m. under the lake, cost to this day abt. \$6,000,000. In 1882, the bonded debt of Chicago

was \$12,752,000. The valuation of real and personal property for the purpose of taxation was \$122,373,395. The total city tax levied was \$4,139,049. The public school system in Chicago (including a high and a normal school) is regarded as one of the most thorough in the U. States. There are also many private academies and several schools sustained by the Catholics. Among the highest institutions are the University of Chicago, connected with the Dearborn Observatory, the North Western University (Methodist), the Baptist Union Theological Seminary, Chicago Theological Seminary, St. Ignatius College (Catholic), College of Law, Chicago Musical College, 7 medical colleges, &c. The Chicago historical society was established in 1856, the Academy of Sciences in 1857, and the Academy of Design in 1869. Charitable, benevolent, art, &c., institutions and places of amusement, are too many for enumeration here. There are 8 libraries open to the public, of which the Chicago public library, now numbering above 60,000 volumes, is the largest. The total number of daily, wkly, and monthly papers is abt. 80, not including mere advertising sheets, programmes, &c. There are abt. 240 houses of public worship, including the mission churches.—The first visitors to the site of Chicago were Joliet and Marquette, August, 1673. The first permanent settlements was made in 1804, during which year Fort Dearborn was built. At the close of 1830, Chicago contained 12 houses and 3 "country" residences in Madison St., with a pop. of abt. 100. The town was organized in 1833, and incorporated as a city in 1837. On Oct. 8, 9, 10, 11, 1871, Chicago was the scene of one of the most destructive conflagrations of modern times. The total area burned was nearly $3\frac{1}{2}$ sq. m.; persons rendered homeless, 98,500; persons killed, abt. 200; loss occasioned by the fire, abt. \$190,000,000. In a year after the fire, a large part of the burnt district had been rebuilt, and at present there scarcely is trace of the terrible disaster save in the improved character of the new buildings over the destroyed. On July 15, 1874, still another great fire swept over the city, destroying 18 blocks of 60 acres in the heart of the city, and abt. \$4,000,000 worth of property. Pop. in 1837, 4,170; in 1850, 29,963; in 1860, 112,172; in 1870, 298,977; in 1880, 503,185.

Chicago, or CHICAGO JUNCTION, O., p.v. in New Haven and Richmond tps., Huron co., 28 m. S. of Sandusky by the Sandusky div. of the B.&O.R.R. It has a wkly paper. Pop. 662.

Chicago River, Ill. This small stream, which forms the harbor of Chicago on the S.W. border of Lake Michigan, is composed of two branches. The N. branch, which is abt. 40 m. long, rises in the N. part of the State, and unites with the S. abt. $\frac{3}{4}$ m. from its entrance into the lake. The S. branch, which is abt. 6 m. long, is sufficiently deep to afford a secure harbor for any vessels which navigate the lake. The natural portage from Chicago R. to the Des Plaines, a branch of the Illinois, is only 6 m., and is so low that at high water it is often overflowed, so that boats can pass from one river to the other. The Illinois and Michigan Canal, which connects Chicago with La Salle, at the head of navigation on the Illinois R., which falls into the Mississippi, has been deepened by the city of Chicago, at a cost of \$3,251,621; the highland 26 m. being cut down to 8 $\frac{1}{2}$ ft. below the ordinary water level of Lake Michigan; and this, with the deepening of the bed of the Chicago R. and its S. branch, permits the waters of the lake to flow through the river and branch into the canal and to be carried into the Illinois. This has obviated the

offensive condition of the waters of the Chicago R., which were previously a great source of annoyance and sickness in Chicago.

Chic'askia, Kan., tp., Harper co. Pop. 597.

Chic'agoff, Alaska, a N. and large island of the Alexander group.

Chicagoff Harbor, Alaska, a port in the island of Attoo, in lat. 52° 55' 40" N., lon. 186° 47' 20" W.

Chic'alah, Ark., tp., Yell co. Pop. 240.

Chic'ester, N.H., p.v. and tp., Merrimack co., 8 m. E. of Concord by the Suncook branch of the C.R.R. Pop. of tp. 784.

Chicha'lah, Ark., p. tp., Yell co. Pop. 240.

Chickahominy, Va., a river in the E. part of the State, rises abt. 20 m. N.W. Richmond, flows S.E., and after a course of abt. 75 m. enters the James R. In close proximity to this river occurred the battles of Seven Pines and Fair Oaks, May 31–June 1, 1862, Mechanicsville, June 26, Gaines's Mill, June 27, Savage's Station, June 29, White Oak Swamp, June 30, 1862, and Cold Harbor, June 3, 1864.—tp., Charles City co. Pop. 1,464.

Chickamauga Creek, Ga., rises in Walker co., flows N.E., then N., and enters the Tennessee R. abt. 6 m. above Chattanooga. Here, Sept. 19–20, 1863, the Union troops under Gen. Rosecrans sustained a defeat at the hands of the Confederates commanded by Gen. Bragg.

Chickamauga Station, Tenn., p.v., Hamilton co., on the Chickamauga Creek, 12 m. E. of Chattanooga by the W.&A.R.R. Pop. 145.

Chick'aminny, Mich., tp., Berrien co. Pop. 996.

Chickasa'bogus, Ala., p.o., Mobile co.

Chickasahay, Miss., p.o., Kemper co.

Chickasaw, Ala., p.v., Colbert co., on the Tennessee R., abt. 30 m. above Florence. Pop. 65.

Chickasaw, Iowa, co. in the N.E. of the State; area, 540 sq. m. It is intersected by the Wapsipinicon R. The surface is undulating; the soil is fertile. The chief prod. in 1880 were 1,208,201 bush. of corn, 505,424 of wheat, 708,698 of oats, 63,722 of barley, 501,616 lbs. of butter, and 16,827 of wool. Cap., New Hampton. Val. of taxable prop. abt. \$6,000,000. Pop. 14,534 (of whom 2,975 for.).

—p.v. and tp., Chickasaw co., on Little Cedar R., 14 m. E. of Charles City. Pop. 132; of tp. 1,289.

Chickasaw, Miss., co. in the N.E. of the State; area, 700 sq. m. The surface is nearly level; the soil is fertile. Corn and tobacco are the staple crops, but wool, cattle and cotton are also raised. Cap., Houston. Val. of taxable prop. abt. \$4,200,000. Pop. 1,794 (of whom 69 for., and 10,215 colored).

Chickasaw, O., v. in Marion tp., Mercer co., 25 m. N.W. Piqua. Pop. 59.

Chickasaw Bayou, Miss., a creek flowing from the Yazoo R. below Haines Bluff, and emptying into the Mississippi. Here, on Dec. 28, 1862, the Union forces under Gen. Sherman attacked the batteries and rifle-pits of the Confederates, defended by Gen. Pemberton; when, after a severe action, the Nationals were forced to retire with the loss of nearly 2,000 men; the Confederate loss being only 207.

Chickasaw Creek, Ala., Marengo co., enters Mobile R. 6 m. from its mouth.

Chickasaw Indians, a tribe of the once great Appalachian nation, formerly occupying the territory between the Ohio and the Tennessee Rs. They for a long time waged war against the early French settlers on the Mississippi. In 1818 they ceded to the U. States part of their lands W. of the Mississippi and S. of the Tennessee R.; and in 1833 gave up the remainder for a money indemnity and a special grant of land for their location E. of the Mississippi. In their new territory they became allied with the Choctaws, and have since made considerable advances toward a superior state of civilization, by pursuing habits of agricultural industry and methodical fru-

gality. They are believed to number abt. 5,000, and to be one of the richest, and generally one of the best conducted of the Indian people.

Chickasaw ba, *Ark.*, tp., Mississippi co. Pop. 864.

Chickasaw ha River, *Miss.*, rises in the E. part of the State, and flows S. for abt. 190 m., uniting with Leaf R. in Greene co. to form the Pascagoula.

Chickies, *Pa.*, p.v. in East Donegal and West Hempfield tps., Lancaster co., 26 m. S.E. Harrisburg. It contains several iron-smelting furnaces. Pop. 265.

Chick's Springs, *S. C.*, p.h. and tp., Greenville co., 10 m. N.E. Greenville. It is much resorted to for its mineral waters. Pop. of tp. 2,247.

Chico, *Cal.*, p. town and tp. ♦, Butte co., on Chico Creek, 95 m. N. of Sacramento by the Oregon div. of the C.P.R.R. It is in a rich farming district and contains 2 banks with an aggregate cap. of \$350,000, 1 daily and 2 wkly papers, 6 churches and several factories. Pop. 3,300; of tp. 5,239.

Chico, *Mont.*, p.o., Gallatin co.

Chico, *Tex.*, p.v., Wise co., 15 m. W. of Decatur. Pop. 292.

Chicopee, *Mo.*, p.o., York co.

Chicopee, *Mass.*, p.o. ♦ and tp., Hampden co., on the E. side of the Connecticut, at the mouth of the Chicopee R., 95 m. by rail W.S.W. Boston. The tp. contains also the v. of Chicopee and Chicopee Falls, which are connected by a branch R.R. 2 m. long, uniting with the Connecticut River R.R. at Chicopee. The principal establishments are 7 cotton mills, with 114,208 spindles, 1 woolen mill, 1 manuf. of hollow-ware and castings, 1 of locks, 2 of plows and other agricultural implements, 2 brass foundries (Ames company), 1 manuf. of military goods, &c., 1 of arms, and 1 brick-yard. The chief companies are the Dwight manuf. company (prints, sheetings, &c.) and the Ames manuf. company, which makes machinery, bronze cannon, small arms, &c. Pop. 350; of tp. 11,325.

Chicopee Falls, *Mass.*, p.v. ♦ in above tp. It has various important manuf. (See CHICOPEE.) Pop. 2,000.

Chicopee River, *Mass.*, rises in Worcester co., flows W., receives Ware and Swift Rs. at Palmer, and falls into the Connecticut R. in the N. part of Springfield, after a course of abt. 75 m.

Chicor, *N. C.*, tp., Pitt co. Pop. 2,523.

Chicora, *Fla.*, p.o., Polk co.

Chico Springs, *N. Mex.*, p.o., Colfax co.

Chicot, *Ark.*, a S.E. co., bordering on Louisiana, and bounded E. by the Mississippi R.; area, 820 sq. m. It is intersected by Crooked and Mason bayous. The surface is level and in some places subject to inundation. The soil in several parts is very fertile. The chief prod. in 1880 were 117,391 bush. of corn, 7,916 of sweet potatoes, and 25,338 bales of cotton. Cap., Lake Village. Val. of taxable prop. abt. \$4,500,000. Pop. 10,117 (of whom 157 for., and 8,555 colored).

Chili, *N. C.*, p.o., Beaufort co.

Chillicothe, *Ill.*, p.v. and tp. ♦, Peoria co., on the Illinois R., and on the Peoria branch of the C., R. I. & P. R.R., 18 m. N.N.E. of Peoria. It is a large grain depot, and possesses various manuf. industries. A daily packet boat runs to Peoria. It has a wkly paper. Pop. 936; of tp. 1,357.

Chillicothe, *Iowa*, p.v. in Cass tp., Wapello co., on Des Moines R., 8 m. N.W. Ottumwa by the C., B. & Q. R.R. Pop. 234.

Chillicothe, *Mo.*, a city, cap. of Livingston co., on the H. & St. J. R.R., and on the Omaha branch of the St. L., K. C. & N. R.R.; also the terminus of the C. & D. M. C. R.R., 76 m. E. of St. Joseph. It is the principal town in the Grand River Valley. It contains 10 churches, 2 wkly papers, 2 banks, 3 flouring mills, 2 planing mills, a foundry and machine shop, an academy and graded free schools, plenty of timber and water. Coal in abundance in the vicinity. Pop. 4,078; of tp. 5,860.

Chillicothe, *O.*, a city, cap. of Ross co., on the right bank of Scioto R., 45 m. in a direct line, or 70 m. following the windings, above its junction with the Ohio, and 3 m. above the mouth of Paint Creek, 45 m. S. of Columbus, and 96 m. N.E. Cincinnati. The M. & C. R.R. renders accessible the rich coal and iron mines of Southern Ohio. The Ohio and Erie Canal extends from Portsmouth, at the mouth of the Scioto, through this city, to Columbus and Cleveland. Chillicothe is the center of nearly all the trade of the rich farming country bordering on the Scioto, one of the finest agricultural districts of the U. States. It is beautifully situated, 30 ft. above the river, on a plain which forms the bottom of a valley, enclosed by two ranges of cultivated hills 500 ft. high. The principal avenues follow the course of the stream, and are intersected at right angles by others, all lighted with gas, and regularly planned. The city is well supplied with water, and has many handsome public buildings. Manuf., carriages, flour, lumber, machinery, agricultural implements, edge-tools, paper, iron, &c. There are 11 hotels, an insurance company, and 3 nat. banks with an aggregate capital of \$400,000. The city is divided into four wards, and contains 36 public schools, including a high school. There are also two Catholic parochial schools, a commercial college, a select school for girls, and 5 newspapers. Chillicothe was founded by emigrants from Virginia in 1793, and from

1800 to 1810 was the seat of the State government. Pop. 10,938.

Chillisqua'que, Pa., p.tp., Northumberland co. Pop. 1,737.

Chillisquaue Creek, Pa., rises in Montour co., flows S.W., and empties into the West branch of Susquehanna R. in Northumberland co.

Chilton, Miss., p.o., Yazoo co.

Chilmark, Mass., p.tp., Dukes co., comprises the W. part of the island of Martha's Vineyard; also a range of smaller islands called the Elizabeth Islands, and the island of No Man's Land. Pop. 494.

Chilo, O., p.v. in Franklin tp., Clermont co., on the Ohio R., 38 m. above Cincinnati. Pop. 200.

Chilow, W. Va., v. in Union tp., Tyler co. P. 94.

Chilton, Ala., a central co., bounded E. by Coosa R.; area, 650 sq. m. The surface is undulating; the soil is fertile. The chief prod. in 1880 were 183,973 bush. of corn, and 3,534 bales of cotton. Cap., Clanton. Val. of taxable prop. abt. \$3,000,000. Pop. 10,806 (of whom 27 for., and 2,151 colored).

Chilton, W. Va., v., Kanawha co. †

Chilton, Wis., p.v. in Chilton tp., cap. of Calumet co., 79 m. N.W. Milwaukee by the Wisconsin Central RR. It has several factories, a bank, 2 wly papers, &c. Pop. 1,353; of tp. 1,361.

Chiltonville, Mass., p.v. in Plymouth tp., Plymouth co., 3 m. S.E. Plymouth. †

Chin'chilla, Pa., p.o., Lackawanna co.

Chincoteague, Va., one of the islands belonging to Accomack co. Chincoteague Sound separates it from the mainland. It has a p.o., several churches and a graded school. Its oysters and its breed of ponies are celebrated.

Chinese Camp, Cal., p.v., Tuolumne co., 26 m. from Milton. It was once a lively mining camp of 2,500 inhabitants, but through the failure of its gold mines, it decreased in pop. quite rapidly. It is dependent on Yosemite travel for support. Pop. 184.

Chino, Ariz., p.o., Yavapai co.

Chino, or CHINA, Cal., p.tp., San Bernardino co. Pop. 411.

Chinook, Wash., small v. in Pacific co., some miles above Astoria on the N. side of Columbia R. It is so named from the Chinooks, a family of Indians who formerly inhabited this side of Columbia R. They are now nearly extinct, being only represented by a small band on the Chehalis reservation.

Chinquapin Rough, Ky., p.o., Jackson co.

Chinquapin, N.C., v., Duplin co., on Northeast R., 12 m. S.E. Keanaville. Manuf. rosin and turpentine. †

Chinquapin, S.C., tp., Aiken co. Pop. 492.

—tp., Lexington co. Pop. 1,208.

Chipeta, Col., p.o., Gunnison co.

Chipman's Point, Vt., p.o. and steamboat landing on Lake Champlain, in Orwell tp., Addison co.

Chipola, Fla., p.o., Calhoun co.

Chipola River, Ala., rises in the S.E. part of the State, flows S. through Jackson and Calhoun cos., Fla., for abt. 125 m., and empties into the Appalachicola R. near Iola.

Chippewa, Wis., a river, called by the Indians the Ojibway, or Ojibbewa. It rises in Ashland co., flows nearly S.W. through Chippewa and other cos., and enters the Mississippi R. at the foot of Lake Pepin, 6 m. above Wabasha. Length, abt. 220 m. It traverses extensive forests of pine.

Chippewa, Mich., a co. which forms the E. extremity of the upper peninsula. It is bounded on the N. by Lake Superior, and on the E. by the river St. Mary. It is drained by the Tequamenon R. The surface is uneven and partly covered with forests of pine. Limestone abounds here. Oats, potatoes, butter, and maple-sugar are produced. Cap., Sault de St. Marie. Val. of taxable prop. abt. \$400,000. Pop. 5,243 (of whom 3,094 for., and 792 Indians).

—tp., Isabella co. Pop. 487.

—tp., Mecosta co. Pop. 445.

Chippewa, Minn., a W. co.; area, abt. 700 sq. m. It is traversed by the Chippewa R. The surface is undulating; the soil is fertile. The chief prod. in 1880 were 354,421 bush. of wheat, 65,853 of corn, and 240,275 of oats. Cap., Montevideo. Val. of taxable prop. abt. \$500,000. Pop. 5,408 (of whom 2,175 for., and 3 colored).

—tp., Douglas co. Pop. 361.

Chippewa, O., tp., Wayne co. Pop. 3,527. See DOYLESTOWN.

Chippewa, Pa., tp., Beaver co. Pop. 908.

Chippewa, Wis., a N.W. co.; area, abt. 4,000 sq. m. It is intersected by the Chippewa R., and also drained by the Yellow R. and other streams. The surface is uneven and mostly covered with forests. Large quantities of pine lumber are exported from it. Sandstone occurs here as a surface-rock. The soil is fertile. The chief prod. in 1880 were 337,839 bush. of wheat, 141,529 of corn, 488,902 of oats, and 39,849 of barley. Lumber and brick are manufactured. Cap., Chippewa Falls. Val. of taxable prop. abt. \$13,000,000. Pop. 15,492 (of whom 5,444 for., and 196 Indians).

Chippewa Bay, N.Y., p.o., St. Lawrence co.

Chittenango, *N. Y.*, p.v. in Sullivan tp., Madison co., on Chittenango Creek, 2 m. from Chittenango Station. It has several factories, a nat. bank, a wkly paper, and a much resorted sulphur spring 1 m. S. of the village. Pop. 954.

Chittenango Creek, *N. Y.*, has its source in Nelson tp., Madison co., and flows N. into Oneida Lake, abt. 10 m. N.E. Syracuse.

Chittenango Falls, *N. Y.*, p.v. in Sullivan tp., Madison co., on Chittenango Creek, which here falls 150 ft., 16 m. S.E. Syracuse. Pop. 150.

Chittenango Station, *N. Y.*, p.v. in Sullivan tp., Madison co., 10 m. E. of Syracuse by the N. Y.C.&H.R.R.R. Pop. 97.

Chittenden, *Vt.*, a N.W. co., bounded W. by Lake Champlain; area, 517 sq. m. It is drained by Lamoille and Onion Rs., which afford valuable water power. Near the lake the surface is nearly level, but toward the E. it becomes rough and in some places mountainous. Nearly all the land is fertile, suitable for grazing, or capable of producing corn, potatoes, &c. The V.C. and the R.&B.R.Rs. traverse the co. The chief prod. in 1880 were 198,977 bush. of corn, 318,192 of oats, 32,488 of barley, 1,471,728 lbs. of cheese, 1,947,552 of butter, 98,712 of wool, and 446,671 of maple sugar. Cap., Burlington. Val. of taxable prop. abt. \$16,000,000. Pop. 32,798.

—p.tp. Rutland co. Pop. 1,062.

Chittenden's Falls, *N. Y.*, v. in Stockport tp., Columbia co. Pop. 150.

Chloride, *Col.*, p.o., Pitkin co.

Chloride, *N. Mex.*, p.o., Socorro co.

Choccoloc, *Ala.*, p.o., Calhoun co.

Choccoloc Creek, *Ala.*, a branch of the Coosa R., which it enters in Talladega co.

Chocolay, *Mich.*, tp., Marquette co. Pop. 974. See HARVEY.

Chocanut, *Ta.*, p.tp., Sasquehanna co. Pop. 537.

Chocanut Centre, *N. Y.*, p.h. in Union tp., Broome co., 3 m. N.W. Binghamton. Pop. 30.

Chocorna, *N. H.*, p.o., Carroll co.

Chocorna Mountain, *N. H.*, is in Albany tp., Carroll co. Height, 3,540 ft. It is celebrated for its picturesque scenery.

Choco ville, *Ark.*, p.o., Sebastian co.

Chocowinity, *N. C.*, p.tp., Beaufort co. Pop. 2,460.

Choctaw, *Ala.*, a S.W. co., bordering on Mississippi; area, abt. 600 sq. m. The Tombigbee R., which flows along the E. boundary, is navigable for steamboats. It is well watered by affluents of the Tombigbee. The surface is undulating, and mostly covered with forests; the soil is fertile. The chief prod. in 1880 were 272,213 bush. of corn, 52,714 of sweet potatoes, and 9,004 bales of cotton. Cap., Butler. Val. of taxable prop. abt. \$1,500,000. Pop. 15,731 (of whom 8,344 colored).

Choctaw, *Ark.*, tp., Lincoln co. Pop. 952.

—p.o., Van Buren co.

Choctaw, *Miss.*, a central co., traversed by Big Black R.; area, 575 sq. m. Forests of oak, hickory, and other timber, occupy much of the land; the remainder is fertile. The chief prod. in 1880 were 243,287 bush. of corn and 5,737 bales of cotton. Cap., Greensborough. Val. of taxable prop. abt. \$1,500,000. Pop. 9,036 (of whom 42 for., and 2,500 colored).

Choctaw Agency, *Miss.*, p.o., Oktibbeha co., 14 m. S.E. Starkville. Pop. 100.

Choctaw Bluff, *Ala.*, p.o., Clarke co.

Choctaw Corner, *Ala.*, p.v., Clarke co., 12 m. N. of Grove Hill. Pop. 200.

Choctawhatchee, *Ala.*, a river which rises in Barbour co., Ala., flows S. through Florida, and falls into a bay of the same name in the Gulf of Mexico, after a course of abt. 150 m.

Choctaws, or **CHACTAS**, a tribe of Indians now settled in the Indian Territory along the N. banks of the Red R., where they possess abt. 10,450 sq. m. When first known to Europeans they occupied the district now forming the S. part of Mississippi and the W. part of Alabama. On the settlement of Louisiana they formed an alliance with the French, and assisted them against the Natchez and Chickasaws; but by degrees they entered into friendly relations with the English, and at last, in 1786, recognized the supremacy of the U. States by the treaty of Hopewell. Their emigration W. began abt. 1800, and the last remains of their original territory were ceded in 1830. In their new settlements the Choctaws continued to advance in prosperity till the outbreak of the civil war, which considerably diminished the population and ruined a large part of their property. They sided with the Confederates, and their territory was occupied by Confederate troops; and accordingly at the close of the war they were regarded as having lost their rights. Part of their land they were forced to surrender to the Government; their slaves were emancipated; and provision was claimed for them in the shape of either land or money. Since then they have considerably recovered their position. They now number abt. 16,000, have 50,000 acres under cultivation, and possess private prop. to the value of upward of \$4,700,000. They are governed by a chief and a nat. council of 40 members, according to a written constitution, which dates in the main from 1838; and they possess a regular judicial system and employ trial by jury. Missions are maintained amongst them by the American Board of Commissioners, the Presbyterians, the Methodists and the Baptists. The Choctaw language has been reduced to writing, and brought to some degree of literary precision by the efforts of the missionaries, who have produced in the language the Bible, school-books and hymnals. A newspaper is published wkly in Choctaw and English at New Boggy; and a grammar was composed by the late Rev. C. Byington (Philadelphia, 1870).

Choctoc, *Ga.*, p.o., Union co.

Choga, *N. C.*, p.o., Jackson co.

Chola me, *Cal.*, p.o., San Luis Obispo co.

Choptack, *Tenn.*, p.o., Hawkins co.

Choptank River, rises in Kent co., Del., flows S.W., and empties into a large estuary in Chesapeake Bay, Md. It is navigable for sloops 40 m. from its mouth.

Chotard Landing, *Miss.*, v. in Issaquena co., 18 m. S. of Mayersville. Pop. 100.

Choteau, or **CHOUTEAU**, *Lud. T.*, p.o. and station, Cherokee Nation, on the Kansas div. of the M. P.R.R., 71 m. S. of Oswego.

Choteau, *Mont.*, a N. co. Area, abt. 12,500 sq. m. It is intersected by the Missouri R. and the Milk R. The surface is partly mountainous, but it contains some broad treeless plains and considerable arable land. The climate is quite mod. rate, from the comparatively small elevation above the sea. Chief prod. in 1880, 88,541 bush. of corn and 2,401 of wheat. Cap., Fort Benton. Val. of taxable prop. abt. \$1,200,000. Pop. 3,058 (of whom 798 for., and 559 Indians).

Choteau Creek, *Dak.*, p.o., Bon Homme co.

Chou teau, *Kan.*, p.o., Johnson co.

Chouteau Island, *Ill.*, tp., Madison co. Pop. 1,094.

Chowan, *N.C.*, a N.E. co., bounded S. by Albemarle Sound, and W. by Chowan R. Area, 240 sq. m. It was one of the original precincts of the lords proprietors under King Charles II., and was occupied by a tribe of Indians called Chowanokes. The surface is slightly uneven, and the soil generally of good quality. The chief prod. in 1880 were 143,156 bush. of corn, 46,548 of sweet potatoes, and 2,223 bales of cotton. Cap., Edenton. Val. of taxable prop. abt. \$1,100,000. Pop. 7,900 (of whom 6 for., and 4,267 colored).

—p.o., Chowan co.

Chowan River, *N.C.*, is formed by the Notaway, Meherrin and Blackwater Rs., which rise in Va. It flows into Albemarle Sound, a little N. of the Roanoke. It is navigable, on the Meherrin branch, for large vessels to Murfreesboro', near the line of Va.

Chris'man, *Ill.*, p.v. in Ross tp., Edgar co., 23 m. S. of Danville by the Danville & Southwestern div. of the W., St.L.&P.R.R., and 67 m. E. of Decatur by the L., D.&S.R.R. Pop. 541.

Chrisman, *Va.*, p.o., Rockingham co.

Christ Church, *S.C.*, tp., Charleston co. Pop. 5,153.

Christena, *Vb.*, p.o., Kearney co.

Christian, *Ark.*, tp., Independence co. P. 1,891.

Christian, *Ill.*, a central co., bounded N. by Sangamon R., and intersected by the S. fork of that stream. Area, 675 sq. m. It has a generally level surface, diversified by timber and fertile prairies. It is traversed by 3 lines of railroads. The chief prod. in 1880 were 6,143,469 bush. of corn, 1,456,544 of wheat, 749,479 of oats, 102,726 of potatoes, 287,686 lbs. of butter, 87,775 of wool, and 39,473 galls. of sorghum molasses. Cap., Taylorsville. Val. of taxable prop. \$19,000,000. Pop. 28,232 (of whom 2,441 for., and 126 colored).

Christian, or **CHRISTIAN CITY**, *Kan.*, p.v., McPherson co., 15 m. S.E. McPherson. Pop. 75.

Christian, *Ky.*, a S.W. co., bordering on Tennessee. Area, 704 sq. m. It is watered by a number of small streams, several of which flow for 2 or 3 m. through subterranean channels. The soil in the S. and level part of the co. is productive; the N. part is hilly, and its wealth consists chiefly in forests and mines of coal and iron. The St.L.&S.E.R.R. passes through the co. The chief prod. in 1880 were 1,430,154 bush. of corn, 437,668 of wheat, 64,341 of oats, 185,684 lbs. of butter, 32,726 of wool, and 12,577,274 of tobacco. Cap., Hopkinsville. Val. of taxable prop. abt. \$8,500,000. Pop. 31,681 (of whom 235 for., and 14,689 colored).

Christian, *Mo.*, a S.W. co., drained by James

R. and branches of the White. Area, 500 sq. m. The surface is undulating or hilly; the soil in the valleys is fertile. Timber is plentiful. The A.&P.R.R. passes through the N.W. extremity. The chief prod. in 1880 were 635,549 bush. of corn, 145,513 of wheat, and 75,223 of oats. Cap., Ozark. Val. of taxable prop. abt. \$2,000,000. Pop. 9,649 (of whom 207 for., and 197 colored).

Cincinnati, *Mo.*, p.o., Ralls co.

Cincinnati, *Nb.*, p.v., Pawnee co., 12 m. S.E. Pawnee City. Pop. 75.

Cincinnati, *O.*, the chief city of the State, cap. of Hamilton co., and in size the 8th city in the U. States, is situated on the N. bank of the Ohio R., 250 m. direct, or by the river 466 m. S.W. Pittsburg, Pa., 290 m. direct, or 500 m. by river N.E. Cairo, Ill., and 861 m. by rail S.W. New York. The city is chiefly built upon two terraces or plateaus, the first 60 and the second 112 ft. above the river. Beyond these rises an amphitheatre of hills from 400 to 450 ft. high, from which may be obtained a magnificent view of the valley of the Ohio and the surrounding country. On the opposite bank of the river, are the cities of Covington and Newport, which communicate with Cincinnati by two bridges and several steam ferries. The wire suspension bridge, which is 1057 ft. long between the towers (or, including the approaches, 2,252 ft.), with a height of 100 ft. above low water, was completed in 1867 at a cost of nearly \$2,000,000. Further up the river is a wrought iron railroad bridge built upon piers. Cincinnati covers an area of 24 sq. m., extending along the river abt. 10 m. with an average width of 3 m. The most important part of the city, however, is comprised within a distance of 2½ m. along the river. The streets are laid out with great regularity, crossing each other at right angles, are broad and well paved, and for the most part beautifully shaded. The business portion of the city is compactly built, a fine drab freestone being the material chiefly used. The outer highland belt of the city is beautified by costly residences which stand in the midst of extensive and neatly adorned grounds. Here the favorite building material is blue limestone. The names of the suburbs on the hilltops are Clifton, Avondale, Mt. Auburn, Price's Hill, and Walnut Hills. The city is also noted for the beauty of its surrounding scenery. Cincinnati is well

supplied with public parks, the largest of which, Eden, is situated on a hill in the E. part of the city, and is beautifully laid out and adorned. Burned Wood, on a hill N. of the city, contains 170 acres, nearly all forest. One of the most attractive objects in the city is the Tyler Davidson bronze fountain which was presented to the city by Mr. H. Probasco in 1871, and cost nearly \$200,000. The design embraces 15 bronze figures, all cast at Munich, the chief one representing a female with outstretched arms, from whose fingers the water falls in fine spray. This is the surmounting figure, and reaches a height of 45 ft. above the ground. Among the most notable buildings is that of the U. States Government, built of sawed freestone in the Roman Corinthian style; it is three stories high, with a length of 150 ft. and a width of 80 ft. The county court-house, in the same style of architecture, is 175 ft. square and three stories high. The brick buildings for the city offices are 205 ft. long and 52 ft. wide. The Masonic Temple, built in the Byzantine style, 195 ft. long and 100 ft. wide, is four stories high, and has two towers 140 ft., and a spire 180 ft. high. The most imposing church edifices are St. Peter's Roman Catholic Cathedral, built in pure Grecian style, 200 by 80 ft., with a stone spire rising to a height of 224 ft.; St. Paul's Church (Methodist), with a spire 200 ft. high; and the First Presbyterian Church, with an immense tower surmounted by a spire 270 ft. high.—Cincinnati is one of the most important commercial and manufacturing centres of the West. The 6 railroads entering the city are used by 12 companies, and besides these 2 lines terminate at Covington. Abt. 300 passenger and freight trains arrive and leave daily on these roads. The position of the city on the Ohio R. gives it water communication with the extensive river system of the Mississippi valley; while it is connected with Lake Erie by the Miami Canal. The number of steamers running between Cincinnati and other ports in 1881 was 206; the number of arrivals of steamers during 1881 was 2,638; of departures, 2,633. About three-fourths of the commerce of the city is by railroad and canal, and the remainder by river transportation. The extent of the entire commerce is indicated by the value of imports, which for the year 1881 amounted to \$274,641,218 and the exports to \$271,973,776. Boat building was formerly a prominent industry, but it has recently declined. In 1881, 16 vessels of 1,969 tons in aggregate were built. Formerly Cincinnati was the chief centre in the U. States for the slaughtering of swine and the packing of pork, but the supremacy is now held by Chicago, Cincinnati taking the second rank. In 1882 there were slaughtered 384,878 hogs, against 522,425 in 1881. The production of iron in all its branches is rapidly increasing and will soon assume the leading rank in the industrial products of the city. The total value of all the manuf. of iron in 1881 was \$20,557,783; cash capital invested \$9,988,390; hands employed 11,874. The manuf. of wool and especially of furniture, is also steadily increasing. The total products for 1881 was valued at \$17,370,682; hands employed, 10,683. Cincinnati is the principal leather market in the West, and the second in the U. States. It ranks second in the manuf. of boots and shoes, and first in the production of harness. The value of products of leather and leather goods during 1881 was \$13,320,786; hands employed, 7,502. There are 27 breweries, the product of which has a national reputation. The production of beer during 1881 was 23,132,742 galls. valued at \$5,676,173. Cincinnati spirits, in the form of whisky, high wines, cologne spirits, &c., are sold in every State. In 1881, the product of distilled liquors was 11,610,110 galls. valued at \$13,139,817; and of rectified liquors, 11,361,655 galls. valued at \$12,838,670. In 1883 there were 12 nat. banks with an aggregate cap. of \$7,000,000, and 11 private banks.

There were 9 daily, 42 wkly, 4 semi-monthly, 27 monthly, and 5 quarterly papers.—The city is divided into 25 wards, and is governed by a mayor elected for 2 years, a board of 25 aldermen and a board of 50 councilmen. It has a very efficient paid fire department and police force. The city is supplied with water obtained by pumping from the Ohio R. by means of 3 immense reservoirs, 2 of which, with a capacity of 100,000,000 each are in Eden Park. In 1882 the bonded debt of Cincinnati was \$24,286,217; the valuation of real property was \$120,045,230, personal property, \$41,359,163; amount of revenue from taxation, \$3,583,177. Cincinnati has abt. 160 churches and a large number and variety of well organized charitable institutions. Secret and mutual benevolent societies are also very numerous, especially among the German population. The public schools are under the control of a superintendent and a board of 50 elected members, and comprise 1 normal, 3 high, 6 intermediate and 32 district schools. The Woodward and the Hughes high schools have long been known for their excellence. Besides the above, there are a large number of Roman Catholic parochial schools. The university of Cincinnati is designed to afford advanced and technical instruction free of charge. Besides the Cincinnati Wesleyan College for females (Methodist Episcopal), St. Xavier College (Roman Catholic), and Mount St. Mary's of the West, the city has 1 law, 6 medical, and 2 theological schools, 4 commercial colleges, a school of design, and 2 schools of music. There are 11 public libraries in the city, the largest being the free public library, which has 81,000 bound volumes and 5,500 pamphlets, and the young men's mercantile with nearly 40,000 volumes. The most important literary associations are the natural history and the historical and philosophical societies.—Cincinnati was first settled in 1788, and was named, it is said, in honor of the Cincinnati society of officers of the revolutionary war. Twelve years later it had 750 inhabitants. In 1814 it was incorporated as a city. Abt. 1830, the Miami canal was built, which greatly increased the prosperity of the city. Pop. in 1810, 2,540; in 1830, 24,831; in 1840, 46,338; in 1850, 115,436; in 1860, 161,044; in 1870, 216,239; in 1880, 255,708.

Cincinnati, Tex., p. o., Walker co.

Cincinnatius, N. Y., p. v., ♦ and tp., Cortland co., 75 m. S. E. Oswego, and 15 m. S. E. Cortland. It has an academy. Pop. 429; of tp. 1,093.

Cin'abar, Cal., p. o., San Benito co.

Cinnamon'son, N. J., p. tp., Burlington co. Pop. 2,184.

Cinque Hommes (*sink'hôm*), *Mo.*, tp., Perry co. Pop. 1,449.

Circle Valley, Utah, v., Pi Ute co. Pop. 67.

Circleville, Ill., p. v., Tazewell co., 8 m. S. E. Pekin Junction. Pop. 350.

Circleville, Kan., p. v. in Jefferson tp., Jackson co., 9 m. W. of Holton. Pop. 122.

Circleville, N. Y., p. v., Orange co., 7½ m. N. of Middletown. Pop. 115.

Circleville, O., a city, the cap. of Pickaway co. on the Scioto R. and the Ohio Canal, 104 m. E. N. E. Cincinnati by the C.&St. L. R.R., and 30 m. S. of Columbus by the S. V. R.R. It occupies the part of an aboriginal fortification of circular form, from which its name is derived. The surrounding country is rich and chiefly devoted to the culture of broom-corn, for which Circleville is a leading market. It has 14 churches, 2 nat. and 1 other banks, 7 building-and-loan associations, 2 large pork-packing establishments, a number of mills and factories, and 3 wkly papers. Pop. 6,046; of tp. 6,541.

Circleville, Pa. (p. o. name TINKER RUN), v. in North Huntingdon tp., Westmoreland co., 2 m. W. of Irwin Station. Pop. 149.

Circleville, Tex., p. o., Williamsou co.

Circleville, W. Va., tp., Pendleton co. Pop. 1,313. See MOUNT FREEDOM.

Cisco, Cal., p.v., Placer co. Pop. 73.

Civil Point, Iowa, p.o., Audubon co.

Clackamas, Oreg., a N. W. co.; area, abt. 1,700 sq. m. It is bounded E. by the Cascade Range of mountains, and drained by the Willamette R., and by the Clackamas R., which enters the Willamette some miles above Portland, after a course of abt. 100 m. It contains extensive forests. The surface is much diversified. The soil in some parts is very fertile. The chief prod. in 1880 were 231,616 bush. of wheat, and 218,824 of oats. Cap., Oregon City. Val. of taxable prop. abt. \$4,000,000. Pop. 9,260 (of whom 1,396 for., 175 Chinese, and 117 Indians).

—p.v. in above co., 12 m. S. of Portland. Pop. 150.

Clairborne, Ala., p.v., Monroe co., abt. 75 m. S. W. Selma. Pop. 199.

Clairborne, La., an E. parish, bordering on Arkansas, drained by the branches of Bayou d'Arbonne; area, abt. 1,200 sq. m. The surface is undulating and partly covered with pine and other timber. The soil is good, though not of remarkable fertility. The chief prod. in 1880 were 332,158 bush. of corn, 28,175 of oats, 106,742 of sweet potatoes, 16,720 lbs. of wool, and 19,569 bales of cotton. Cap., Homer. Val. of taxable prop. abt. \$1,500,000. Pop. 18,858 (of whom 33 for., and 10,314 colored).

Clairborne, Miss., a S. W. co.; area, 740 sq. m. The Mississippi R. on the W. separates it from Louisiana, and the Big Black R. touches its N. W. border. The chief prod. in 1880 were 197,568 bush. of Indian corn, 22,714 of sweet potatoes, 263,807 tons of hay, and 18,518 bales of cotton. Cap., Port Gibson. Val.

of taxable prop. abt. \$3,900,000. Pop. 16,768 (of whom 158 for., and 12,858 colored).

—p.v., Jasper co., 23 m. W. of Chubuta. Pop. 175.

Clairborne, O., tp., Union co. Pop. 2,758. See RICHMOND.

Clairborne, Tenn., a N. E. co., intersected by Powell's R., and bordering on Ky., touching Va. on the N. E. corner, and bounded S. by Clinch R.; area, abt. 350 sq. m. The surface is hilly, and in some places mountainous. It possesses a fertile soil, and has mines of lead, zinc and iron, the last of which are very extensive and profitably worked. The chief prod. in 1880 were 496,262 bush. of corn, 44,192 of wheat, 74,921 of oats, and 14,928 of potatoes. Cap., Tazewell. Val. of taxable prop. abt. \$1,800,000. Pop. 13,373 (of whom 14 for., and 789 colored).

Clairfield, Tenn., p.o., Clairborne co.

Clairmont, N. Mex., p.o., Socorro co.

Clairmont, N. Y., formerly a v. of West Farms tp., now included in the city of New York.

Clairville, Cal., p.o., Sonora co.

Clallam, Wash., a N. W. co., bounded N. by the strait of Juan de Fuca, and W. by the Pacific Ocean; area, 1,720 sq. m. It is watered by several streams that fall into the strait. Mount Olympus, 8,138 ft. high, the N. peak of the Olympic range in the S. of this co., which is for the most part densely covered with forests. The soil is fertile. The chief prod. in 1880 were 25,257 bush. of wheat, 10,969 of oats, 7,965 of barley, 5,674 of potatoes, and 27,816 lbs. of butter. Cap., New Dungeness. Val. of taxable prop. abt. \$250,000. Pop. 638 (of whom 171 for., 97 Indians, and 4 Chinese).

Clam Falls, Wis., p.v. and tp., Polk co. Pop. of tp. 115.

Clam Lake, Mich., p.o., Antrim co.

—tp., Wright co. Pop. 455.

Clark, Neb., tp., Dixon co. Pop. 129.

Clark, N.J., tp., Union co. Pop. 353.

Clark, or CLARKE, O., a S.W. central co.; area, 380 sq. m. It is intersected by Mad R., and also drained by Lagodona Creek. The surface is finely diversified; the soil is very fertile. The chief prod. in 1880 were 1,730,534 bush. of corn, 839,147 of wheat, 161,492 of oats, 107,916 of potatoes, 518,006 lbs. of butter, 306,846 of wool, 197,718 of flour, and 64,642 of tobacco. Pork is also a staple prod. The manuf. interests are varied and important; the most numerous are those

of flour, agricultural tools, and carriages. It is traversed by several RRs. Cap., Springfield. Val. of taxable prop. \$27,204,290. Pop. 41,947 (of whom 4,266 for., and 3,565 colored).

—tp., Brown co. Pop. 1,761. See HAMERSVILLE.

Clark, of CLARKSVILLE, *Pa.*, p. borough in Shenango tp., Mercer co., 11 m. W. of Mercer. Pop. 264.

Clark, or CLARKE, *Wash.*, a S.W. co.; area, 1,350 sq. m. It is bounded S. by the Columbia R., which also forms half of the W. boundary, and is intersected by the Catlapootle R. The surface is much diversified and for a large part covered with forests of hard wood. The soil partially fertile. The chief prod. in 1880 were 51,584 bush. of wheat and 72,734 of oats. Val. of taxable prop. abt. \$1,000,000. Pop. 5,490 (of whom 1,063 for., and 183 Chinese and Indians).

Clark, *Wis.*, a W. central co., intersected by Black R., and watered by L. Eau Claire R.; area, 1,548 sq. m. The surface is lilly, and the soil fertile. The chief prod. in 1880 were 56,987 bush. of wheat, 70,754 of corn, 146,503 of oats, 6,456 of rye, and 8,009 of barley. Lumber is also a staple prod. Cap., Neillsville. Val. of taxable prop. abt. \$6,000,000. Pop. 10,715 (of whom 2,815 for., and 15 Indians).

Clark Centre, *Ill.*, p.o., Clark co.

Clark, *Mo.*, a S.W. co.; area, 1,270 sq. m. It is bounded W. by the Tombigbee, and S.E. by the Alabama R., both of which are here navigable by steamboats. The surface is uneven, and a considerable portion of it occupied by pine forests. Part of the soil is poor and sandy; in other places it is fertile. The chief prod. in 1880 were 312,718 bush. of corn, 39,308 of oats, 56,731 of sweet potatoes, 11,095 bales of cotton, and 17,685 galls. of molasses. Cap., Clarks-ville. Val. of taxable prop. abt. \$1,600,000. Pop. 17,806 (of whom 33 for., and 10,090 colored).

Clark, or CLARK, *Ark.*, a S.W. central co., bounded E. by the Washita R., and S.W. by the Little Missouri; area, abt. 750 sq. m. It is intersected by Antoine and Caddo creeks. The Washita is navigable by steamboats. The chief prod. in 1880 were 11,953 bush. of wheat, 470,352 of corn, and 13,924 bales of cotton. Cap., Arkadelphia. Val. of taxable prop. abt. \$3,400,000. Pop. 15,771 (of whom 13 for., and 5,205 colored).

Clark, *Ga.*, a N.E. central co.; area, 180 sq. m. Granite is found in great abundance; the principal other minerals are gold, kaolin, pyrites, tourmaline, and garnets. Near the streams the land is fertile, but much of the soil in the uplands is worn out. The Athens branch of the Georgia RR. terminates at the county seat. The chief prod. in 1880 were 11,104 bush. of wheat, 67,940 of Indian corn, 16,098 of oats, and 3,310 bales of cotton. Cap., Athens. Val. of taxable prop. abt. \$4,000,000. Pop. 11,702 (of whom 151 for., and 6,304 colored).

Clark, or CLARK, *Ind.*, a S.E. co., separated from Kentucky on the S.E. by the Ohio R.; area, 400 sq. m. The surface is mostly level, and the soil fertile. Iron, marble, limestone and hydraulic cement are found. The J. & C. L., the Louisville div. of the O. & M., and the L., N. A. & C. RRs. traverse the co. The chief prod. in 1880 were 188,777 bush. of wheat, 619,002 of Indian corn, 77,425 of oats, 93,187 of potatoes, 241,346 lbs. of butter, 33,896 of wool, 19,321 of tobacco, and 27,141 galls. of sorghum molasses. Pork is also a staple prod. Cap., Charlestown. Val. of taxable prop. abt. \$19,000,000. Pop. 28,638 (of whom 2,450 for., and 2,531 colored).

—p.v. in Ward tp., Randolph co., 6 m. N. of Winchester. Pop. 75.

Clark, *Iowa*, a S. co.; area, 432 sq. m. It is drained by the South, the Whitebreast, and the E. fork of Grand R. The surface is moderately uneven, and occupied mainly by prairies. The soil is generally good. The B. & M. R.R. passes through the co. The chief prod. in 1880 were 80,596 bush. of wheat,

2,370,160 of corn, 578,707 of oats, 44,623 of potatoes, 281,575 lbs. of butter, and 48,627 of wool. Cap., Osceola. Val. of taxable prop. abt. \$4,000,000. Pop. 11,512 (of whom 445 for., and 28 colored).

Clarke, *Kan.*, a S.W. co. of Kansas, bordering on the Indian Territory; area, 780 sq. m. Its N.E. corner is intersected by the Nescatunga R., the S.E. corner by the Cimarron, while a branch of the latter waters its W. part. Pop. 163.

Clarke, or CLARK, *Ky.*, an E. central co.; area, 210 sq. m. It is bounded on the S. by the Kentucky and Red Rs. The surface is uneven; the soil is productive. The chief prod. in 1880 were 129,943 bush. of wheat, 791,292 of corn, 17,187 lbs. of tobacco, and pork. Cap., Winchester. Val. of taxable prop. abt. 9,000,000. Pop. 12,113 (of whom 86 for., and 4,185 colored).

Clarke, or CLARK, *Miss.*, an E. co.; area, abt. 625 sq. m. It is watered by the Chickasawha R. The surface is slightly undulating and to a great extent covered with forests. The M. & O. RR. traverses the co. The chief prod. in 1880 were 174,712 bush. of corn, 30,101 of oats, and 4,693 bales of cotton. Cap., Quitman. Val. of taxable prop. abt. \$2,600,000. Pop. 15,022 (of whom 72 for., and 7,792 colored).

Clarke, or CLARK, *Mo.*, a N.E. co.; area, 516 sq. m. It is separated from Illinois by the Mississippi R., and from Iowa by the Des Moines. It has a slightly uneven surface, intersected by Fox and Wyaconda rivers, and occupied chiefly by fertile and extensive prairies, interspersed with forests of good timber. The chief prod. in 1880 were 97,253 bush. of wheat, 32,232 of rye, 2,168,222 of corn, 484,078 of oats, 42,846 of potatoes, 239,835 lbs. of butter, and 81,584 of wool. Cap., Waterloo. Val. of taxable prop. abt. \$10,000,000. Pop. 15,031 (of whom 748 for., and 308 colored).

—tp., Chariton co. Pop. 1,040.

Clarke, *O.*, a co. See CLARK.

Cleveland, *Kan.*, v. in Belmont tp., Kingman co. Pop. 37.
Cleveland, *Ky.*, p.o., Fayette co.
Cleveland, *Mich.*, tp., Leelenaw co. Pop. 395.
Cleveland, *Minn.*, p.v. and tp., Le Sueur co., 14 m. N.E. Mankato. Pop. 156; of tp. 1,147.
Cleveland, *Mo.*, v. in Nowaday tp. and co., 1 m. N. of Burlington Junction. Pop. 47.
Cleveland, *Neb.*, p.o., Holt co.
Cleveland, *N. Y.*, p.v.♠ in Constantia tp., Oswego co., on the N. shore of Oneida Lake, 40 m. S.E. Oswego by the N. Y. O. & W. R.R. Manuf., tannery, flour, lumber, boat-building, &c. It has a wkly paper. Pop. 724.
Cleveland, *N. C.*, a S.W. co., bordering on South Carolina, and intersected by the First Broad R.; area, 660 sq. m. The soil is generally good; the surface is uneven and marked by several considerable elevations, the principal of which is Kings Mt., near the S. E. border. Gold is found. The chief prod. in 1880 were 55,983 bush. of wheat, 390,281 of corn, 41,692 of sweet potatoes, 153,456 lbs. of butter, and 6,126 bales of cotton. Cap., Shelby. Val. of taxable prop. abt. \$3,000,000. Pop. 16,571 (of whom 11 for., and 2,872 colored).
Cleveland, *O.*, a city and port of entry, cap. of Cuyahoga co., the 2d city in size and importance in O., and the 11th in the U. States, situated at the mouth and on both sides of Cuyahoga R., on the S. shore of Lake Erie, and on the C. C. & C. L., the C. & P., the L. S. & M. S., and the A. & G. W. R.Rs., 138 m. N.E. of Columbus, 244 m. N.E. Cincinnati, and 623 m. W. of New York. Cleveland is the N. terminus of the Ohio Canal, which extends S. to Portsmouth on the Ohio R. Several lines of steamboats run to the various lake ports. The greater portion of the city stands on

a gravelly plain, elevated abt. 100 ft. above the lake. The river passes through it in a winding course, affording an excellent harbor, which has been improved by dredging out a commodious ship-channel (branching from the river near its mouth), and by the erection of 2 piers 200 ft. apart, stretching several hundred feet into the lake. On each pier is a light-house, and another stands on the cliff above. The city is laid out with much taste, chiefly in squares, the streets being remarkably wide and well paved. The abundance of shade-trees, chiefly elms, has given it the title of the "Forest City." The great stone viaduct which spans the river valley between the two divisions of the city, on a level with the plateau, was completed in 1878, and is justly reckoned among the triumphs of American engineering. It is 3,211 ft. long, and cost \$2,200,000. The most noteworthy buildings are that of the U. States (containing the post-office, the custom-house, and the federal courts), the city hall, the county court-house, the house of correction and work-house, the city infirmary, the Cleveland medical college, Case Hall, and the two high-school buildings. The Union Railway dépôt, an immense structure of stone near the lake shore, is one of the largest of the kind in the U. States. The city has an extensive trade in copper and iron ore shipped from the Lake Superior mining region, and in coal, petroleum, wool, and lumber, received by railroad, canal, and lake transportation. During 1881 Cleveland received 5,121 tons of copper valued at \$2,560,500; 1,277,994 tons of iron ore, valued at \$11,501,946; and 39,619 tons of pig iron valued at \$1,109,332. The total value of merchandise received coastwise was \$61,921,552, cleared \$37,023,210. The foreign trade is exclusively with Canada. The imports for the year 1881 amounted to \$726,738, the exports to \$552,161. In 1882 there were registered, enrolled and licensed at this port 187 vessels of 81,329 tons, including 112 sailing vessels of 42,841 tons, 70 steamers of 36,622 tons, and 5 barges of 1,866 tons. There were built during the year 5 sailing vessels of 1,583 tons, and 13 steamers of 11,320 tons. The manuf., particularly of iron and coal-oil are very important. The Cleveland Rolling Mills is probably the largest connected concern in the manuf. of iron and steel in the U. States. Its extensive works cover more than 100 acres of ground, and it employs in average 5,000 men. There are 20 refining companies, which, besides manuf. illuminating oils, are engaged in making abt. 20 distinct products from the crude oil. Other important products are sulphuric acid, wooden ware, agricultural implements, marble and stone, grindstones, railroad cars, white lead, &c. There are 8 pork-packing concerns, employing 750 men; the number of hogs slaughtered and packed in 1881 was 124,589. Cleveland has a Board of Trade incorporated in 1866; 6 nat. and 9 other banks, 6 daily, 37 wkly, and 12 monthly papers.—The government of the city is vested in a mayor and a common council of 2 members for each of the 18 wards. The city has an efficient police and a paid fire department. It is supplied with water obtained from the lake by means of a tunnel $1\frac{1}{2}$ m. long, and forced into a large reservoir on high ground in the W. part of the city. The reformatory and charitable institutions are numerous and varied. The assessed value of property in 1881 was \$79,647,156. The public schools in 1881 comprised 1 normal, 2 high, and 42 grammar schools, in which were enrolled 24,836 pupils, with an average daily attendance of 17,016. The expenditure for the public schools during the year amounted to \$420,219. Cleveland has no college or university, but there are several excellent seminaries, academies, and private schools for the advanced education of both sexes. The Cleveland library association has 18,000 volumes, the public library, supported by taxation, abt. 20,000 and the law library abt. 2,000. The Bethel free read-

ing-rooms are open to the public, and the western reserve historical society has a valuable collection of books. Cleveland was laid out in 1796, incorporated as a village in 1814, and as a city in 1836. Pop. in 1810, 57; in 1830, 1,075; in 1840, 6,071; in 1850, 17,034; in 1860, 43,417; in 1870, 92,819; in 1880, 160,142; in 1883 (estimated) 200,000.

Clinton, Kan., p.v. and tp., Douglas co., 11 m. W. of Lawrence. Pop. 285; of tp. 1,005.

Clinton, Ky., a S. co., bordering on Tennessee, bounded N. by the Cumberland R.; area, abt. 350 sq. m. The surface is hilly, Poplar Mt. in the E. part, 1,000 ft. high, being the principal summit. The soil is fertile, though little improved. Coal and iron are abundant, and there is good water power. The chief prod. in 1880 were 33,375 bush. of wheat, 281,808 of corn, 10,115 of oats, 15,552 of Irish and 11,947 of sweet potatoes, 96,822 lbs. of butter, 17,816 of wool, and 77,408 of tobacco. Cap., Albany. Val. of taxable prop. abt. \$900,000. Pop. 7,212 (of whom 10 for., and 310 colored).

Clinton, Ky., p.v. ♦, cap. of Hickman co., 78 m. N.W. Jackson, and 30 m. S.E. Cairo, Ill., by the C., St. L. & N.O. R.R. Pop. 506.

Clinton, La., p.v. ♦, cap. of East Feliciana parish, 32 m. N. of Baton Rouge. A railroad 25 m. long connects it with Port Hudson on the Mississippi. It has good female schools and a wkly paper. P. 1,129.

Clinton, Me., p.v. and tp., Kennebec co., on Sebasticook R., 28 m. N.E. Augusta and 46 m. S.W. Bangor by the M.C. R.R. Pop. 575; of tp. 1,665.

Clinton, Md., p.o., Prince George's co.

Clinton, Mass., a manuf. town of Worcester co., on the Nashua R., 45 m. W. by N. of Boston and 17 m. N.E. Worcester by the W. & N. R.R. It has 5 churches, a nat. bank, a wkly paper, and manuf. of ginghams, combs, Brussels and Wilton carpets, wire-cloth, machinery, &c. The Lancaster mills of this place employ abt. 1,200 hands, operating on 950 looms, and producing annually nearly 7,000,000 yds. of ginghams and plaids. Pop. of tp. 8,030.

Clinton, Mich., a central co., drained by Grand, Maple, and Looking-glass Rs.; area, 576 sq. m. The surface is flat, and there are extensive forests. The soil is fertile. It is intersected by several lines of R.Rs. The chief prod. in 1880 were 1,669,723 bush. of wheat, 693,972 of corn, 529,549 of oats, 70,165 of rye, and 20,370 of barley. Butter is also extensively produced. Cap., St. John. Val. of taxable prop. abt. \$9,500,000. P. 27,534 (of whom 3,195 for., and 79 colored).

—p.v. ♦ and tp., Lenawee co., on Raisin R., 29 m. S. E. Jackson by the Jackson branch of the L.S. & M.S. R.R. It has a bank, a wkly paper, and several mills and factories. Pop. 927; of tp. 1,577.

—tp., Macomb co. Pop. 2,000. See MOUNT CLEMENT.

Clinton, Minn., v. in Money Creek tp., Houston co. Pop. 46.

—tp., Rock co. Pop. 237.

Clinton, Miss., p.v. ♦, Hinds co., 9 m. W. of Jackson and 35 m. E. of Vicksburg by the V. & M. R.R. Here is Mississippi College, a Baptist institute, founded in 1851. Pop. 569.

Clinton, Mo., a N. W. co.; area, 460 sq. m. It is drained by several small streams, affluents of Platte R. The surface is nearly level; the soil fertile. The chief prod. in 1880 were 121,598 bush. of wheat, 3,455,610 of corn, 299,186 of oats, 10,859 of rye, and 13,972 lbs. of cotton. Wool, cattle and butter are also staple prod. Limestone is abundant here. It is intersected by the H. & St. J. and several other R.Rs. Cap., Plattsburg. Val. of taxable prop. abt. \$8,500,000. Pop. 16,073 (of whom 698 for., and 975 colored).

—tp., Clinton co. Pop. 784.

—tp., Douglas co. Pop. 975.

—p.v. in Clinton tp., cap. of Henry co., on the M.K. & T. R.R., 40 m. S.W. Sedalia. It has a nat. and another bank, 2 wkly papers, and cigar factories. Pop. 2,868; of tp. 3,849.

—tp., Texas co. Pop. 1,145.

Clinton, N. J., tp., Essex co. Pop. 2,745. See IRVINGTON.

—p. borough, Hunterdon co., on the S. branch of the Raritan R., abt. 10 m. N. of Flemington. It has 4 churches, a nat. bank, a wkly paper, carriage manuf., and a large trade. Iron and manganese mines have been opened in the neighborhood. P. 842; of tp. 2,973.

Clinton, N. Y., a co., which forms the N.E. extremity of the State; area, 1,092 sq. m. It is bounded on the E. by Lake Champlain, and drained by the Au Sable, Chazy and Saranac Rs. The surface is partly mountainous; the soil near the lake is fertile. The chief prod. in 1880 were 232,041 bush. of Ind. corn, 521,130 of oats, 45,907 of wheat, 26,057 of rye, 164,404 of buckwheat, 20,560 of barley, 984,812 of potatoes, 83,334 tons of hay, 1,080,986 lbs. of butter, 193,422 of wool, and 152,809 of maple sugar. Cattle are raised extensively. Iron ore abounds here. Cap., Plattsburg. Val. of taxable prop. \$8,517,316. Pop. 50,901 (of whom 10,604 for., 100 colored, and 16 Indians).

—tp., Clinton co. Pop. 2,004. See CHURBUSCO.

—tp., Dutchess co. Pop. 1,640.

—p.v. ♦ in Kirkland tp., Oneida co., on the Utica div. of the D., L. & W. R.R., at the junction of the Rome branch, 9 m. W. by S. of Utica, and on the Erie Canal. It has 6 churches, a wkly and a monthly paper, a seminary for boys, and 4 for young ladies. It is also the seat of Hamilton College. In the vicinity are large quarries of good building-stone. There are also various manuf. Pop. 1,236.

Clinton, N. C., p.v. ♦ in Clinton tp., cap. of Sampson co., 57 m. S.E. Raleigh. It has a bank. Pop. 620; of tp. 3,441.

Clinton, O., a S.W. co.; area, 467 sq. m. It has an undulating surface and fertile soil. The chief prod. in 1880 were 602,788 bush. of wheat, 2,382,670 of corn, 132,917 of oats, 83,488 of potatoes, 26,500 of flax-seed, 465,800 lbs. of butter, 159,923 of wool, and 58,447 of maple sugar. Cap., Wilmington. Val. of taxable prop. \$13,900,745. Pop. 27,539 (of whom 757 for., and 1,550 colored).

Coarse Gold Gulch, Cal., p.o., Fresno co.
Coast Fork, Oreg., tp., Lane co. Pop. 290.
Coast Range, or COAST MOUNTAINS, Cal., a range of mts. extending nearly parallel with the coast of the Pacific Ocean, from Oregon to the S. boundary of the State. Its width is from 30 to 40 m. and it is divided by the bay of San Francisco. S. of lat. 34° 20' N. a plain from 25 to 40 m. wide lies between the mts. and the sea, the spurs being short and running at right angles with the main ridge; N. of that the spurs form the greater part of the coast line. E. of the bay is the Contra Costa ridge, which is crossed by the Gabilan ridge. N. of the Gabilan are the Sonoma and Carneros ridges, beyond which the spurs are so numerous and closely connected that they are scarcely distinguished by name. These spurs are separated by fertile valleys, some of which are 60 m. long by 10 m. broad, watered by streams, and possessing a genial and agreeable climate. The most noted are the Los Angeles, Salinas, Santa Clara, Sonoma and Napa valleys. The highest peak of the main range is Mt. San Bernardino, 11,600 ft. high, lat. 33° 48'. The principal passes are S. of the outlet of the Sacramento basin. The Northernmost, Livermore's pass, lat. 37° 42', is 686 ft. high; the others are mostly higher, the two Southernmost, San Geronio and Warner's, lat. 33° 10', being respectively 2,800 and 3,780 ft. high. Nearly all the spurs, valleys and streams of the range run to the west. The coast mountains are steep and rocky. N. of lat. 38° they are covered with timber and brush; S. of that the ridges nearest the ocean have some timber, and those further inland are nearly bare.
Coatesville, Ind., thriving p.v. in Clay tp., Hendricks co., 10 m. S.W. Danville, and 28 m.W. of Indianapolis. It has a graded school and several mills and factories. Pop. 499.
Coatesville, Pa., a p. borough ♀, Chester co., on the Brandywine Creek, 39 m. W. of Philadelphia by the P.R.R., which here crosses the W.&R.R.R. It is situated in the rich and beautiful Chester Valley, and has 5 churches, a nat. bank and 2 wkly papers. It is lighted by gas, has good water-works and a well-organized fire department. Manuf., iron foundry, flour, planing and woolen mills, tannery, 2 boiler plate manuf., shawl factory, &c. Pop. 2,766.
Coatopa, Ala., p.v., Sumter co., 67 m. W. of Selma by the Alabama Central div. of the E.T., V.&G.R.R. ♀
Coats Bend, Ala., p.o., Etowah co.
Coatsburg, Ill., p.v. in Honey Creek tp., Adams co., 16 m. E. of Quincy by the C., B.&Q.R.R. Pop. 218.
Coats's Grove, Mich., p.o., Barry co.
Coats'town, Tenn., p.o., Sumner co.
Coatsville, Miss., p.o., Greene co.
Coatsville, Mo., p.v., Schuyler co., 30 m. N. of Kirksville. Pop. 98.
Co'ball, Conn., p.v. in Portland and Chatham tps., Middlesex co., contiguous to Middle Haddam. Here is a mine of cobalt and various important manuf. Pop. 400.

Cobalt, Mo., p.o., Howell co.

Cobb, Ala., p.o., Shelby co.

Cobb, Ga., a N.W. co., bounded S.E. by the Chattahoochee, and drained by several creeks; area, 529 sq. m. The surface is hilly, and in part mountainous. The soil is fertile. The rocks are granitic and metamorphic and produce gold. The chief prod. in 1880 were 80,617 bush. of wheat, 406,730 of corn, 57,621 of oats, and 13,092 bales of cotton. Cap., Marietta. Val. of taxable prop. abt. \$3,500,000. Pop. 20,748 (of whom 63 for., and 6,010 colored).

Cobb, Wis., p.o., Iowa co.

Cobbosseecontee Waters, Me. This pond is a fine sheet of water, lying W. of Hallowell tp. in Kennebec co., and connected with other smaller ponds. Its outlet, a river of the same name, after passing through another beautiful sheet of water, enters the Kennebec R. at Gardiner. These waters afford charming scenery and great water power.

Cobb River, Minn., rises in Freeborn co., flows N.W. through part of Faribault co., and falls into Darby Creek in Blue Earth co.

Cobbs, Ark., p.o., Lonoke co.

Cobbs, N.C., p.o., Cherokee co.

Cobbs Creek, Pa., flows between Delaware and Philadelphia cos., and falls into Darby Creek near Darby.

Cobb's Creek, Va., p.o., Matthews co.

Cobb Switch, Miss., p.o., Lowndes co.

Cobb Valley, Cal., v. in Quartz tp., Plumas co. Pop. 67.

Cobbville, Ark., p.o., Johnson co.

Cobbville, Ga., p.o., Telfair co.

Cobden, Ill., p.v. ♦ and tp., Union co., 42 m. N. of Cairo by the I.C.R.R., in the middle of a rich fruit-growing country. It has a wkly paper and several mills. Pop. 800; of tp. 3,072.

Cobham, Pa., p.v. in Watson tp., Warren co., 16 m. S. of Warren. Pop. 40.

Cobham, Va., p.v., Albemarle co., 15 m. E. of Charlottesville. Pop. 85.

—tp., Surry co. Pop. 2,972.

Coble, N.C., tp., Alamance co. Pop. 1,112.

Cob Hill, Ind. T., p.o., Tahlequah co.

Cobleskill, N.Y., p.v. ♦ and tp., Schoharie co., on a small creek of the same name, 45 m. W. of Albany by the D.&H.C.R.R. It has a nat. bank, a wkly paper, and several factories. P.1,222; of tp. 3,371.

Cob Moo Sa, Mich., p.o., Oceana co.

Cobscok Bay, Me., a large bay, situated W. of Passamaquoddy Bay. See EASTPORT.

Cobton, N.C., p.o., Craven co.

Coburg, Wash., p.o., Mason co.

Coburg, Ind., p.v., Porter co., 8 m. N.E. Val-paraiso. Pop. 50.

Coburg, Iowa, p.v. in Grant tp., Montgomery co., 5 m. S. of Red Oak. Pop. 83.

Coburn, Pa., p.v. in Gregg tp., Centre co., 15 m. S.E. Bellefonte. Pop. 85.

Coburn's Store, N.C., p.o., Union co.

Cocalico, Pa., p.v. in West Cocalico tp., Lancaster co., at base of the South Mts., 21 m. N. of Lancaster. Pop. 60.

Cochecton, N.Y., p.v. and tp., Sullivan co., on the Delaware R., 106 m. S.E. Owego by the N.Y., L.E.&W.R.R. Pop. 188.

Cochecton Centre, N.Y., p.v. in above tp., abt. 100 m. S.E. Owego. ♦

Cochesett, Mass., p.v. in West Bridgewater tp., Plymouth co., 24 m. S. of Boston. Manuf. boots and shoes. ♦

Cochetopa, Col., p.o., Saguache co.

Cochituate, Mass., p.v. in Wayland tp., Middlesex co., 4 m. N.E. South Framingham Station, 19 m. W. of Boston, on a lake of the same name, which is abt. 3½ m. long, and from which Boston is chiefly supplied with water. Pop. 400.

Cochran, Ga., p.v., Pulaski co., 39 m. S.E. Macon by the E.T., V.&G.R.R. Much cotton is shipped here. Pop. 330.

Cochran, Ind., p.v. in Centre tp., Dearborn co., 2 m. S.W. Aurora on the Ohio R. and 27 m. W. of Cincinnati, O. It has a large chair factory, railroad shops, &c. Pop. 1,024.

Cochran's Mills, Minn., p.v. in Cokato tp., Wright co., 60 m. W. of St. Paul. (Pop. included in Cokato.)

Cochran's Mills, Pa., p.v. in Burrell tp., Armstrong co., 13 m. S. of Kittanning. Pop. 70.

Cochransville, Pa., p.v. in West Fallowfield tp., Chester co. Pop. 122.

Cochranston, O., p.v. in Montgomery tp., Marion co. 11 m. N.W. Marion Junction. Pop. 150.

Cochranston, Pa., p. borough ♦, Crawford co., 11 m. S.E. Meadville by the Franklin branch of the N. Y., P.&O.R.R. Pop. 654.

Cocke, Tenn., an E. co., bounded N.W. by the Nolichucky R.; area, abt. 270 sq. m. It borders on N.C., and is traversed by French Broad and Big Pigeon Rs. The surface is mountainous and well wooded. Iron or Smoky Mt., on the S.E. border, is the principal range. The chief prod. in 1880 were 94,763 bush. of wheat, 553,567 of corn, 50,165 of oats, and 107,843 lbs. of butter. Cap., Newport. Val. of taxable prop. abt. \$2,500,000. Pop. 14,808 (of whom 17 for., and 1,420 colored).

Cockeysville, Md., p.v. ♦, Baltimore co., 7 m. N.E. Towson town, and 15 m. N. of Baltimore by the N.C.R.R.

Cockran, Tex., a W. co., bordering on New Mexico. It is a part of the Staked Plain, and has no population.

Cockrell, Cal., p.o., Conejos co.

Cockrum, Miss., p.o., De Soto co.

Coccolamus, Pa., p.h. on a creek of the same name in Fayette tp., Juniata co., 7 m. S. of Thompson town. Pop. 47.

Coddingville, O., v. in Granger and Sharon tps., Medina co., 9 m. E. of Medina. ♦

Codde Creek, N.C., p.o., Cabarrus co.

—tp., Iredell co. Pop. 2,350. See MOORESVILLE.

Coden, Ala., p.o. Mobile co.

Coderus, or JEFFERSON, Pa., p.v. and tp., York co., 16 m. S.E. York. Pop. 320; of tp. 2,261.

Codorus Creek, Pa., a stream in York co. After a course of 30 m. it falls into the Susquehanna near New Holland.

Cody, Va., p.o., Halifax co.

Coe (kō), Ill., tp., Rock Island co. Pop. 1,048.

Coe, Mich., p.o., Mecosta co.

Coe Ridge, O., p.h., Cuyahoga co., 13 m. W. of Cleveland. ♦

Coe's Mills, Fla., p.o., Liberty co.

Coesse, Ind., p.v. in Union tp., Whitley co., 15 m. W. of Fort Wayne. Pop. 207.

Cœur d'Alene, Idaho, a lake, abt. 18 m. long, in the N. part of the territory. It receives the waters of a small river of the same name. Its outlet is the Spokane R.

—p.v. ♦, cap. of Kootenai co., at the S. end of the above lake, N. of which is Fort Cœur d'Alene. ♦

Cœurs d'Alene (Fr., and hearts), Idaho and Wash., an Indian tribe of the Selish fan ily. They call themselves Skizoomish, but are more generally known by the above name, given them by the French voyagers. They were poor, distrustful, and cruel, and lived on fish, roots, and small game, not visiting the bison ground. In 1822 they were estimated at 2,000, but now scarcely number 300. A part of the tribe in Idaho had a reservation set apart for them by an executive order of June 14, 1867, and by order of July 2, 1872, those in Paradise Valley were removed against their protest to a reservation between Okinakane and Columbia Rs. and British America.

Coeymans, N. Y., p.v. and tp., Albany co., on the Hudson R., 12 m. S. of Albany by the Athens branch of the N.Y.C. RR. It has a mineral spring, flagstone quarries, and manuf. of brooms, straw-paper, soap, &c. Pop. 654; of tp. 2,912.

Coeymans Creek, N. Y., rises in New Scotland tp., Albany co., and flows into the Hudson R. in Coeymans tp.

Coeymans Hollow, N. Y., p.v. in Coeymans tp., Albany co., 15 m. S.W. Albany. Pop. 325.

Coffade Hah, Miss., p.o., Neshoba co.

Coffee, Ala., a S. E. co., watered by Pea R.; area, abt. 650 sq. m. The surface is somewhat hilly, and the soil generally poor. Pine timber grows in great abundance. The chief prod. in 1880 were 155,014 bush. of corn, 15,025 of oats, and 4,788 bales of cotton. Cap., Elba. Val. of taxable prop. abt. \$400,000. Pop. 8,061 (of whom 2 for., and 1,284 colored).

Coffee, Ga., a S. E. co., bounded N. by the Ocmulgee R., S.W. by the Allapaha, and intersected by the Satilla and its branches; area, 1,000 sq. m. The surface is level and sandy. The chief prod. in 1880 were 58,408 bush. of corn, 44,760 of oats, 52,612 of sweet potatoes, 18,720 lbs. of rice, 57,006 of wool, 14,133 galls. of molasses, and 591 bales of cotton. Cap., Douglas. Val. of taxable prop. abt. \$500,000. Pop. 5,070 (of whom 11 for., and 1,042 colored).

Coffee, Ill., tp., Wabash co. Pop. 1,342.

Coffee, Ind., p.h. in Lewis tp., Clay co., on Elk R., 10 m. S. of Clay City. Pop. 50.

Coffee, Tenn., a central co.; area, 320 sq. m. It has an elevated and hilly surface and a fertile soil. The chief prod. in 1880 were 58,155 bush. of wheat, 658,293 of corn, 34,160 of oats, pork, and butter. Cap., Manchester. Val. of taxable prop. abt. \$2,000,000. Pop. 12,393 (of whom 62 for., and 1,727 colored).

Coffee Creek, Ark., p.o., Phillips co.

Coffee Creek, Col., a stream which rises in El Paso co., flows S.E., then S., and falls into Arkansas R., in Bent co.

Coffee Landing, Tenn., p.o., Hardin co.

Coffee Run, Pa., p.v. in Lincoln tp., Huntingdon co., 15 m. S.W. Huntingdon by the H.&B.T.Mt. RR. Pop. 60.

Coffee Springs, Ala., p.o., Geneva co.

Coffetown, Pa., v. in Maxatawney tp., Berks co. Pop. 155.

Coffeysville, Ala., p.v., Clarke co., 1 m. E. of the Tombigbee R., and abt. 120 m. S.W. Montgomery. P. 104

Coffeysville, Miss., p.v. in cap. of Yalobusha co., 16 m. N.E. Grenada by the C., St.L.&N.O.R.R. Pop. 749.

Coffeysville, Tex., p.v., Upshur co., 30 m. W. of Jefferson. Pop. 67.

Coffey, Ark., tp., White co. Pop. 542.

Coffey, Kan., a S.E. co., intersected by the Neosho R.; area, 576 sq. m. The surface consists mostly of undulating prairies; the soil is remarkably fertile. The chief prod. in 1880 were 82,823 bush. of wheat, 1,513,209 of corn, 85,928 of oats, 227,821 lbs. of butter, and 49,302 of wool. Cap., Burlington. Val. of taxable prop. abt. \$4,000,000. Pop. 11,438 (of whom 712 for., and 429 colored).

Coffeyburg, Mo., p.v. in Salem tp., Daviess co., 7 m. N. of Jamison Station. Pop. 325.

Coffey's Spring, Ky., p.o., Wayne co.

Coffey's Store, Ala., p.o., Jackson co.

Coffeyville, Ark., p.v., Jackson co., 3 m. S.W. Olyphant. Pop. 80.

Coffeyville, Kan., p.v. in Parker tp., Montgomery co., on Verdigris R., 140 m. S.W. Lawrence by the K.C., L.& S.K.R.R. It has a bank and several flour mills. Pop. 753.

Coffin's Grove, Iowa, tp., Delaware co. Pop. 1,017. SEE MASONVILLE.

Coffin's Summit, N. Y., p.o., Dutchess co.

Coffman, Mo., p.o., St. Genevieve co.

Co'gan House, Pa., p.h. and tp., Lycoming co., 18 m. N.W. Williamsport. Pop. 50; of tp. 1,002.

Co'gan Station, Pa., p.v. in Lewis tp., Lycoming co., 9 m. N. of Williamsport by the N.C. RR. P. 225.

Coggin's Rock, W. Va., p.v., Greenbrier co. **Cog Hill, Tenn.**, p.v., McMinn co., on Conasauga Creek, 13 m. S. of Athens. It has a flouring and saw mill. Pop. 95.

Cogs'well, Ky., p.o., Rowan co.

Cohansey, N. J., a creek which rises in Salem co., flows S., then W., and empties into Delaware Bay in Cumberland co. Large vessels can ascend it up to Greenwich.

—p.v., Cumberland co., on the above creek, 8 m. N. of Bridgeton. **+**

Cohasset, Mass., p.v. and tp., Norfolk co., on the Atlantic Ocean, 21 m. E. of Boston by the O.C. RR. Mackerel-fishing is the chief industry of this place. The small Cohasset R. flows through a part of the town into the harbor. The Cohasset Rocks, so disastrous to mariners, lie off the town, and Minot's Ledge light-house on its coast, in lat. 42° 16' 9" N., lon. 70° 45' 14" W. The situation of this town is delightful and romantic, and attracts many visitors in the summer season. Pop. of tp. 2,182.

Cohn, Ill., p.v., Clark co.

Cohoc'tah, Mich., p.v. and tp., Livingston co., 32 m. E. of Lansing. Pop. 43; of tp. 1,276.

Cohoc'ton, or CONIOCTON, N. Y., a mill river, rises in Steuben co., and unites with the Tioga to form Chemung R., near the Valley of Painted Post. Length, 55 m.

—p.v. and tp., Steuben co., on the above river, 36 m. N.W. Corning by the N.Y., L.E.&W. RR. (Liberty Station). It has a graded school, a wkly paper and various factories. Pop. 698; of tp. 3,346.

Cohoes (koh-hōz), N. Y., a city, Albany co., on the right bank of the Mohawk R., at its junction with the Hudson R., on the Erie and Chauplain Canals, and on the R.&S. and Troy & Schenectady branch of the N.Y.C.&H.R.R.R.s, 9 m. N. of Albany. It has 1 daily and 5 weekly papers, 1 nat. and 1 State bank, 2 axe factories, the Harmony Manuf. Company's cotton mills (five in number, one of which is one of the largest, if not the largest and most complete cotton mill in the world), 20 knitting mills, 1 pin factory, 1 rolling mill, and one horse railroad, connecting with the city of Troy, 3 m. S. The city receives its supply of water for all purposes from the Mohawk R. The Cohoes Falls, 70 ft. in perpendicular height, and remarkable for their particular beauty, are just above the city. Pop. in 1870, 15,357; in 1880, 19,417.

Cohoke, Va., p.o., King William co.

Cohutta Springs, Ga., p.o., Murray co.

Coila, N. Y., p.v., Washington co., 30 m. N. E. Albany. **+**

Coin, Iowa, p.v. in Lincoln tp., Page co., 7 m. S. of Tarkio. Pop. 772.

Coin, Wash., p.o., Whitman co.

Coinjock, N. C., p.o., Currituck co.

Cointsville, O., p.v. and tp. in Mahoning co., 7 m. S.E. Youngstown. Pop. of tp. 1,232.

Cokato, Minn., p.v. and tp., Wright co., 60 m. W. of St. Paul. It has several steam flour and saw mills. Pop. 274; of tp. 1,616.

Coke, Tex., p.v., McLennan co., abt. 20 m. W. of Waco. Pop. 66.

Cokelan, Tex., p.o., Palo Pinto co.

Coker Creek, Tenn., p.o., Monroe co.

Cokerville, Ala., p.o., Monroe co.

Cokesburg, N. J., v. in High Bridge and Tewksbury tps., Hunterdon co., abt. 3 m. from Lebanon, which is 49 m. W. by S. of Jersey City by the Central RR. **+**

Cokesbury, S. C., p.v. and tp., Abbeville co., 12 m. N. E. Abbeville. Pop. 2,945.

Cokeville, Pa., p.v. in Derry tp., Westmoreland co., 35 m. E. of Pittsburgh. Coke is largely manufactured here. Pop. 450 (consisting principally of coal miners).

Cokeville, Wyo., p.o., Uintah co.

Colbergen, Neb., p.o., Pierce co.

Colbert, Ala., a N. W. co., bounded N. by the Tennessee R. and W. by Mississippi; area, abt. 650 sq. m. It is intersected by Big Bear Creek and other affluents of the Tennessee. The surface is hilly or undulating. The soil is fertile. The chief prod. in 1880 were 10,923 bush. of wheat, 500,701 of corn, 43,914 of oats, and 9,012 bales of cotton. Cap., Tusculumbia. Val. of taxable prop. abt. \$2,000,000. Pop. 16,154 (of whom 158 for., and 6,949 colored).

Colbert, Ind. T., p.v. in Chickasaw Nation, 8 m. N. E. Denison, Tex., by the Kansas div. of the Missouri Pacific RR. It has a flour and saw mills. Pop. 75.

Colbert, Miss., p.o., Marshall co.

Colburn, Ind., p.v. in Washington tp., Tippecanoe co., 12 m. N.E. Lafayette. Pop. 246.

Colburn, Wis., p.v. in Lewiston tp., Columbia co., abt. 7 m. N.W. Portage City. ✚

Colby, Kan., p.o., Thomas co.

Colby, Mich., v. in Sidney tp., Montcalm co., 3 m. S. of Stanton by the Stanton branch of the D.L. & N.R.R. Here is one of the largest saw mills in the State. Pop. 125.

Colby, Wis., p.tp., Clark co. Pop. 813.

—p.v. ✚ in Illul tp., Marathon co., 216 m. N.W. Milwaukee and 157 m. E. of St. Paul by the W.C.R.R. It has several mills. ✚

Colchester, Conn., p.v. ✚ and tp., New London co., 48 m. N.E. New Haven by the B.&N.Y.A. L.R.R. It has manuf. of India-rubber, paper, &c., and is the seat of Bacon Academy. Pop. 1,400; of tp. 3,500.

Colchester, Ill., a coal-mining p.v. ✚ and tp., McDonough co., 53 m. N.E. Quincy by the C., B. & Q. RR. Pop. 1,067; of tp. 1,920.

Colorado, RIO COLORADO, or COLORADO RIVER OF THE NORTH, a large river which rises in the Rocky Mts. and falls into the Gulf of California. The main stream, known as the Green R., has its source in Fremont's Peak on the W. borders of Wyoming, so that the whole extent of its course must be upward of 2,000 m. After receiving the waters of the Yampuh

and the White Rs. it flows S. for abt. 150 m. without any important augmentation till it meets with the great rival stream of the Grand R. The united stream continues to force its way S., till at its junction with the Colorado Chiquito, or Little Colorado, which takes its rise in the Sierra Madre of New Mexico, it turns almost due W., and cuts right athwart the line of the mountain ranges. Its S. direction is resumed after the confluence of the Virgen from the Wahsatch Mts., and it only receives one other tributary of real magnitude, the River Gila, before it reaches the sea. The enormous cañons or ravines through which the Colorado and several of its confluence force their way, ender this one of the most remarkable river systems of the world. The Grand Canon alone extends for a distance of abt. 200 m. W. from the junction of the Colorado Chiquito, and its walls rise almost sheer from the water's edge to a height of from 4,000 to as much as 7,000 ft. Further down is Black Cañon which, with a length of 25 m. and a height of 1,000 or 1,500 ft., would be considered a magnificent phenomenon, were it not so completely thrown into insignificance by its more-stupendous neighbor. These very features which give the river its uniqueness prevent it from being of much use as a means of navigation; but steamers can proceed upward as far as Callville, abt. 612 m. from the mouth. The discovery of the Colorado is due to Fernando Alaseon in 1540; but it was not till Lieutenant Ives's expedition in 1857 that even the lower part of its course was properly explored. In 1869 the whole course from the head-waters in Wyoming to the town of Callville was traversed by a party of explorers, commissioned by the U. States Government and commanded by Professor J. W. Powell. Since that date the river and its basin have been the object of systematic survey under the same auspices, and the results of the gigantic undertaking have been published by Pr. Powell in his *Exploration of the Colorado R. of the W. and its Tributaries*, explored in 1869, 1870, 1871, and 1872 (Washington, 1875).

—a W. State, bounded N. by Wyoming and Nebraska, E. by Nebraska and Kansas, E. by the Indian T. and New Mexico, and W. by Utah. It lies between lat. 37° and 41° N., lon. 102° and 109° W. It is 375 m. long from E. to W. and 275 m. wide from N. to S.; area, 103,645 sq. m. The W. portion, embracing abt. 4-7 of the area, is occupied by the principal chains of the Rocky Mts. and numerous subordinate ranges; the eastern consists of rolling plains, gradually rising toward the W., where they are bounded by the foot hills of the Rocky Mts. in abt. 105° W. lon. The Rocky Mts. inclose elevated plains or valleys of different areas, which are known as the NORTH PARK, MIDDLE PARK, SOUTH PARK and SAN LUIS PARK, (which see). The North Park lies between the main range of the Rocky Mts. and the S. part of the Medicine Bow Mts., and owing to its northern situation and cold climate has thus far been less explored and settled than the others. The Middle Park is S. of the North Park, from which it is separated by a transverse chain. Some of the loftiest peaks of the Rocky Mts. rise upon its rim. The Middle Park is drained by the sources of the Blue R., one of the confluent of the Grand R., and its surface is covered by magnificent forests and broad, open meadows. Directly S. of it lies South Park, the most picturesque of the series. The continental divide bounds it on the W. and separates it from the deep valley of the upper course of the Arkansas R. The San Luis Park, in the S. part of the State, and separated from the South Park by the valley of the Arkansas, is by far the largest. It is surrounded by the San Juan Mts. and the Sierra Mimbres, which form a magnificent panorama of snowy peaks and ranges. Thirty-five streams, descending from the encircling snowy crests, water the park. Nineteen of these streams empty into the

beautiful San Luis Lake, while the others join the Rio Grande, which traverses the park from N. to S. There are other parks of smaller area and lying E. or W. of those above named.—No other State has at any time advanced so rapidly as Colorado did during the past thirteen years. In 1870 the total pop. of the then territory was 39,864; in 1880 it was 194,327, and was not less than 230,000 in 1883. Mining was the foundation of Colorado's prosperity, and continues to be its leading industry and greatest source of wealth. For the production of silver alone it ranks first. For gold it holds the 4th rank—after California, Nevada and Dakota. For the year 1880, the gold yield was \$2,750,000. The production of silver increased slowly from \$650,000 in 1870 to \$3,726,000 in 1877. Then came the discovery of the Leadville carbonates, and the "silver era" of Colorado began. The silver product in 1878 was \$6,000,000; in 1879, \$12,000,000, and in 1880, \$16,500,000. Coal mining is second in importance only to the mining of the metals, and the development of the coal deposits has been in keeping with Colorado development generally, as the following table, presenting the condition of affairs in 1870 and 1880, sufficiently shows:

	1870.	1880.
Establishments.....	3	25
Hands employed.....	16	1,434
Capital.....	\$36,000	\$5,939,250
Wages.....	9,000	714,714
Materials.....	2,410	114,576
Products, tons.....	4,500	462,747
Products.....	\$16,500	\$1,041,350

Throughout Colorado vast deposits of iron ore are found, but until 1881 these remained unproductive. There being no works available for the reduction of the ore, it rested in the earth, valueless. In 1877 a rolling mill was set up at Pueblo, to be removed the following year to its present position in Denver. In the census of 1880 this little mill—now owned by the Colorado Coal and Iron Company—with its two trains of rolls and its daily capacity of 40 tons, is the sole representative of Colorado's iron industry. Between the taking of the census and the publication of the returns the great iron works at Pueblo began operations. The furnace, with a daily capacity of 100 tons, went into blast Sept. 17, 1881, and from that time onward has been producing an exceptionally fine quality of iron.—After mining, stock-raising was the next industry to attract a large amount of capital. This business has increased constantly since its foundation, and still relatively holds its own, as the following comparative table shows

	1870.	1880.
Horses.....	6,446	45,257
Mules and asses.....	1,173	2,581
Working oxen.....	5,566	8,179
Milch cows.....	25,017	28,770
Other cattle.....	40,153	315,989
Sheep.....	120,928	994,844
Swine.....	5,509	7,656
Total.....	204,792	1,400,276

Colorado is a natural grazing region. In many respects it possesses advantages for cattle and sheep-raising superior to those of any other grazing region in the world. It affords a great abundance of rich grass, and the dryness of the climate is such that the grass cures standing, and throughout the winter is an excellent hay; while the configuration of the country—broken by many deep ravines—together with the plentiful timber, affords a shelter against storms sufficient to permit the stock to winter in safety unharmed.—Agriculture, the third great industry of the State, has scarcely kept pace with mining and stock-raising; yet a marked advance was made in the ten years between 1870 and 1880. Since irrigation has

come to be a well understood science, a vast amount of land that a few years ago was regarded as waste and valueless has been brought into productiveness and value. Wheat is the leading crop, and its excellence—hardness and size of grain and fineness of quality—has made Colorado flour famous not only in the W. but in the E. The following table presents concisely the product of the State in 1870 and 1880:

	1870.	1880.
Wheat.....bushels..	258,474	1,475,559
Indian corn.....“ ..	231,903	453,980
Oats.....“ ..	332,940	640,100
Barley.....“ ..	35,141	107,241
Rye.....“ ..	5,235	20,937

At the foundation of all of Colorado's prosperity, at once the cause and the effect of its rapid development, have been its railways. When the Kansas Pacific reached Denver, in 1870, nearly the whole of the present inhabited portion of the State was a wilderness. There were a few mining camps and a few trading posts; but the greater portion of the territory was deserted of inhabitants, save hostile Indians. The annual increase in mileage, on all the Colorado roads collectively, shows how rapidly the advance was made:

1870miles..	157	1876miles..	957
1871“ ..	328	1877“ ..	1,045
1872“ ..	483	1878“ ..	1,165
1873“ ..	603	1879“ ..	1,208
1874“ ..	682	1880“ ..	1,531
1875“ ..	807	1881“ ..	2,275

As the general result of the industrial development above noted, together with the growth of various minor industries, the total assessed value of property in Colorado has increased from \$17,388,101 in 1870, to \$73,698,746 in 1880, and \$91,630,885 in Nov., 1881—a net gain in 17 months of nearly \$18,000,000.—Colorado is divided into 33 counties, viz.: Arapahoe, Bent, Boulder, Chaffee, Clear Creek, Conejos, Costillo, Cutter, Dolores, Douglas, Elbert, El Paso, Fremont, Gilpin, Grand, Gunnison, Hinsdale, Huerfano, Jefferson, Lake, La Plata, Larimer, Las Animas, Ouray, Park, Pitkin, Pueblo, Rio Grande, Routt, Saguache, San Juan, Summit, and Weld. The principal cities and towns are Black Hawk, Boulder, Canon City, Central City, Colorado Springs, Denver (the cap. and chief city), Georgetown, Golden, Greeley, Leadville, Silver Cliff, and Trinidad.—Colorado was organized as a territory March 2, 1851, and admitted to the Union as a State, Aug., 1876. Gold was found in 1858. Pop. in 1880, 194,327 (of whom 129,131 males, and 65,196 females, 154,537 natives, and 39,790 foreigners, 191,126 whites, 2,435 colored, 612 Chinese, and 154 taxed Indians).

Colorado, Ill., p.o., Pope co.

Colorado, Kan., p.t.p., Lincoln co. Pop. 504.

Colorado, N.Mex., p.v., Doña Ana co.

Colorado, Tex., a river which rises in Benar district, between the 32d and 33d parallels, abt. lon. 102 W. It flows successively S.E., E. by S., and again S.E., and empties into Matagorda Bay. Its length is above 900 m.; average width 250 ft. The only important tributaries are in the upper part of its course, where it receives from the S.W. the Rio Concho, San Sabo, and Llano, and from the N.W. Pecan bayou. In winter it is navigable for steamboats to Austin, nearly 300 m. It flows for more than two-thirds of its length through a highly fertile region, and is a beautiful clear stream.

—a S.E. co., intersected by the Colorado R.; area, 905 sq. m. It comprises one of the best cotton growing portions of the State, and has abundant supply of timber. The chief prod. in 1880 were 153,467 bush. of corn, 22,077 of oats, and 32,552 bales of cotton. Cap., Columbus. Val. of taxable prop. abt. \$2,500,000. Pop. 16,673 (of whom 1,964 for., and 7,692 colored).

—p.o., Mitchell co.

Colorado Black, Mo., v. in Longwood tp., Pettis co., near Longwood. Pop. 80.

Colorado City, Col., p.v., El Paso co., 2 m. N.W. Colorado Springs by D.&R.G.R.R. Pop. 347.

Colorado Springs, Col., p.v., cap. of El Paso co., 75 m. S. of Denver by the D.&R.G.R.R., on a large table land, at an altitude of abt. 6,000 ft. It has a delightful climate and mineral springs, and is a place of summer resort. It has 1 nat. bank and 2 other banks, a number of saw mills, a State school for deaf-mutes, 1 daily, 4 wkly and 1 monthly papers, 20 churches, &c. It contains several hotels, and is surrounded by fine scenery. Pop. 4,226.

Colosse', N.Y., p.v. in Mexico tp., Oswego co., 25 m. N. of Syracuse. Pop. 145.

Colquitt, Ga., a S.W. co., bounded E. by the Withlacoochee R., area, 600 sq. m. The surface is level. The chief prod. in 1880 were 24,110 bush. of corn, 18,080 of oats, 36,811 lbs. of wool, and 736 bales of cotton. Cap., Moultrie. Val. of taxable prop. abt. \$250,000. Pop. 2,527 (of whom 3 for., and 105 colored).

—p.v., cap. of Miller co., in the middle of forests of pine, 46 m. S.W. Albany. It has a high school and a wkly paper. Pop. 175.

Coltharp's, Tex., p.o., Houston co.

Colton, Cal., p.v., San Bernardino co., 55 m. E. of Los Angeles. Pop. 878.

Colton, N.Y., p.v. and tp., St. Lawrence co., on Racket R., which here gives power to several saw mills, 8 m. S.E. Potsdam. Pop. 606; of tp. 1,974.

Colton, O., p.v. in Washington tp., Henry co., 25 m. S.W. Toledo. Pop. 113.

Colt's Neck, N.J., p.v. in Atlantic tp., Monmouth co., 5 m. N.E. Freehold. Pop. 123.

Coltsville, Mass., v. in Pittsfield tp., Berkshire co., 3 m. N.E. Pittsfield, where is the p.o. Pop. 50.

Columbia, or OREGON, a great river, which rises in Otter Lake on the W. slope of the Rocky Mts., in British Columbia, in lat. 50° 30' N., lon. 116° W. It flows N.W. to lat. 52° 10', where it receives the Canoe, which rises in abt. lat. 52° 45', then turns W. and S., and flows in a general S. direction to the boundary of the U. States, whence, entering Wash. Territory, its course lies through the great plain between the Cascade and Rocky Mts. to the 46th parallel. Here, turning somewhat abruptly, it flows in a general W. direction, forming the boundary between Wash. Territory and Oreg., and falls into the Pacific in abt. lat. 46° 15' N., lon. 124° W. There is a remarkable bend in lat. 47° 55' N., lon. 118° 10' W., where the river turns nearly due W., and continues in that direction abt. 120 m. to the mouth of the Okinakane. It then flows S.W. abt. 50 m., when it turns S.E., and flows in that direction abt. 165 m. to the 46th parallel. Throughout its entire length the Columbia is very rapid, often passing through mountain gorges and broken by many cataracts. The tide sets up 165 m. to the Cascades, which are a series of rapids caused by the passage of the stream through the Cascade range. At a distance of abt. 30 m. from the ocean the river expands into a kind of bay from 3 to 7 m. wide, which forms its mouth. At low tide there is abt. 20 ft. of water over the flats at the entrance to this bay, while the depth of the channel is 24 ft. Ocean steamers can ascend to Vancouver, 115 m. above the mouth, and steamers of 200 or 300 tons to the Cascades, around which there is a railroad 6 m. long. The Dalles, 40 m. further, again obstruct navigation. Here the river bends like a horseshoe to the S. and flows with a rapid current through a basaltic trough with walls 20 ft. high and 200 yards apart. Other falls, with stretches of navigable water between, are Priest rapids, 179 m. above the Dalles; Buckland rapids, 66 m. further; and Kettle falls, 274 m. above. The last is a perpendicular fall of 15 ft. At high water (from

the middle of May to the middle of July) steamers could probably ascend from the Dalles to Kettle falls. Above Kettle falls the river is again navigable abt. 50 m. to falls just N. of the 49th parallel. Above the head of Upper Arrow Lake, lat. 50° 30' N., there is no navigable water. At Vancouver the Columbia is a mile wide. Its total length is over 1,200 m. The rise at Vancouver during high water is 19 or 20 ft., and so great is the force of the current as to overcome the effect of the tide, and render the water drinkable even on the bar. The principal E. branches are the Kootenay (also called McGillivray or Flat Bow), which joins the Columbia in British Territory abt. 20 m. N. of the boundary; Clarke's, or Flathead R.; the Spokane, and Lewis fork (also called the Sappin or Snake R.), which is the great southern tributary, and rises in the Rocky Mts. in W. Wyoming, abt. lat. 44° N., lon. 110° 30' W. The tributaries from the west are smaller; the chief are the Nchoialpitkwu, Okinakane, and Yakama. Below the great bend several streams empty into the Columbia from the north, the largest of which is the Cowlitz; from the south it receives the Umatilla, John Day's R., the Des Clutes, and the Willamette. On the 7th of May, 1792, Capt. R. Gray, in the ship Columbia, of Boston, discovered and entered the mouth of this majestic stream, and giving it the name of the vessel in which he sailed, called it the Columbia R. In 1804-5, Lewis and Clarke made the first exploration of the river ever made by civilized men, and passed the winter of 1805-6 at its mouth. The Missouri Fur Company, in 1808, established a trading-house on Lewis R., the first ever formed on the waters of the Columbia; and, in 1811, Astoria was founded, at the mouth of the river, by the Pacific Fur Company, under J. J. Astor, of New York.

Columbia, Ala., p.v., Henry co., 116 m. S.E. Montgomery. Pop. 290.

Columbia, Ark., a S.W. co., bordering on Louisiana, watered by Bayou Dorcheat: area, abt. 700 sq. m. The surface is level, and the soil fertile. The chief prod. in 1880 were 3,548 bush. of wheat, 235,376 of corn, 51,627 of sweet potatoes, and 13,039 bales of cotton. Cap., Magnolia. Val. of taxable prop. abt. \$2,000,000. Pop. 14,087 (of whom 14 for., and 5,499 colored).

—tp., Randolph co. Pop. 1,312.

Columbia, Cal., a pretty mountain p.v.♠, Tuolumne co., 2,200 ft. above sea level, 142 m.N. of San Francisco. Fruit growing and mining are extensively engaged in. Pop. 650.

Columbia, Conn., p. tp., Tolland co. Pop. 757.

Columbia, Dak., p.v., cap. of Brown co., near Tchanchicaha Lake. Pop. 133.

Columbia, Fla., a N.E. co. bordering on Georgia, bounded S. by the Santa Fé, and N.W. by the Suwannee R.; area, 864 sq. m. The surface is level, and the soil light and sandy. Pine forests cover a considerable part of the co. The J.,P.&M.R.R. passes through it. The chief prod. in 1880 were 173,795 bush. of corn, 38,389 of oats, 34,505 of sweet potatoes, 18,941 galls. of molasses, and 1,992 bales of cotton. Cap., Lake City. Val. of taxable prop. abt. \$1,500,000. Pop. 9,589 (of whom 32 for., and 4,769 colored).

Columbia, Ga., an E. co., separated from South Carolina by the Savannah R., and bounded N.W. by Little R.; area, 500 sq. m. It has an uneven surface, and a soil once fertile but impaired by improper tillage. A gold mine near Little R. has been worked. The chief prod. in 1880 were 7,151 bush. of wheat, 93,191 of corn, 50,105 of oats, 18,821 of sweet potatoes, 63,524 lbs. of butter, and 8,313 bales of cotton. Cap., Appling. Val. of taxable prop. abt. 1,200,000. Pop. 10,465 (of whom 11 for., and 7,440 colored).

Columbia, Ill., p.v.♠ and tp., Monroe co., 14 m. S. of East St. Louis by the C.&St.L.R.R. Pop. 1,308; of tp. 2,242.

Columbia, Ind., Dubois co. Pop. 855.

—v. and tp., Van Buren co. It has a station on the South Haven div. of the M.C.R.R., 27 m. W. of Kalamazoo. Pop. 1,510. Pop. 37.

Columbia, Miss., p.v., cap. of Marion co., 75 m. S.E. Jackson. Pop. 83.

Columbia, Mo., p.v.♠ in Columbia tp., cap. of Boone co., 10 m. N. of the Missouri and 24 m. E. of Booneville. A branch road connects it with the St. L., K.C. & N.R.R. It is the seat of the State university and the Christian and Baptist female colleges. It has 2 nat. banks, a library, 2 wkly papers, and various factories. Pop. 3,326; of tp. 6,917.

Columbia, Nev., p.o., Elko co.

Columbia, N.H., p.tp., Coos co., lies on the E. bank of Connecticut R. It contains several starch factories. Pop. 500.

Columbia, N. J. (p. o. name ALTON), v. in Chatham tp., Morris co., abt. 2 m. from Madison. Pop. 279.

—p.v., Warren co., on the Delaware R., opposite Portland, Pa., and connected with it by a bridge.♠

Columbia, N. Y., an E.S.E. co., bounded E. by Massachusetts, and W. by the Hudson R. Area, 620 sq. m. In the E. part the surface is hilly, but in the W. and central portions it is generally level. The soil is fertile and highly cultivated. Iron, lead, limestone, slate, and marble are obtained in various places, and at New Lebanon are warm springs which are much resorted to. It is traversed by several lines of RR. The chief prod. in 1880 were 13,141 bush. of wheat, 468,584 of rye, 537,196 of corn, 724,719 of oats, 128,878 of buckwheat, 703,811 of potatoes, 122,935 tons of hay, 1,434,836 lbs. of butter, 254,895 of wool, and 67,821 of hops. There are in this co. many and extensive manuf. of various articles. Cap., Hudson. Val. of taxable prop. \$28,025,105. Pop. 47,925 (of whom 4,961 for., and 1,214 colored).

—p.v. and tp., Herkimer co., 8 m. S.W. Herkimer. Pop. 99; of tp. 1,616. See MILLER'S MILLS.

Columbia, N. C., v. and tp., Randolph co., 10 m. N.E. Ashborough. Pop. 167; of tp. 1,495.

—p.v. in Columbia tp., cap. of Tyrrel co., near an inlet of Albemarle Sound, 25 m. E. of Plymouth, and abt. 182 m. E. of Raleigh. Pop. 166; of tp. 1,302.

Columbia, O., suburb of Cincinnati, Hamilton co., on the Ohio R., 5 m. above the City Hall. It has a branch of the Cincinnati p.o., and a station on the C.G.&P.R.R.

—tp., Hamilton co. It contains several villages. Pop. 5,306. SEE MADISONVILLE.

—tp., Lorain co. Pop. 906.

—tp., Meigs co. Pop. 1,116.

—v., Williams co., 15 m. N.W. Bryan Station. P. 102.

Columbia, Ore., a N.W. co., bounded N. and

E. by the Columbia R., separating it from Washington Territory, and watered by the Klaskanine; area, 470 sq. m. The W. border is mountainous. Coal and iron are found; the soil is good. The chief prod. in 1880 were 3,041 bush. of wheat, 5,322 of oats, and 21,916 of potatoes. Lumber and salmon are largely exported. Cap., St. Helen. Val. of taxable prop. abt. \$500,000. Pop., 2,042 (of whom 365 for., 64 Chinese, and 14 Indians).

—tp., Multnomah co. Pop. 84.

—tp., Washington co. Pop. 354.

Columbia, Pa., an E. co., intersected by the N. branch of the Susquehanna, and drained by Catawissa and Flushing creeks; area, 375 sq. m. Knob Mt., Catawissa Mt., and the Muncy hills, which traverse the co., are branches of the Allegheny range, and are wholly unproductive. The valleys lying between them are very fertile, and some of the uplands are also fit for cultivation. Limestone and iron ore are found in great abundance. The North Branch Canal, and the Lackawanna & Bloomsburg RR. traverse the co. The chief prod. in 1880 were 193,865 bush. of wheat, 78,349 of rye, 595,540 of corn, 337,028 of oats, 118,516 of buckwheat, 236,328 of potatoes, 561,004 lbs. of butter, and 31,046 of wool. Cap., Bloomsburg. Val. of taxable prop. abt. \$20,000,000. Pop. 32,408 (of whom 1,730 for., and 144 colored).

—tp., Bradford co. Pop. 1,304. See SYLVANIA.

—p. borough, Lancaster co., on the left bank of the Susquehanna R. (here nearly 1½ m. wide), 12 m. W. of Lancaster, and 46 m. by rail S.W. Reading. It is the S.W. terminus of the Reading and Columbia R.R., 4½ m. long, and the N. terminus of the Columbia and Port Deposit RR. A railroad bridge across the river connects Columbia with Wrightsville. It contains 2 nat. and 1 other bank, 2 rolling mills, a mill for railroad iron, engine boiler works, several iron furnaces, a patent rake manufactory, and a fine library. Here is an extensive market and depot for lumber, which is brought down the river by rafts. Pop. 8,312.

—tp., Pender co. Pop. 1,559.

—a coal-mining v. in Carroll tp., Washington co., 5½ m. S.E. Monongahela City. †

Columbia, S. C., a city, cap. of the State and of Richmond co., situated on the E. bank of the Congaree, just below the falls, and at the confluence of the Broad and Saluda R.s., 137 m. by rail N. N. W. of Charleston; lat. 33° 57' N., lon. 81° 7' W. It is on the C., Columbia & Augusta and the W. C. & A. R.R.s., is the S.E. terminus of the C. & G. R.R., and is connected with Charleston by a branch of the South Carolina RR. It is the seat of the South Carolina University, founded in 1804. Columbia has a State-house, penitentiary, an asylum for the insane supported by the State, a Presbyterian theological seminary, a Methodist female college, 2 nat. banks, a cotton factory, 3 foundries, 2 sash and door factories, an orphans' home, water-works, a park, large libraries connected with the theological seminary (18,300 vols.), and South Carolina University (30,000 vols.), and 2 daily and 5 wkly papers. It is at the head of steamboat navigation. It was taken by Gen. Sherman's army Feb. 17, 1865, and was then much injured by fire. Pop. 10,040; of tp. 13,094.

Columbia, Tenn., a city, cap. of Murray co., on Duck R., 46 m. S.S.W. Nashville by the Nashville & Decatur RR. It is the seat of Jackson College, and has a nat. bank, 3 wkly and 1 monthly papers, 2 female seminaries, 3 flouring mills, a butter and cheese factory employing 1,000 cans, 3 good hotels, &c. Pop. 3,400.

Columbia, Tex., p.v., Brazoria co., on the W. bank of Brazos R., which is navigable for steamboats up to this point (30 m. from its mouth), 50 m. S.W. Houston by the Columbia div. of the I.&G.N.R.R. It

has a large trade in cotton, canned beef and sugar, carried on by steamboats and by rail. Pop. 739.

Columbia, Va., p.v. and tp., Fluvanna co., on James R., 25 m. S.E. Charlottesville. Pop. 239; of tp. 2,643.

Columbia, Wash., a S.E. co., bordering on Oregon, and bounded N. and E. by the Snake or Lewis R. The surface is partly mountainous or hilly; the soil is productive. The chief prod. in 1880 were 425,879 bush. of wheat, 150,232 of oats, 13,380 of corn, and 180,015 of barley. Cap., Dayton. Val. of taxable prop. abt. \$500,000. Pop. 7,103 (of whom 477 for., 38 Chinese, and 16 Indians).

Columbia, Wis., a S. co., intersected by the Wisconsin and Neenah R.s.; area, 751 sq.m. The surface is rolling or hilly, and the soil rich. The Wisconsin is navigable by steamboats to Winnebago Portage, whence a canal connects it with the Neenah, 1½ m. distant. The C., M. & St. P. R.R. crosses the co. The chief prod. in 1880 were 751,111 bush. of wheat, 67,576 of rye, 1,242,248 of corn, \$69,695 of oats, 149,617 of barley, 267,325 of potatoes, 54,442 tons of hay, 863,780 lbs. of butter, 193,008 of wool, and 268,916 of hops. Cap., Portage City. Val. of taxable prop. abt. \$16,000,000. Pop. 28,065 (of whom 7,562 for., 2 Chinese, and 16 Indians).

Columbia Centre, O., p.v. in Lima tp., Licking co., 15 m. N.E. Columbia. Pop. 189.

Columbia City, Ind., p.town & cap. of Whitley co., 19 m. W. of Fort Wayne by the P., F. W. & C. RR. It has a graded school, the Green Hill Seminary, 2 hotels, 2 banks, 2 wkly papers, 2 flour mills, a brewery, &c. Pop. 2,244.

Columbus, Ga., a city, cap. of Muscogee co., on the E. bank of the Chatahoochee R., which here forms the boundary between Ga. and Ala. It is 100 m. W.S.W. of Macon, and 292 by rail W. of Savannah. Steamboats ply at all seasons between Columbus and Appalachicola, Fla., light drafts only being used in summer. Columbus is the N. terminus of the Mobile and Girard RR., the E. terminus of the Western Alabama, the W. terminus of the Central Ga., and the S. terminus of the North and South RRs. It has cotton factories, and the falls of the river at this point afford a water power sufficient for 100,000 spindles. It has 3 saw mills, 2 machine shops, and 1 foundry, besides planing and flouring mills. There are 2 nat. and 1 other banks, 1 savings bank, and 2 daily and 4 wkly papers. The public schools for white and colored are unsurpassed by any in the State. Columbus has pleasant suburbs, noted for the beauty of their scenery and the taste of their private residences. The neighboring country has some of the finest farming-land in Western Ga. Pop. 10,123.

Columbus, Ill., p.v. and tp., Adams co., 15 m. E. of Quincy. Part of the v. is in Gilmer tp. Pop. 235; of tp. 1,077.

—(p.o. name Wool), v., Pope co., abt. 20 m. E. of Vienna. Pop. 84; of tp. 836.

Columbus, Ind., a city, cap. of Bartholomew co., on the East Fork of White R., in the middle of the richest agricultural wheat growing district in the State, and on the J., M. & I. RR., 41 m. S.S.E. of Indianapolis. Another railroad extends from this point N.E. to Cambridge. It has a nat. and another bank, 8 hotels, 2 grain elevators, 2 wkly papers, gas and water-works, 3 flour mills, 2 saw mills, a woolen mill, tannery, brewery, and various other factories. Pop. 4,813; of tp. 6,592.

Columbus, Kan., p.v. in Salamanca tp., cap. of Cherokee co., 49 m.S. of Fort Scott by the K.C., F.S. & G.R.R. It has 2 wkly papers, a bank, a coal mine, &c. Pop. 1,165.

Columbus, Ky., p.v. in Hickman co., on the Mississippi R., 196 m. by rail below St. Louis. It is the N. terminus of the M. & O. RR. The St. L., I. M. & S. R.R. terminates at Belmont, on the other side of the river, and crosses by means of inclined plains and a ferry. It has a wkly paper, a bank, some factories, and an active trade. Pop. 1,338.

Columbus, La., p.o., Sabine parish.

Columbus, Mich., p.tp., St. Clair co. Pop. 1,327.

Columbus, Minn., tp., Anoka co. Pop. 92.

Columbus, Miss., a city, cap. of Lowndes co., on the navigable Tombigbee R. and on a branch of the M. & O. RR., 235 m. by rail from Mobile. It has 2 banks, 3 wagon factories, 10 churches, a female seminary, a university and 2 public academies, and a very large trade, especially in cotton. It has 3 wkly and 2 tri-wkly papers. Pop. 3,955.

Columbus, Mo., p.v. and tp., Johnson co., 45 m. E. of Kansas City. Pop. 100; of tp. 1,308.

Columbus, Neb., a city, cap. of Platte co., on the Platte R. and the U.P. RR., 92 m. W. of Omaha. It has a bridge across the Platte, a bank, 3 school-houses, a high school, 5 churches, various industries, and 3 wkly papers. Pop. 2,131; of tp. 2,656.

Columbus, Nev., p.v. in Fish Lake Valley, Esmeralda co., 130 m. S.E. Virginia City. Pop. 96.

Columbus, N.J., p.v. in Mansfield tp., Burlington co., 13 m. S.E. Trenton. Pop. 547.

Columbus, N.Y., p.v. and tp., Chenango co., abt. 40 m. S. of Rome. Pop. 124; of tp. 1,177.

Columbus, N.C., a S.E. co., bordering on South Carolina, bounded S.E. by the Waccamaw R., and N.W. by Lumber R.; area, 600 sq. m. The surface is level and partly marshy. The chief prod. in 1880 were 136,546 bush. of rice, 93,834 of sweet potatoes,

268,105 lbs. of rice, and 930 bales of cotton. Cap., Whitesville. Val. of taxable prop. abt. \$2,000,000. Pop. 14,439 (of whom 21 for., and 5,513 colored).

—p.v. in Columbus tp., cap. of Polk co., 70 m. W. of Charlotte. Pop. 71; of tp. 838.

Columbus, O., a city, cap. of the State and of Franklin co., pleasantly situated on each side of the Scioto R., but principally on the E. side, and 70 m. from its mouth, 110 m. N.E. of Cincinnati, and 350 m. from Washington, D. C. It is in lat. 39° 57' N. and lon. 83° 3' W. from Greenwich. It is well laid out on a level site in the midst of an extensive plain, and possesses very broad and handsome streets, pleasantly shaded with elm trees. High street is its principal thoroughfare, and Capitol Square one of the most spacious of its open areas; while Broad Street, 120 ft. wide, is laid out for a stretch of 2 m. As the cap. of the State, it contains the usual public buildings, which are all on a large and liberal scale. The Capitol is an imposing edifice built of gray limestone with a rotunda 150 ft. high. It covers an area of 55,936 sq. ft., and its internal accommodations are most complete. There are also in and around the city the penitentiary, extending over more than 10 acres of ground, and accommodating upward of 1,000 prisoners; the new lunatic asylum, capable of containing 600 patients; the blind asylum, the idiot asylum, deaf and dumb asylum, the U. States arsenal, various hospitals and charitable institutions, a county court-house, a county infirmary, the Starling medical college, the Lutheran university, an agricultural and mechanical college, the odd-fellows' hall, and a fine opera-house. The city hall, on the S. side of State street, erected at a cost of \$200,000, and containing the post-office, public library, and city offices, is a Gothic building, 187½ by 80 ft., with a central tower 138 ft. high. The high-school building is a fine specimen of the simple Norman style of architecture. The city possesses a fine park of about 40 acres, named in honor of its donor, Dr. Lincoln Goodale, and another of equal extent called the City Park. The grounds of the Franklin Co. Agricultural Society occupy 83 acres, and the gardens of the Columbus Horticultural Society 10. The manuf. of the city are important and various; flour mills, engineering works, and factories for agricultural implements, brushes, carriages, harness, files, and furniture are among the chief establishments. There are 24 hotels, 3 nat. banks with an aggregate capital of \$500,000, 2 State and 6 other banks, 2 savings banks, and a clearing-house association, and 5 insurance companies, of which one is a life insurance association. Columbus has great advantages for internal commerce. It is situated on a branch of the Ohio Canal, at the intersection of 11 lines of RRs. The leading commodity is coal. The geographical situation of Columbus, with a vast coalless district extending N. and N.W. of it for hundreds of miles, its accessibility to a coal-seam of enormous quantity and superior quality, by way of the C. & H. V. RR., make it a great outlet for the article. The city is divided into 9 wards, and is governed by a mayor and a common council of 17 members. The fire department is under the control of a chief engineer. The Roman Catholics have 4 parish schools, with an average attendance of 1,020, and several academies and seminaries. Other educational institutions are Capitol university (Lutheran), and Starling medical college. The State Library contains over 30,000 volumes. There are 44 churches, 2 musical societies, 3 daily, 4 tri-wkly, 5 wkly and 4 monthly papers. At the time Columbus was laid out as a town in 1812, it was an almost unbroken forest, with no resident within its limits; and it had only 500 inhabitants when in 1816 it became the cap. of the State. Its growth and wealth are largely due to the concentration of the State institutions and the

liberal expenditure of public money, together with the natural advantages of a rich country. Its pop. has been as follows: in 1820, 1,400; 1840, 6,487; 1860, 18,554; 1870, 31,274, 1880, 51,665.

Columbus, Pa., p. borough and tp., Warren co., 24 m. S.W. Jamestown and 3 m. N.E. Corry by the N.Y., P.&O.R.R. Pop. 421; of tp. 1,663.

Columbus, Tex., p.v. and cap. of Colorado co., on the W. bank of the Colorado R., 84 m. N.W. Houston by the G., H. & S.A.R.R. The river is crossed by a railroad bridge. The trade of Columbus is extensive. It has 2 banks, a wkly paper, and is the seat of Colorado College. Pop. 1,959.

Columbus, Wash., p.o., Klikitat co.

Columbia, Wis., p.v. and tp., Columbia co., on Crawfish R., 148 m. N.W. Milwaukee by the C., M. & St.P.R.R. It has a nat. and another bank, 2 wkly papers and several manuf. Pop. 1,876; of tp. 2,681.

Columbia City, Iowa, p.v. and tp., Lousia co., abt. 40 m. N. of Muscatine. It has a nat. bank and a wkly paper. Pop. 603; of tp. 2,868. See COLUMBUS JUNCTION.

Columbia Grove, O., p.v. in Pleasant tp., Putnam co., 58 m. S.W. Toledo by the C., H. & D.R.R. It has several lumber, flour and woolen mills, and a wkly paper. Pop. 1,392.

Columbia Junction, Iowa, p.v. in Columbus City tp., Lousia co., on Iowa R., 41 m. N. of Burlington and 57 m. S.E. of Cedar Rapids by the B., C. R. & N.R.R. It has a nat. bank and a wkly paper. Pop. 793.

Columbusville, N.Y., v. in Newtown tp., Queens co., contiguous to Maspeth. It contains Mt. Olivet Cemetery and is connected with Brooklyn by street railway.

Colusa, Cal., a N. co., bounded E. by Sacramento R. and W. by the Coast range of mts.; area, 2,376 sq. m. Several streams rise in the Coast range, but sink before reaching the Sacramento; Stony and Sycamore Creeks traverse the co. Quicksilver, sulphur and salt are found. The soil is fertile. The chief prod. in 1880 were 4,537,504 bush. of wheat, 15,735 of corn, 899,558 of barley, and 1,482,74 lbs. of wool. Cap., Colusa. Val. of taxable prop. \$12,420,308. Pop. 13,118 (of whom 2,921 for., and 1,415 colored).

—a thriving p.v. in Colusa tp., cap. of the above co., on the Sacramento R., 50 m. in a direct line N. W. Sacramento. It has a bank with a cap. of \$500,000, 2 wkly papers, and has a large trade in agricultural products. Pop. 602; of tp. 2,043.

Comal, Tex., a S.W. central co., bounded S.W. by the Cibolo R., and intersected by the Guadalupe; area, 575 sq. m. The surface is rolling, and in some parts mountainous; live oak and mezquite cover abt. one-third of the land. The soil is good in the valleys, but fit only for grazing elsewhere. The chief prod. in 1880 were 13,414 bush. of wheat, 10,717 of rye, 39,036 of corn, 14,846 of sweet potatoes, 94,835 lbs. of butter, and 2,102 bales of cotton. Cap., New Braunfels. Val. of taxable prop. abt. \$1,200,000. Pop. 5,546 (of whom 1,644 for., and 270 colored).

Comanche, Kan., a S. co., bordering on the Indian Territory, and intersected by the Nescatunga and Cimarron Rs.; area, 780 sq. m. Cap., Banville. Pop. 372 (of whom 20 for., and 2 colored).

—tp., Barton co. Pop. 443.

Comanche, Tex., a N.W. central co., intersected by Leon R.; area, 1,650 sq. m. A mountain ridge forms its S.W. boundary; the rest of the surface is generally undulating and well timbered, abt. a third part being covered with oak, ash, elm, &c. The

soil is only fertile in the river bottoms. Stock-raising is the leading occupation. The native mustang grape is abundant. The chief prod. in 1880 were 29,141 bush. of wheat, 85,451 of corn, and 2,098 bales of cotton. Cap., Comanche. Val. of taxable prop. abt. \$1,300,000. Pop. 8,608 (of whom 57 for., and 79 colored).

—p.v. and cap. of above co., 125 m. N.W. Austin. It has a bank and a wkly paper. Pop. 704.

Comanches, a warlike tribe of Indians who roam over the N. part of Texas and of Mexico, and appear to be of the same stock with the Shoshonees or Snakes. They are nomadic, and range over a wide extent of territory, including part of New Mexico and the valley of the Rio Grande. They have large numbers of horses. Their principal occupations are robbery and war. They always fight on horseback, and have some firearms, but more commonly use the bow and arrow. They are by treaty placed upon a large reservation in the S.W. part of the Indian Territory, with some Kioways and Apaches. They are estimated at abt. 3,200 souls.

Concord, Md., p.o., Caroline co.

Concord, Mass., a fine p.v. ♦ and tp., Middlesex co., on Concord R., 20 m. N.W. Boston by the Fitchburg RR. It has a nat. and a savings bank, a high school, town-house, and a public library of abt. 2,000 volumes; also manuf. of cotton and of woollen flannels, and of carriages. The provincial congress met here in 1774 and 1775. On the 19th of April, 1775, several men were killed here in a skirmish between the British troops and the citizens of Concord. The sluggish current of Concord R. has prevented it from being turned to manufacturing purposes, and its natural beauties have been preserved. The quiet and repose of the place have made it a favorite with several celebrated men of letters. Pop. of tp. 3,922.

Concord, Mich., p.v. ♦ and tp., Jackson co., on Kalamazoo R., 14 m. W. of Lansing by the Air Line div. of the M.C.R.R. It has a union school, a banking-house, and a wkly paper. Pop. 540; of tp. 1,583.

—tp., Clinton co. Pop. 2,867. See PLATTSBURG.

—tp., Washington co. Pop. 1,120. See TROUDALE.

Concord, N.H., a city, cap. of the State, in Merrimack co., on the Merrimack R., 42 m. N.W. Portsmouth and 75 m. N.N.W. Boston by rail. It is one of the largest railroad centers in New England. At this station trains are made up for the C., the B., C. & M., the C. & C., the C. & P., and the N.R.Rs. Concord is pleasantly laid out, for the most part on the west side of the river; and its principal streets are lined with trees. The State-House, which is a handsome edifice built of granite, occupies an open space ornamented with elm and maple trees. The city contains also a city hall and three public libraries; while in the neighborhood there is the State asylum for the insane, with a farm attached for the employment of the inmates. Concord has 3 nat. banks with an aggregate capital of \$450,000, 3 savings banks, 2 daily, 4 wkly and 1 monthly papers, 15 churches, 52 schools, and 6 hotels; it is well supplied with water, and, having both railroad and canal communication, is advantageously situated for the development of its manufactures. These consist chiefly of carriages, dry goods, leather goods, and furniture. Granite of a superior quality is also quarried in the neighborhood; and a large trade is carried on in dressed and undressed blocks. The site of the town was first occupied by settlers in

1725; it was known as Rumford until 1765, when it received its present name. It was incorporated as a city in 1853. Pop. 13,838.

Concord, N. Y., tp., Erie co. Pop. 3,400. See SPRINGVILLE.

Concord, N. C., p.v. ♦ and tp., Cabarrus co., 21 m. N.E. Charlotte by the R.&D.R.R. It has 2 wkly papers. Pop. 1,264; of tp. 1,761.

Concehul, Ala., a river which rises in Pike co., and flows through Florida into Pensacola Bay. Two miles below the Fla. line it unites with the Escambia, a river of inferior size, the name of which, however, it afterward assumes. It is navigable for more than 100 m., but the country is sterile.

—a S. co., drained by Escambia R., Burnt Corn Creek, Murder Creek, and Sepulga R.; area, abt. 800 sq. m. It has a hilly surface, with a sandy, sterile soil. The forests furnish large quantities of pine timber, which are conveyed down the Concehul in small rafts. Near Brooklyn, in the E. part, is a large cave. The chief prod. in 1880 were 181,277 bush. of corn, 17,816 of sweet potatoes, and 4,633 bales of cotton. Cap., Sparta. Val. of taxable prop. abt. \$1,300,000. Pop. 12,606 (of whom 37 for., and 6,377 colored).

Concehul River, Ala., p.v., Covington co.

Concedogwin Creek, Pa., rises in Franklin co., flows E. for abt. 75 m., and falls into the Susquehanna, a little above Harrisburg.

Concejos (Kon-ud' hove), Col., a S.W. co., bounded N.E. and E. by the Rio Grande, which also intersects the N. part, S. by New Mexico, and W. by Utah; area, 2,300 sq. m. It is watered by the Rio Concejos and other tributaries of the Rio Grande, and also by tributaries of the San Juan. The surface is broken by mountains, the Sierra Madre and Sierra La Plata ranges traversing the co. There is a large area of arable land. The W. part is occupied by the Ute Indian reservation. The precious metals are found in the mountainous parts, but are little worked. Gypsum also occurs. The inhabitants are chiefly Mexicans and half-breeds. The chief prod. in 1880 were 1,607 bush. of wheat, 2,800 of oats, and 67,162 lbs. of wool. Cap., Gaudalupe. Val. of taxable prop. abt. \$400,000. Pop. 5,605 (of whom 885 for., 9 Chinese, and 21 Indians).

—p.v. ♦, cap. of the above co., on the Rio Grande, 4 m. N.E. San Rafael Station on the D.&R.G.R.R. Pop. 339.

Conemaugh, Pa., a river which rises in the Alleghany Mts., and flows W.N.W. into the Alleghany R., 29 m. E.N.E. Pittsburgh. In the lower part of its course it takes the name of Kiskeminetas. Fifteen m. N.E. of Greensburg it has salt works on both its banks. Its length is about 150 m.

—p. borough, incorporated in 1869 under name of East Conemaugh, Cambria co., on Conemaugh R., 15 m. S.W. Ebensburg, and 80 m. E. of Pittsburgh by the Penn.R.R. It has several important manuf. of iron. Pop. 3,504. See JOHNSTOWN.

—tp., Cambria co., adjoining the above borough. Pop. 418.

—tp., Indiana co. Pop. 1,346

—tp., Somerset co., adjoining the tp. of the same name in Cambria co. Pop. 1,379.

Conestoga, Pa., p.v. and tp., Lancaster co., 8½ m. S. of Lancaster. The tp. is in the Conestoga Valley, which gives name to a once celebrated stock of horses. Pop. 505; of tp. 2,350.

Conestoga Creek, Pa., rises in Lancaster co., flows S.W. and enters the Susquehanna 10 m. below Columbia.

Conesus, N. Y., p.tp., Livingston co. It is bounded W. by CONESUS LAKE, which is 9 m. long, 1 m. wide, and is said to exceed 300 ft. in depth. It is well stocked with fish, and its waters, which are pure and cold, go to the Genesee R. by a N. outlet. Pop. 1,397.

Conesus Centre, N. Y., p.v. in above tp., 38 m. S. of Rochester by the N. Y., L. E. & W. RR. P. 190.

Conesville, Iowa, p.v. in Orono tp., Muscatine co., 50 m. S. E. Cedar Rapids by the B., C. R. & N. RR. P. 377.

Conesville, O., p.o., Coshocton co.

Conewago, Pa., a creek or river which rises in Adams co., and after a course of 40 m., falls into the Susquehanna opposite Bainbridge; another creek of the same name enters the Susquehanna 5 m. below Middletown, after a W. S. W. course of 15 m. —tp., Adams co. Pop. 1,211. See McSHERRYSTOWN. —tp., Dauphin co. Pop. 895. —p.o., Lancaster co.

—tp., York co. Pop. 1,495. See STRINESTOWN.

Conewango, N. Y., p. tp., Cataaugus co., has a station on the Buffalo and Southwestern branch of the N. Y., L. E. & W. RR., 53 m. S. of Buffalo. Pop. 1,299.

Conewango, Pa., tp., Warren co. Pop. 1,478. See WARREN.

Conewango Creek, N. Y. and Pa., a stream which rises in the N. E. corner of Cataaugus co., N. Y., flows in a general S. direction, receiving the waters of the outlet of Chataqua Lake, and joins the Alleghany R. at Warren, Warren co., Pa. By means of this creek and its outlets there is boat navigation from the Gulf of Mexico to within 10 m. of Lake Erie.

Conewango Valley, N. Y., p.o., Chautauqua co.

Coney Island, N. Y., is the popular watering place of New York city, and is unique in its appearance, its patronage and its history. The island, which is in Gravesend tp., Kings co., is the extreme W. end of a great outlying sand-bar, broken by inlets, which extend along the S. coast of Long Island for nearly 90 m., its different sections being known as Coney Island, Rockaway, Long, Jones, Oak Island, and Great South Beaches. Coney Island is a part of the town of Gravesend, and is separated from the shore by Gravesend Bay on the W., Sheepshead Bay and Coney Island Creek on the N., runs to a point on the E., and has the broad Atlantic for its S. boundary. The distance from the Battery to the wharf at the western extremity of the island is abt. $8\frac{1}{2}$ m. as the bird flies. Prior to 1875 this fine stretch of beach 5 m. long, with its splendid surf, and its unequalled location in point of accessibility from New York, Brooklyn and other adjacent cities, was little more than a barren waste of sand. On the W. end of the island was a small hotel, and 2 steamboats made daily trips to that point. At the present time, 1882, 8 stean railways, one line of street cars, and 9 lines of steamboats, capable of transporting at least 150,000 persons to and from the beach daily, are in operation. The beach itself is covered with light and airy buildings of all sizes and for every conceivable purpose, and during the season the sands are black with people daily. Three of the hotels are among the finest of their kind in the world, and a number of others are fully equal to the best hotels at other watering places. Pop. 1,184.

Confidence, Iowa, p.v. in Wright tp., Wayne co., 42 m. W. of Ottumwa. Pop. 200.

Confidence, W. Va., p.o., Putnam co.

Confidence, Pa., p. borough in Lower Turkey Foot tp., Somerset co., 84 m. S. E. Pittsburgh by the Pittsburgh div. of the B. & O. RR. It exports lumber, bark, hoop poles, staves and leather. Pop. 430.

Congaree, S. C., a river which is formed at Columbia, by the union of the Broad and Saluda Rs. It runs S. E. for abt. 30 m., and unites with the Wateree to form Santee R.

—tp., Lexington co. Pop. 1,547.

—p.o., Richland co.

Congdon, Neb., p.o., Dawson co.

Conneaut, O., a p. borough ✱, Ashtabula co., on Conneaut Creek and on the L. S. RR., 68 m. E. N. E. Cleveland, and 2 m. from Lake Erie. It is a shipping point for produce. Here the first settlers of Northern Ohio landed in 1796. The mouth of the creek makes a good harbor. Conneaut has a light-house, a good trade, a wkly paper and 2 banks. Pop. 1,150; of tp. 2,947.

Conneaut, Pa., tp., Crawford co. Pop. 1,601. See PENNLIN.

—tp., Erie co. Pop. 1,546.

Conneaut Creek, O. and Pa., has its sources in Erie and Crawford cos., Pa., and enters Lake Erie in Ashtabula co., O.

Conneautville, Pa., p. borough ✱ in Spring tp., Crawford co., on Conneaut Creek, 35 m. S. W. Erie. It has a nat. bank and 2 wkly papers. Manuf., iron-works, woolens, leather, flour, chemicals, &c. Pop. 941.

Connecticut (kōn-neh'-e-kut), the largest river of New England, rises in the extreme N. part of New Hampshire, near the frontier of Canada. Its W. bank forms the entire boundary between N. H. and Vt. It flows in a general S. S. W. direction until it enters Franklin co., Mass. It afterward intersects Mass. and Conn., flowing nearly S. to Middletown, Conn., below which its course is S. E., and enters Long Island Sound at Saybrook. Length, about 450 m. The valley of the Connecticut is celebrated for the beauty of its scenery, the fertility of its soil, and the luxuriant growth of the tobacco-plant known as the "Connecticut seed-leaf," which is used principally as "wrappers" in making cigars. Vessels drawing 8 feet can ascend to Hartford, which is abt. 50 m. from its mouth. Its principal affluents are the Deerfield, Farmington and Chicopee Rs.

—one of the States of New England, the smallest in the Union after Rhode Island and Delaware, is bounded N. by Mass., abt. 88 m.; E. by Rhode Island 45 m., S. by Long Island Sound, 100 m., and W. by New York, abt. 68 m. (direct). The S. W. corner projects along the Sound under New York for abt.

13 m.; area, 4,845 sq. m. The State lies on the S. slope of the hilly regions of New England, with a general surface much diversified; there is however no land above 1,000 ft. in elevation. The western plateau, with its numerous ranges and ridges, is the culminating ground, and is on the whole better adapted to grazing and dairying than to the growth of cereals. It is intersected by the valleys of the Housatonic R. and its tributaries, and gradually descends in a S. direction until it terminates with low hills near the shores of the sound. The central or Connecticut River Valley is the best farming region of the State, and has an average width of over 20 m. Central Valley belongs to the red sandstone formation. The E. portion of the State consists of numerous ranges of hills with gentle declivities, and contains in the valleys which intersect it much excellent farm land. Most of the State is drained by 3 principal rivers with their branches: the Connecticut in the central, the Housatonic in the western, and the Thames in the eastern part.—The rocks are granite, traps, sandstone, limestone, &c. From the quarries at Portland are obtained vast quantities of the red sandstone, of which the brownstone fronts of city houses are made. Granite of the finest quality is found in great variety and is extensively used for building purposes. In the vicinity of Milford is found in small quantities a beautiful marble resembling verd antique. In Litchfield co., are extensive quarries of pure white marble, in great demand for building purposes. The State capital at Hartford is built of marble from Canaan. Feldspar quarries in Glastonbury and Middletown supply material for porcelain and crockery. In Lyme is found a choice variety of porphyry. In Bolton are quarries of micaceous slate, furnishing the cities of the neighborhood with fine paving stones. Copper is found in Granby, Bristol and other sections of the State, but the mines are not at present worked. Lead and silver are also found, but not to any profitable extent. Hydraulic lime, from the borders of Southington and Berlin is used extensively for the manuf. of water cement. In Chatham is a cobalt mine. Extensive beds of hematite iron ore are found, especially in Salisbury and Kent; and the iron works at the former place have long been celebrated. For the year 1880 the production of iron ore in Connecticut amounted to 35,018 tons.—The climate of the sea-coast and the Connecticut Valley is mild and salubrious. In the hill-country of the N.W. the winters are much more severe and the quantity of snow greater. The mean temperature at New London 47.07°; at Litchfield, 44.68°; at New Haven, 50.82°; for the whole State, 49.62°. The higher portions of Conn. are well adapted to stock raising, and cattle, butter and cheese form important articles of export. The rich valleys produce the cereals, fruit and vegetables of the temperate zone in great abundance. The cultivation of tobacco has greatly increased of late, particularly in the valley of the Connecticut R.

The following table shows the product of each principal crop for the census year 1880:

Products.	Quantity produced.	Average yield per acre.	Number of acres.	Total Valuation.
Indian corn.....bushels.	1,621,100	29	55,900	1,215,825
Wheat.....do.	30,582	18	2,199	55,415

Potatoes.....do.	2,795,310	87	32,130	1,677,186
Tobacco.....pounds.	15,487,660	1,538	10,070	2,323,149
Hay.....tons.	760,550	1	760,550	12,168,809
Total.....			939,034	18,476,208

In 1881 the live stock in farms included 54,000

horses valued at \$3,081,780; 118,800 milch cows valued at \$3,370,356; 125,600 oxen and other cattle, valued at \$3,815,728; 98,071 sheep valued at \$348,162; and 60,600 hogs valued at \$833,250. There were in 1880 30,598 farms in the State, mostly small and valued in gross at some \$130,000,000. The forest woods are oak, pine, chestnut, walnut, butternut, birch, beach, ash, elm, maple, poplar, basswood, whitewood, hemlock and cedar. The principal fruit trees are the apple, pear, quince, cherry and plum. Peaches, after disappearing for many years, have again begun to thrive. Raspberries are cultivated to a considerable extent. Grape vineyards are increasing in number and excellence yearly, the annual wine products being abt. 30,000 galls.—The chief material glory of the State is in the extent and variety of its manufactures, exceeding by far those of any other State in the Union or of any people in the world in proportion to the population. There is not a water power in the State (and it has many), but turns the wheels of some productive industry, and a very large part of the inhabitants are, directly or indirectly, interested in some kind of manufactures. All the large towns and villages owe their growth to their factories, and every year increases their number. Nowhere in the world has there been such a development of mechanical ingenuity in the way of labor-saving appliances and new inventions. The State stands first in the matter of patents. Many of the machines used in metal working are marvels of skill, especially those for the manufacture of pins, needles, hooks and eyes, tubes, screws, fish-hooks and fire-arms. In the manuf. of clocks, India rubber goods and hardware, Connecticut leads the world. The city of Waterbury, hundreds of miles away from the great copper producing regions, has become the centre of brass manufacturing for the whole U. States; New Haven for its large manufactories of improved fire-arms and cartridges. At Hartford are the extensive works of the Colt fire-arms company. Meriden is noted for its britannia ware, bronze and glass works, etc. Norwich is largely interested in woolen manufactories. Willimantic has the largest mill for the manuf. of cotton thread in the world. Thompsonville is famous for its carpets. Manchester has the extensive Cheney silk works and a large gingham factory. Through the E. part of the State are large cotton mills, and the State stands fifth in 1880 on the list in manuf. of cotton goods, having 82 establishments with an aggregate capital of \$20,310,500; spindles 936,376; looms 18,261. The axes and agricultural tools made by the Collins company of Collinsville are known throughout the world. Danbury is one of the most extensive hat manuf. towns in the country. Middletown does a large business in pumps and plated goods. Bridgeport is the headquarters for sewing machines, having the great factories of the Wheeler & Wilson and the Howe machines. New Britain is famous for its house furnishing goods, table cutlery, rules and levels, etc.; and these are only a portion of the towns which might be mentioned which are known throughout the country for their manufactures. In 1880 there were in the State 4,488 manufacturing establishments; capital \$120,480,275; hands employed, 112,915; wages paid during the year, \$45,501,518; value of materials, \$102,185,341; value of products, \$185,797,211. The principal manuf. are agricultural implements, boots and shoes, brass and iron goods, carpets, carriages, cloaks, clothing, cotton goods, dye-stuffs, fire-arms, hardware, hats, hooks and eyes, hosiery, professional and scientific instruments, India rubber goods, jewelry, leather, etc.—Connecticut has 5 custom districts, to which 866 vessels of 96,410 tons belonged in 1880. The direct commerce with foreign countries was formerly far more important than it is at present, and is being absorbed more and more by New York.—The State

is intersected in all directions by 22 railroads which, in 1882 operated 959 m. within the State limits. The State is thoroughly interlaced with telegraph wires reaching nearly every city, town and hamlet within her borders.—The State is the home of a number of the largest and safest insurance companies in the country, both fire and life. For most of these the headquarters is at Hartford. The assets of the fire companies are over \$19,000,000; and those of the life companies over \$102,000,000; there are 12 of the former and 8 of the latter.—The educational facilities of the State are of the first order. The school fund amounts to over \$2,000,000, the income of which is devoted to the support and encouragement of the common schools. The schools are free, being maintained by local taxation, and the assistance received from the fund. There are over 1,600 public schools, with some 2,600 teachers, and with over 139,000 pupils. In addition, there are a number of schools supported by individual liberality. Several of the best preparatory schools of the country are in the State, such as Hopkins', grammar school, of New Haven, the Hartford high school and the Norwich free academy. For the higher education the State has Yale College at New Haven, Wesleyan University (Methodist), at Middletown, and Trinity College (Episcopalian) at Hartford. Connected with Yale College is the Sheffield Scientific School, and schools of law, medicine, theology and fine arts, with a post-graduate course, which justly entitles the college to be called a university. Two-thirds of the students are from other States. At New Britain is an excellent normal school for the education of teachers.—The State is divided into 8 counties, viz.: Fairfield, Hartford, Litchfield, Middlesex, New Haven, New London, Tolland, and Windham. The cities are Bridgeport, Hartford (the cap.), Middletown, New Haven, New London, Norwich, and Waterbury.—The constitution of Connecticut was adopted in 1818, but has since been amended. The legislature consists of a Senate of 21 members and a house of representatives of 247 members. The governor (salary \$2,000) and other executive officers are chosen annually. The supreme court of errors consists of 5 judges. The superior court consists of the 5 supreme judges and 6 other judges. Each has \$3,500 salary. There are courts of common pleas in the four most populous counties. Justices of the peace are elected in every town. For the year 1880 the State receipts amounted to \$2,506,971 and the expenditures to \$1,600,383. The State debt was \$4,966,600. The val. of taxable prop. was \$327,182,435.—The Dutch of the New Netherlands first explored the Connecticut R. They erected a fort in 1633. In 1636 colonists from Massachusetts settled along the river. New Haven was settled in 1638. A constitution for the government of the colony of Connecticut was perfected and approved by a general vote of the people, Jan. 14, 1639. It formed the basis of the charter obtained for Charles II. in 1662, and its leading features have been copied into the constitution of the several States and of the U. States. According to current history, the royal charter was saved by being hid in the "charter oak" when Sir Edmond Andros tried to get possession of it in 1687. This constitution was of so general a character, that no change was necessary when Connecticut took her stand as one of the independent States of the Union, on the declaration of independence in 1786, and continued in force till 1818, when the present constitution was formed. Pop. in 1679, 12,535; in 1756, 131,805; in 1782, 208,870; in 1810, 255,179; in 1840, 301,856; in 1850, 363,099; in 1860, 451,520; in 1870, 537,452; in 1880, 622,700 (of whom 305,782 males and 316,918 females; 492,902 natives and 229,992 foreign birth; 610,769 whites, 11,547 colored, 129 Chinese and 225 Indians).

- Cook**, *Ill.*, a N. E. co., touching Indiana and Lake Michigan; area, 1,027 sq. m. The surface is level or undulating, much of it being occupied by prairies. The soil is remarkably rich and deep. The flat land was formerly thought unfit for cultivation, but is now generally esteemed the best, since careful tillage has developed its richness. It is traversed by the Illinois and Michigan Canal, and by various R.R.s, centering in Chicago. It was organized in 1831, and named after Daniel P. Cook, a member of

Congress from Illinois, by whose exertions a grant of \$3,000,000 acres of land was obtained from the United States to aid in the construction of the Illinois and Michigan Canal. The chief prod. in 1880 were 37,043 bush. of wheat, 1,619,528 of corn, 2,223,052 of oats, 20,623 of rye, 506,815 of potatoes, 156,900 tons of hay, 1,347,662 lbs. of butter, 75,553 of wool, 41,498 of flax, and above 3,000,000 galls. of milk sold. There are a large number of manuf. establishments, chiefly in Chicago, the cap. Pop. 607,468 (of whom 242,488 for., and 7,119 colored).

Cooperstown, *Ill.*, p.v. and tp., Brown co., 30 m. N.W. Jacksonville. Pop. 250; of tp. 1,649.

Cooperstown, *N.Y.*, p.v. ♣ in Otsego tp., cap. of Otsego co., pleasantly situated at the S. end of Otsego Lake, 69 m. W. of Albany. The lake is 9 m. long, and has two steamboats. Cooperstown has 6 churches, 2 wkly papers, a union school and academy, a hospital, an orphan asylum, and 2 nat. banks. The Cooperstown and Susquehanna Valley R.R., 16 m. long, connects it with the Albany and Susquehanna R.R. Pop. 2,199.

Cooperstown, *Pa.*, p. borough, Venango co., on Sugar Creek, 11 m. N.W. Oil City. It has flour, lumber and woolen mills. Pop. 297.

Cooperstown, *Wis.*, p.v. and tp., Manitowoc co., 22 m. N.W. Manitowoc. Pop. of tp. 1,700.

Coopersville, *Ky.*, p.v., Wayne co., 15 m. S. E. Monticello. Pop. 50.

Coopersville, *Mich.*, p.v. ♣ in Polkton tp., Ottawa co., 15 m. W. of Grand Rapids. It has a wkly paper. Pop. 645.

Coopersville, *N.Y.*, p.v. in Champlain tp., Clinton co., 10 m. S.W. Rouse's Point by the D.&H.C. C.R.R. Pop. 113.

Coopersville, *O.*, v., Pike co., on the Ohio Canal, 18 m. N. of Portsmouth. ♣

Coopersville, *Va.*, p.o., Sussex co.

Cooper's Well, *Miss.*, an artesian mineral spring, 4 m. S.E. Raymond, Hinds co. Its water is an active saline chalybeate, and is much visited for the cure of chronic diarrhoea, dyspepsia, and many other diseases.

Coopertown, *Tenn.*, p.v., Robertson co., 10 m. S.W. Springfield. Pop. 100.

Coopes, *N.C.*, tp., Nash co. Pop. 1,685.

Coops'town, *Md.*, p.o., Harford co.

Coopwood, *Miss.*, p.o., Winston co.

Coos, *N.H.*, a co. which forms the N. extremity of the State. Area, 1,950 sq. m. It is bounded W. by the Connecticut R., and is drained by the Androscoggin. The surface is mostly mountainous and rugged. Mount Washington, the highest peak of the White Mts., is in the S. part of this co. It is intersected by the G.T.R.R. The chief prod. in 1880 were 31,464 bush. of wheat, 228,698 of oats, 43,431 of buckwheat, 864,452 of potatoes, 500,811 lbs. of butter, 75,944 of wool, and 268,351 of maple sugar. Lumber and starch are the chief manuf. Cap., Lancaster. Val. of taxable prop. abt. \$12,000,000. Pop. 18,580 (of whom 3,581 for., 13 colored, and 22 Indians).

—OR NORTH STRATFORD, p.v. ♣, Coos co., 134 m. N. W. Portland, Me., by the G.J.R.R. Pop. 300.

Coos, *Oreg.*, a W. co.; area, abt. 1,300 sq. m. It is bounded on the W. by the Pacific Ocean, and drained by the Coquille and Coos Rs. The surface is partly mountainous; much of the soil is very fertile. The chief prod. in 1880 were 42,044 bush. of corn, 17,584 of oats, and 7,960 of barley. Coal and lumber are exported from this co., which also contains gold. Cap., Empire City. Val. of taxable prop. abt. \$1,500,000. Pop. 4,834 (913 for., 91 Chinese, and 190 Indians).

Coosa, *Ala.* and *Ga.*, a river formed by the Etowah and Oostenaula, which unite at Rome in Ga. It crosses the E. boundary of Ala., flows S.W., and then S., until it unites with the Tallapoosa on the S. border of Elmore co., Ala. The stream thus formed is the Alabama R. The length of the Coosa is abt. 350 m.

Coosa, *Ala.*, an E. central co.; area, 650 sq. m. It is bounded on the W. by the Coosa R. The surface is diversified; the soil fertile. The chief prod. in 1880 were 55,028 bush. of wheat, 364,399 of corn, 41,758 of oats, 47,367 of sweet potatoes, 111,946 lbs. of butter, and 8,411 bales of cotton. Quarries of fine marble and statuary granite have been opened here. The granite is of a beautiful gray tint, and is said to be the best in the U. S. for statuary. Iron and lead ores are also found. The co. is well watered, and especially adapted to pasturage. Water power is abundant. Cap., Rockford. Val. of taxable prop. abt. \$1,300,000. Pop. 15,132 (of whom 12 for., and 5,082 colored).

Coosa, *Ga.*, p.o., Floyd co.

Coosa, *Miss.*, p.o., Leake co.

Coosa Creek, *Ga.*, p.o., Union co.

Coosada Station, *Ala.*, p.v. in Robinson Springs tp., Elmore co. Pop. 45.

Coosaw, *S.C.*, p.o., Beaufort co.

Coosawattee, *Ga.*, a river formed in Gilmer co. by the union of Elijah and Carticary Creeks. It flows in a winding S.W. course and unites with the Comasauga in Gordon co., to form the Oostenaula. —p.o., Gordon co.

Coosawat chie, *S.C.*, tp., Beaufort co. Pop. 1,766.

Coos Bay, *Oreg.*, the principal sea-port of the S. part of the State. Its entrance, just N.E. of Cape Arago (lat. 43°20'38" N., lon. 124°22'11" W.), is very good, and its bar has 14 ft. of water at high tide. The Coos R., a small stream, flows into it. Four m. from the bar, on the S. shore, is Empire City, the cap. of Coos co.; and 4 m. from the mouth of the river is Marshfield, an important coal-mining center. The bay is important chiefly for its vast quantities of tertiary lignitic coal, which is found on the S. side over a large area. It is regarded as the best coal on the Pacific coast but is inferior to the bituminous coals. The bay is surrounded by an elevated and densely timbered region.

Coos City, *Oreg.*, p.tp., Coos co. Pop. 307.

Cornville, *Me.*, p. tp., Somerset co. Pop. 932.

Cornwall, *Col.*, p.o., Rio Grande co.

Cornwall, *Conn.*, p.v. and tp., Litchfield co. The v. is 45 m. N.W. New Haven. The tp., bounded W. by the Housatonic R., has important mines of iron ore. Pop. 137; of tp. 2,000. See CORNWALL BRIDGE.

Cornwall, *Ill.*, tp., Henry co. Pop. 887.

Cornwall, *N.Y.*, p. tp., Orange co., on the W. bank of the Hudson R., 56 m. N. of N.Y. by the Newburg branch of the N.Y.,L.E.&W.R.R. The surface of this town, being chiefly within the Highlands, is hilly, and in a great part mountainous, including in its area those well-known summits, Bare Mt., Crow's Nest, and Butter Hill. The physical features of this whole region are highly interesting and romantic. There are several localities in this town of interest in our revolutionary history; such are West Point, and the sites of the old forts Putnam, Clinton, and Montgomery. The two former are situated at West Point, and the latter on an eminence in the S. part of the town, near the Hudson. The landing for Cornwall is at the village bearing the same name, 4 m. S. of Newburg, at the N. termination of the Highlands. Pop. of tp. 3,833. See CORNWALL ON THE HUDSON, and WEST POINT.

Cornwall, *N.Y.*, p.tp., Lebanon co. Pop. 2,522. See BISMARCK.

Cornwall, *Vt.*, p.tp., Addison co. Pop. 1,070.

Cornwall Bridge, *Conn.*, p.v. in Cornwall tp., Litchfield co., on Housatonic R., 57 m. N.W. Bridgeport by the H.R.R. Pop. 300.

Cornwall Hollow, *Conn.*, p.v. in Cornwall tp., Litchfield co., abt. 47 m. N.W. New Haven.

Cornwallis, *Va.*, p.v., Ritchie co. Pop. 33.

Cornwall on the Hudson, *N.Y.*, p.v. in Cornwall tp., Orange co., on the Hudson R., 4 m. S. of Newburg by water. It is contiguous to Canterbury, has a savings bank, a public library, a wkly paper, some factories, and is a favorite place of summer resort. Pop. 1,000.

Cornwall Station, *Col.*, p.o., Contra Costa co.

Cornwallville, *N.Y.*, p.v. in Durham tp., Greene co., 19 m. W. of Catskill.

Cornwell, *Ky.*, a coal-mining p.v., Menifee co., 21 m. S.E. Mount Sterling. Pop. 345.

Cornwell, *S.C.*, p.o., Chester co.

Corona, *N.J.*, p.v. in Lodi tp., Bergen co., 12 m. from Jersey City.

Corona, *N.Y.*, p.v. in Newtown tp., Queens co., 9 m. by rail N.E. Brooklyn. Pop. 750.

Corona, *Tenn.*, p.o., Tipton co.

Coronado, *Kan.*, p.o., Sedgwick co.

Coronoco, *S.C.*, p.o., Abbeville co.

Corothers, *O.*, v. in Venice tp., Seneca co. Pop. 91.

Corpus Christi, *Tex.*, p.v. & cap. of Nueces co., on the neck of the peninsula which separates Corpus Christi and Nueces bays, abt. 8 m. below the mouth of Nueces R. and 178 m. S.E. Austin. It has 2 banks, 2 wkly papers, an active trade, a good harbor and regular steamboat communication with New Orleans. Pop. 3,254.

Corpus Christi Bay, *Tex.*, is at the N. end of the Laguna del Madre, and communicates by Aransas Pass and Corpus Christi Inlet with the Gulf of Mexico, from which it is separated by Mustang Island.

Corra, *Minn.*, p.o., Olmsted co.

Corral, *Idaho*, p.o., Alturas co.

Corralitos, *Cal.*, p.v. Santa Cruz co., 5 m. N. of Watsonville. Pop. 250.

Coulterville, Tenn., p.o., Hamilton co.

Council, Ark., tp., Lee co. Pop. 887.

Council Bend, Ark., p.o., Lee co.

Council Bluffs, Iowa, a city, cap. of Pottawattamie co., on the E. bank of the Missouri R., 1,000 m. above St. Louis, and 120 m. W. by S. of Des Moines. It has ample RR. communication by means of the Union Pacific, the Chicago and Northwestern, the Chicago, Rock Island, and Pacific, the Burlington and Missouri River, and the Kansas City, St. Joseph, and Council Bluffs lines. It also communicates by horse RR. and ferry with Omaha, Neb., on the opposite bank, 4 m. distant. The bridge connecting the two cities, known as the Missouri R. bridge, is 2,750 ft. in length between the abutments, and has 11 spans. It is 50 ft. above high-water mark, has a railroad track and accommodations for horse cars and ordinary travel. Council Bluffs is situated abt. 3 m. from the river, at the foot of the bluffs, which are high and precipitous. It embraces an area of 24 sq. m., and presents a neat appearance. The principal edifices are of brick. The most important public buildings are the county court-house, the city hall, 2 public halls, the high-school building and 6 ward school-houses. The most important manuf. are the Council Bluffs iron-works and machine shops, the agricultural works, a carriage factory, 2 lumber wagon factories, 2 steam flour mills, 3 breweries, &c. There are 1 nat. bank, 1 private, and 1 savings bank, 2 daily and 3 wkly papers. The Roman Catholics have a seminary for young ladies, and a boys' school. There is a library association, and a young men's Christian association and reading-room. The State institute for the deaf and dumb is in the vicinity. There are 9 churches. The site of Council Bluffs was occupied in 1846 by a Mormon settlement known as Kaneshville. The city was incorporated under its present name in 1853. Pop. in 1870, 9,287; in 1880, 18,059.

Council Grove, Kan., p.v. in Council Grove tp., cap. of Morris co., on Neosho R., 25 m. N.W. Emporia by the Neosho Valley div. of the M.P.R.R. It has a bank, 2 wkly papers, 2 flour mills, a coal mine, &c. Pop. 1,043; of tp. 1,633.

Council Hill, Ill., p.v. and tp., Jo Davis co., 1 m. from the station below. Pop. 230; of tp. 595. The tp. also contains COUNCIL HILL STATION, a small p.v. on the I.C.R.R., 7 m. N.E. Galena.

Crafter, Ill., tp., Calhoun co. Pop. 575.

Cra'ven, N.C., a S.E. co.; area, abt. 1,000 sq. m. It borders on Pamlico Sound, and is intersected by the Neuse R., navigable throughout the co. The surface is low, swampy, and in a great part covered with pine forests, the turpentine and lumber procured from which are among the chief articles of export. The A.&N.C. RR. traverses it. The chief prod. in 1880 were 218,256 bush. of corn, 121,638 of sweet potatoes, 70,047 lbs. of rice, and 5,782 bales of cotton. Cap., New Berne. Val. of taxable prop. \$4,000,000. Pop. 19,720 (of whom 108 for., and 13,067 colored).

Cra'vens, Ark., p.o., Franklin co.

Crawfish River, Wis., rises in Columbia co., flows S.E., then S., and falls into Rock R. in Jefferson co.

Crawfish Spring, Ga., p.v., Catoosa co., 3 m. N. of Pond Spring. Pop. 50.

Crawford, Ala., p.v. and tp., Russell co., 15 m. W. of Columbus, Ga. Pop. 124; of tp. 1,960.

Crawford, Ark., a W. co., bordering on the Ind. Ter. and bounded S. by the Arkansas R., which is navigable by steamboats; area, 585 sq. m. The surface is mountainous. Boston Mt., 2,000 ft. high, is in the

co. Coal and other minerals are found. The chief prod. in 1880 were 31,040 bush. of wheat, 465,356 of corn, 16,859 of Irish and 26,406 of sweet potatoes, 8,980 bales of cotton, 98,114 lbs. of butter, and 8,314 galls. of molasses. Cap., Van Buren. Val. of taxable prop. abt. \$3,000,000. Pop. 14,740 (of whom 159 for., 1,391 colored, and 16 Indians).

Crawford, Ga., a S.W. central co., bounded N. E. by Echeconee Creek, S.W. by Flint R., and drained by several creeks; area, 289, sq. m. The surface is uneven; the N. part is moderately fertile, producing cotton, grain and sweet potatoes; the S. sterile, and covered with pine forests. The chief prod. in 1880 were 13,089 bush. of wheat, 144,381 of corn, 26,928 of oats, 21,441 of sweet potatoes, and 6,765 bales of cotton. Cap., Knoxville. Val. of taxable prop. abt. \$1,300,000. Pop. 8,656 (of whom 8 for., and 4,716 colored).
—p.v. Oglethorpe co., 18 m. E. of Athens by the G.R.R. (Lexington Station). Pop. 312.

Crawford, Ill., a S.E. co.; area, 420 sq. m. It is separated from Ind. on the E. by the Wabash R., and drained by Embarras R. and its N. Fork, the former passing through the S.W. part and the latter flowing along the W. boundary. The surface is occupied in great part by fertile prairies. The chief prod. in 1880 were 549,476 bush. of wheat, 1,195,290 of corn, 151,355 of oats, 47,771 of potatoes, 248,314 lbs. of butter, 94,326 of wool, 65,213 of tobacco, and 45,153 galls. of sorghum molasses. Cap., Robinson. Val. of taxable prop. abt. \$7,000,000. Pop. 16,130 (298 for., and 37 colored).
—v. in Cicero tp., Cook co. Pop. 40.

Crawford, Ind., a S. co., bordering on Kentucky, bounded E. by the Great Blue, S. by the Ohio R., and drained by Little Blue R.; area, 280 sq. m. The valleys of the streams are productive, but nearly all the rest of the land is rugged and sterile. Coal, iron and limestone are the most valuable minerals. Lumber, flour, pork and beef are exported in considerable quantities. The chief prod. in 1880 were 70,040 bush. of wheat, 311,464 of corn, 101,027 of oats, 38,912 of potatoes, 151,727 lbs. of butter, 39,423 of wool, and 43,820 galls. of sorghum molasses. Cap., Leavenworth. Val. of taxable prop. abt. \$3,200,000. Pop. 12,356 (of whom 210 for., and 2 colored).

Crawford, Iowa, a W. co.; area, 700 sq. m. It is intersected by Boyer R. and by the C.&N.W.R.R. The surface is almost level; the soil is productive. The chief prod. in 1880 were 704,020 bush. of wheat, 3,047,849 of corn, 234,810 of oats, 46,461 of rye, and 58,492 of barley. Cap., Deunion. Val. of taxable prop. abt. \$5,000,000. Pop. 12,413 (of whom 3,475 for., and 22 colored).

—tp., Madison co. Pop. 951.

—tp., Washington co. Pop. 265; of tp. 1,261.

Crawford, Kan., a S.E. co.; area, 504 sq. m. It is drained by small affluents of the Neosho R. It is a part of what was once known as the Cherokee Neutral Lands. The E. portion is underlaid with fine beds of bituminous coal. The soil is fertile. Stock-raising and farming are the principal pursuits. The chief prod. in 1880 were 19,493 bush. of wheat, 2,797,340 of corn, and 258,056 of oats. Cap., Girard. Val. of taxable prop. abt. \$6,000,000. Pop. 16,854 (of whom 1,201 for., and 100 colored).

—tp., Cherokee co. Pop. 893.

Crawford, N. C., tp., Currituck co. Pop. 2,350.

Crawford, O., a N. central co.; area, 412 sq. m. The surface is level, and the soil fertile. The S. portion is principally devoted to grazing, the N. to the production of wool. The P., Ft. W. & C.R.R. traverses it, and the C., C. & I.R.R. intersects the S.E. corner. The chief prod. in 1880 were 768,661 bush. of wheat, 1,216,462 of corn, 668,783 of oats, 92,227 of potatoes, 49,346 tons of hay, 814,554 lbs. of butter, and 385,835 of wool. Cap., Bucyrus. Val. of taxable prop. \$15,300,680. Pop. 30,583 (of whom 3,715 for., and 92 colored).

—tp., Coshocton co. Pop. 1,431. See NEW BEDFORD.

—p.tp., Wyandot co. Pop. 2,213. See CAREY.

Crawford, Pa., a N.W. co., bordering on Ohio, intersected by a number of creeks, including French Creek or Venango R.; area, 975 sq. m. It has an undulating surface, and a soil of good quality, but better adapted to grazing than to tillage. The forests are very extensive and abound in sugar maple. Iron ore and lime marl are found in considerable quantities. Lumber is abundant, and forms one of the chief articles of export. It is traversed by the Beaver and Erie Canal, the Oil Creek & Alleghany River R.R., the Atlantic & Great Western, the Franklin branch, and the Erie & Pittsburgh R.R.s. The chief prod. in 1880 were 232,147 bush. of wheat, 6,227 of rye, 829,369 of corn, 1,128,674 of oats, 128,807 of buckwheat, 347,236 of potatoes, 148,800 tons of hay, 280,016 lbs. of cheese, 2,348,433 of butter, 288,932 of wool, 83,661 of maple sugar, and 55,833 of hops. Cap., Meadville. Val. of taxable prop. abt. \$45,000,000. Pop. 68,604 (of whom 6,584 for., and 495 colored).

—tp., Clinton co. Pop. 463. See RANCH TOWN.

Crawford, Tex., p.o., McLennan co.

Crawford, Wis., a S.W. co., bordering on Iowa. Area, 612 sq. m. It is bounded on the W. by the Mississippi, and on the S.E. by the Wisconsin R., and intersected by the Kickapoo. The surface is hilly; the soil fertile. The chief prod. in 1880 were 335,279 bush. of wheat, 569,150 of corn, 374,364 of oats, 19,610 of rye, and 28,150 of barley. The M. & St. P.R.R. connects Milwaukee with Prairie du Chien, the cap. of the co. Val. of taxable prop. abt. \$5,000,000. Pop. 15,644 (of whom 3,603 for., and 47 colored).

 41 m. S.E. Chicago and 150 m. N.W. Indianapolis by
 the P.C. & St. L. R.R. It has 6 churches, 4 hotels, a nat.
 bank, a planing mill, a brewery, &c., and 4 wkly pa-
 pers. Pop. 1,709; of tp. 2,855.
Crown Point, Kan., p.o., Saline co.
Crown Point, N.Y., p.v. in and tp., Essex co.,
 on the W. Shore of Lake Champlain, 32 m. N. of
 Whitehall and 103 m. N.E. Albany by the D. & H. C.
 R.R. The tp. was first settled by the French, who in
 1731 built Fort St. Frederick (the "Crown Point" of
 history) on a long cape projecting into Lake Cham-
 plain, which became the seat of thriving settlements,
 which were destroyed in 1759, and again in 1777, by
 the British troops. In 1775 it was surprised and taken
 by the provincial forces. The British fort at Crown
 Point, which cost \$10,000,000, is now in a ruinous con-
 dition. The tp., which contains several villages, has
 extensive beds of rich iron ore and mineral phosphate
 of lime. Iron, lumber and wooden wares are manuf.
 on an extensive scale. It has a light-house. Pop. 650,
 of tp. 4,287.
Crown Point Centre, N.Y., p.v. in above
 tp., 34 m. N. of Whitehall. It has several factories
 and mills. ✚
Crown Rock, Oreg., p. tp., Wasco co. P. 97.
Crownsville, Md., p.v., Anne Arundel co.,
 6 m. N.W. Annapolis. ✚
Crow River, Minn., rises in Meeker co., by
 two large forks which flow E. and unite in Wright
 co. It then flows N.E. and falls into the Missis-
 sippi R. some miles above Anoka. Total length, including
 the North fork, abt. 150 m.
 —p.o., Meeker co.
 —tp., Stearns co. Pop. 137
Crows, a tribe of Indians, belonging to the great
 Dakota family, and called by themselves Absaroka
 or Upsaroka. They are tall, well made, and remark-
 able for the extraordinary length of their hair. They
 inherit the N. part of Wyoming and the S. part of
 Montana, and divided into Mountain and River
 Crows, and number abt. 3,500.
Crow's, Va., p.o., Alleghany co.
Crow's Landing, Cal., p.o., Stanislaus co.

Cumber, *Mch.*, p.h., Sanilac co., abt. 40 m. E. of Vassar.✦

Cumberland, *Ga.*, p.o., Camden co.

Cumberland, *Ill.*, a S.E. co., intersected by Embarras R.; area, 310 sq. m. It is diversified by forests and prairies, and the soil is fertile. The St. L., V., T.H.&I.R.R. passes through it, and the Chicago div. of the Illinois Central intersects the N.W. corner. The chief prod. in 1880 were 303,819 bush. of wheat, 1,186,633 of corn, 226,020 of oats, 137,201 lbs. of butter, and 49,106 of wool. Cap., Majority Point. Val. of taxable prop. abt. \$6,500,000. Pop. 13,762 (of whom 281 for., and 2 colored).

Cumberland, *Ind.*, p.v. in Warren tp., Marion co., 11 m. E. of Indianapolis by the P., C., & St. L. R.R. Pop. 209.

Cumberland, *Kan.*, p.o., Thomas co.

Cumberland, *Ky.*, a S. co., bordering on

Tennessee, bisected by Cumberland R.; area, abt. 375 sq. m. The surface is hilly near the river, and the soil moderately fertile. There is a remarkable oil spring near the river. The chief prod. in 1880 were 37,221 bush. of wheat, 315,602 of corn, 12,396 of oats, 88,396 lbs. of butter, and 671,970 of tobacco. Pork is also a staple prod. Cap., Burkesville. Val. of taxable prop. abt. \$1,800,000. Pop. 8,891 (of whom 4 for., and 1,565 colored).

Cumberland, *Me.*, a S.W. co., bordering on the Atlantic, and bounded N.E. by the Androscoggin R.; area, abt. 990 sq. m. The coast is indented by a number of bays, the principal of which, Casco Bay, affords facilities for navigation and the fisheries hardly surpassed on the Atlantic coast. The surface of the co. is diversified by several small lakes. From Sebago pond, the largest of these, a canal has been opened to the ocean. The soil is fertile and well cultivated. It is the most populous co. in the State, and is traversed by the Portland div. of the Grand Trunk R.R. of Canada, the Portland, Saco & Portsmouth, the Main Central, the Portland & Rochester, and the Portland & Ogdensburgh R.R.s. The chief prod. in 1880 were 20,531 bush. of wheat, 556,103 of potatoes, 93,619 of corn, 87,940 of oats, 17,624 of barley, 94,410 tons of hay, 85,186 lbs. of cheese, 1,244,722 of butter, and 61,493 of wool. There are numerous manuf., of which the greater part are in Portland, the cap. Val. of taxable prop. abt. \$85,000,000. Pop. 86,360 (of whom 10,650 for., and 530 colored).

—p.v. and tp. in the above co., on Casco Bay, 9 m. N.E. Portland by the G.T.R.R. of Canada. Pop. of tp. 1,619.

Cumberland, *Md.*, a city, the cap. of Alleghany co., is situated on the Potomac R. In pop. and commerce it is the second city in the State. It is the head of navigation of the Chesapeake and Ohio Canal (leading to Georgetown, *D. C.*) and the shipping point for the semi-bituminous coal produced in the vicinity, and which constitutes the principal traffic of that canal. It is 178 m. W. by N. from Baltimore, and is the point of intersection of the Baltimore & Ohio and Pittsburg & Connellsville R.R.s. The Cumberland & Penn. R.R., with its Eckhart branch, also centres here. Its manuf. industries comprise extensive rolling mills for rails and bars, and factories for other railroad iron, a factory for the manuf. of steel, foundries, machine shops, flour and cement mills, and numerous minor enterprises. It has 3 nat. banks, and 2 daily and 3 wkly papers. Its mercantile interests employ a large capital. It has several good hotels. Its churches are also numerous; some of them are fine specimens of architectural beauty. An admirable system of water works (on the Holly plan) furnishes an abundance of water and good fire protection. The steadily developing coal trade and its growing iron industries form the chief sources of its prosperity. Pop. 10,693.

Cumberland, *Miss.*, p.v. and tp., Sumner co., 20 m. N.W. Starkville. Pop. 90; of tp. 2,059.

Cumberland, *N. J.*, a S.W. co., bounded S.W. by Delaware Bay, and E. by Tuckahoe Creek; area, 480 sq. m. With the exception of some ranges of hills, the surface is generally level. E. of Cohansy Creek the soil is light, sandy, and overgrown with pine forests; W. of the creek it is composed of clay and sandy loam. Marl is obtained in this part, and Greenwich tp. has some iron mines. The West Jersey R.R., Bridgeton branch, and the Vineland R.R. traverse it. The chief prod. in 1880 were 157,952 bush. of wheat, 602,546 of corn, 633,24 of oats, 247,729 of Irish and 265,546 of sweet potatoes, 34,716 tons of hay, and 366,047 lbs. of butter. Cap., Bridgeton. Val. of taxable prop. \$14,087,771. Pop. 37,691 (of whom 1,884 for., and 1,965 colored).

—v. in Maurice River tp., Cumberland co. Pop. 212.

Cumberland, *N. C.*, a S. central co.; area,

abt. 1,680 sq. m. It is intersected by Cape Fear R., and in a great measure occupied by forests of pitch pine. Turpentine and lumber are exported by means of steamboats down Cape Fear R. The soil is generally good, and the surface considerably diversified. About half of the co. lies within the hilly and granite region of N.C.; the remainder is low and level. A railroad runs from Fayetteville to the coal fields in Chatham co. The chief prod. in 1880 were 282,423 bush. of corn, 13,791 of oats, 68,790 of sweet potatoes, and 3,946 bales of cotton. Cap., Fayetteville. Val. of taxable prop. abt. \$4,600,000. Pop. 23,836 (of whom 119 for., and 11,244 colored).

Cumberland, O., p.v. in Spencer tp., Guernsey co., abt. 12 m. S.W. Cambridge. It has several mills. Pop. 519.

Cumberland, Pa., a S.co., lying chiefly within the Kittatinny or Cumberland valley between Blue and South mountains; area, 545 sq. m. The Susquehanna R. flows along its E. boundary, and the Conodogwint Creek intersects it. Superior limestone exists here in profusion, and iron ore has been found. The soil is rich, and agriculture flourishes. It is traversed by several lines of RRs. The chief prod. in 1880 were \$34,517 bush. of wheat, 1,219,107 of corn, 937,166 of oats, 33,055 of rye, 188,367 of potatoes, 62,000 tons of hay, 1,045,483 lbs. of butter, and 35,177 of wool. Cap., Carlisle. Val. of taxable prop. abt. \$45,000,000. Pop. 45,978 (of whom 654 for., and 2,169 colored).

—tp., Adams co. Pop. 1,512.

—tp., Greene co. Pop. 1,868.

Cumberland, R. I., tp., Providence co. It contains several manuf. villages. Pop. 6,445. See ASHTON, &c.

Cumberland, Tenn., an E. central co., drained by Emery's R. and Cany Fork of the Cumberland; area, 700 sq. m. The surface is hilly or mountainous, and for a large part covered with forests. The chief prod. in 1880 were 127,636 bush. of corn, 10,826 of oats, 16,546 of potatoes, and 71,149 lbs. of butter. Cap., Crossville. Val. of taxable prop. abt. \$1,400,000. Pop. 4,538 (of whom 44 for., and 42 colored).

Cumberland, Va., a central co., bounded S.E. by the Appomattox and N. by the James, and intersected by Willis R.; area, 310 sq. m. The surface is uneven, and the soil was originally productive, but is now in some places worn out. The chief prod. in 1880 were 41,317 bush. of wheat, 148,119 of corn, 37,673 of oats, and 1,814,674 lbs. of tobacco. Cap., Cumberland Court-House. Val. of taxable prop. abt. \$2,300,000. Pop. 10,540 (of whom 30 for., and 7,419 colored).

—tp., New Kent co. Pop. 1,626.

Cumberland, Wis., p.v. and tp., Barron co., 15 m. N.W. Barron. Pop. 246; of tp. 642.

Cumberland Bay, N. Y., situated in Lake Champlain, opposite the v. of Plattsburg, is enclosed by Cumberland Head, a point of land on the W. shore, stretching 4 m. into the lake. Maconough gained his famous naval victory over the British, under Com. Downie, in this bay, on the 11th Sept., 1814.

Cumberland Centre, Me., p.v. in Cumberland tp., Cumberland co., 11 m. N. of Portland. It is the seat of Greeley Institute. ✱

Cumberland City, Ky., p.v., Clinton co., 11 m. N. of Albany. Pop. 94.

Cumberland City, Tenn., p.v., Stewart co., on the Cumberland R., 82 m. W. of Nashville. P. 96.

Cumberland Court-House, Va., p.v., cap. of Cumberland co., 50 m. S.W. Richmond. Pop. 100.

Cumberland Falls, Ky., p.o., Whitley co.

Cumberland Furnace, Tenn., p.v., Dickson co., 5 m. N.E. Charlotte. It contains a scattered pop., chiefly composed of employees of a large pig iron manuf. located here. Pop. 96.

Cumberland Gap, a narrow pass through the Cumberland Mts. on the line between Kentucky and Tennessee and at the W. extremity of Virginia. It was an important strategic point in the late civil war. This gap is a cleft 500 ft. deep, and in some places is only wide enough for a road. If well provisioned, it could be held by a small force against any opposing army.

Cumberland Gap, Tenn., p.o., Claiborne co.

Cumberland Hill, R. I., p.v. in Cumberland tp., Providence co., 11 m. N. of Providence.

Cumberland Iron-works, Tenn., p.o., Stewart co.

Cumberland Island, Ga., off Camden co., is the largest of the sea-islands, being 22 m. long and abt. 2 m. wide in average. It lays between St. Andrew's Sound on the N. and St. Mary's Sound on the S. The N. part is cut off by a small river, and called Little Cumberland Island. On the S. part is the Dungeness light-house.

Cumberland Mills, Me., p.v. in Westbrook tp., Cumberland co., 5 m. W. of Portland by the P. & R.R. Pop. 265.

Cumberland Mountains, that portion of the Appalachian group which ranges along the S. W. border of Virginia and the S.E. of Kentucky, and thence passes across the State of Tennessee into the N.E. part of Alabama. It spreads over a width of abt. 50 m., parallel ridges alternating with longitudinal valleys. The ridges rarely exceed 2,000 ft. in height. They are rocky and little cultivated, but the valleys are fertile. These mountains lie west of the range of granite and metamorphic rocks which compose the mountains on the W. borders of North Carolina and the N. part of Georgia. They are upon the range of the great coal formation of the Middle States, and essentially composed of the same groups of stratified rocks as those of the Alleghany mountains, Chestnut ridge and Laurel hill in Pennsylvania. The Tennessee R. and its branches drain the E. slopes until it crosses the range, flowing toward the Ohio, like the Cumberland.

Cumberland River, Ky. and Tenn., a large river, rises in Ky., on the W. slope of the Cumberland Mts., near the boundary of Va., and pursues a very circuitous course to the Ohio, which it enters abt. 12 m. above the entrance of the Tennessee. The elevation of its sources above its mouth is supposed to exceed 1,000 ft. Its course is first W. and S.W. until it enters Tenn., and bearing still S., passes round with an extensive sweep to Nashville. Its course is then N. W. until it re-enters Ky., and flows in this direction abt. 50 m. across the State to its junction with the Ohio. Not far from Williamsburg, Ky., it has a remarkable vertical fall of 60 ft. Its comparative length is abt. 450 m.; although from the great tortuousness of its channel, its entire length following the course of the stream, cannot be less than 600 m. Without reference to the inflections of the river, itself, the valley which it drains is 350 m. long, with an average breadth of 50 m., comprehending an area of 17,500 sq. m., which, in superfcies, is the third in rank of those of the tributaries of the Ohio. The greatest part of this valley lies between lat. 36° and 37°, and lon. 6° and 12° W. from Washington. In an ordinary stage of water, the river is navigable for vessels and large steamboats to Nashville, 200 m., and for boats of 15 tons 300 m. farther. For half its length it is navigable for small craft at all seasons. It is the second river in size that enters the Ohio, being inferior only to the Tennessee.

Cumberland Valley, Pa., p.v. and tp., Bedford co., at the base of Wells Mts., on Evitt's Creek, 4 m. E. of Hyndman Station. The v. is more generally known as Centreville. Pop. 108; of tp. 1,270.

Cumbyville, Ark., v. in Island tp., Desha co. ✱

Cumming, Neb., a N.E. co., intersected by the N. branch of the Elkhorn R.; area, 400 sq. m. The S. C.&P.R.R. passes through it. The surface is undulating prairie, interspersed with timbered bottom lands; the soil is fertile. The chief prod. in 1880 were 214,991 bush. of wheat, 880,413 of corn, 143,149 of oats, 14,018 of rye, and 7,494 of barley. Cap., West Point. Val. of taxable prop. abt. \$1,600,000. Pop. 5,677 (of whom 2,207 for., and 38 Indians).

Cuttyhunk, Mass., p.o., Dukes co.

Cuttyhunk Island, Mass., one of the Elizabeth islands, at the entrance of Buzzard's Bay. It has a fixed light in lat. 41° 24' 35" N., lon. 70° 56' 7" W.

Cuyahoga, O., a river which rises in Geauga co., runs S. through Portage co., then proceeds in a N.N.W. direction through Summit and Cuyahoga cos. to its entrance into lake Erie at Cleveland. It is one of the most important rivers in Northern O., its winding course being over 80 m. Its falls, which are numerous, afford fine mill seats, and it is but little affected by drought.

—a N.E. co., bordering on Lake Erie, and intersected by Cuyahoga R.; area, 426 sq. m. The surface is level and the soil fertile. It has rich mines of iron ore, which produced in 1880, 210,354 tons of iron. It is traversed by the Ohio Canal and numerous lines of R.R.s. centering at Cleveland. The chief prod. in 1880 were 176,494 bush. of wheat, 592,679 of corn, 640,428 of oats, 9,683 of rye, 8,127 of barley, 37,582 gallons of wine, 1,278,639 lbs. of cheese, 908,843 of butter, and 136,142 of wool. There are numerous manuf., mostly in Cleveland, the cap. Val. of taxable prop. 888,492,680. P. 196,943 (68,741 for., and 2,193 colored).

Cuyahoga Falls, O., p.v. ♦, Summit co., on Cuyahoga R., 34 m. S.E. Cleveland by the C.,M.V. & C. R.R. The falls of the Cuyahoga afford an excellent water power, which is extensively employed to operate several large paper mills, flour mills, and other manuf. The falls themselves present many wild and romantic features for the admiration of the lovers of nature. The river has a descent here, in the course of a little more than 2 m., of abt. 200 ft., over stratified rocks, which, for a portion of the distance, are worn away, or were originally separated by some convulsion of nature, into a chasm of nearly that depth. The ravine thus formed, with the rapids and cascades of the river passing through it, exhibits many points of bold and picturesque scenery. The v., which is coextensive with the tp., has a bank and a wkly paper. Pop. 2,294.

Cuyler, N.Y., p.v. and tp., Cortland co., 16 m. S.E. Cortland by the Cazenovia div. of the U.,L.&E. R.R. Pop. 134; of tp. 1,382.

Caylerville, N. Y., p.v. in Leicester tp., Livingston co., on Genesee R., 30 m. S.W. Rochester in the Dansville & Mt. Morris branch of the N.Y., L.E.&W.R.R. Pop. 254.

Cynthiana, Ind., p.v. in Smith tp., Posey co., 24 m. N.E. Mt. Vernon. It has a graded school. Pop. 313.

—in Shelby co. See **BLUE RIDGE**.

Cynthiana, Ky., a city, cap. of Harrison co., on the S. Fork of Licking R., and on the K.C.R.R., 66 m. S. of Cincinnati. It has 2 wkly papers and a nat. bank. It is noted for the manuf. of "Bourbon" whisky. There are 8 churches, a graded free school, a female college, 2 flouring mills, and 2 carriage-factories. It is in a very fertile agricultural district, and is the site of a famous race-course. It was attacked and taken by the Confederates, July 17, 1862; retaken by the Federals June 11, 1864, who, 3 days later, were driven out of the city by Gen. Burbridge, with heavy loss. Pop. 2,101.

Dade, Fla., the most S. co. of the State, bordering E. and S.E. on the Atlantic Ocean and straits of

Florida, and S.W. on the Gulf of Mexico; area, abt. 4,400 sq. m. Along the coast, which is indented by several bays, are numerous islands belonging to the co. Lake Okeechobee occupies the N.E. corner. The surface is low, level, and almost wholly occupied by the Everglades, a vast expanse of shallow water, dotted over with innumerable small islands. Proposals have been made to drain these by canals. During the rainy season they are quite impassable. The co. has one good harbor for vessels drawing 9 ft. of water, and on Cape Florida, at the entrance of this harbor, is a light-house. Cap., Miami. Pop. 174 (of whom 33 for., and 4 colored).

Dade, Ga., a N.W. co., bordering on Tennessee and Alabama; area, 160 sq. m. It occupies Lookout Valley and is encompassed by mts. of considerable height. Iron, coal, and other minerals are found in various parts. The A.&C.R.R. passes through it. The chief prod. in 1880 were 140,264 bush. of corn, 24,712 of wheat, and 20,084 of oats. Cap., Trenton. Val. of taxable prop. abt. \$900,000. Pop. 4,703 (of whom 31 for., and 1,085 colored).

Dade, Mo., a S.W. co.; area, 498 sq. m. The surface is diversified and the soil productive. Sac R., a tributary of the Osage, is the principal stream. The chief prod. in 1880 were 1,373,896 bush. of corn, 110,157 of wheat, 178,978 of oats, and 34,716 lbs. of butter. Cap., Greenfield. Val. of taxable prop. abt. \$3,500,000. Pop. 12,557 (of whom 94 for., and 247 colored).

Dakota, a N.W. territory, bounded N. by the Dominion of Canada. E. by Minnesota and Iowa. S. by Nebraska, and W. by Wyoming and Montana. It

is situated between lat. 42° 30' and 49° N., lon. 96° 20' and 104° W.; length, from N. to S., 450 m., breadth, from E. to W., 350 m.; area, 147,700 sq. m. The general surface of the country in the E. part is an undulating prairie, free from marsh and swamp, but traversed by many streams and dotted with a great number of lakes. A plateau of an average elevation of 1,450 ft. above the sea, and 15 or 20 m. in breadth, extends 200 m. from the S. along the E. border; a similar table land, of less elevation, occupies the middle and N. portion. In the S.W. part of the territory are the Black Hills and the "*mauvaises terres*" or "bad lands." The general topographical character of this section of the country is mountainous, though the hills do not rise to a great height above the creek or gulch levels, but in all cases rise very abruptly. The Missouri R., which is navigable throughout its entire course in Dakota, traverses the territory from the N.W. to the S.E. corner. Its largest tributary is the Yellowstone which, flowing through Montana, joins the Missouri on the border of the territory in lat. 48°. The Big Cheyenne flows E. to the Missouri in S. Dakota. In the E. portion of the Territory the most important tributaries are the Dakota or James R., which, after flowing nearly 400 m. S., unites with the Missouri a few miles below Yankton; the Vermilion and Big Sioux, which are each more than 150 m. long. The Red River of the North flows N. into British America, and forms the E. boundary of Dakota for nearly 250 m. It is navigated by the Hudson Bay Company's steamers nearly 200 m. S. in Dakota. Flowing into the Red R. are 8 rivers from the W., varying in length from 40 to 100 m. The territory has a great number of lakes and ponds, which afford a constant supply of good water. In the N. portion is a large body of salt water, 40 m. long and 12 m. in maximum breadth, called Minniwaken or Devil's lake. Here also are rich deposits of salt.—Good building stone is found in many localities. On the extreme W. boundary of the territory, divided by the line between Dakota and Wyoming, lie the coal fields. Little has as yet been done for their development, and not much can be said of them or their extent. Large quantities of the coal have been tested in the furnaces of the mills in the mining regions, and with proper means of transportation it would make by far the most economical fuel that can be used. The development of the mineral and agricultural resources of the Black Hills has proceeded with great rapidity. The character of the gold-bearing quartz is such that the expense of working it is light, and can be done with profit where the value of the ore is only \$12 per ton, though it is found continually worth from \$100 to \$200 per ton. Silver is found in abundance not far from Deadwood and other localities among the hills, and silver mining will doubtless be an industry equal to the gold-mining interest. For the year 1882 the yield of gold amounted to \$4,000,000; of silver, \$70,000. In the purity and abundance of the supply of water the Black Hills are unequalled by any region in the great West.—The climate is highly favorable to health, the atmosphere is dry and pure, and there is comparatively little rain. While the winters in the North are severe, the climate of the South is mild, and observations made at Fort Clark, lat. 47°, show the mean temperature for the 6 months, beginning with Dec., to have been but 1° lower than at New York. The soil of Dakota is a rich black loam, admirably adapted to agricultural purposes. This is true of almost every portion of valley or hill or mountain on which there is any soil whatever. A luxuriant growth of grass spreads over the glades in the forest, the park openings, the creek bottoms and hill sides, such as only grown on the richest soil. Splendid grass, pure water, excellent shelter from storms render some portions thoroughly fitted

for first-class stock farms, which before many years will furnish beef, mutton, butter, cheese and wool for a nation. The outlying plains country offers immense advantages to the large stock owner.—The state of agriculture in some of the eos. shows a very rapid improvement. In the country around Bismarck, for instance, 25 bush. of wheat per acre were raised in 1880; oats, 50 bush. per acre; corn, 105 bush. On some land 150 to 300 bush. of potatoes grew, and all the vegetables are abundant and of remarkable fine flavor. The wheat is of superior quality and makes good flour. The chief agricultural prod. of Dakota for the year 1880 were 16,156 bush. of barley, 90,852 of corn, 2,217,132 of oats, 24,359 of rye, and 2,830,280 of wheat.—The manufacturing industry is yet undeveloped. There is, however, abundant water-power, which invites and will facilitate the establishment of manufacturers. In 1882, 7 lines of railroads had 1,638 m. in operation; other lines were in process of construction, and still others projected.—The settlements in the territory are confined to three distinct localities. The settlements in S.E. Dakota, in which is the present capital, extend from Nebraska, mainly in a N. direction, up the Big Sioux, the Vermilion and the James Rs. They are spreading along the border of N.W. Iowa and S.W. Minnesota, as far N. as Kampeka lake and as far W. as the James R. The settlements in the N. part of the Territory are along the W. bank of the Red River of the North, from Richland co. opposite Breckenridge to Pembina, on the line of the British possessions, crossing the Northern Pacific railroad at Fargo, and extending W. along the line of that road to Bismarck. The other settlement is in the Black Hills, which now has a pop. estimated at 25,000. These three sections of Dakota are not only remote from each other, but their interests are not identical. A bill was introduced into Congress in 1881 providing for the division of the territory by a line through its centre E. and W., the S. portion to be admitted as a State into the Union, the N. part to be a Territory under the name of Pembina. No conclusive action was taken upon the measure.—Dakota has the usual territory government—a governor and executive officers, and a legislature of 13 councilmen and 26 representatives. Abundant provision has been made for all interests of education. The Indian reservation in Dakota, W. of the Missouri R., contains 56,000 sq. m., and is chiefly inhabited by the Sioux. The territory is divided into 95 eos., of which only a part are organized. The principal towns are Bismarck, Central City, Deadwood, Fargo, Lead City, and Yankton (the cap.).—Dakota, which formed a part of the Louisiana purchase of 1803, was organized as a Territory March 2, 1861. The first permanent settlements were made in 1859. In the summer of 1863 the settlers suffered greatly from hostile bands of Sioux. Gen. Sully, with 2,000 troops, routed the savages at Whitestone in June, and since then they have been held in check. The first legislature met on the 17th of March, 1862. Large discoveries of gold in the Black Hills were reported during 1874-5. Negotiations carried on with the chiefs who visited Washington in the summer of 1875 were unsuccessful; but past experience teaches that the extinguishment of the Indian title to the lands is only a question of a little time.—Pop. in 1860, 4,837; in 1870, 14,181; in 1880, 135,177 (of whom 82,296 males, and 52,882 females; 83,382 whites, and 51,795 of foreign birth; 133,147 natives, 401 colored, 238 Chinese, and 1,391 Indians). Emigration has been of late and continues to be so large, that the pop. in 1883 can be safely estimated at 250,000.

Dakota, Ill., p.v. and tp., Stephenson co., 96 m. S.W. Milwaukee. Pop. 257; of tp. 887.

Dakota, Minn., a S.E. co., bounded N. by the

Mississippi, N.W. by St. Peter's or Minnesota R., and S.E. by the Cannon; area, 550 sq.m. The surface is nearly level and the soil fertile. Three lines of R.R.s. traverse the co. The chief prod. in 1880 were 1,323,975 bush. of wheat, 467,135 of corn, 731,897 of oats, 67,892 of barley, 96,762 of potatoes, and a considerable quantity of butter. Cap., Hastings. Val. of taxable prop. abt. \$9,200,000. Pop. 17,391 (of whom 5,130 for., and 92 colored).

—p.v. in New Hartford tp., Winona co., on the Mississippi R., 5 m. N.W. of La Crosse by the C., M. & St. P. RR. Pop. 81.

Dakota, Neb., a N.E. co., separated from Dakota Territory on the N.E. and Iowa on the E. by the Missouri R.; area, 400 sq.m. The surface consists of rolling prairies, bottom lands, and groves of timber. The soil is fertile. The chief prod. in 1880 were 496,465 bush. of corn, 83,468 of wheat, 35,964 of oats, and 106,809 lbs. of butter. Cap., Dakota. Val. of taxable prop. abt. \$900,000. Pop. 3,213 (of whom 603 for., and 11 colored).

—p.v. ♦ and tp., Dakota co., on the Missouri R., 120 m. N. of Omaha by the Nebraska div. of the C., St. P., M. & O. RR. It has 2 wky papers, and a U. S. land office. Pop. 364; of tp. 830.

Dakota, Wis., p.v. and tp., Waushara co., 30 m. N. of Portage City. Pop. of tp. 537.

Dakota River, RIVIERE À JACQUES, or JAMES RIVER, *Dak.*, rises in the N.E. part of the territory. It flows nearly S., and enters the Missouri R. abt. 8 m. below Yankton, after a course of abt. 600 m.

Dakotah, Iowa, p.v., cap. of Humboldt co., 15 m. N. of Fort Dodge by the M. & St. L. RR. It has a wky paper. Pop. 248.

Dana, Ind., p.v. in Helt tp., Vermillion co., 75

m. W. of Indianapolis by the I., D. & S. RR. Pop. 183.

Dana, *Iowa*, p.o., Greene co.

Dana, *Mass.*, p.tp., Worcester co., 30 m. N.W. Worcester. Pop. 736.

Dana, *Mo.*, p.o., Bates co.

Dana, *Neb.*, p.o., York co.

Danborough, *Pu.*, p.v. in Plumstead tp., Bucks co., 3 m. N. of Doylestown. Pop. 80.

Danburg, *Ga.*, p.o., Wilkes co.

Danbury, *Conn.*, a p. borough in Danbury tp., one of the county seats of Fairfield co., 28 m. W. by N. from New Haven, and 53 m. N.N.E. New York. It is the terminus of the D. & N. RR., and of a branch of the Housatonic line. Still R., an affluent of the Housatonic, flows through the town and furnishes good water power. The village is built principally on a single street, $1\frac{1}{2}$ m. long, and presents a handsome appearance. Lake Keousha, abt. 2 m. distant, is a favorite resort for boating and fishing. Danbury has long been noted for its manuf. of hats, the first factory having been established in 1780. There are now ten companies engaged in the business, having an aggregate capital of \$500,000. The Danbury shirt company produces 230,000 shirts annually. The manuf. of sewing machines is also carried on. There are 2 nat. banks, a public library, a high school & wklly papers, and 9 churches. Danbury was settled in 1684. The town was attacked and burned by the British in 1777, when Gen. Wooster, the American commander, was mortally wounded. Pop. 9,000; of tp. 11,649.

Danbury, *Iowa*, p.v. in Liston tp., Woodbury co., 7 m. N.E. Stapleton by the Maple River branch of the C. & N. W. RR. Pop. 69.

Danbury, *Neb.*, p.v. and tp., Red Willow co., 15 m. S. by W. from Indianola. Pop. of tp. 521.

Danbury, *N.H.*, p.v. and tp., Merrimack co., 39 m. N.W. Concord by the N. RR. Pop. of tp. 760.

Danbury, *N.C.*, p.v., cap. of Stokes co., on the Dan R. It has a wklly paper. Pop. 144.

Danbury, *O.*, p.tp., Ottawa co. Pop. 1,400.

Danby, *Kan.*, p.o., Ness co.

Danby, *Mich.*, p.v. and tp., Ionia co., on the Grand R., $7\frac{1}{2}$ m. S.W. Portland. Pop. of tp. 1,423.

Danby, *Neb.*, p.v., York co., 13 m. N. of York. Pop. 70.

Danby, *N.Y.*, p.v. and tp., Tompkins co., 22 m. N.E. Elmira.

Danby, *Vt.*, p.v. and tp., Rutland co., on Otter Creek, 18 m. S. of Rutland by the B. & R. RR. The tp. has numerous cheese factories and a marble quarry. Pop. 325; of tp. 1,202.

Danby Four Corners, *Vt.*, p.v. in Danby tp., Rutland co. It has a wklly paper. Pop. 47.

Dancing Branch, *Tenn.*, p.o., Monroe co.

Daucyville, *Tenn.*, p.v., Haywood co., 14 m. S.W. Brownsville. Pop. 203.

Dau'dridge, *Tenn.*, p.v. in Jefferson co., 26 m. N.E. Knoxville. It has a female institute. P. 431.

Dauc, *Ill.*, v. in Creek tp., DeWitt co. Pop. 95.

Dauc, *Wis.*, a S. co., area, 1,235 sq. m. The surface is moderately hilly, and the soil calcareous and fertile. In the center part lie the Four Lakes, the longest of which is 6 m. long; they are connected by short channels, and have their outlet through Catfish R. In the W. part is a hill abt. 2,000 ft. high, called Blue Mound. The greater part of the land is occupied by prairies and oak openings. The chief prod. in 1880 were 2,983,259 bush. of corn, 883,870 of wheat, 2,295,708 of oats, 84,890 of rye, 480,624 of barley, 421,627 of potatoes, 1,472,428 lbs. of butter, 283,783 of wool, 77,825 of hops, and 5,371,242 of tobacco. Cap., Madison. Val. of taxable prop. abt. \$38,000,000. Pop. 53,234 (of whom 16,035 for., and 88 colored).

Dauc, or DANE STATION, *Wis.*, p.v. and tp., Dane co., 14 m. N.W. Madison by the C. & N. W. RR. Pop. 125; of tp. 1,161.

Dane Prairie, *Minn.*, tp., Otter Tail co. Pop. 437.

Dan'ford, *O.*, p.o., Guernsey co.

Danforth, *Ill.*, (p.o. name DANFORTH STATION) v. and tp., Iroquois co., 77 m. S.W. Chicago by the I. & C. RR. It has a bank. Pop. 207; of tp. 1,582.

Danforth, *Iowa*, p.o., Johnson co.

Danforth, *Me.*, p.v. and tp., Washington co., 83 m. N.E. Bangor by the E. & N. A. RR. P. of tp. 612.

Danforth, *N.H.*, p.o., Hillsborough co.

Daniel, *Miss.*, p.v., Smith co.

Daniel, *Va.*, p.o., Orange co.

Daniels, *W.Va.*, p.o., Raleigh co.

Daniell's Mills, *Ga.*, p.o., Douglas co.

Danielson, *Minn.*, tp., Meeker co. Pop. 421.

Danielsonville, *Conn.*, p.v. in Killingly tp., Windham co., 10 m. N. of Plainfield by the Norwich div. of the N. Y. & N. E. RR. It has a nat. and a savings bank, and 2 wklly papers. Manuf., cotton goods, &c. Pop. 3,000.

Danielsville, *Ga.*, p.v., cap. of Madison co., 8 m. S.W. Royston Station. Pop. 175.

Danielsville, *Pu.*, p.v. in Leligh tp., Northampton co., 5 m. N.E. Slatington Station. P. 130.

Danielsville, *Tenn.*, p.o., Dickson co.

Danley, *Ark.*, tp., Faulkner co. Pop. 222.

Dan'nbrog, *Neb.*, p.v. and tp., Howard co., 12 m. S.W. St. Paul. Pop. 53; of tp. 1,083.

Dannemo'ra, *N.Y.*, p.v. in Clinton co., 15 m. W. of Plattsburg. The Clinton State Prison is situated here. Pop. 577; of tp. 2,962.

Dannevirke, *Neb.*, p.o., Howard co.

Dan River, *N.C.* and *Va.*, rises in Patrick co., Va., flows N.E. and then S. for abt. 200 m., and unites with Staunton R. in Mecklenburg co., Va., to form the Roanoke R. It has falls of 23 ft. at Danville, but by a canal constructed around them, is navigable 100 m. from its mouth.

Dan River, *N.C.*, tp., Caswell co. Pop. 2,127.

Dan River, *Va.*, tp., Patrick co. Pop. 3,702.

—tp., Pittsylvania co. Pop. 8,382.

Dan's Fork, *Mo.*, rises in Lafayette co., flows E., and unites with the Big Black R. in Saline co.

Dansville, *Mich.*, p.v. in Ingham tp., Ingham co., 67 m. N.W. Detroit. It has several factories. Pop. 440.

Dansville, *N.Y.*, p.v. in North Dansville tp., Livingston co., on Canaseraga Creek, 30 m. S. of Rochester by the Dansville and Mount Morris branch of the N. Y., L. E. & W. RR. It has 2 wklly papers, the Dansville Seminary, 1 nat. bank and another bank, several paper and flouring mills, &c. Pop. 3,625.

—tp., Steuben co. Pop. 1,788. See ROGERSVILLE.

Dansville, or DANVILLE, *O.*, (p.o. name ALBERTA), v. in Salem tp. Meigs co., 14 m. W. of Pomeroy. Pop. 35.

Danube, *N.Y.*, p.tp., Herkimer co. Pop. 1,235. See NEWVILLE.

Danvers, *Ill.*, p.v. and tp., McLean co., 11 m. N.W. Bloomington. It has a graded school. Pop. 460; of tp. 1,755.

Danvers, *Mass.*, p.v. and tp., Essex co., 19 m. N.E. Boston by the B. & M. RR. It is the seat of the State Insane Asylum, and has 1 nat. and 1 savings bank, abt. 10 churches, a public library and 2 wklly papers. Manuf., boots and shoes, carpets, &c.

Danvers Centre, *Mass.*, p.v. in above tp., 5 m. N.W. Salem. Pop. 385.

Danvers Port, *Mass.*, p.v. in above tp., on an inlet of the ocean, 17 m. N.E. Boston. It has a high school. Pop. 574.

Danville, *Ala.*, p.v., Morgan co., 14 m. S.W. Decatur. Pop. 200.

Danville, *Ark.*, p.v. in Spring Creek tp., cap. of Yell co., on the Petit Jean R., 75 m. N.W. Little Rock. Pop. 200.

Danville, Cal., p.v., Contra Costa co., 15 m. E. of Oakland. Pop. 87.

Danville, Dak., p.v., Turner co., 4 m. S.W. Swan Lake. ✦

Danville, Ill., a city and the cap. of Vermillion co., on Vermillion R., 16 m. N.W. of its confluence with the Wabash, 125 m. S. of Chicago, and 4 m. W. of the Indiana State line. It was settled in 1828, and its rapid growth and importance are due to its situation on the N.E. outcrop of the central (bituminous) coal fields, the mining of which is its chief source of wealth. It is also an important railroad center, connecting with all points by the C., D. & V.; W., S. L. & P.; the E., T. H. & C.; the I., B. & W.; and the D. & S. W. R.R.s. There are 13 churches, a high school, a nat. bank, flouring mills, 2 foundries, 5 carriage and wagon manuf., 2 planing mills, car and locomotive works, and other industries. Danville is surrounded by a rich and densely settled agricultural region, with an abundance of timber, building stone, and water. Pop. in 1870, 4,751; in 1880, 7,735.

Danville, Ind., p.v. ✦ in Centre tp., cap. of Hendricks co., on White Lick Creek, 18 m. W. of Indianapolis by the I. & S. T. L. R.R. It has 2 wkly papers, 1 nat. and another bank, &c. Pop. 1,598.

Danville, Iowa, p.v. ✦ and tp., Des Moines co., 13 m. N.W. Burlington by the C., B. & Q. R.R. Pop. 271; of tp. 1,459.

—tp., Worth co. Pop. 529.

Danville, Ky., p.v. ✦, cap. of Boyle co., 14 m. S. of Cincinnati by the C. S. R.R. It has a wkly paper, a nat. and another bank, and is the seat of a State asylum for deaf-mutes, the Centre College, the Caldwell Female Institute, and the Collegiate Southern Institute. Pop. 3,074.

Danville, Me., p.v. in Auburn tp., Androscoggin co., 29 m. N. of Portland by the M. C. R.R. P. 85.

Danville, Minn., p.tp., Blue Earth co. P. 707.

Danville, Miss., p.o., Alcorn co.

Danville, Mo., p.v. in Danville tp., cap. of Montgomery co., 30 m. W. of St. Louis. It has a wkly paper. Pop. 239; of tp. 2,655.

Danville, N.H., p.tp., Rockingham co. P. 613.

Danville, N.J., p.o., Warren co.

Danville, O., v., Highland co., 43 m. N.E. Cincinnati. Pop. 139.

—p.v. ✦ in Union tp., Knox co., 85 m. S.W. Cleveland by the C., M. V. & C. R.R. Pop. 254.

—v. in Range tp., Madison co., abt. 11 m. S. of London. Pop. 125.

Danville, Pa., p.borough ✦, cap. of Montour co., on the N. branch of the Susquehanna and on the Lackawanna and Bloomsburg, the Philadelphia and Reading, and the Danville, Hazleton and Wilkes Barre R.R.s., 50 m. S.W. of Wilkes Barre and 67 m. N. by E. from Harrisburg. It contains 16 churches, 2 nat. banks, 1 daily and 4 wkly papers, a large steam printing office, 7 blast furnaces, 6 rolling mills, and numerous other manuf. Good iron ore, limestone, and anthracite coal are found in the vicinity. P. 7,839. —tp., Montour co. Pop. 8,346.

Danville, Tenn., p.v., Houston co., on the Tennessee R., 45 m. S.W. Clarksville. Pop. 77.

Danville, Tex., p.o., Comal co.

Danville, Tex., v., Montgomery co., 45 m. N. of Houston. ✦

Danville, Va., p.v. and tp., Caledonia co., 33 m. N.E. Lumburg by the S. T. J. & L. C. R.R. It has a wkly paper, a graded school and a nat. bank, and a sulphur spring. Pop. 645; of tp. 2,003. See NORTH DANVILLE and WEST DANVILLE.

Danville, Va., p.v. ✦ in Dan River tp., Pittsylvania co., on the falls of Dan R., at the terminus of the Lynchburg and Danville R.R., and on the Richmond, Danville and Piedmont RR., 141 m. W.S.W. of Richmond, in the midst of one of the finest tobacco regions in the world. Danville has assumed con-

siderable importance during the past few years. In 1880 it had 9 tobacco warehouses, 75 tobacco factories, 75 assorting factories, and the value of best tobacco sold during that year was \$3,775,500. Leaf tobacco is largely exported. It has 1 nat. and 2 other banks, and 2 wkly papers, and is the seat of Roanoke Female College and another female institution. Pop. 7,526.

Danville, Wis., p.v. in Elba tp., Dodge co., 15 m. N.W. Watertown. It has a flour mill. Pop. 122.

Danway, Ill., p.v. in Miller tp., La Salle co., 27 m. S.W. Aurora. Pop. 47.

Daphne, Ala., p.v., cap. of Baldwin co., on Mobile Bay, about 7 m. E. of Mobile by water. It has a good beach for bathing, and is much resorted to in summer and winter. Pop. 185.

D'Arbonne, La., p.o., Union co.

D'Arbonne Bayou, La. This stream rises in Claiborne parish, flows S.E., and empties into the Ouachita R. in Ouachita parish.

Darboy, Wis., p.o., Calumet co.

Darby, O., tp., Madison co. Pop. 1,126. See PLAIN CITY.

—tp., Pickaway co. Pop. 1,500. See PALESTINE.

—tp., Union co. Pop. 1,171. See UNIONVILLE.

Darby, Pa., p.borough and tp., Delaware co., on Darby Creek, 6 m. S.W. Philadelphia, with which it is connected by a horse railroad. Manuf., cotton and woolen mill, and a worsted and silk yarn factory. Pop. of borough 1,779; of tp. 1,245.

Darby Creek, O., rises in Union co., and after a S.E. course of 60 m., enters the Sciota, nearly opposite Circleville.

Darby Creek, Pa., rises in Delaware co., flows S.E., forming part of the limits of Philadelphia, and empties into the Delaware R., 8 m. below Philadelphia.

Darby's, Ala., tp., Pike co. Pop. 2,000. See HENDERSON.

Darbyville, Fla., p.tp., Baker co. Pop. 547.

Darbyville, O., p.v. in Muhlenberg tp., Pickaway co., on Darby Creek, 20 m. S.W. Columbus. Pop. 262.

Dardanelle, Ark., p.v. ✦ and tp., Yell co., on the Arkansas R., 65 m. N.W. Little Rock. It has a wkly paper and a seminary. Pop. 748; of tp. 2,487.

Dardenne, Mo., p.tp., St. Charles co. P. 4,655.

Dare, N.C., a N.E. co., bounded N. by Albemarle Sound, W. by Alligator R., and including several low, sandy islands along the Atlantic coast; area, abt. 350 sq.m. The main portion is swampy, and forests of cypress, red cedar, and pine abound. Cap., Manteo, on Roanoke Island. Pop. 3,245 (of whom 1 for., and 367 colored).

Daretown, N.J., p.v. in Upper Pittsgrove tp., Salem co., 31 m. S.W. Camden by the Phil. & Salem branch of the W. J. R.R. Pop. 385.

Darien, Conn., p.v. and tp., Fairfield co., pleasantly situated on Long Island Sound, 35 m. S.W. New Haven. It has a female seminary and a library. P. 460.

Darien, Ga., p.v. ✦, cap. of McIntosh co., on the Altamaha R., 60 m. S.W. Savannah. It has a wkly paper, and carries on a large lumber trade. Pop. 1,543.

Darien, N.Y., p.v. and tp., Genesee co., 26 m. E. of Buffalo. Pop. 106; of tp. 2,046.

Darien, Wis., p.v. and tp., Walworth co., 50 m. S.W. Racine by the Racine and Southwestern div. of the C., M. & S. T. P. R.R. It has a graded school. Pop. 427; of tp. 1,394.

Darien Centre, N.Y., p.v. in Darien tp., Genesee co., 12 m. S.W. Batavia. Pop. 197.

Darius, Tenn., p.o., Rhea co.

Darlington, S.C., a N.E. co., bounded N.E. by the Great Pedee, S.W. by Lynch's Creek, and N.W. by Cedar Creek; area, 800 sq. m. It is well watered, and the river lands are very fertile: the uplands are inferior, but occasionally well timbered. Reclamations from the borders of the Pedee, Lynch's and Black Rs., have yielded vast bodies of rich swamp lands for cultivation. The surface is undulating, sometimes rising into hills of 300 ft. The Pedee is navigable for steamers its whole length, and Lynch's for 80 m. from its junction with the former river. The co. is traversed by 3 lines of RRs. The chief prod. in 1880 were 440,892 bush. of corn, 88,216 of oats, 136,736 of peas and beans, 195,657 of sweet potatoes, 54,719 lbs. of rice, and 23,946 bales of cotton. Cap., Darlington Court-House. Val. of taxable prop. abt. \$6,500,000. P. 34,485 (122 for., and 21,558 colored). —tp. in above co., Pop. 2,816.

Darlington, Wis., p.v. in Darlington tp., cap. of Lafayette co., on Pecatonica R., 16 m. S.E. Warren by the Mineral Point div. of the C.M. & St.P. RR. It has 2 wkly papers and 2 banks. Pop. 1,372; of tp. 2,599.

Darlington Court-House, S.C., p.v. in Darlington tp., cap. of Darlington co., 75 m. E.N. E. Columbia, and 30 m. S. of Cheraw. It has a wkly paper and 2 steam-mills. Pop. 1,350; of tp. 2,816.

Dauphin Island (GREAT and LITTLE), Ala., two sandy islands, which lie at the mouth of Mobile Bay, and are attached to Mobile co.

Davenport, Cal., p.o., Santa Cruz co.

Davenport, Iowa, a city and river port, cap. of Scott co., is situated on the W. bank of the Mississippi, abt. 110 m. above Keokuk (following the course of the river) and 184 m. W. by S. of Chicago. It occupies the base and higher parts of a bluff which rises gradually and extends 3 m. along the river. The bluff commands extensive and beautiful views of the river and of the town of Rock Island on the opposite side of the Mississippi. The C.R.I. & P. RR. here crosses the river on a iron bridge, which cost over \$1,200,000. This city is the southern terminus of the D. & St.P. and of the C. & S. W. RR. It contains 25 churches, Griswold College, a business college a city training

school, the largest and most successful system of common schools in Iowa, the Roman Catholic academy of the Immaculate Conception, an opera-house, 3 nat. and 2 savings banks, 4 daily, 10 wkly and 1 semi-monthly papers. Manuf., machinery, woolen goods, farming implements, glue, corn-sugar, furniture, fine lumber and fine flouring-mills. Davenport has fine water-works, which cost \$600,000, comprising 20 m. of pipe and 260 hydrants, horse railroads, five public parks, a fire department and gas-works, and is the market of a large farming region. Coal abounds in the vicinity. Large quantities of grain are shipped here. Pop. 21,834; of tp. 25,539.

Davenport, Mo., p.o., Dade co.

Davenport, Nb., p.o., Thayer co., 30 m. S.E. Hastings by the U.P.R.R. Pop. 223.

Dayton, N.Y., p.v. and tp., Cattaraugus co., 106 m. N.W. Hornellsville by the N.Y., L.E. & W. RR. It has a bank, 3 cheese factories, and several lumber mills. Pop. 367; of tp. 1,705.

Dayton, N.C., Wake co.

Dayton, O., a city, the cap. of Montgomery co., on the E. bank of the Great Miami, which is there joined by the Mad, 46 m. N. of Cincinnati, and 135 m. S. of Toledo. The Miami Canal, which connects the Ohio R. with Lake Erie, passes by the town; and this means of communication, along with that of the 8 RRs. of which it is the terminus, has contributed greatly to the prosperity of the place. The city is very regularly laid out, and the houses and public edifices are better than in many other W. cities, partly owing to the comparatively moderate price of the white limestone, or marble, which abounds in its neighborhood. The principal public buildings are the county court-house—designed after the Parthenon at Athens, and erected at a cost of about \$150,000—and the market-house, containing within its walls a city hall and the council chamber. There are,

besides numerous churches, a high school, and the female Cooper Academy; also a public library, 3 nat. and 4 other banks, 8 local insurance companies, and 27 newspapers and periodicals (of which 5 daily). Of charitable institutions the orphan asylum, the almshouse, and a lunatic asylum may be mentioned, and in the vicinity there is the Central National Soldiers' Home. A considerable manufacturing industry is carried on, which is facilitated by a copious supply of water conveyed from the Mad. There are several machine shops, and works for the manufacture of agricultural implements, railway carriages, paper, cotton, &c. Dayton was first settled in 1796, and was incorporated as a city in 1841. Pop. in 1850, 10,977; in 1860, 20,081; 1870, 30,473; and in 1880, 38,677.

Dayton, Oreg., p.v. in Yam Hill co., on Yam Hill R., 35 m. S.W. Portland. P. 368; of tp. 819.

Dayton, Pa., p.v. in Wayne tp., Armstrong co., 17 m. from Millersburg by the Summit branch of the N.J.C. RR. It is the seat of the Dayton and Glad Run academies and a soldiers' orphan school. Pop. 579.

Dayton, Tenn., p.v., Rhea co., on Big Richland Creek, 7 m. S.W. Washington, and 38 m. N.E. Chattanooga. It has 4 churches and a flour mill. P. 200.

Dayton, Tex., p.v., Liberty co. Pop. 348.

Dayton, Va., p.v. in Rockingham co., abt. 30 m. N.E. Staunton. It has a seminary. Pop. 258.

Dayton, Wash., a thriving p.v., cap. of Columbia co., in the splendid Touchet Valley, 31 m. N.E. Walla Walla. It has a wkly paper. Manuf., woolens, lumber, flour, &c. Pop. 996.

Dayton, W. Va., p.o., Harrison co.

Dayton, Wis., p.v. in Exeter tp., Green co., 15 m. N.W. Broadhead. Pop. 113.

—tp., Richland co. Pop. 1,109. See BOAZ.

Deerfield, Va., p.v., Augusta co., 23 m. N.W. Staunton. Pop. 55.

Deerfield, Vt., a beautiful and rapid stream, which rises in the high grounds of Windham co., and flowing S.E., falls into the Connecticut R. near Greenfield, Mass. Its passage through the mountains is very romantic. Length, abt. 75 m.

Deerfield, Wis., p.v. and tp., Dane co., 20 m. E. of Madison. Pop. 106; of tp. 972.

—tp., Waushara co. Pop. 307.

Deerfield Centre, N.H., p.v. in Deerfield tp., 16 m. S.E. Concord. It has several mills.

Deerfield Prairie, Ill., p.o., DeKalb co.

Deerfield Street, N.J. See DEERFIELD.

Deer Ford, La., p.o., E. Baton Rouge parish.

Deer Grove, Ill., p.v. in Hahnman tp., Whitesides co., abt. 30 m. W. of Mendota. Pop. 45.

Deer Head, Ala., p.o., DeKalb co.

Deering, Me., tp., Cumberland co., adjoining Portland. It contains quite a number of manufacturing villages. Pop. 4,324. See EAST DEERING.

Deering, Iowa, p.o., Winnebago co.

Deering, N.H., p.tp., Hillsborough co. P. 674.

Deer Island, Mass., is in the harbor of Boston. It contains the city almshouse, a house of industry, and other charitable institutions. Pop. 1,016.

Deer Isle, Me., p.v. and tp., Hancock co. The tp. consists of Great and Little Deer Isles and Isle au Haut, besides smaller islands on Penobscot Bay, and has important fisheries. Lobsters are here canned for market. By steamer it is 130 m. from Portland. Pop. of tp. 3,267. See GREEN'S LANDING.

Deer Lake, Mich., p.o., Lake co.

Deer Lick, O., p.o., Williams co.

Deer Lick, W. Va., p.o., Mason co.

Deer Lodge, Mont., a N.W. co., bounded N. by British America; area, 6,500 sq. m. It is watered by tributaries of the Missouri and Columbia Rs. There are grazing and agricultural lands on both sides of the Rocky Mts., which intersect it from S.E. to N.W. It contains the richest mining territory of Montana, and produces more gold than any other county. The chief prod. in 1880 were 14,193 bush. of wheat,

147,874 of corn, 5,844 of barley, and 59,645 lbs. of butter. Cap., Deer Lodge City. Val. of taxable prop. abt. \$3,000,000. Pop. 8,876 (of whom 710 Chinese).

Deer Lodge City, Mont., p.v. and cap. of Deer Lodge co., on Deer Lodge Creek (an affluent of Hell Gate R.). 48 m. S.W. Helena. It has a wkly paper, a nat. bank, a Catholic hospital, and contains the Territorial penitentiary. Pop. 941.

Deer Park, Ala., v., Washington co., 44 m. N. of Mobile by the M.&O.R.R. ✚

Deer Park, Ill., p.tp., La Salle co. Pop. 850.

Deer Park, Md., p.v., Garrett co., 48 m. S.W. Cumberland by the B.&O.R.R. It is situated in a mountainous and picturesque region, and is a favorite summer resort. Pop. 195.

Deer Park, N.Y., tp., Orange co. Pop. 11,420. See PORT JERVIS.

—p.v. in Babylon tp., Suffolk co., 36 m. E. of Brooklyn. Pop. 275.

Deiblers, Pa., p.o., Northumberland co.

De Kalb, Ala., a N.E. co., bordering on Geor-

gia, drained by Willis Creek, an affluent of Coosa R., and Town Creek, of the Tennessee; area, abt. 720 sq. m. The valley of Willis Creek, abt. 60 m. long by 5 m. broad, enclosed by Lookout Mt. on the S.E. and Sand Mt. on the N.W., is fertile and well cultivated. The co. is well supplied with water power, and abounds with magnificent scenery. The chief prod. in 1880 were 37,382 bush. of wheat, 322,259 of corn, 34,843 of oats, 28,918 of sweet potatoes, and 2,859 bales of cotton. Cap., Lebanon. Val. of taxable prop. abt. \$1,200,000. Pop. 12,675 (of whom 21 for., and 681 colored).

De Kalb, Ga., a N. W. co., bounded N. by Chattahoochee R.; area, 291 sq. m. It has an elevated and somewhat uneven surface. Stone Mt., in the E. part, is one of the greatest natural curiosities in the State. The soil of the river bottoms is remarkably rich. Iron is found, granite is abundant, and gold has been discovered in small quantities. At Decatur are chalybeate springs. The chief prod. in 1880 were 49,579 bush. of wheat, 243,268 of corn, 52,842 of oats, 16,715 of sweet potatoes, and 8,008 bales of cotton. Cap., Decatur. Val. of taxable prop. abt. \$2,000,000. Pop. 14,497 (of whom 44 for., and 4,544 colored).

De Kalb, Ill., a N. co.; area, 648 sq. m. It is drained by Kishwaukee and Indian creeks. The surface is undulating; the soil fertile. The greater part of it is prairie. The chief prod. in 1880 were 75,630 bush. of wheat, 4,357,761 of corn, 1,818,381 of oats, 8,445 of rye, 8,450 of buckwheat, and 64,478 of barley; also butter and cattle. Cap., Sycamore. Val. of taxable prop. abt. \$23,000,000. Pop. 26,774 (of whom 5,273 for., and 94 colored).

—(p.o. name DE KALB CENTRE) p. v. ♦ and tp. in above co., 58 m. W. of Chicago by the C.&N.W.R.R. It has 2 wkly papers, a bank and various factories. Pop. 1,598; of tp. 2,465.

De Kalb, Ind., a N.E. co., bordering on Ohio, drained by the St. Joseph's and some smaller rivers; area, 346 sq. m. The surface is undulating, and the soil fertile. The co. is traversed by several lines of R.R.s. The chief prod. in 1880 were 644,723 bush. of wheat, 762,918 of corn, 460,632 of oats, 83,726 of potatoes, 568,659 lbs. of butter, and 136,818 of wool. Cap., Auburn. Val. of taxable prop. abt. \$12,000,000. Pop. 20,225 (of whom 1,194 for., and 1 colored).

—p.c., De Kalb co.

De Kalb, Miss., p.v., cap. of Kemper co., 32 m. N. of Meridian. Pop. 300.

De Kalb, Mo., a N.W. co.; area, 440 sq. m. It is drained by several small affluents of the Platte, and by Blue Creek, an affluent of Grand R. The surface is diversified by prairies and forest; the soil is productive. The chief prod. in 1880 were 167,034 bush. of wheat, 3,113,160 of corn, and 257,003 of oats. Butter and pork are also staple products. Cap., Maysville. Val. of taxable prop. abt. \$6,000,000. Pop. 13,343 (of whom 620 for., and 127 colored).

—p.v. in Bloomington tp., Buchanan co., 23 m. E. of Pittsburgh. Pop. 237.

Delaware, a river which rises by 2 branches on the W. side of Catskill Mts., New York. The Mohawk or main branch rises from a small lake near the border of Schoharie co. in 42° 45' N. lat., at an elevation of 1,886 ft. above tide water, and flows S.W. across Delaware co., nearly 50 m. to the E. line of Broome co., within 10 m. Susquehanna R. and turning suddenly it pursues a S.E. course of 5 m. to the Pa. line, in 42° N. lat., 8 m. below which it receives the Popocatehon branch from the S.E. The river then proceeds in a winding course S.E. for 60 m., to the N.W.

corner of N.J. in $41^{\circ} 24'$ N. lat., at Carpenter's point, at the mouth of Neversink R. It then turns to the S. W., along the base of the Kittaning chain of mountains 35 m., when it passes this mountain by what is called the "water gap," which is considered a great curiosity. The distance through the mountains is about 2 m., and the banks rise in a rugged and lofty wall, 1,600 ft. high, precipitously from the water's edge, leaving at the S.E. entrance, scarcely room for a road, overhung with immense masses of rock. The passage, however, widens toward the N.W., and the river contains some beautiful and fertile islands. The view of the "gap" is highly picturesque, and the river here has a great depth. From this it pursues a S.E. and then a S.W. course to Easton, where it receives the Lehigh, a large branch from the W. A little below Easton the river passes through S. Mt. and pursues a S.E. course to Trenton, 60 m. below Easton, having in that distance 25 rapids, with a total fall of 165 ft. These rapids are navigable at high water. At Trenton is a fall which obstructs navigation, and below which it enters tide water. The river below Trenton turns to the S.W., until near the bay, which enters the ocean in a S.E. direction. Five miles below Philadelphia it receives Schuylkill R., a large branch from the N.W. The whole course of the river from its source to its entrance into the bay is about 300 m., and to its entrance into the ocean, 375 m. It is navigable for ships of the line to Philadelphia, by the course of the river and bay, 120 m. from the ocean, and 45 m. from its entrance into the bay; and for sloops 35 m. farther, or 155 from the ocean, to Trenton. Above the falls at Trenton it is navigable for boats of 8 or 9 tons, 100 m. The Delaware is connected with Hudson R. by the Delaware and Hudson Canal, which commences at a dam in the Delaware, near the mouth of the Lackawaxen Creek, and extends to Eddyville on Roundout kill, a few miles from its entrance into Hudson R., and by the Morris Canal, which leaves the Delaware opposite to Easton, Pa., and terminates at Jersey City, opposite to N. York city. A vast amount of coal is transported on these canals. There is also a canal from Delaware city, 42 m. below Philadelphia, to Back Creek, a tributary of Elk Creek, which falls into Chesapeake Bay. This canal is 14 m. long, and admits of the passage of considerable vessels. *Delaware Bay*, at the mouth of Delaware R., is a large arm of the sea, 75 m. long and 20 m. across its mouth, between Cape May on the N., and Cape Henlopen on the S. In the middle it is 30 m. wide. The navigation is difficult and dangerous, having many shoals. Below Port Penn, 70 m. from the ocean, the bay has no safe natural harbor; nor is there one for several hundred miles S. of New York. To remedy this inconvenience, the federal government has erected a magnificent Breakwater, within Cape Henlopen. The anchorage ground or roadstead is in a cove, directly W. of the cape. The E. or seaward end of the Breakwater, rests on the S. end of an extensive shoal called the "shears," abt. 2 m. N. of the shore at the cape. The Breakwater consists of a stone dyke or pier, 3,600 ft. long, lying E. S. E. and W. N. W. At the distance of 1,050 ft. from the W. end is another dyke, 1,500 ft. long, forming with it an angle of $146^{\circ} 15'$, which is designed especially as an ice-breaker. The whole length of the two dykes is 5,100 ft., and 900,000 cubic yards of basalt or granite rocks, weighing from a ton to upward of three tons each, were consumed in its construction. The depth of water is from 4 to 6 fathoms, in a surface of over half a sq. m. The estimated cost of this great work was \$2,216,950.

—an E. State, bounded N. by Pa., on the N. E. and E. by Delaware R. and Bay and the Atlantic Ocean, on the S. and W. by Md. It is situated between lat. $38^{\circ} 28'$ and $39^{\circ} 50'$ N. and lon. $75^{\circ} 5'$ and $75^{\circ} 50'$ W. It is 93 m. long from N. to S. and varies in width from 12 to 38 m.; area, 1,960 sq. m. The boundary line between

Pa. and Del., is the segment of a circle, with a radius of 12 m. the centre of which is at New Castle.—The N. section is of a primary rocky formation. Hills of a beautifully rounded outline rise to a height of several hundred feet above tide water. The creeks run through deeply cleft valleys with rounded or abrupt rocky sides. Below this primary region is a comparatively level country. A table-land not more than 75 feet high extends through the peninsula and slopes gently toward the E. and W. In the swamps and morasses several small streams have their rise, which empty into the Delaware and the Chesapeake. Along the Md. line is a cypress swamp containing 50,000 acres and furnishing valuable timber; it is infested with poisonous reptiles.—The Delaware R., navigable for the largest vessels, washes the E. shore. Brandywine Creek rises in Chester co., Pa., and unites with Christiana Creek near Wilmington. It is 40 m. long and navigable 13 m. for vessels drawing six feet of water. Duck Creek forms the boundary between Kent and New Castle cos., and the Mispillion R., the boundary between Kent and Sussex. The Murderkill, Indian and Broadkill Rs., flow into Delaware Bay; the Rocomoke, Nanticoke and Choptank Rs., flow into Chesapeake.—Along the Delaware Rs., are rich clay lands. Newcastle co. contains almost every variety of soil to be found E. of the Alleghany Mts.—jagged hills, broad plains, extensive meadows, swamps and marshes. A green sand stratum, averaging 21 feet in thickness, furnishes an abundance of marl for fertilization. In the N. part is a clayey soil, and a vegetable mould in the marsh-lands. Sandy soils prevail extensively in Kent and Sussex. Hundreds of acres of the swamp and submerged lands along the Delaware R., have been reclaimed by drainage. The climate is mild, being tempered by the sea breezes which sweep across the whole peninsula. Observations at Newark show a mean annual temperature of 53° . Delaware scenery is lovely and varied. The banks of the Brandywine near Wilmington are romantic and wild. The chalybeate springs are much visited by northern invalids. Lewes is a celebrated bathing resort. Of public improvements the great breakwater built by the U. States at a cost of \$2,000,000 and the Delaware and Chesapeake Canal are the most notable, the cutting for the canal, 90 feet perpendicular in some places, being the deepest in the world for such a purpose.—The principal agricultural products for the year 1880 were 3,894,264 lbs. of corn, 378,508 of oats, and 1,175,272 of wheat. Delaware produces besides hay, sorghum molasses and honey, and large quantities of fine fruit and vegetables. A large income is derived from the wonderful peach orchards, growers being specially favored by soil, climate and railroad facilities, which are constantly being extended. The peach crop in 1880 amounted to 4,109,000 baskets. Canning and drying fruits exceed all other industries. The entire fruit district in 1880 was 29,500 acres. In that year the live stock on farms comprised 21,933 horses; 3,931 mules; 5,818 working oxen; 27,284 milch cows; 20,450 other cattle; 21,967 sheep; and 48,186 swine. The manufacturing industry of Delaware is of great importance and mostly carried on in the northern part of the State and the city of Wilmington. According to the census of 1880 there were in the State 746 manuf. establishments; capital invested \$15,655,822, hands employed, 12,638, wages paid during the year \$1,267,349, value of materials \$12,828,461, value of products \$20,514,438. The State had 8 cotton factories with 46,188 spindles and 822 looms, employing 695 hands, and using 7,512 bales of cotton. Wilmington is largely interested in making steam engines, railroad cars, machinery and gunpowder, and enjoys peculiar advantages for building iron ships. The foreign commerce at Delaware is important. In 1882 the State had 165 vessels of 16,668 tons in aggregate; 29 vessels of 10,558 tons were built; and there were 278 m. of

railroad in operation.—The State is divided into school districts, and the voters of each district decide all questions relating to the schools. In 1880 the number of schools was 393; pupils, 26,672; school population, 35,649. Delaware college, at Newark, has classical, scientific and agricultural departments. The Wesleyan female college, at Wilmington, is a flourishing institution.—The State is divided into 3 cos., viz.: New Castle in the N., Kent in the middle and Sussex in the S.; and these are subdivided into hundreds. Wilmington is the principal city, and Dover is the cap.—The legislative authority is vested in a general assembly, which consists of a senate, having 9 members and a house of representatives, having 21 members. The legislature holds biennial sessions. The governor serves for 4 years. The judicial power is vested in a court of errors and appeals, superior court, court of chancery, orphans' court, court of o. er and terminer, court of general sessions of the peace and jail delivery, registrar's court, and justice of the peace. The State sends 1 representative to the Federal Congress and has 3 electoral votes. There is no State prison; criminals are confined in the county jails. The whipping-post and the pillory are still in vogue. The State debt in 1880 was \$869,000; the val. of taxable prop. was \$62,419,119.—Delaware was one of the original 13 States, and the first to ratify the Federal Constitution, which it did by a unanimous vote, December 7, 1787. On the 28th of August, 1609, Henry Hudson discovered the Delaware R., which, however, afterward took its name from Lord Delaware, who entered it in 1610. In 1682 William Penn obtained a grant of the territory, and governed it as a part of Pennsylvania. It was allowed a separate general assembly in 1703. The amended Constitution of 1831 is still the fundamental law of the State.—Pop. in 1790, 59,094 (of which 8,887 slaves); in 1840, 76,748; in 1850, 90,542; in 1860, 112,215 (of which 1,798 slaves); in 1870, 125,015; in 1880, 146,620 (of whom 74,108 males and 72,500 females, 137,140 natives and 9,468 of foreign birth, 120,160 whites, 26,443 colored, and 5 Indians).

Delaware, Ark., tp., Logan co. Pop. 606.

—p.tp., Yell co. Pop. 309.

Delaware, Ind., an E. co.; area, 400 sq. m. It is intersected by the White and Mississinewa Rs. The surface is nearly level; the soil is mostly fertile. The chief prod. in 1880 were 639,900 bush. of wheat, 1,680,883 of corn, 85,353 of oats, 58,916 of potatoes, 517,944 lbs. of butter, and 83,726 of wool. Flour is the chief manuf. Cap., Muncie. Val. of taxable prop. abt. \$16,000,000. Pop. 22,928 (of whom 467 for., and 215 colored).

Delaware Bend., O. v. in Delaware tp., Defiance co., 176 m. S.E. Chicago by B. & O.R.R. P. 175.

Delaware City., Del., p.town & New Castle co., on the Delaware R., abt. 40 m. below Philadelphia. It is the E. terminus of the Chesapeake and Delaware Canal. It has an academy, a wkly paper, and a nat. bank. Pop. 1,111.

Delaware Grove., Pa., p.v. in Delaware tp., Mercer co., 2½ m. S.W. Fredonia Station. Pop. 65.

Delaware Mine., Mich., p.v. in Grant tp., Keweenaw co. It has mines of copper. Pop. 100.

Delawares, a tribe of Indians belonging to the Algonquin family, called in their own language *Leau-Loaup*, lived originally on the banks of the Delaware and Schuylkill, but are now mostly found in the Indian Territory, in the valley of the Verdigris. They were, according to tradition, a bold, powerful race, but were overcome by the Iroquois, who compelled them in 1744 to leave their original settlement.

Some of them removed to Ohio about 1780. They were friendly toward the U. S., and formed several treaties with them. They next crossed the Mississippi and settled in Kansas. They are now for the most part removed to their new lands in the Indian Territory, and in part incorporated with the Cherokees. Their number is abt. 1,000. They have a few schools, and carry on farming and cattle raising to some extent, but their chief occupation is hunting and fishing. They are generally good trappers, brave, and comparatively intelligent.

Denver, Col., a city, cap. of the State and of Arapahoe co., on the right bank of the South Platte, at the junction of Cherry Creek, 15 m. from the E. base of the Rocky Mts., 5,267 ft. above sea level, 106 m. S. of Cheyenne and 639 m. W. of Kansas City by the Kansas div. of the U.P. R.R., and 278 m. E. of Leadville by the D. & R. G. R.R.; lat. 39° 45' N., lon. 104° 50' W. This fine city occupies a series of plateaus rising by gentle ascents from the river, and faces the mountains, commanding a grand and beautiful view. It is built principally of brick, manufactured in the vicinity. Denver is the great commercial center of Colorado and the adjacent country, and is situated favorably to become a great distributing point; 6 lines of R.R.s. are already diverging from it. Its trade and manuf. interests are developing with a wonderful rapidity. It has 5 nat. and 3 other banks, a branch of the U. States mint, abt. 25 churches, a good system of public schools, a public library, an

opera-house, 6 daily, 13 wkly, and 2 monthly papers, gas-works, &c., and is supplied with water through 8 m. of pipe. It is divided into 6 wards. Manuf., smelting and refining works, breweries, woolen, flour, and planing mills, iron and terra cotta foundries, carriage factories, &c. The first cabin was erected on the site of Denver in 1858. Pop. in 1870, 4,759; in 1880, 35,629.

Denver, Ill., p.v. in Harmony tp., Hancock co., 12 m. S. of Carthage. Pop. 125.

—tp., Richland co. Pop. 956. See WAKEFIELD.

Denver, Ind., p.v. in Jefferson tp., Miami co., on the Eel R., 19 m. N.E. Logansport by the W., St. L. & P. R.R. It has a graded school, a college, and a normal school. Pop. 273.

Denver, Iowa, p.v. in Jefferson tp., Bremer co., 10 m. S.E. Waverly. Pop. 100.

Denver, Mich., p.v. and tp., Newaygo co., on the White R., 27 m. N.E. Muskegon. Manuf., flour, lumber, and woolen mills. Pop. 100; of tp. 1,112.

Denver, Minn., tp., Reck co. Pop. 104.

Denver, Mo., p.v. in Allen tp., Worth co., on the Grand R., 15 m. N. of Albany. Pop. 281.

Denver, N. C., p.v. in Catawba Springs tp., Lincoln co., 16 m. E. of Lincolnton. Pop. 148.

Denver, Pa., p. o., Lancaster co.

Denver, Tex., p. o., Montague co.

Denverton, Cal., p.v. and tp., Solano co., 37 m. S.W. Sacramento. Pop. 31; of tp. 369.

Den'ville, N. J., p.v. in Rockaway tp., Morris co., on the Rockaway R., 29 m. N.W. Newark by the Morris and Essex div. of the D., L. & W. R.R. P. 384.

De'volante, or DEO VOLENTE, Miss., p. o., Le Flore co.

Depauville, N. Y., p.v. in Clayton tp., Jefferson co., on Chaumont R., 12 m. N.W. Watertown. It has a graded school. Pop. 216.

Deperre, or DE PERE, Wis., p.v. ♠ and tp., Brown co., on the Fox R., here crossed by a bridge 1,500 ft. in length, which connects it with West Deperre, a v. of the same tp., 124 m. N.W. Milwaukee by the Milwaukee, Green Bay and Marquette div. of the C. & N. W. R.R. It has a wkly paper, a nat. bank and a savings bank, several flour and saw mills and iron furnaces, and various other factories. The Goodrich line of steamers make regular trips to Chicago, and the Buffalo line takes freight from the wharves to Buffalo and intermediate ports. Pop. 1,954; of tp. 2,771.

De Peyster, N. Y., p.v. and tp., St. Lawrence co., on Black Lake, 7 m. S.W. Rensselaer Falls Station. Pop. 325; of tp. 1,194.

Deposit, Ky., p. o., Jefferson co.

Deposit, N. Y., p.v. ♠ and tp., on the Delaware R., 99 m. S.E. Elmira by the N. Y., L. E. & W. R.R. It has a wkly paper, an academy, a nat. bank, a large lumber trade, and several factories. The tp. in Delaware co. Pop. 1,714. The v. is partly in that tp. (pop. 544) and partly in Sanford tp., Broome co. (pop. 875). Total pop. of v. 1,419. The p. o. is in Broome co.

Deptford, N. J., tp., Gloucester co., on the Delaware R. Pop. 3,818. See WOODBURY.

De Pue, Ill., p.v. in Selby tp., Bureau co., on Lake De Pue, 24 m. W. of Ottawa. It has a large ice trade. Pop. 323.

Deputy, Ind., p.v., Jefferson co., 87 m. W. of Cincinnati by the Cincinnati div. of the O. & M. R.R. Pop. 168.

Derby, Conn., p.v. ♠ and tp., New Haven co., at the confluence of the Naugatuck R. with the Housatonic R., 19 m. S. of Waterbury by the N. R.R. It has 2 nat. and 2 savings banks, 3 graded schools, and a number of important and various factories. A bridge across the Naugatuck R. connects it with Birmingham. Pop. 3,226; of tp. 9,000. See ANSONIA and BIRMINGHAM.

Derby, Ind., p.v. in Union tp., Perry co., on the Ohio R., 18 m. N.E. Tell City. Pop. 150.

Derby, Iowa, p.v. in Union tp., Lucas co. 11 m. S.W. Chariton by the Mount Ayr branch of the C., B. & Q. RR. Pop. 174.

Derby, Kan., p.o., Sedgwick co.

Derby, N. Y., p.o., Erie co.

Derby, O., p.o., Pickaway co.

Derby, Ill., p.v. & tp., Orleans co.

—p.v. in above tp., on the Clyde R., 58 m. N.E. Montpelier. It has an academy. Manuf., flour and lumber mills. Pop. of tp. 1,967.

Derby Line, Ill., p.v. & in Derby tp., Orleans co., on the frontier of Canada, 5 m. N.E. Newport by the C.R. RR. It has a nat. bank with a capital of \$150,000, and is chiefly engaged in the manuf. of boots and shoes. Pop. 400.

Derden, Tex., p.o., Hill co.

De Red wood, Cal., p.o., Santa Cruz co.

Derinda, Ill., p.tp., Jo Davis co. Pop. 944.

Desert, Ariz., p.o., Pima co.

Desert, Cal., p.o., San Bernardino co.

Desha, Ark., a S.E. co., separated from Mississippi by the Mississippi R., and intersected by Arkansas and White Rs.; area, abt. 525 sq. m. The surface is low, level, and subject to inundation. The chief prod. in 1880 were 180,177 bush. of Indian corn, and 18,103 bales of cotton. Cap., Watson. Val. of taxable prop. abt. \$2,000,000. Pop. 8,973 (of whom 188 for., and 6,523 colored).

Deshler, O., p.v. & in Bartlow tp. Henry co., 38 m. W. of Tiffin by the Chicago div. of the B. & O. RR. It has a wkly paper and several factories. Pop. 752.

Design, Pa., p.o., Pittsylvania co.

Desloge Lead Mines, Mo., v. in Perry tp., St. Francois co. Pop. 440.

De Smet, Dak., a N. co.; area, 1,500 sq. m. It has no population.

De Smet, Dak., p.v., cap. of Kingsbury co. P. 140.

Des Moines, Iowa, the largest river in the State formed by the junction of two branches, known as the E. and W. forks, which rise in a chain of small lakes in S.W. Minn. and flowing S.E. unites in Humboldt co., Iowa. From the junction it flows S.E. through the middle of the State, and joins the Mississippi at the N.E. corner, about 4 m. below Keokuk. In its course of 300 m. the Des Moines drains 10,000 sq. m. in Iowa, passing through an undulating, fertile region, interspersed with tracts of prairie, rich in coal, and abounding in timber. There are many excellent mill sites along its banks. The fall from Fort Dodge, Webster co., to Ottumwa, Wapello co., is 2 ft. 4 in. per mile, and from Ottumwa to its mouth, 1 ft. 11 in. per mile. Many towns have sprung up along its banks, among which is Des Moines, the State cap. The principal tributaries from the West are the Raccoon, or Coon R. and North, Middle, and South rivers; the largest E. branch is the Boone, which rises in Kossuth and Hancock co.

—a S.W. co., bordering on Illinois, washed by the Mississippi on the E., bounded S. by Skunk R., and drained by Flint Creek; area, 408 sq. m. Limestone and Anthracite are the principal mineral productions. The surface is occupied by prairies and tracts of timber. The soil is fertile and well cultivated. Three lines of RRs. traverse the co. The chief prod. in 1880 were 263,697 bush. of wheat, 2,812,975 of corn, 431,874 of oats, 13,429 of rye, 147,822 of potatoes, 611,737 lbs. of butter, and 93,645 of wool. Cap., Burlington. Val. of taxable prop. abt. \$18,000,000. Pop. 33,099 (of whom 7,166 for., and 450 colored).

—a city, the cap. of the State and of Polk co., situated on the Des Moines R. at the mouth of the Raccoon, 358 m. W. of Chicago and 142 m. E. of Omaha by the C., R. I. & P. RR. The city is laid out in quadrilateral form, extending 4 m. E. and W. and 2 m. N. and S. The Des Moines, flowing from the north, divides it a little E. of the centre, and the portion W. of this river, commonly called the "West Side," is again divided S. of its centre by the Raccoon. From the confluence of the rivers, on either side, the ground rises gradually toward the city limits to a height of about 160 ft. Enclosed by the rivers on the S. and E. is a plateau about 1 m. long and $\frac{1}{2}$ m. wide, with an average elevation of 15 ft. above high water, where are situated the post office, court-house, and city offices, the principal depots and hotels, and the greater portion of the business houses. On the higher ground beyond are some of the finest private residences. E. of Des Moines R. is another business locality. The portion of the West Side S. of Raccoon R. is known as "South Park." Capital square, E. of

the river, contains 10 acres, on an elevated site commanding a fine view. The new State-house, a very fine building, was erected at a cost of nearly \$3,000,000. The State library contains some 20,000 volumes. The city has 20 or more churches; 2 nat. and 4 other banks; U.S. court-house and post-office, built of marble and costing \$250,000; a State arsenal; a large county court-house; and it has complete gasworks, the Holly system of water-works, numerous handsome residences, and other public improvements to be found in first-class modern cities. Two daily, 12 wkly, and 2 monthly papers are published here. Mines of excellent coal are extensively worked in the vicinity. Numbers of manufactories of various kinds are in operation. Des Moines was laid out in 1846, and incorporated as the town of Fort Des Moines in 1851. A city charter, giving it its present name, was granted in 1857, and the same year it became the cap. of the State. Pop. in 1860, 3,963; in 1870, 12,035; in 1880, 22,408.

De Soto, La., a N.W. parish, bordering on Texas, drained by Red and Sabine Rs.; area, 910 sq. m. The largest part of the co. is heavily wooded; the soil is generally good. By means of the Red R. it has steamboat communication with New Orleans. The chief prod. in 1880 were 158,665 bush. of corn, and 11,298 bales of cotton. Pork is also a staple product. Cap., Mansfield. Val. of taxable prop. abt. \$2,000,000. Pop. 15,605 (of whom 70 for., and 10,490 colored).

De Soto, Miss., a N.W. co., bordering on Tennessee, and bounded N.W. by the Mississippi R. The surface is generally level, and occupied chiefly by cotton plantations. There are extensive swamps in the W. part. The M. & T.R.R. crosses it. The chief prod. in 1880 were 581,272 bush. of corn, 81,776 of sweet potatoes, 276,783 lbs. of butter and 28,469 bales of cotton. Cap., Hernando. Val. of taxable prop. abt. \$5,000,000. Pop. in 1870, 32,021; in 1880, 22,924 (of whom 137 for., and 15,344 colored).

Detroit, Kan., p.v. in Centre tp., Dickinson co., on the Kansas R., 90 m. S.W. Topeka by the Kansas div. of the U.P.R.R. Pop. 350.

Detroit, Me., p.v. and tp., Somerset co., on the Sebasticook R., 104 m. N.E. Portland by the M.C.R.R. Pop. 250; of tp. 661.

Detroit, Mich., a river or strait through which the waters of the upper lakes, Superior, Huron, Michigan, and St. Clair, are discharged into Lake Erie. Its length from Lake St. Clair to Lake Erie, is abt. 28 m. At its outlet from Lake St. Clair, it is over 1 m. wide. Opposite to Detroit, abt. 8 m. below, it is $\frac{3}{4}$ m. wide. Its course to Detroit is a little S. of W.; but here it makes a curve, and pursues a more S. direction. Abt. 5 m. below Detroit, the river is divided into two channels, by Grand Turkey Island, and soon widens to 3 or 4 m., and continues of this width for 16 or 17 m., until it opens into the N.W. angle of Lake Erie. There are many islands in the river, rendering the navigation somewhat intricate; nevertheless, vessels of considerable burden can be carried through into Lake St. Clair. The principal channel is on the E. side, between Boisblanc Island and the Canada shore. The principal towns on its banks are Detroit and Brownstown on the American shore, and on the Canada shore Sandwich and Amherstburg. It receives from Michigan the River Rouge, abt. 1 m. above Grand Turkey Island, and the Huron, at the point of connection with Lake Erie. From Canada, the only stream worthy of notice is the Canard, which enters the Detroit abt. $\frac{3}{2}$ m. above Amherstburg.

Detroit, (from the French for *Strait*), *Mich.*, the chief city of the State, a port of entry, and the cap. of Wayne co., on the W. bank of Detroit R., opposite the Canadian town of Windsor, abt. 7 m. S.W. Lake St. Clair, 256 m. W. of Buffalo and 60 m. N. by E. from Toledo by C.S.R.R., 274 m. E. by S. from Milwaukee by D., G. H. & M.R.R., 85 m. S.E. Lansing by D., L. & N.R.R., 178 m. N.W. Cleveland O., by L.S. & M.S.R.R., 76 m. E. of Jackson by M.C.R.R., 65 m. N.E. Adrian by W., St. L. & P.R.R.; and 231 m. S.W. Toronto, Canada, by G.T. of C.R.R. Detroit with its suburbs stretches abt. 5 m. along the river and the central part extends for abt. 2 m. back from the shore. The streets generally cross each other at right angles, and are from 50 to 100 ft. wide. They are for the most part ornamented with rows of trees. A number of avenues, from 100 to 200 ft. wide, diverge from the Grand Circus, a spacious park, semi-circular in form, which is divided into two quadrants by Woodward avenue. The chief building is the city hall, one of the finest structures of the kind in the West. Built of sandstone, and designed after the Italian style of architecture, it measures 200 ft. long and 90 ft. wide, and is surmounted by a tower 180 ft. high. Other noteworthy structures are the opera house, the office of the board of trade, the Roman Catholic cathedral,

and the custom-house, containing also the post-office. On the Campus Martius stands the Michigan soldiers' and sailors' monument. It is of bronze and granite, 55 ft. high and abt. 30 ft. in diameter at the base. It is surrounded by a colossal bronze statue of an Indian girl representing Michigan in defense of the Union. The commercial facilities of Detroit are very extensive. The Detroit R. is a connecting link in the great chain of lake navigation, and affords the best harbor on the lakes. The city is the centre of an extensive railroad system, and from 10 to 13 daily lines of steamers run to various points on the lakes. There is a considerable foreign commerce with Canada, the imports in 1882 amounting to \$3,232,230 and the exports to \$1,854,314; 3,227 vessels of 27,735 tons entered and 3,250 of 232,230 cleared in the foreign trade; 2,592 of 1,010,020 entered and 2,744 of 1,043,848 tons cleared in the coast-wise trade. At beginning of 1883 the port of Detroit possessed 155 sailing vessels of 34,945 tons, 136 steamers of 43,600 tons and 21 barges of 4,383 tons. The large quantities of produce, chiefly from Michigan, passing eastward through the city by rail and water, give to Detroit an extensive domestic commerce. The manuf. industries of the city are extensive and important. The working of iron is carried on in numerous blast furnaces, foundries, and other establishments. Twelve saw-mills annually cut from 45,000,000 to 50,000,000 ft. of lumber; and 26 brick-yards make from 55,000,000 to 60,000,000 bricks a year. The extensive Pullman car works are situated here; also one of the seven pin factories in the U. States. The Detroit copper-smelting works annually produce over \$2,000,000 worth of ingot copper from Lake Superior ore. There are also 9 large flour-mills, abt. 60 breweries, malt houses and distilleries, 20 tanneries, a large number of tobacco and cigar factories, several of boots and shoes, 1 of organs, 1 of white lead, 2 of chemicals, 4 ship-yards, 3 large dry-docks, &c. Detroit has 10 lines of street railway with more than 45 m. of track intersecting the city in every direction. It is divided into 11 wards, and has a metropolitan police of 100 members, a fire department with 7 steam fire-engines, and ample supplies of water from the river. There are abt. 65 churches, 14 asylums and hospitals, 22 public schools, 4 public libraries, the largest containing about 25,000 volumes, 2 medical colleges and 3 medical societies; 5 nat. banks, 8 State and savings banks, and 8 private bankers, 6 daily, 24 wkly, 11 monthly and 1 quarterly papers.—Detroit was settled by the French early in the eighteenth century, and passed into the hands of the English in 1763, who ceded it to the U. States in 1783, and was the cap. of the State from 1837 till 1847. Pop. in 1810, 770; in 1840, 9,102; in 1860, 45,619; in 1870, 79,577; in 1880, 116,342.—v. in Springwells tp., Wayne co., Pop. 50.

Detroit City, *Mich.*, p. v. in Detroit tp., cap. of Beeker co., on a lake of the same name, 228 m. N. W. St. Paul by the N.P.R.R. It has a wkly paper and a bank. Pop. 554; of tp. 994.

Detroit Junction, *Mich.*, p. v. in Springwells tp., Wayne co., at the junction of several lines of R.Rs. It is a W. suburb of the city of Detroit, and contains several important manuf. Pop. 600.

De Turksville, *Pu.*, p. v. in Washington tp., Schuylkill co., 12 m. S.W. Pottsville. Pop. 56.

Denel, *Dak.*, an E. co., bordering on Minnesota, area, abt. 650 sq. m. Its surface is broken by the Coteau des Prairies, and it is watered by several lakes and by affluents of the Big Sioux and Minnesota Rs. The chief prod. in 1880 were 38,785 bush. of wheat, and 29,294 of corn. Pop. 2,302 (of whom 756 for.)

Dismal, N. C., p.tp., Sampson co., 49 m. E. of Fayetteville. Pop. 1,272.

Dismal Swamp, a great morass in the cos. of Nansemond and Norfolk in Va., and in Gates, Camden, and Pasquotank cos. in N.C., is abt. 30 m. long and 10 m. wide. A large portion of it is covered with dense forests of juniper, cypress, white cedar, and gum trees, from which lumber is exported. Near the middle of the swamp is Lake Drummond, which has an area of abt. 6 sq. m. and abounds in fish. A canal through the Dismal Swamp opens steam communication between Chesapeake Bay and Albemarle Sound. The Dismal Swamp is remarkable for its considerable elevation above the surrounding country. The water of this swamp, known as "juniper water," is of a dark reddish color, and is carried in large quantities to Norfolk and Hampton Roads for shipping purposes. It is highly prized for its excellent quality, and is not liable to become corrupt by keeping.

District, Pa., tp., Berks co. Pop. 798.

District of Columbia.

District of Columbia, a territory, containing the cap. of the U. States. It is situated upon the N. bank of the Potomac R., 295 m. from the Atlantic Ocean, lat. 38° 53' 38" N., lon. 77° 3' 6" W. It is separated from Va. by the river, and is bounded upon three sides by Md. It was originally erected under a law of congress of July, 1790, for the establishment of a permanent seat of government. This law authorized the acquisition by the U. States of a territory not exceeding ten miles square, at the confluence of the Potomac and its eastern branch. A part of the territory thus designated was ceded to the U. States by Va., and included the city of Alexandria, and a part by Md., including the city of Georgetown. By a law of congress of July, 1846, that portion of the district which had been ceded to the U. States by Va., was ceded back to that State. The present area of the district is 64 sq. m. Under the law of 1790, three commissioners were appointed to receive the cession of the district, and to lay out the city of Washington, and erect the public buildings for the reception of the Federal Government. The corner-stone of the Capitol was laid by Washington, September 18, 1793. On the first Monday of December, 1800, the removal of the Government from Philadelphia was effected. The district is under the control of congress, and its municipal affairs are regulated by three commissioners appointed by the president and senate, by virtue of a law of 1874. The courts are constituted by act of congress, and the judges appointed by the president and senate. By the law of 1874, the municipalities of Georgetown and Washington were abolished, and the elective franchise throughout the district suppressed. It has no representative in congress.—The surface of the district is diversified by hill and dale, is well wooded with oak, maple, chestnut, hickory, and other trees, is productive when well cultivated, and affords at several points, extended and beautiful views of the valley of the Potomac. The climate is moist and warm, and there is much local miasma. In the summer and autumn fevers prevail in some parts, especially in the low grounds near the Potomac. The staple prod. before 1800 was tobacco, the culture of which has of late years been abandoned for grain, Indian corn, hay, fruit, and vegetables, all of which are produced in great abundance, and sold at remunerative prices in the markets of Washington and Georgetown. The shad and herring fisheries of the Potomac yield a large revenue. The Chesapeake and Ohio Canal connects Georgetown, the head of tide water on the Potomac, with Cumberland, the centre of the bituminous coal region of the State of Md. It is 180 m. in length, and transports 1,000,000 tons of coal per annum. The district is intersected by the Washington and Metropolitan branches of the B.&O.R.R., and by the B.&P.R.R., and is connected with the S. by rail to Alexandria, the N. terminus of the Virginia railway system. There are well-managed lines of steamboats running to Norfolk, Baltimore, and New York, the last freighted mainly with flour from the district mills. The coal tonnage of the Potomac exceeds 600,000 tons annually from the port of Georgetown, which is the port of entry for the District of Columbia. The commerce is almost entirely domestic. In 1880, according to census returns, there were in the district 971 manuf. establishments, employing 7,146 hands, of whom 5,496 were males above 16, 1,389 females above 16, and 261 youth; capital invested \$5,552,526; wages paid during the year \$3,924,612; value of materials \$5,365,400; of products \$11,882,316—consisting mainly of flour, building materials, furniture, clothing, and iron. Since 1793 the U. States Government has expended \$60,000,000 in the erection of public buildings

and improvement of public grounds in the district.—In the extent and excellence of arrangements for both public and private education few places excel this. There are 125 select schools. The public schools number 390, enrolling 25,000 pupils and employing 400 teachers, with an average salary of \$650. Those designed for the colored population are reported as remarkably well conducted and successful. Many of their buildings are large and handsome. There are 100 schools for this class, enrolling 7,000 pupils, and employing 120 teachers. The total expenditure for public schools is abt. \$370,000 a year, and the value of school property \$1,000,000. There are also several higher institutions of learning, among which may be mentioned: the Georgetown university, the oldest Roman Catholic college in America, which has 35 professors and a library of rare books and manuscripts; the Columbian university, established by Baptists in 1814; and the Howard university. The National deaf-mute college, the only collegiate institution for the deaf mutes in the world, has 8 professors, and gives a regular collegiate course of instruction. There are in the district 130 public libraries, with an aggregate of 500,000 volumes. The congressional library contains 320,000 volumes, with an immense collection of pamphlets. Copies of every work secured by copyright are required to be deposited in it.—There are 120 church edifices in the district, of which the Baptists have 25, the Methodists 42, the Roman Catholics 14, the Episcopalians 20, the Presbyterians 14, and the Lutherans 8. The U. States navy yard in Washington is one of the most complete in its appointments of all the dock yards in the country. In 1882 the total funded debt of the district was \$21,892,750. Pop. in 1800, 8,144; in 1820, 23,336; in 1840, 33,745; in 1860, 75,080 (of whom 11,131 free colored and 3,185 slaves); in 1870, 131,700; in 1880, 177,624 (of whom 83,578 males and 94,046 females, 160,502 natives and 17,122 of foreign birth, 118,006 whites, 59,596 colored, 13 Chinese, 4 Japanese, and 5 Indians).

Dry Sawmill, Ia., p.o., Elk co.

Dry's Mill, N.C., p.o., Cabarrus co.

Dry Springs, Mo., p.o., Ripley co.

Dry Tortugas. [Sp. *tortuga*, a "tortoise"], Fla., a group of ten small, low, barren islands belonging to Monroe co., situated over 40 m. W. of the most western of the Florida Keys proper. On the most S.W. island, called Loggerhead Key, stands a brick lighthouse 150 ft. high, with a fixed white dioptric light of the first order; lat. 24° 38' 5" N., lon. 82° 52' 53" W. There is also a smaller light for Dry Tortugas Harbor (lat. 24° 37' 47" N. lon. 82° 52' 53" W.). This lighthouse stands inside Fort Jefferson, an important fortification on Garden Key. The Dry Tortugas served as a place of imprisonment for persons under sentence by courts-martial during the late civil war.
